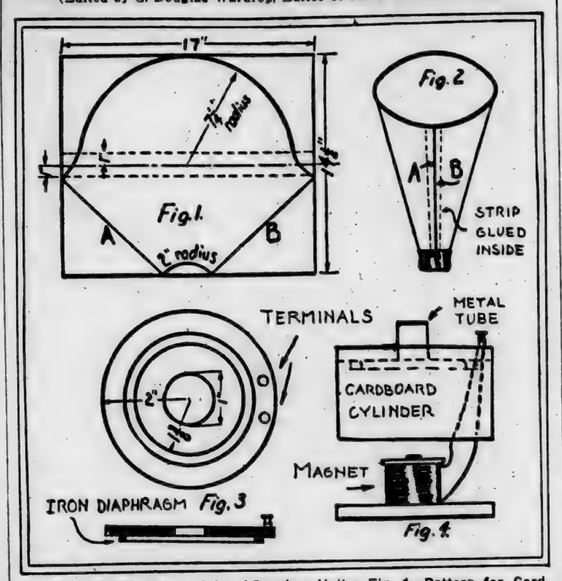
When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)



Diagrammatic Sketches of Loud-Speaker Units: Fig. 1—Pattern for Cardboard Horn. Fig. 2—Horn Assembled. Fig. 3—Diaphragm and Its Mounting. Fig. 4—Details of Magnet and Its Casing.

Construction of a loud-speaker is held by many amateurs to be beyond their ability. And for many types of speaker this is true.

The making of the type shown and described in this article, however, will not present any difficulty, and only the simplest of tools and materials will be found necessary.

A rectangular piece of cardboard 17 inches by 14½ inches and about 1-24 inch thick is obtained, and marked out as shown in Fig. 1. The cardboard is then cut along the thick lines, and the lines A and B folded together as shown in Fig. 2. A 1-inch strip of cardboard is glued over the joint, care being taken to bring the two edges close together, until the glue is dry. The horn should be bound together with string to hold it in shape. Finally it should be given at least one coat of black enamel, inside and out. A turned metal fitting of suitable shape, and procurable at any hardware or phonograph shop, can be slipped in position over the lower end of the horn and glued as shown.

Building the Base.

For the base a circular box, about 4 inches in diameter by 2¾ inches high, is necessary, but failing this, two wooden disks about 4 inches in diameter and ½ inch thick will do, when joined by a piece of cardboard 13½ inches by 2¾ inches and made into a cylinder with an inside diameter equal to that of the disks. The overlapping edges should be glued. This is also given a coat of enamel.

In the center of one of the wooden disks bore a hole of a diameter very slightly less than the inside diameter of the metal fitting attached to the horn. Both disks are then to be given two coats of shellac varnish. When this has dried place a short piece of tightly-fitting metal tubing in the hole in the disk, so as to protrude about ¾ inch on one side. A wooden ring, such as the rim of a circular box lid, or even a wooden curtain-pole ring filed down to about ⅛ inch in depth, is glued to the other side of the disk. To this is affixed a thin iron diaphragm, which must be perfectly flat. Two brass terminals are then screwed through near to the edge of the disk. All these details are shown in Fig. 3.

Obtain a circular piece of magnetized steel ¼ inch in diameter by about 1 inch long, and slip two fiber spool ends over its extremities to form a spool. If this is unobtainable, a piece of steel of the given dimensions can be magnetized by winding round it a single layer of wire and passing a current through the winding. In winding this coil, care should be taken to notice which is to be the N pole of the magnet. This can be ascertained by looking along the axis of the steel bar and noting whether the winding is in a clock-wise or anti-clock-wise direction; if the latter is the case, the pole nearest the observer will be the south pole. This pole should be marked.

The Magnet.

Next wind a layer or two of insulating tape round the magnet. The spool thus formed, if the instrument is to be used with a telephone transformer, should be wound with 1 lb. of No. 30 S.W.G. d.c.c. copper wire, having a resistance of about 140 ohms. In winding this coil the N pole of the magnet should be held towards the winder and the wire wound in an anti-clock-wise direction. A resistance of 1,000 ohms can be obtained by using about 1 lb. of No. 36 S.W.G., 2,000 ohms by using 2 lb. of the same wire, and so on.

The first disk (the one to which the diaphragm has been affixed) is now smeared with glue round its circumference, and slipped into one end of the cardboard cylinder. The ends of the coil are next connected to the under side of the terminals on the disk. The spool itself should then be glued to the second disk. This is shown in Fig. 4.

This second disk is now smeared with glue in the same manner and slipped into the lower end of the cylinder; but before this glue has dried the horn must be dropped over the metal tube provided and the instrument placed in circuit with a weak battery. The position of the lower disk is now adjusted by pressing upward until the magnification of the sound produced by making and breaking the circuit is at its best. Care must be taken not to press the disk too far, as the core may then come into contact with the diaphragm.

Get Sharp Tuning With Wax Records

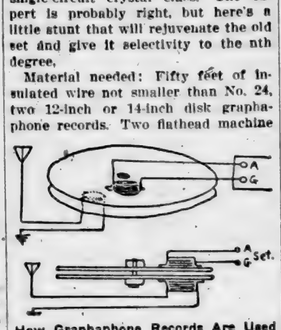
Phonograph Accessory Will Rejuvenate Set and Add Selectivity.

By LESTER B. McNELLY

We read a lot these days about "sharp tuning" and "selectivity," of the newer sets. We hear the "DX" hounds talking casually about getting stations that seem impossible. Sometimes those "DX" hounds get over enthusiastic, but many times they are talking facts. The reason that we doubt many of their stories is because we cannot duplicate their feats, and the reason that many of us cannot duplicate their feats is because our sets tune too broadly.

If an expert diagnosed our troubles he would probably tell us that our aerial was too long or that our inductances were too close, and by the time he got through we would feel that our faithful old box of junk was in the single-circuit crystal class. The expert is probably right, but here's a little stunt that will rejuvenate the old set and give it selectivity to the nth degree.

Material needed: Fifty feet of insulated wire not smaller than No. 24, two 12-inch or 14-inch disk graphaphone records. Two flathead machine



How Graphaphone Records Are Used to Obtain Sharp Tuning.

screws with nuts. One stove bolt ¼ inch by 2 inches with two washers and two nuts.

Winding the Coils.—Take a round bottle about 2 inches in diameter and near the base at equal distances apart place three pieces of adhesive tape each 1½ inches long. Spare 3 feet for a lead wire and then make 35 wraps around the bottle in a clock-wise direction, keeping the successive turns to pile on each other in order to make the coil as compact as possible. Bring the ends of the tape up over the coil and use each tape to jiggle the coil loose from the bottle. Slide the coil off the bottle and use the tapes to bind the coil as tightly as possible. Clip the coil from the original bulk of wire leaving a 3-foot lead. The next coil is a duplicate of the first.

Drilling the Records.—Three inches from the center of the graphaphone records drill a hole to accomodate the flathead machine screws and countersink the holes deeply enough to avoid any possible projection of the heads of the screws above the surface.

Mounting the Coils.—Take two pieces of very stiff cardboard, or preferably fiber 1 inch wide and 2½ inches long. Drill a hole in the center of each of the same size that was used on the records. Insert the screws in the records and mount the coils rigidly by means of the cardboards as "bridges." Bind tightly on the nuts. the leads of both coils should point toward the circumference of the records.

Final Assembly.—Drill a ¼-inch hole in a block of wood 1 inch thick, and 4 inches square, countersink to accommodate head of bolt. Insert bolt through block, slip on a washer, then place on the bolt one record with the coil down and one record with the coil up, with a washer between, then comes the third washer. Bind the whole together with a nut until all slack is taken up, but not so tight that the records drag. After final adjustment of tension is made, the whole assembly can be locked with the extra nut.

Senator Slush's Stand

"Senator Slush condemns in no uncertain tones the making of large gifts to colleges and universities by rich men, because he thinks they tend to make these institutions subservient to the givers," remarked a henchman.

"Knowing him fairly well," replied Maj. Ira W. Widenfuller, chief speedometer inspector, "I fancy Senator Slush would much prefer that rich men bestow their gifts on him, even if wealth should chance to make him subservient to its givers."—Kansas City Star.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 23 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Faint Praise

A rich old banker married a beautiful chorus girl of seventeen. On his return, all aglow with happiness from his honeymoon, he said to his sister-in-law:

"What do you think of my wife? Isn't she ravishing?"

"Ravishing!" said the sister-in-law. "Stunning! With those blue eyes and that pale gold hair, what a widow she's going to make!"

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Sign of Improvement

Goldo was working in his garden when the minister passed. "Allow me to congratulate you," said the pastor.

"Oh, my garden isn't so much," modestly said Goldo.

"I didn't mean that," the minister explained; "this is the first time I ever saw you on your knees."

Just say to your grocer Red Cross Ball Blue when buying bluing. You will be more than repaid by the results. Once tried always used.—Advertisement.

Wise is the man in the limelight, who doesn't overwork his popularity.

"MOVIES" HAVE MADE FRECKLES VALUABLE

It is the movies that have capitalized freckles. Every freckle means a dollar to a boy if he has them in abundance. Such a boy can laugh at the triumphs of beauty on the screen. His capital is equally lucrative. His face is his fortune, and truly that golden largess in his countenance is a golden balance in the bank.

The sun in its indelible tattooing has not been wholly unkind. The sun itself can say, "I too have spots."

What is the charm of freckles on a boy's face? For unquestionably they have charm, though anything but charming to the boy.

They say that a face of many freckles means abundance of iron in the blood. Aren't all freckle-faced boys manly?—iron in the blood, iron in the soul. We don't believe you can iron out the fact.—St. Louis Globe-Democrat.

Modern France Surely Paradise of Children

The single child in France is the normal standard. He is petted by the whole clan of uncles, aunts, and cousins. At six years of age his own little world seems to revolve about him, eager to satisfy his smallest wish, to keep him amused, to provide him with pleasure. In the Luxembourg gardens I have been watching the children of France, and listening to their laughter before the guignol show—old Punch and Judy—in the Champs Elysees, and galloping pigs up in the great circus of the Boulevard de Clinchy. Sir Philip Gibbs says in World's Work.

France is the paradise of children. Crowds gather round to watch them at play. The very eyes of the agents de police soften at the sight of them. I have just come from a christening of two babes in a little church in a low quarter of Paris. The whole congregation watched the ceremony with emotional interest. Two little lives added to France—that was good! Admirable! The father and mother were regarded with admiration and esteem. But what a risk, with the cost of living so high in Paris!

Found Treasure Trove

John Stevens, mate of a lumber schooner at Laurel, Del., while removing a rotten board in the floor of the coal hole of the boat, was surprised to find several old coins under the old plank. A closer search disclosed a bag containing scores of pieces of money coined by at least a dozen eastern and South American countries. Some of the coins are more than a hundred years old, the latest ones about fifty. The boat is more than fifty years old.

Really Helpless, You Know

The prize excuse was introduced in an English court during the trial of a man charged with wife-beating.

A neighbor who was present during the assault was called as a witness for the prosecution. He described the blows in detail and the wife's helplessness.

In astonishment the judge turned to the witness and asked: "Do you mean the court to understand that you stood by and saw this man strike the poor woman again and again?"

"Yes, I saw it all."

"And you made no effort to interfere?"

"I couldn't."

"Why not?"

"I was filling my pipe."

Hardly Appropriate

At the end of a certain Sunday school treat the children were singing the verse which includes the words, "Weak and sinful though we be."

One youngster with a weak theological background sang with all his heart and voice: "We can sing full though we be."

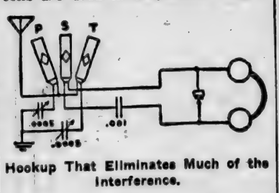
Heartless Brute

He's a mean man who will deliberately walk between a woman and a milliner's window.

Three Honeycomb Coils Used on Crystal Sets

By LEO SCHECHTER

The accompanying diagram shows a hookup which I have recently developed. It is far superior to any other crystal hookup I have ever tried. In this hookup spider web or honeycomb coils are used in conjunction with a



Hookup That Eliminates Much of the Interference.

crystal detector. I had been troubled with intereference until I found that this hookup eliminates it quite well.—Radio Digest.

When Water Should Be Added to A Battery

If water is added to the storage A battery when it is nearly discharged, it is likely to run out of the vents in the filler caps when the battery reaches full charge. This is due to the quantity of small gas bubbles which form in the solution and greatly increase its bulk. In most batteries, the separators between the plates extend up above the level of the top edge of the plates so that it is only necessary to keep the acid solution just above the separators. Water can be added after the battery is fully charged.

To Get Best Results in Using Loop Aerial

It is generally conceded that radio is about the most puzzling thing known and many, by way of performing various trifling experiments will vouch for this. Things that many say cannot possibly be done are really performed and a good many of our little everyday "hunches" bring surprising results.

Many fans have found a loop aerial will work better in one room of the house than in another. Therefore, if you want to do some interesting experimenting with this type of aerial, give this idea a tryout.

Often large metallic frames, radiators, etc., affect the loop and the functioning of your receiver. And should it be removed to another room in exactly the opposite direction surprising results will be obtained. It is well to bear in mind that no radio set, whether receiving or transmitting, can be expected to work efficiently if large metallic elements are in the immediate vicinity.

Audion Oscillation

Very little has been said about the oscillating point of the audion. Although two vacuum tubes may be of the same type, they will not always operate efficiently under the same conditions. Vacuum tubes vary in their characteristics; there are no two bulbs alike. The main trouble with non-oscillating V. T. circuits lies in the fact there is not much attention paid to the B battery potential. When trying out a new bulb, test it, using a variable plate voltage, as some tubes are very critical, necessitating careful adjustment.

Wood and Foil to Make Cartridge Grid Leaks

The grid leak shown is nothing but a stick of wood marked with a pencil, with tinfoil caps placed on the ends and bound with a piece of twine. In order to make this leak of a permanent value it is only necessary to paint the whole thing except the very

Showing Parts Needed for the Cartridge Grid Leak.

tips with a waterproof substance. This is one of the first home-made leaks devised that can be mounted in the regular grid leak forms or supports.—Radio Digest.

When Outdoor Antenna Overcomes Difficulties

An indoor antenna is more efficient for receiving radio signals than a loop but the latter has directional properties which make it exceptionally valuable in some locations. If you live in a steel-framed building in which metal lath has been used on the walls, the efficiency of either a loop or an indoor antenna will be low. The only way to overcome this difficulty is to use an outdoor antenna or else to use at least a five-tube set. But, even the most powerful receiver cannot be expected to bring in distant stations on a loop or indoor antenna when the whole room is practically a metal box

SINNERS *in* HEAVEN

By CLIVE ARDEN

Copyright by The Bobbs-Merrill Co.

THE CANNIBALS

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Rochdale, fish and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter.

PART TWO—Continued.

—4—

Gradually, worn out, she grew calmer; gradually she lost consciousness of her surroundings, falling into a troubled, restless sleep. . . .

The sun had moved round behind the hill and the hut seemed dark and oppressive when, suddenly, her eyes opened. She started up in some alarm. Surely it was not night, and Croft still absent? However autocratic and distasteful any companionship might become, the awfulness of solitude—as for a moment that contingency swept across her mind—made it desirable beyond all riches.

She ran to the door. To her surprise, it was no longer barricaded. She pushed it open, and drew a breath of relief; for outside it was still broad daylight. The sunshine gleamed in bright patches upon the shore, alternating with long stretches of shadow cast by palms which, singly or in small clumps, dotted the bay. The time, she judged, must be early evening. If Croft had returned and opened the door, where could he be now?

Unsteadily she walked to the water's edge, searching with straining eyes the shore and the distant reef, without result. Nameless dread at her heart, she turned to ascend the slope toward the palm grove, thinking to get from there a clearer view of the wrecked machine.

A movement behind, among the trees, presently caused her to look round quickly. It was, unmistakably, a footfall: evidently Croft had returned and come to the river. With a sigh of relief, she left the tree and turned inland to greet him. . . .

Then, for a moment, all power seemed to leave her body. She stood rooted to the ground, her lips moving without uttering a sound, her eyes dilated.

About ten feet away, a pair of fierce, restless eyes gazed upon her, fascinated, from a sooty-black face repulsive by its breadth of nose and thickness of lips. The dark, naked form, of medium height and sinewy build, glistened as if fresh from the water: the frizzy black hair clung damply about the ears and forehead. As he stood watching her, like an animal watching its prey, the coarse lips parted in a slow devilish grin. . . . With a quick stream of unintelligible words, he sprang forward.

The spell broke. With one shriek of terror, she turned and fled madly down the slope.

The unintelligible muttering ceased. A blood-curdling yell like some wild war-cry pierced the still air, echoing around the bay . . . quick agile steps sounded close in her wake.

The unearthly strength born of emergency came to Barbara. Everything save the distant hut faded from her sight; time ceased; coherent thought fled from her. Only one instinct reigned—that of the hunted beast to reach its lair. That, once there, defense might prove equally impossible, she never paused to consider. The bare feet drew nearer in their hot pursuit; the weird cry again and again resounded over the bay. . . . Closer he came; she heard his short snorting breathing . . . closer: the warmth of it fanned her neck . . . closer yet, and a hand caught roughly at the sleeve of her blouse, tearing the soft silk to ribbons as she wrenched her arm free . . . closer, and this time the sinewy black fingers grabbed the bare arm itself. . . .

A swift whirling noise smote across her reeling brain; something hurtled past her shoulder . . . with a savage snarling groan, her captor fell sprawling upon the ground.

Dazedly she looked around. Springing over crags, scrambling through brushwood, Croft came down the hill behind the hut at break-neck speed. The native, quickly regaining his feet, cast one glance toward the tall white figure with blazing eyes, dropping, to his muddled senses direct from the heavens; then, without a word, he turned swiftly and leapt, with extraordinary rapidity, back toward the palm grove.

Her transient strength oozing away, Barbara staggered forward.

Croft caught her by the arms.

"What the devil made you leave the hut?" he demanded angrily.

All tendency to faint left her. No lash of a whip could so have quickened her bewildered brain. She recoiled in his grasp, gazing up into his face dumfounded. Amid the confusion of her mind his extreme pallor struck her forcibly. His eyes pierced her like flaming steel.

"Hadn't you enough sense to realize this possibility?"

Now was the time to assert herself, she hesitated; searched vainly for a retort; opened her mouth; closed it again. In her weak state circumstances proved too overwhelming. Feeling utterly insignificant, she merely turned her miserable eyes seaward.

"I—was only looking—for you," she murmured unsteadily.

Opposition may wear down a man, as a fortress, with time; but helplessness silences all guns. He stood, breathing hard, still grasping her arm, gazing into her face with eyes no longer flashing with anger, but smoldering with something she could not define—something composed of horror and fear.

"G—d!" he muttered at last, in a different tone. "If I had been too late!"

For a moment he stood silent, scanning the vicinity of the palm grove; perceiving no signs of the native, he turned with her toward the hut.

"I rescued most of the wireless and luggage," he said, turning the subject of her thoughts abruptly. "I brought some of our things across, and left the rest on the reef. You were asleep. So I took the wireless up the hill, and fixed up the aerial."

Sinking once more upon the coats, she watched him carry in their suitcases and—something else.

It was the old tin box of Aunt Dolly's provisions. . . . Tears rose to Barbara's eyes, and her throat contracted; but her companion's presence caused her to wrestle valiantly with the grief stirred up afresh by the sight of this familiar old box. The little homely things are ever those which bring out the full force of loss or tragedy.

Hiding weakness from Croft's eyes, however, was becoming, unconsciously, Barbara's purpose in life just now. Any display of it was, she felt intuitively, abhorrent to him. In silence she watched him unfasten the box, take out the spirit-lamp, reach among the other contents, and abstract a tin of milk.

Presently he brought some steaming milk in a small tin mug. She had often used that mug upon picnics with Aunt Dolly; the sight of it caused another wave of homesickness and loss.

"I can't drink it," she muttered, turning away.

"You must," he replied quietly, seating himself on the ground beside her, his countenance inexorable. She took no notice.

"Come along! Don't be silly, Barbara!"

Quickly she turned and faced him.

Then rather too hastily she took the mug; but her hands trembled, and the milk splashed over the edge. He placed his fingers over hers and guided them; and the cool firm touch brought a peculiar sense of calm and security.

"It tasted—queer!" she remarked.

Rising, he returned to the work of unfastening their luggage.

"Your case is unstrapped," he said presently. "Will you unpack it now?"

"Oh!—I can't! Not yet," she said wearily.

"Shall I?"

"No! Oh, dear me, no!" She started up in alarm.

"Well, but—don't you want things for the night?"

"No."

He looked at her in mute inquiry.

"You don't suppose," she asked with asperity, "I shall ever—undress in this place?"

As he turned away, she saw the same flash of white teeth in the dim light that she had seen the first time they met.

"I advise you to change, after such a soaking," was his only remark. He stood near the door, as if uncertain, for a few moments, then pushed it open. "I shall have my supper outside. . . . Good-night!" he added.

There was much sense in his advice: her clothes felt stiff and heavy. Wearily she opened her suitcase, surprised to find most of the contents dry. She hastily undressed and slipped into cool, fresh garments. Throwing on a loose Japanese dressing gown, she lay down again, exhausted. All fears sank into oblivion. . . . She fell into a deep, heavy sleep.

III

The flare of many torches illuminated the midnight darkness in the south of the island. Chimabahol, the old chief, sat in the leafy council chamber near the entrance of the sacred palm grove, surrounded by his trusted warriors. In the center of the large circle of squatting figures stood Babooma—next in rank to the chief—recounting, in his muttering, sing-song dialect, the strange story which, arousing tragic memories, caused consternation and foreboding in every heart.

When he ceased, Chimabahol sat silent, pulling his beard with wrinkled dark hands that trembled. An agitated babel broke out all around, fierce native oaths blending with wails of distress.

The chief at last commanded silence and spoke.

"Whence came they, Babooma? Was there no strange canoe floating, like a vast island, upon the lagoon?"

"There was not, O Chief. The white woman appeared in my path as if sprung from the waving palms! The white man"—he looked furtively round—"did fall from the skies, sending his bolt before him!" He shivered, stroking his sore shoulder. "The great white man is a giant, O my Chief! He will not easily be killed."

"How great is the tribe? Didst thou not see others, Babooma?"

"None other did I stay to see, O Chief! Perchance they are evil spirits come to haunt the huts where live the ghosts of our slain ones. Or perchance they slay with ball-devils like unto those other evil ones."

The chief sat in deep thought for some moments; then rose and waved his spear.

"The Vow!" he cried. "Let preparations be made, my warriors. When next darkness hides the earth, we will fall upon this white tribe, true to the Vow!"

A confusion of voices resounded, accompanied by many furtive glances into the darkness of the forest; the savage joy of revenge was yet tempered with awe. Memories of the means of warfare adopted by white men caused them to follow their chief in still half-fearful excitement to the sacred palm grove.

Presently the sound of native voices rose once more, singing their Song of Hate.

* * * * * * * *

The man sitting outside the little hut raised his face, inhaling the soft scents, grateful for the refreshing wind. All night he had sat motionless, head hidden in his hands. There was nobody to see, in his haggard features, what Barbara had seen that morning.

Although his eyes had not closed, this solitary vigil, with its forced inaction, had revived and intensified the morning's sufferings. The sense of powerlessness which had attacked Barbara with such violence in the afternoon now attacked him. Again and again he strove to turn his thoughts from the wrecked mass out there upon the reef; from the dark waters and the monsters which infested them, where those friends, strong and full of life not many hours ago, now lay hidden. What awful fate, worse than mere drowning, had been theirs? . . . He strove to restrain his mental agony, dragging his mind away, for down that road madness lay. . . . There were natives, possibly cannibals, upon this island, to be faced sooner or later. Therein, to his mind, lay hope. For surely they were in touch with civilization? During his travels he had picked up a good number of dialects employed among Polynesian and Melanesian natives. With luck he might find means of rescue through their enterprise, if they had any. But this was doubtful. He knew well the characteristics of the Pacific: knew the trade routes, the ports of call, the features of islands in touch with civilization, the features of many practically unknown. . . . Intercourse with strange natives, too, meant considerable risk, with a woman in his care. . . . At that thought, the same strange thrill shot through his frame which he had experienced in the morning; the awful loneliness of spirit seemed to fall from him.

Scattering his reflections, a strangled, terrified cry came from the hut. He sat up, alert in a moment. All had been quiet hitherto. The draught dropped into the milk had done its work. He had been fortunate in rescuing the case of medicines and first-aid necessities from the machine. Again, louder, another cry smote upon his ears. He sprang to his feet. . . .

Reaction had come upon Barbara, awakening from the heavy effects of the drug, so vividly that she was almost delirious. The little hut seemed to swing round and round, now darting suddenly up toward the sky, now dropping, as a stone, into limitless space. And ever, from the four quarters of the globe, roared what seemed like ten thousand trains. . . . To escape was impossible, for somebody had barricaded the door . . . the hut rushed down now toward the dark fathomless waters . . . they closed above her head, and everywhere black hands surrounded her—black leering faces came close. . . . With a shriek of terror she cowered against the wall, when the door opened; then perceiving freedom, she ran blindly toward the starlight without.

A pair of arms caught her upon the threshold. Half-demented she struggled in their hold, gasping hard sobs. But they closed more tightly; and their protective warmth shut out the lurking dangers. Gradually she grew calmer; the nightmare sensations of returning consciousness abated. Ceasing to struggle, she leaned exhausted against him, her arms clinging to one of his, the waves of her long hair falling across his breast.

So for several minutes they remained—two derelict beings hurled, helpless pawns, over the boundary line of civilized life into a world yet in its infancy—each conscious of a sense of comfort in each other's nearness.

Presently he straightened himself. With two fingers he felt her brow and cheek; they were of little more than normal heat. He stroked back the hair clustering over her forehead; and she stirred, raising her head.

"You must lie down again and sleep," he said, drawing her toward the bed of coats. But her grasp tightened upon his arm.

"You are not going—far away? It—it's like a vault in here—full of death—" Her voice rose unnaturally.

"I won't leave you at all," he said hurriedly, but with a decision which obviously relieved her. "It's not safe—for either of us—alone—tonight."

Her eyes wandered over his face, in the dim starlight, in a dazed manner, while she sank back upon the coats with a long sighing breath.

One hand still clasped in hers, the other arm passed under her head for a pillow, he remained upon the ground by her side. The turmoil of his own spirit seemed unaccountably soothed. Though never sleeping, a comforting drowsy numbness replaced the sharp suffering of his mind. . . .

But when the early light of dawn pierced through the aperture, it brought with it the remembrance of a man's hand-clasp, the trust in one honest brown eye, the shade in place of the other. . . . The wonderful peace which seemed to have descended upon the little hut, lulling his mind, filling it, during those hours of close protection and companionship, with something exquisitely beautiful, albeit incomprehensible, was shattered at one blow.

He half-withdrew his arm; then, pausing, bent over the sleeping girl and looked long upon the delicate features, the sensitive lips and dark lashes. As he looked, an unbidden thought flitted across his mind, bringing a slow flush into his face. Had another taken indisputable possession? Had he reached to the very depths of her soul; fired all the deepest fibers of her womanhood? . . .

He drew himself up, gently freeing his hand and arm. The question opened vistas down which he refused to look. A part of his nature that night had been illuminated as if by many-hued candles; and he felt dazzled, strange to himself, almost, for once, afraid.

He rose with difficulty, his limbs cramped after long sitting; stretched his arms; looked down once more upon the sleeping form confident of his protection.

Croft was a lover of cleanliness, fair play, victory always—but victory with honor. Throwing back his head in a characteristic way, his eyes still resting upon the sleeping face, he smiled. It was the little smile which many men knew well, which enemies feared, but which those he led had ever loved to see: that smile with him meant a challenge, and a challenge presaging achievement.

Noiselessly, he opened the door and went out. Seizing two old basins discovered among the rubbish in the hut, he strode toward the river.

Save for the distant surf, no sound was audible. From the palm grove he keenly surveyed the bay: it was deserted; the world might have been dead. Plunging through the tall bamboo he came out upon the deepened stretch of water glimmering faintly, like moving darkness, below him. Then, throwing off his garments, he dived into the shadowy ripples, feeling a primitive delight in the cold sting to his tired limbs. Afterward, slipping into his shirt and breeches, he filled his basins and returned to the grove.

When he emerged from the bamboo, the sound of voices fell upon his ears. Hastily stepping back, he waited, listening intently. The voices came nearer, then receded toward the seaward outskirts of the palm grove.

Discovering the Dark Forms of Three Natives.

Croft took a few noiseless strides in their direction, soon discovering the dark forms of three natives among the trees. Soundlessly creeping in their wake, he hid again, close enough to hear their speech, while they paused at the top of the slope.

The man sets about doing things. The girl becomes hysterical. Will she be able to face real perils?

(TO BE CONTINUED.)

A wife is called the better half because she generally gets the best of the other half.

NOTICE!
To Livestock Owners

If You Own Any Horses, Cattle, Poultry or Hogs, by All Means Read This.

Safeguard your stock against the costly ravages of quick-spreading disease. Nature has provided wonderful health-giving roots and herbs which have proved unfailing in thousands of cases. These are combined in a time-tried, reliable remedy, Porter's Pain King—the standby of hundreds of farmers in this community. They recommend it highly for sores, colds and distemper in horses and for soreness of the udder, caked teats, and bloat in cattle.

With chickens becoming better money-earners, there is an increasing use of Porter's Pain King by careful poultry raisers everywhere. It is a positive relief for gapes, roup and parasitic growths. Sick hens are not good layers.

Use Porter's Pain King at the slightest sign of trouble. Just follow the directions with each bottle. It may save you several hundred dollars. Your dealer guarantees satisfaction or money back.

Community Building

Organization Works for "Better" American Homes

For the past three years several hundred American communities have organized and held better-homes demonstrations, under the guidance and with the advice of the national educational organization, Better Homes in America. Plans are now under way for extending this public service to hundreds of additional communities in 1925, as well as in those communities which make a "better homes" demonstration an annual affair.

Herbert Hoover, secretary of commerce, is president of the organization. The active direction of Better Homes in America is in the hands of Dr. James Ford, executive director. Doctor Ford is a member of the faculty of Harvard, having been granted a special leave of absence in order to undertake this educational work. Better Homes in America is supported entirely by public and private gifts.

There are numerous excellent reasons why every community in the country should take advantage of the existence of this organization and, with its help, demonstrate some of all of the ways in which American homes may be made better places to live in. This means making the most of the family income in the direction of comfort, economy and beauty. The better-homes organization directs its principal efforts toward aiding the American family of small or moderate means.

Cities and Suburbs Must Be in Harmony

High taxes and land values in the cities have had the same effect on industry that they have had on home-seekers, they have forced industries to seek locations outside the city limits, where taxes and land are cheaper, but where the city's labor supply would be available. As a result, every big city not only has its residential suburbs but its industrial suburbs. Essentially they are part of the city, actually they are not.

To bring all of these residential and industrial suburbs into some kind of harmony with the city about which they center is the task which regional planning bodies in most of the big cities of the country are undertaking. The regional-plan idea recognizes the homogeneity of the entire city area—not merely that part within the city limits, but the suburbs and unorganized territory surrounding, and seeks to upbuild and regulate all parts for the benefit of the whole. Under regional planning all local problems would be worked out in accordance with general plans and policies adopted by the region as a whole. Zoning bodies in the various communities would act in accordance with a general zoning plan for the whole area. Administrative bodies would act in accordance with a general program worked out to avoid conflicts and duplications of effort.—Chicago Daily News.

Beauty as an Asset

The value of beauty as an asset to any great country is apparent to anyone who has visited California and the highly developed sections of Florida—countries in which the possibilities of soil and climate have been utilized to an amazing degree for purposes of ornamentation—the growing of trees, plants and shrubbery which are indigenous to the region and which give the charm of local color to the countryside. Visitors to southern California cannot fail to see and remember pleasantly the well-kept orange groves, blooming rose clusters and hanging dates which come and go, mile after mile, along the country roads, and the same may be said of the beauty spots of Florida.—Atlanta Constitution.

Farms Being Beautified

More than 800 varieties of ornamental plants and shrubs have been set out by Canadian farmers in the Cap Rouge district in the last few years. Some rare flowers and trees, many with vivid colorings, have been started on the otherwise drab fields in that district as a result, and the farmers have become quite enthusiastic about the dominion experiment station's idea of beautifying the farm.

March of Improvement

The transition from the log cabin of the early settlers to the modern American home marks a period of great development; but, it must be acknowledged, the greatest advancement has occurred in the past quarter century. The introduction of new and improved building materials and home equipment has largely brought about this development.

No Beauty Without Trees

Beautiful street trees make a beautiful and attractive city. A city without trees is barren and devoid of charm and repels rather than attracts the visitor, whereas a city with streets of beautiful trees has a cool and soothing appearance, and produces a restful effect on eyes and nerves.

Irresistible Force

There is nothing that can keep a town from growing when everybody is working in that direction.

...STER AND EGGS LONG ASSOCIATED

For Centuries Have Been Season's Symbols.

The relation between eggs and Easter does not seem far-fetched when it is remembered that the Easter festival is a celebration of life and that the egg is, perhaps, the most striking symbol of life, with its wonderful possibilities of development. This symbolical conception of it can be traced back to ancient times. One of the Roman games was racing on an oval track for eggs as prizes, and this was in honor of Castor and Pollux, the twins who had come forth from an egg laid by the Swan Lena. In an expense account dating back to the time of Edward I of England is the item: "Eighteen pence for 400 eggs to be used for Easter gifts." Much farther back than that the egg was considered the emblem of the resurrection. The custom of coloring the shells was probably the grafting of the art instinct upon the Easter observance. It once found much more elaborate expression than now, when sentimental inscriptions and beautiful designs were etched into the colors.

Many customs and superstitions have grown up around the Easter observance. Suckling's verse:

> But, oh, she dances such a way
> No sun upon an Easter day
> Is half so fine a sight.

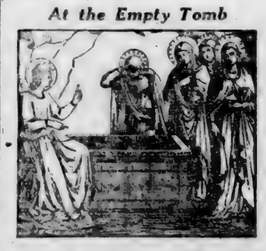
borrows meaning when we know that, according to an old belief, the sun in the heavens danced on Easter morning in joy for the resurrection. The Scotch tradition was still more specific, and claimed that the god of day whirled around like a cartwheel and gave three leaps, and these performances were solemnly argued about by wiseacres. Another belief was that as it shines or rains on Easter day so will it shine or rain a little every day in the year, and an old couplet ran:

> A good deal of rain on Easter day
> Gives a good crop of grass, but little good hay.

If the wind on that day was in the east, one should draw Easter water (whatever that may be) and bathe in it to prevent ill effects from the east wind. An old English custom was to wear a new article of dress on Easter Sunday to insure good fortune in love affairs during the coming year. The Easter hat is probably a relic of that practice. Still another custom was to court good luck by putting out all fires on Easter eve and lighting them afresh.

Constantine, the Christian emperor of Rome, first invested the observance of Easter with pomp. The day was distinguished by the most elaborate ceremonies in the churches, and by night not only the churches but the city itself was illuminated by a multitude of gigantic candles or wax pillars in an attempt to outshine the day.

At the Empty Tomb



"Ye Seek Jesus, Who Was Crucified . . . . He Is Not Here: for He Is Risen, as He Said." —Matt. xxviii:5-6.

Glad Message of Hope

In a world where there is much that is dreary and sad there is yet the message of Easter with its hope and good cheer. How hopeless the world would be if the life of the Master had closed with the crucifixion! How sublime it becomes when the life is crowned with the resurrection! We are living today in a world of subtle influence. We now realize more than ever the universality of truth. Even science has taught us the presence of laws whose workings are as invisible as the miracles of Biblical times.

Life's True Meaning

The present life gets its meaning from the life that is to come. Human life comes to beauty and dignity and power only as it is lived for eternal things.

AN EASTER GREETING!

THE lark at sunrise trills on high,
The greeting, Christ is risen!
And through the woods the blackbird pipes,
The greeting, Christ is risen!
From 'neath the eves the swallows cry
The greetings, Christ is risen!
Throughout the world man's heart proclaims
The greeting, Christ is risen!
And echo answers from the grave,
In truth, He is risen.
—Martha G. D. Bainchi.

ST. JOE NEWS.

VOL. XXXIX ST. JOE DeKALB COUNTY, INDIANA, THURSDAY APRIL, 9 1925 NO. 15

What is Your Opinion?

Home Town Talks

Is St. Joe YOUR TOWN?

Buying at home is an investment, buying away is a speculation.

Do not think you can prosper whether the town does or not.

Somebody started this town; it is up to you to keep it moving.

Think well of your town and your town will think well of you

A dollar is no carrier pigeon; send it away and it won't come back

Let the carpenter be the only man in your town to use a hammer.

It takes a crew to sail a ship: it takes cooperation to make a town.

The farther a man gets from his home the nearer it gets to his heart.

Keeping your house in repair keeps its value in the same condition.

It isn't the money they spend that makes people poor; it is the money they squander.

Let Me furnish YOU HAM FOR EASTER!

Saturday: Whole Ham, Cured nicely Smoked at... 30c
Picnic Hams and just the Right Size at... 20c

NOTE—Pay your accounts. They are due now.

WHO
Aims at Nothing
USUALLY
Hits the Mark

The man without a finacial plan is as unlikely to achieve any financial success, as the man who would start to build a house without a blue print or a drawing to go by.

A great many people, hard working and sincere, fail to build for themselves a successful financial structure, because they are working without plans.

Part of our business is to help you make successful plans. Come in and talk to us, and we will be glad to advise with you about savings, investments or financial matters.

The St. Joe Valley Bank, A STATE BANK

The Vagrant

The interest you earn on a home depends on the interest you take in it.

If you are looking for an investment, a home never misses a dividend.

The great question, after all, is whether this is a community or a freight station.

If this town had the livest citizens the citizens would soon have the livest town.

Don't be afraid to praise public spirit where it is deserved; deserve a little yourself.

It is the purpose of the editor in these short paragraphs, to provoke comment pro or con. If we could cause recognition of but one thot this week, we would be well paid, and they are all vital for a more harmonious, and successful St. Joe.

Didn't Pay, So He Goes To Jail

Jesse Don Gorrell had a taste of what it means to disobey the order of a court, when he failed to pay his former wife, Ruth Gratz Gorrell of Jackson township, the money he owes her for the support of their child, Jesse Don Gorrell was sent to jail by Judge Endicott for thirty days.

When Gorrell secured a divorce in the DeKalb circuit court the child, Josephine, was given into the custody of Mrs. Gorrell and he was directed to pay her $15 a month for the girl's support. He is delinquent in his payments from December 8. When brought into court last winter he promised to make payment by March 15, and having failed, Judge Endicott ordered the sheriff, Wm. Morr, to place Gorrell in jail, which he did, after he saw the court meant business he made a payment of $120 and was released from jail with the promise that by May 5 he would pay another $100. After being given credit for the $120 he still owes his former wife $490.

Lutheran Notes

This is the week for the Easter services. Preaching every evening at 7:30. Celebration of the Lord's supper and reception of members on Sunday morning at 10:30.

Sunday School 9:30.

Do not miss any of these services for they are all interesting and helpful. Be sure and attend.

S. D. Steffey, Pastor

Order a Sunday Chicago Tribune at News office—The most for the money in Sunday papers.

The ladies of the Christian church will hold a Bake Sale and Bazaar, Saturday, April 11, at Widney's Electric Shop.

At a meeting of the directors of the local bank last Wednesday, M. M. Maxwell was selected as assistant cashier, taking his position on Thursday. Mrs. Lena Meek was filling the position temporarily.

In Society

Believing that "a little bit of nonsense every now and then" is beneficial the ladies of the Culture Club enjoyed an April Fool program last Wednesday night at the home of Mrs. Lena Meek. The committee in charge aimed to discover all of the gullible members and the ladies qualified nearly 100 per cent. Notable features of the evening were readings, piano music and the ladies "Oh! Pshaw" quartette. The lunch served was artistically pleasing but hardly palatable to appetites untrained for cotton balls, excelsior sandwiches, etc. However a "trailer" appeared and disappointed appetites were appeased.

Twenty-five members were present and one guest, Mrs. Chas. Bishop of Cleveland, O.

Church Notes

Special services at the Christian church each evening this week as follows:

Wednesday evening, April 8, Conversion of a woman.

Thursday evening, April 9, Conversion of a moral man.

Friday evening, April 10, Conversion of a religious man.

Saturday evening, April 11, A model conversion.

Lord's Day, April 12, A proper division of the Word.

There will be a special song service consisting of solos, duets and choruses.

"Search the scriptures for in them ye think ye have eternal life—John 5: 39.

A cordial invitation extended the public to attend these services.

Obituary

The death of James Provines, a pioneer and well known citizen of DeKalb county, took place Friday morning at 5:30 o'clock at the residence of Sheriff Wm. G. Morr in Auburn. He was the father of Mrs Morr.

Mr. Provines was past seventy-five years of age For a number of years he had been afflicted with Bright's disease but he was never bedfast until last December, when he was stricken with pneumonia. He recovered from that sickness, but it left him weak. His condition from Bright's disease became so serious that he was again forced to his bed on February 23. He steadily failed and he was unconscious for several days before his death.

It was on January 7, 1846, that Mr. Provines was born in Wayne county, Ohio, a son of Alexander and Dorcas Adams Provines When he was eight years of age the family moved to Jackson township, DeKalb county. James Provines was educated in the district schools of the township. On April 30, 1864, when he was eighteen years of age, he enlisted in the union army as a member of Company K. 135th Indiana infantry. Most of his service was spent as a nurse in army hospitals and he was honorably discharged September 29, 1864.

Returning to DeKalb county, Mr Provines taught school for five terms. He learned the carpenter's trade and later bought a farm of 80 acres. He afterward sold this farm and a farm of 120 acres on the St. Joe road in Jackson township. He lived on this farm for thirty-eight years until he retired and moved to Auburn eight years ago to make his home with his daughter. In addition to farming he was engaged for a number of years in the live stock business.

The marriage of Mr. Provines and Miss Helen Woolsey took place on November 11, 1869, and she died on February 24, 1896. Surviving are three children, Mrs. Morr and Frank A Provines of Auburn, and Perry M. Provines, who lives on his father's farm. Surviving also are two brothers, Alexander Provines of Auburn and Robert C. Provines of Rankin, Okla., and two sisters, Mrs. James Farver and Miss Mary Provines of Auburn.

Mr. Provines was a member of Auburn lodge, F. & A. M., for fifty-eight years. He also was a member of the Knights of Pythias and the G. A. R. He served as adjutant of the Auburn post of the G. A. R. for a number of years.

11 Young People Added to the Church

Last week the pastor, Rev. S D. Steffey preached each evening at the Lutheran church at Spencerville The attendance and interest was fine for the entire week. On Sunday eleven young men and women were received into the church after which the Holy Communion was administered to the largest number of people for many years. A large crowd was present and took some part in all of the services.

A TRANSFORMATION

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and se-late place, Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a black man, evidently a savage. Croft rescues her.

PART TWO—Continued.

—5—

He could see now, in the stronger light, that all were armed with long spears, two also carrying bows and arrows. The third, an old man, wore round his neck a large clam-shell disk—emblem of the rank of chief—and through his nose-cartilinges a dark stone. Rings, probably of tortoise-shell, hung from his ears.

Croft wondered if this were a visit of negotiation, with a view to a compact of friendship with visitors to their island. He recognized them for members of the huge scattered family of Melanesians, or Papuans, which have some undoubted connection with the African blacks, and are to be found in numberless South Sea islands as well as in Melanesia proper. Although their dialect is more or less local, there is sufficient similarity to make it fairly intelligible to any one accustomed to the variations.

A few minutes, and Croft's illusion of a friendly compact was destroyed. Hostility was evident. He soon realized that an attack was being organized for the following night, though he could not distinguish the plans being laid.

Emboldened by the absence of any sign of their enemy, the men remained standing for several minutes, gazing down the slope at the solitary nut wherein Barbara lay unprotected. At last, after an indistinct colloquy, they moved slowly forward in its direction.

For a moment Croft's heart seemed to stop beating. To expose himself, unarmed, would mean certain death, and the consequent abandonment of the girl, whose life now rested upon his, to a fate probably far worse. Inside the hut, if he could but reach it, lay the suitcase containing his revolver. Should he risk all and dash from his hiding place or—? A sigh of relief escaped his lips when the men suddenly halted. For what seemed an eternity he watched them confer together, evidently divided in opinion on the wisdom of their venture. When at last they turned and made off toward the south of the island, he found his clenched hands were shaking and his brow was wet. He hurried down to the hut, where he found a white-faced girl ineffectually barricading the door with suitcases.

She uttered a welcoming cry on his appearance at the window.

"How did you escape? Where were you? What can we do?"

To his own amazement perhaps as much as hers, he laughed—almost happily.

"They have gone away," he replied. "We can't do anything at present."

She gazed at him in some bewilderment, knowing nothing of the reaction which had caused that strange light in his face; and he laughed again, boyishly; then leaned farther in for a closer inspection of the blue-clad figure with its cloud of hair.

"You are better?" he asked.

The paleness of her cheeks changed suddenly to red under his scrutiny.

"I—I'm all right," she muttered, turning away.

"I will go back for the water," he remarked; and his face disappeared from the aperture.

Barbara's mind was uncomfortably confused. Safe in some refuge she had seemed to be sleeping for hours. When she awoke she instinctively sought for a hand which proved not to be there. Throughout the terrified moments that ensued, vague impressions of some midnight event chased elusively through her brain. They were intensified by Croft's appearance. Vainly she tried to capture the threads; to separate the real from the chaos of delirium. All was confusion, jumbled repetitions of accumulated horrors. She caught first at one thread; then lost it and caught at another. But ever at one point her cheeks burned. How much was true? Surely not—. The more she thought the more convinced did she become of its incredible reality. . . . How could she face her companion? He alone could place the unraveled threads in her hands. But how to make him do so? How—

So engrossed were her thoughts that she started violently at the sound of his voice again at the window.

"Your nerves are awfully weak," he remarked.

"They are not!" she snapped indignantly. Was she always to feel foolish and, above all, appear so, with this man?

Opening the door, she took in one of the basins, without looking up.

A scented, steaming bath could not have been more welcome than that little basin of cold water. The freshness invigorated her, reviving a girlish interest in appearances. Unpacking a tiny traveling mirror, she proceeded to do up her hair, dressing in one of the cool washing frocks intended for Australia.

Croft was thumping on the hut, demanding breakfast, before the completion of this toilet. His quick glance took in her dainty and very civilized appearance down to the gray suede shoes; but he made no comment.

Again the contents of the old tin box proved invaluable, with the addition of bananas and coconut. They spread their store upon the ground outside, in the early morning sunshine.

Conversation languished. Croft seemed abstracted, deep in thought. Her riddle of the night lay unsolved. . . .

After several furtive glances at his face, she made a plunge.

"I want to know—"

"Yes? What?" Quickly his eyes searched her own, causing her to lower them confusedly.

"I can't remember what happened—I'm afraid I—did I behave rather stupidly, last night?"

He stretched out his hand for a banana, peeling it with irritating deliberation before replying.

"You were, naturally, slightly unhinged after all your experiences."

This guarded reply was unsatisfactory.

She felt exasperated. Looking across at him, she fancied the suspicion of a smile hovered around his lips.

"You realize, of course, that anything I did—or said—was because—I mean, it was not my normal state!"

"Oh, I quite realize that!" His tone caused her to look up quickly again.

"Why are you laughing?" she asked uneasily.

"Why are you so afraid?" he retorted.

Nonplused, she took refuge in a dignified silence. Finishing her breakfast, she looked round the bay—at the rugged hill beside them, the palms and dense forest trees in the background, the coral shingle and white sand stretching down to the magnificent blue of the lagoon, in the distance the reef and vast stretch of limitless sea: the intensely vivid colors and contrast shone in the sunlight with extraordinary brilliance.

"It's all very beautiful," she said at last, conversationally.

"It is!" he agreed warmly, rising to his feet. Bringing his mug filled with water, he sat down close beside her.

"Now, please mend my head."

Barbara was concerned over his pallor and the lines surrounding his eyes.

"You look worn out!" she exclaimed involuntarily. "Didn't you sleep well last night?"

"Not a wink!" He glanced quickly up at her. Whereupon her unraveled confusion returned fourfold; and she finished her job in silence.

"I'm going up the hill to the wireless," he observed then. "You need not fear the natives. They won't return until they have mustered their numbers."

At her look of alarm he continued hurriedly: "I've got a scheme for scaring them off altogether. I shan't be long away. If you shout, I shall hear."

There was no suggestion of her company being required. She watched him disappear, with a sickening sense of the oppressive loneliness that she dreaded; but pride forbade her uttering a word to detain him. Then, with unconscious imitation of Croft, she threw her head a little back; clenched her hands; and entered the hut. . . .

While the natives hurried to the south, to prepare for battle, the man sat on the ground beside the transmitter, staring out to sea, his brain working on the scheme to which he had just alluded; his mind torn between conflicting decisions. In this predicament, at the mercy of a tribe of hostile savages, there were but two forlorn hopes of defense. One lay in the little weapon down in the hut, with its limited supply of ammunition; the other in the innerent superstition of the islanders. If once the latter could be roused; if his ruse, for all its wildness, succeeded, their lives might yet be safe. On the other hand, wireless messages might reach a ship in time. There was not enough electrical energy for both purposes. . . . Which should it be?

"My God!" he muttered to himself. "Was ever a man in such a d—d position?"

IV

No better tonic could have been given to Croft's mind than this necessity for immediate action. Until he had made his decision and the details were matured, he forbore to alarm Barbara with the prospect before them.

For about two hours he was absent. Then a spiral of gray smoke ascended from the hilltop, and he appeared with his arms full of wire.

"I have left a beacon burning, in case a passing vessel—" Abruptly he ceased, standing still, his eyes upon the figure emerging from the hut.

"A transformation!" he exclaimed; and there was a strange new tone in his voice.

The dainty shoes and stockings had been discarded, the hairpins thrown away. With a long thick plait swinging down her back, sleeves rolled up, bare feet sinking in the sand, she flashed him a shy look of inquiry.

"It seems more natural—here," she said.

Thus did Barbara take the first step from out the net of lifelong conventions, and tread the free spaciousness beyond.

"You fit in so well—as if it is your natural sphere!" she added.

He smiled half to himself, patted the spare seat beside him. Rather wonderingly she approached, looking, he thought with compunction, extremely young and delicately made. To inform a sensitive girl of the forthcoming attack of possible cannibals was, to Croft, ten times more formidable than meeting them single-handed. He was not versed in the handling of these situations.

Taking her hand, he drew her down close beside him; then, in a few curt sentences, he told her.

The fingers he held closed convulsively upon his own; her free hand

"They Wouldn't Kill You," He said. "Do You Understand?"

clenched itself upon her knee; the faint color drained away, leaving her face quite white.

"Can't we go—hide somewhere—on the reef?" she urged, turning dark eyes of fear upon him.

He shook his head. Very thoughtfully, from every point of view, had he considered the position. Should they, by hiding, elude the natives tonight, it would be but a respite. The same danger would surround them every moment they spent here; they could never know peace or safety. For some reason these natives were hostile: something must be done to overcome their hostility. Until and unless a friendly compact could be made, they must be forced to leave the two white people alone, through fear. All this he explained to the girl, who recognized the wisdom of it, as well as what she deemed the impossibility.

"Two! Against, possibly, hundreds! How can we make them fear us?" she asked hopelessly.

"Through their superstition," he replied promptly. "Once make them believe we deal with the supernatural, or possess magical powers, and they will make us tabu. The dread of death or disease from violating a tabu will cause them to shun us like lepers."

Barbara, inexperienced in natives' ways, was only half convinced. She listened incredulously to the scheme he propounded, her knowledge of electricity being limited.

"I will get some sticks," he concluded, rising; "and place everything in readiness; then I shall turn in for a bit. This afternoon we'll strengthen the walls of the hut; and I'll put up a partition. Then we shall each have a room until we can build another hut. Plenty of work before us, if rescue doesn't come soon!"

Silently, she helped to collect sticks, an extraordinary numbness pervading her mind. Croft's spirits rose. He had faced and eluded death too often to fear it. His confidence in this simple ruse puzzled her.

Collecting the rubber shock absorber belonging to the wireless outfit, he broke the sticks into short stakes showing Barbara how to cover them. This done, he proceeded to fix them firmly in the ground round the hut then attached the aerial to the top of each: thus forming a wire circle a few inches above the ground, as far from the hut as the amount of aerial permitted. The two ends were carried through the entrance and connected to the transmitter within.

"Now!" he exclaimed, "when I wave, press the key on the transmitter here, and watch the result."

He went out to the wire; and, kneeling down, placed one hand about half an inch above it. Raising the other, he gave the signal.

She pressed the key as directed. Immediately, a series of bright blue sparks flashed, like fireflies, from the wire to his hand, which he repeatedly jerked away; then, delighted with its success, he returned to her.

"You see," he explained, "the volume of current is always large with wireless, therefore takes effect by sparking at the moment of contact. The human body is, of course, a conductor. Our visitors will get the shock of their lives—especially as they usually approach any object of attack by waddling along on their stomachs!"

He chuckled with the anticipatory enjoyment of a schoolboy over a practical joke; then suggested having some food.

Mechanically she fetched Aunt Dolly's box and drew out tins of beef and coffee, heroically trying to share in his confidence.

He talked on, compelling her to attend, diverting her thoughts until the meal ended, covertly watching her every expression. Then he drew her within the hut, to rest.

Mechanically again, she entered, going to the little window and looking out, drearily, toward the palms. He fixed up the door, then came over to her.

"You don't feel at all nervous?" he asked nonchalantly.

She turned, with a forced smile.

"Oh, no! . . . Dear me, no! . . . Of course not," she answered, with terrific emphasis.

"That's all right! You're a plucky soul for a girl!"

She flashed an indignant look at him, which, in spite of herself, faded as she met the unexpected laughter in his eyes.

"You wanted adventure!" he reminded her. "You wanted to 'feel life,' to learn the 'meaning' of things, to sound the 'deep chords.' Well! You have your heart's desire—at the very bedrock of nature! Seize it, Barbara! Drink to the very dregs! Then tell me if you have discovered what—is missing."

Surprised, she listened silently. He turned away, laid one of their coats just inside the door, and threw himself down upon it. Within a few minutes he was sleeping the sleep of sheer exhaustion.

But the girl sat for long under the little window, lost in thought, wondering over his words. And ever her mind reverted to one sentence. A few words of praise from one whose opinion you have unconsciously learned to respect, and what a world of courage do they bring in their train!

• • • • • • • •

There are no pleasant hours of twilight in the tropics. The sun sets, and soon the world is wrapped in darkness. It had disappeared behind the west hill, and already a few stars were showing in the swiftly darkening sky, when Croft came out of the hut to where Barbara was collecting the remains of their supper. He carried something in his hands.

"Do you understand a revolver?" he inquired.

She turned round, mingled fear and relief in her face. "Have you one? No; I have never fired one in my life. I wouldn't dare!"

"Well, I want to show you how to use this little beast, in case anything goes wrong and you are left—"

She laughed, miserably.

"If they manage to kill you, they will soon finish me off!"

He regarded her in silence, for a moment.

"They wouldn't kill you," he said quietly. "Do you understand my meaning?"

Her face went very white. For a few minutes she paced up and down, hands clenched, facing this new terror, striving to control herself before this man whose very look discouraged weakness. The coolness of his bearing, as he stood playing with the weapon in his hands, calmed her, bracing her to a simulation of the same fearlessness.

"Show me," she said, going to him.

This is interesting. How will a girl of Barbara's upbringing react to these primitive conditions?

(TO BE CONTINUED.)

Symbolic Indian Masks

According to the Bureau of American Ethnology, tribes of Indians throughout North America wore masks at religious festivals and at some social gatherings. Sometimes the priests alone were masked, though in other cases the entire company would appear in masks. The false faces generally represented supernatural beings. The simplest form of mask was one prepared from the head of a buffalo, deer, or some other animal. The mask stood, not for the actual animal, but for the type of animal and its supernatural characteristics, and the person wearing it was for the time being endowed with the distinctive quality of the animal.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

How to build up your Weight

TO BE under weight often proves low fighting-power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood-cells, you begin to become plus. That's why S. S. S., since 1826, has meant to thousands of underweight men and women, a plus in their strength. Your body fills to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them.

Free Booklet
Send name and address to S. S. S. Co., 111 S. S. S. Bldg., Atlanta, Ga., for special booklet on the Blood.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

S.S.S. The World's Best Blood Medicine

When Coal Mines Explode

Coal mine explosions are most likely to occur between six and nine in the morning, and between three and seven o'clock in the afternoon.

Do You Know

That boiled frostings or uncooked icings will be much improved by adding a small amount of Calumet Baking Powder.

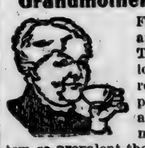
A bad rumor about a man always starts from some one who doesn't like him; remember that.

Brought up on a Farm

As a young man Dr. Pierce practiced medicine in a rural district and was known far and wide for his great success in alleviating disease. He early moved to Buffalo and put up in ready-to-use form, his Golden Medical Discovery, the well-known tonic for the blood, which is an extract of native roots. This "Discovery" of Dr. Pierce's clears away pimples and annoying eruptions, tends to keep the complexion fresh and clear. It corrects the disordered conditions in a sick stomach, aids digestion, acts as a tonic and enriches the blood. Vim is sure to follow its use. All dealers. Tablets or liquid.

Garfield Tea

Was Your Grandmother's Remedy



For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

Stop Child's Cough Quick--To-day

Before it has a chance to develop into croup or something dangerous, get right after that cough of your child's. No use to dose with ordinary cough syrups. HELP FOR MOTHERS OF AILING DAUGHTERS

Mrs. Quigg and Mrs. Betton Tell in the Following Letters What Is Best To Do

DAUGHTER OF MRS. QUIGG
310 MAIN STREET, ROYERSFORD, PA.

Royersford, Pa. — "My daughter was sickly from the time she was 13 years old, and when she was 15 she was irregular and also had severe headaches and pains in her sides and back. She was this way about six months before I began giving her Lydia E. Pinkham's Vegetable Compound regularly although she had tried it before. It helped her very much. She is not bothered by headaches, backaches, or cramps any more, and has not missed but one days work. We recommend it to other mothers with girls who have these troubles." —Mrs. QUIGG, 210 Main Street, Royersford, Pa.

Mrs. Betton's Letter

Ridgely, Md.—"I want to tell you how much good your Vegetable Compound has done my daughter. Before she started taking your medicine she was in a nervous, run-down condition, so that she could hardly sleep at night. She always had a pain in her side and sometimes cramps so that she would have to go to bed. She is a schoolgirl and was going to school only half the time because she was so weak and run-down she could not stand it to walk there some days. She was this way for three or four years. She had been reading your advertisements in the different newspapers and she noticed that some of the girls and women had suffered just as she had. So she took Lydia E. Pinkham's Vegetable Compound and is a lot better. With the first bottle everybody could see a big change. She can go to school every day and can eat just as much as any one else, when before she did not have any appetite. We have told others about the medicine, and we are perfectly willing for you to use these facts as a testimonial. We are also willing to answer letters from other women concerning the help my daughter has received from the Vegetable Compound." — Mrs. JOSEPH BETTON, Ridgely, Maryland.

Building Sets Record

During the past three years there has been expended for new building in the United States somewhere between $14,000,000,000 and $16,000,000,000, and the year 1924 has seen a larger amount expended for building than any previous year.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

There are some men who, if you agree with them, end the conversation right there.

On the Links

He started off well for a beginner and remarked: "Golf is pie."

But just then he got a bad slice.

There is nothing more satisfactory after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue.—Advertisement.

It is difficult to persuade men that the love of virtue is the love of themselves.

Many people imagine that Worms or Tapeworm cannot be expelled entirely. A single dose of "Dead Shot" proves that they can. 372 Pearl St., N. Y. Adv.

Cheerfulness is the principal ingredient in the composition of health.

Kindly Old Gent—"What is your occupation?" Wayfarer—"My wife's out of work at present, sir."

Build your body back to Health

TANLAC is a great natural builder. It revitalizes the blood, stimulates the digestive organs, rejuvenates the liver and peps you up all over.

From the four corners of the earth we gather the roots, barks and herbs that go into Tanlac. We compound them after the famous Tanlac formula that has brought health to millions.

Our files are crammed with testimonials from men and women in every walk of life, who state gratefully that Tanlac has brought them back to vigorous strength.

If you suffer from indigestion, loss of appetite, can't sleep or rest; if rheumatism is making life a torture; if your liver is out of sorts and your body has run down to skin and bones, get a bottle of Tanlac at your druggist's and start taking it right away.

You'll be amazed to note the improvement that comes at once. For the first time in months you'll feel like eating some good solid food. You'll wake up in the morning rested and refreshed, ready for a good day's work. First thing you know you'll have some color in your cheeks and the sparkle of health back in your eyes.

Don't put off taking Tanlac. Begin now if you want to build your body back to health and vigor.

Baptist Minister Praises TANLAC

"I had suffered from stomach trouble and nerve trouble for over 30 years until I could hardly summon the strength necessary to prepare my sermons. Six weeks after taking Tanlac I had a brand new outlook on life. I had a fine appetite, steady nerves and a brand new digestive system. Tanlac has never failed me."

Famous Forts in U. S. History

By ELMO SCOTT WATSON

(©, 1925, Western Newspaper Union.)

Where John Jacob Astor's Great Plan Failed

"Two leading objects of commercial gain have given birth to wide and daring enterprise in the early history of the Americas: the precious metals of the south and the rich peltries of the north," writes Washington Irving in the opening chapter of "Astoria," the chronicle of one of the most romantic of all these daring enterprises. For the story of Fort Astoria is the story of how John Jacob Astor, once a German immigrant boy in New York founded the American Fur company in 1809 and how the next year he organized the Pacific Fur company to compete with the lordly Northwest company of Canada.

Associated with him were three former employees of the Northwest company, Alexander McKay, Duncan McDougal and Donald McKenzie, and Wilson Price Hunt of New Jersey. Early in 1811 a post was established on the Columbia river in Oregon as the central trading point and named Fort Astoria in honor of the founder.

The short history of Fort Astoria is full of tragic incident—of the loss of the ship Tonquin, of the perilous trip overland made by Hunt and McKenzie and of the questionable conduct of McDougal which resulted in the loss of the post.

At the outbreak of the War of 1812 the Northwest company convinced the British fleet operating in the Pacific that the store of furs at Fort Astoria would be a rich prize and a war vessel was dispatched to capture it. In the meantime other agents of the company had appeared before the fort and persuaded McDougal that it would be best to sell out before the post was taken forcibly. The one humorous incident in all of the tragedy of Fort Astoria was the indignation of the captain of the British sloop-of-war when he found that his warlike expedition had been forestalled by a snug commercial agreement and that the anticipated booty had become British property in the regular course of traffic. When he saw what a miserable little stockade was this post which he had been led to believe was a formidable military fortification, he exclaimed "Is this the fort about which I have heard so much talking? Damme, but I'd batter it down in two hours with a four-pounder!"

Fort Astoria was renamed Fort George when the British flag was hoisted over it. Although John Jacob Astor's grand enterprise had failed, he lived to see it become Fort Astoria again, after the cry of "54-40 or Fight" had resulted in Great Britain's giving up her claim to the Pacific northwest and acknowledging the sovereignty of the United States "where rolls the Oregon."

Its Builders Received 18 Cents a Day

On August 18, 1846, Gen. Stephen W. Kearney's "Army of the West," marching to take part in the Mexican war, arrived in the "drowsy old town" of Santa Fe and took possession. Immediately afterwards cannon were placed on an eminence overlooking the town and these guns roared forth a salute to the Stars and Stripes.

A month afterwards Kearney wrote to Brigadier General Jones, adjutant general of the army, as follows: "As this is the capital of the territory a new fort is being built under the direction of Lieutenant Glimer of the engineers and is called, subject to your approval, Fort Marcy." Evidently the adjutant general approved of this method of honoring William Learned Marcy, secretary of war at that time, and so Fort Marcy its name remained as long as it existed.

Perhaps no other fort in the United States was ever built by the government at such a small cost. The work on the fortification was done by the volunteer troops in Kearney's army, a certain number of whom were detailed to this duty each day. Every man who worked 10 days or more consecutively got the magnificent sum of 18 cents a day extra on his pay!

The fort was further improved by Col. Edwin V. Sumner of the Second dragoons, who took command of the military department of New Mexico in July, 1851, and some of the regiments who garrisoned it later saw some stirring service during the Civil war.

Fort Marcy was not the first fort erected on this hill in Santa Fe. Away back in the beginning of the Seventeenth century, before the Pilgrims landed on Plymouth Rock, the Spanish explorers who pushed north from Mexico found on this site evidences of a Pueblo ruin which had been abandoned many years before but which evidently had once been used by these peaceful people as a defense against the wild tribes which sent raiding parties against them.

Although St. Augustine, Fla., and the predecessors of Fort Marion seem to have the best claim to the distinction of being the first town and first fort built on the North American continent by the whites, Santa Fe and the progenitors of Fort Marcy can claim a generous share in the honor of being relics of the rule of Spain in the New World.

GOOD ROADS

GLACIER TRAIL IS MAKING BIG PLANS

Two very important divisions were completed last season to the Glacier Trail system, one the alignment into northern South Dakota and the other through the Lake Park region of Minnesota to Winnipeg, Manitoba. These divisions will serve thousands of travelers in 1925.

Figures accumulated from the states of Missouri, Iowa, Minnesota, North and South Dakota and Montana indicate that the roadbed of the Glacier Trail system is exceptionally good; 2,500 miles of well-marked alignment is composed of 310 miles of paving, 1,497 miles of graded gravel, 693 miles of graded dirt highway, most of the latter being under contract for surfacing in the near future. Two million dollars was invested in 1924 in permanent construction along the 2,500 miles of this popular trail from St. Louis to the northwest.

Advices from the state highway departments indicate that Missouri leads in proposed development and in 1925 will be the banner state in accomplished road construction, and that Iowa is well advanced, except for surfacing in the southern part of the state, but that radical changes in the administration of the Iowa road program now under consideration by the legislature will bring about the desired results.

The Missouri and Iowa road development on the Glacier Trail begets an epoch-making period in a changed trend of travel to the north and northwest.

Illinois pavement now carries the hundreds of thousands of travelers who will soon be passing over the Glacier Trail 200 miles closer to their northern objectives.

Authorities concede that 90 per cent of the automobile tourists are directed from touring bureaus in their travels. It is, therefore, consistent that the marked highways, which really give value received, maintain touring bureaus at strategic points.

Last season the Glacier Trail maintained three touring bureaus, located advantageously for the travelers' convenience in St. Louis, Mo.; St. Paul, Minn., and Minneapolis, Minn. These three bureaus handled 16,776 touring parties in 1924, with an average of three persons to the party, or a total of 50,328. Forty-two per cent of these traveled all, or a part of the way, on the Glacier Trail, as directed from these bureaus. More than 10 per cent completed a tour to the Glacier National park, Montana.

This year more bureaus are to be established and managed by thoroughly competent attendants, who will have available accurate touring information, with road condition and weather reports, and whose business it is to direct just as many travelers as possible over the route of the Glacier Trail.

Through affiliation with the National Highways association of Washington, D. C., the Glacier Trail has become a part of the proposed 250,000-mile system of national highways to be built and forever maintained by the United States government.

Through this national association it has been possible to put out 100,000 large and accurate United States touring maps, which set out the alignment of the Glacier Trail, as well as all the other main automobile thoroughfares in America. These will be displayed in all principal touring bureaus, hotels and garages.

Approving Federal Road System Epochal Event

The final designation and approval of the federal-aid highway system in all the states is an event that will be recognized as time goes on as one of the milestones of progress in the improvement of the highways of the country, according to the annual report of the bureau of public roads of the United States Department of Agriculture.

The map of the system presents a definite plan for the improvement of the main highways of the nation—a plan that it is possible to carry out in a period of not more than ten years, and which, in that limited period, will result in a connected system of arterial highways that will permit unobstructed highway transportation between all cities of 5,000 population or larger. The duty of constructing the connecting roads which are needed to give access to the main system rests with the states and counties.

The roads on the system have been and are being improved by the states with the assistance of the federal government, which pays up to 50 per cent of the cost. During the last fiscal year, 8,620 miles were completed in this way, bringing the total completed since 1916 to 35,157 miles.

Gasoline Tax Favored

More than three-quarters of the states in the Union as well as the District of Columbia have adopted the gasoline tax as an equitable means of procuring funds for highway development. In practically every case the funds secured through this tax are used for road improvement, either construction or maintenance. Many highway officials predict that within a few years this means of raising funds for highway work will be in force in every state in the nation.

Zane Grey as Fisherman

Zane Grey holds the world's record in catching tuna fish, his latest catch being a monster that weighed, when landed, 758 pounds. The author had to tussle with it more than six hours before it was landed safely and weighed. Grey is enthusiastic in fishing and had special boats built, special tackle made, and spent many weeks studying the habits of the big fish, aiming to make a new record. He did.

20,000 Housewives to Be Made Happy

Mrs. Harry Burke of Hudson, Ohio, has just had the good fortune to win an unexpected prize. She wrote for a 10c bottle of Liquid Veneer, which was sent her free and postpaid. The makers wrote asking her to tell her friends, if she liked it. She writes that she was so delighted the way it made her furniture look brand new that she told 15 of her friends and the makers sent her, entirely free and postpaid, a great big beautiful $2.00 Liquid Veneer Polishing Mop. "I'm simply delighted," she writes.

Twenty thousand more of these $2.00 Mops will be given away to housewives. Write for a free 10c bottle and ask for descriptive circular 15, telling you how to get this magnificent polishing mop entirely free. Address Liquid Veneer Co., Buffalo, N. Y.—Adv.

Serious Lumber Situation

The lumber cut per capita in 1906 was 525 board feet. This figure had dropped in 1922 to 285 board feet, and at present the cut is dropping off at the rate of 1,000,000,000 board feet a year, which indicates the serious forest situation which confronts the country.

Baby's little dresses will just simply dazzle if Red Cross Ball Blue is used in the laundry. Try it and see for yourself. At all good grocers.—Advertisement.

One-Way Talent

Talents usually come singly. The man who makes money seldom knows much about the art of spending it.—Duluth Herald.

Stops itching— Reduces irritation

Clears away skin trouble

IF you have today a spot of eczema, or irritation on your skin, cleanse the affected part by bathing with Resinol Soap, then smooth in gently with the fingers a coating of Resinol Ointment. One application frequently stops the itching completely because the special soothing healing properties of Resinol help it to sink deep into the pores where the trouble really lies and restore a normal condition.

Use Resinol Soap daily for your toilet and bath. It helps to keep the skin healthy. Ask your druggist.

RESINOL

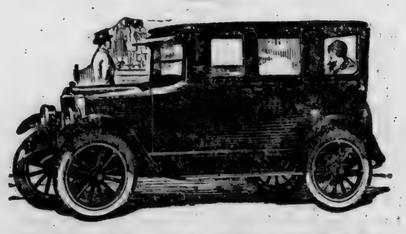
Northern Florida and Southern Georgia

Land values in some parts of Florida have advanced faster in recent years than in any other part of the eastern United States. Every year a million or more Florida tourists pass lands in northern Florida and in southern Georgia where prices are still low and general farming conditions offer attractive opportunities for investment and profitable farm operations. Write to W. E. Price, General Immigration Agent, Southern Railway, Room 660, Washington, D. C., for full particulars.

W. N. U., FORT WAYNE, NO. 14–1925.

Low-cost Transportation

Star Cars



THE STAR 4-DOOR SEDAN

The incomparable Star chassis, the Million-Dollar Star Motor and the modern roomy and comfortable body of the Star 4-door Sedan offer a total value per dollar of cost that warrants first consideration by all of the millions who seek up-to-date, low-cost transportation.

2292 Star owners report an average cost of 1/14 cent per mile for mechanical repairs and replacements.

2292 owners report an average of 23 8/10 miles per gallon of gas.

2292 owners report an average of 9817 miles per set of tires.

To drive their cars it cost these owners on the average of 2 1/10 cents per mile for gasoline, oil, tires and mechanical repairs and replacements.

This sort of low cost transportation is of vital interest to any man or woman who travels. Ask the nearest Star Car Dealer to give you more detailed facts.

Birthplace of Religion

A view of the holy city from the road linking Jerusalem and Jaffa. The ancient walls of the city are seen, as are also the domes of the Church of the Sepulcher. The tower of the German Church of the Savior is also visible. In the foreground is one of the ancient trees which has cast its shadow over the holy places for centuries.

The Sepulcher and the Holy City

JERUSALEM is a holy city to many of the various religions of the world and has been considered so for thousands of years. It is the holiest city in the world to Jews. Christians have a particular reverence for it because it was the city in which the most important events in the life and death of Jesus Christ took place. Mohammed, in his earlier years, taught his followers to bend the knee toward Jerusalem instead of Mecca.

We have arrived at the chief gate of this celebrated city—the Jaffa gate, set in the walls, the cases of which at least date from a remote antiquity. On the outside of the gate it seems that we have come upon the meeting place of the East and the West. Here are khans, the horse and camel markets, stalls for the sale of all kinds of goods, stores, even cafes and restaurants. This particular spot has been called the busiest place in all Judea. The women from Bethlehem—wearing a distinctive garb—are marketing. Nuns, monks and other ecclesiastics in their distinctive habits, as well as the uniformed military attempting to keep order, add to the strange array of costumes. As I was about to enter the gate I stepped aside, for there was a short parade coming through the gate. About 20 men, each carrying a heavy pole, which fell to the pavement heavily to mark steps, walked behind a dignified gentleman who wore a huge black headgear from which a black drapery fluttered to his black robes. I inquired his identity and learned that the patriarch of Jerusalem was going to pay a visit to the patriarch of Antioch and this was the guard of honor accompanying him.

King David's Tower.

Then I passed inside the gate, a visitor relates. To the right, rising like a great medieval castle or stronghold I saw the tower of David, one of the huge relics left intact when Titus destroyed the city of Jerusalem. This tower was not built by King David, but it is likely that it rests upon stones that he ordered placed in position—enormous stones larger than any placed in modern constructions.

From the balcony of my room at the hotel I looked out over the deep blue expanse. There were twinkling lights everywhere and far above them all there was an electric-lighted cross above the tomb of Jesus Christ, visible for a great distance. And strangely enough, all was still. Jerusalem retires shortly after sunset. There are no theaters, few night cafes and almost no social life. It is not considered safe for foreign visitors (particularly Christians) to be abroad in the narrow streets at night. Jerusalem the Golden abounds in religious fanatics, cranks and many people who undoubtedly are insane. The city is visited by zealous Mohammedans who have recently made the pilgrimage to Mecca and now in the second most sacred city in the world, are not to be trusted in the dark.

Burden of the Cross.

Early the next morning, when the skies are beginning to show the first signs of dawn, the bells and gongs begin to sound from hundreds of towers. Sleep is impossible after five o'clock. And the clatter and shouting again come up from the streets. Caravans have arrived from the desert, the market people are bringing in their vegetables, meat, wine and bread. Jerusalem has perhaps 75,000 people, great numbers of whom reside at convents, monasteries, hospices and other religious institutions. All must be fed. The city is 4,000 years old and doubtless many of the customs have not changed materially since the time of Jesus Christ.

The second station of the cross is at the foot of the staircase leading to the barracks, for here it is believed that the cross was placed upon Jesus Christ. Then we come to an arch, called the Ecce Homo arch, where Pilate uttered the words: "Behold the man."

The third station is an Armenian hospice, where Jesus Christ sank beneath the weight of the cross and near by there is a broken column upon which it is said he rested his hand when he was about to fall.

The fourth station lies between the traditional house of the poor man Lazarus and the rich man Dives. An inscription in a lane to the left records that here Jesus Christ met his mother.

At the corner a short distance farther along is where Simon of Cyrene took the cross from Jesus Christ and here again is a depression in a stone that marks the place where the condemned man's hand rested.

We ascend the street and arrive at the sixth station, which marks the home and the tomb of St. Veronica, who wiped the perspiration from Christ's brow on a handkerchief—the impression of his face remaining on the cloth, which is still preserved at Rome.

The last part of this street is vaulted and here is the seventh station, where Christ fell the second time. Here is the hospice of St. John for the entertainment of pilgrims.

At the Eighth Station.

A black cross on a Greek monastery marks the eighth station and is where Christ addressed the women who met him.

The ninth station is a Coptic monastery and here again Christ is said to have sunk under the weight of the cross.

The remaining five stations are in the Church of the Holy Sepulcher.

A narrow sloping street leads down into a small plaza, in which there are large paving stones. At the sides are small booths where crucifixes and rosaries from Bethlehem and Hebron are offered for sale. Here also stand several military guards. We are at the entrance to the church, not at all a beautiful structure upon the outside, one not at all in keeping with what one might expect, for were it possible, all of Christendom would gladly contribute to making this the most beautiful building in the world. The key to the Church of the Holy Sepulcher, however, is a possession of a family of Jerusalem—a hereditary honor that is in the hands of Moslems. Roman Catholics, Greeks, Druses, Abyssinians, Armenians, Copts, Maronites—representative of all Christians save the Protestants, have hours of worship assigned to them, when religious services are conducted according to their own ritual. And here come the millions to pray. Next Sunday morning, Easter, the holy fire will be passed from this church to thousands of waiting tapers and theoretically, at least, that fire extends to all of the Christian churches of the world.

As we enter the old structure we come upon a long slab of pinkish marble lying on the floor. This is called the Stone of Unction, and tradition has it that the body of Christ was placed upon this stone while it was being prepared for burial in the tomb that was furnished by Joseph of Arimathea.

Stone of Unction.

There are many chapels that will claim our attention in this church, but we leave them until later and go at once to the sepulcher itself, which is under the dome in the center of the church. The sepulcher itself is a small chapel of whitish marble that has grown to have the appearance of onyx. It is 26 feet long and 18 feet wide. At the entrance to it are huge candelabra with burning tapers, and over and around the entrance are suspended numerous gold and silver lanterns.

Before entering the sepulchre we must stoop, because the entrance itself is not more than four feet high and is an ornate archway. We come into what is known as the Chapel of the Angel, where is shown the actual stone that was rolled away from the grave of Christ on Easter morning. Pilgrims kneel and kiss this stone, which is covered with glass, else it would have been worn away by reverent lips long ago. In fact, it is necessary frequently to change and replace the glass covering.

Christ's Actual Resting Place.

One at a time we pass beyond to the small room that is about six feet long and six wide. A niche in the wall veneered with marble is the actual resting place of the body of Christ. Forty-three lanterns of gold hang from the ceiling. A priest of some denomination and creed, according to the time of day the visit is made—for each creed has its appointed hour—stands at the actual sepulcher and sprinkles holy water or anoints with oil the heads of all who incline toward the niche.

It is very warm in this tiny chapel, owing to the blazing lanterns, and one does not remain long. Pilgrims usually drop their burial shrouds upon the grave, the priest sprinkles them and they are carried away to distant lands as prized possessions and kept until death.

Coming out of the little chapel, we visit the Chapel of the Apparition, where Jesus Christ appeared to his mother after the resurrection. Then to the Chapel of the Parting of the Raiment, the Chapel of the Crown of Thorns, and to the Chapel of the Cross, where the exact location of the three crosses is indicated by silver. Here the mighty rock is split and there is a great crack that might only have been caused by a convulsion of nature—the earthquake that followed the sacrifice on Calvary.

Magnificent Ornamentation.

Some of the chapels are magnificently ornamented, as, for instance, that of the Greeks, from the ceiling of which hang dozens of gold lanterns. There is a portrait of Christ, perhaps two feet long and one wide, that was the gift of the late czar of Russia and that is made of precious stones—the robe being of rubies.

Here in this church also is the traditional grave of Adam. From earliest times this legend has persisted and while it cannot be authenticated or proved in any way, Adam's bones are supposed to rest beneath the cross upon which Christ was crucified. And before this place is a silver disc in the pavement indicating an early belief that here is the center of the world. That might be open to argument, but one thing none may deny: The Church of the Holy Sepulcher at Jerusalem is sacred to more people than any other place on the earth's surface.

EASTER

Whene'er I hear the Easter bells
Ring out their carols gay,
The graves from all the hills and dells
Dissolve from sight away,
I see the mighty planet left
Without a marble stone
To tell of death, or one bereft
Who comes to weep alone.

Dear hands, long folded to their rest,
Return to touch my own,
And voices memory has blessed
In each familiar tone
Speak as in other days to me;
While on the springtime's breath
Is borne to every land and sea
The news: "There Is No Death."

—*Clarence E. Flynn in Farm Life*

PERSONAL PARAGRAPHS

Potted plants for sale at News office Thursday. Come in and see them they are real cheery.

Frank Limpert and wife of Hicksville were Sunday afternoon callers at Howard Shilling's.

Ada Berry and Anna Rickett spent Sunday afternoon in Auburn with Sol Shearer and daughter.

The Methodist Ladies Quartet appeared on the W. C. T. Convention program at Auburn, Tuesday afternodn.

Easter programs will be given at each of the St. Joe Sunday schools Better plan and attend the place of your choice.

Rev. R. W. Newell and Miss Sarah Renner of Ashley were dinner guests of H. J Renner and wife Monday evening.

Two weeks more school and then Young America will be turned loose. Next week examinations will be held to see how much they don't know.

Mrs. Lola Wells Kiger of Daleville, a State W C. T U. worker addressed the pupils of the local school Wednesday morning Her subject "Law Enforcement" was presented in a pleasing manner and was well received.

Foreclosure of a mortgage on an 80 acre farm in Spencer township is sought by suit filed by Wm. H Davis and Elizabeth Davis against Theodore B. and June E. Dinus On February 25, 1915 a note of $2 700 was given, payable in ten years and secured by mortgage The complaint states that no interest has been paid since 1922, also that he has failed to pay taxes and insurance. Judgment of $3,600 is demanded.

Gladioli bulbs for sale at News office—Extra choice colors.

Mr. and Mrs. H. M. Widney were Fort Wayne visitors, Monday.

Charles Lawson of Auburn visited his mother, Mrs. Virginia Lawson, Sunday evening.

The Coburn's Corners Aid will meet in an all day session with Mrs. Kel Hart April 16.

Mrs S. A. Abel of near Newville came Monday night for a few days visit here with her son and wife.

An income for the family this summer would be fine. Contract pickles for St. Joe Salting Station.

Transfer paper at NEWS office 2 sheets for 5c. Get some now for that pattern you wish to transfer.

Mr. and Mrs Artbur Arnold of near Hicksville, were Sunday afternoon guests in the home of Mrs Nan Lyeber.

A dime goes a good ways when you buy a Ladies Home Journal at News office We have all kinds of good magazines.

Mr and Mrs Wm. Randall entertained Mr. an Mrs Frank Myrtle of Berwyn, Illinois, Saturday night and Sunday.

Mrs Anna Dilley had as Sunday guests, Link Smith and family of Auburn Junction and Clyde Maurer of Fort Wayne.

Mrs F. M. Thornton will go to Fostoria, O, Saturday to attend the funeral of an aunt who died April 3rd at San Diego, Calif

Floyd Ridgway and wife entertained at Sunday dinner Delvin Armstrong and wife of Fort Wayne and Samuel Armstrong and wife.

Lightning Rods, better yet and cheaper than the rest and they save insurance.
Bowser & Reed.

Mr. and Mrs Reuben Reichelderfer and Mr and Mrs. Peters of Harlan were Sunday afternoon guests of Frank Sechler and wife

Mrs Willys Wilcox and small daughter, Carma Jean, returned to their home in Fort Wayne Saturday, after a visit with her parents here.

Saturday afternoon the Joseph Sechler residence caught on fire and the fire department made the run and extinguished the blaze. The damage was small.

Friends here will be pleased to learn that a baby son, Robert Floyd, was born Friday at the St. Joseph hospital to Mr. and Mrs. Floyd Snyder.

George Tustison was a Saturday afternoon and Sunday guest and John Baker a Sunday guest of Mr and Mrs. Frank Tustison. Both are of Auburn.

Mesdames Hattie Hepker, Sadie Bierley and two children and Ethel Sharp and two children of Fort Wayne spent Wednesday with Mrs. John Betz. Mrs Hepker remained until Saturday.

Mr and Mrs. Earl J Smith will leave here Thursday for Holgate, Ohio, for a few days visit with the former's mother, Mrs. Florence Dancer and family, before leaving for New York City where they will sail for France.

Miss Ruth Bowen of Ft. Wayne, visited Ralph Seebler and wife from Thursday until Sunday, returning home with her parents, Mr and Mrs Glen Bowen Sunday who with their small daughter, Elizabeth spent the day here.

John Baker and wife of Scipio, Abner Trostel and wife, O. E. Ginther's and M. M. Maxwell's were Sunday afternoon callers in the Meade Baker home. Mrs. Baker has been sick for the past week.

The Choral Society will render their Easter Cantata, "The Thorn Crowned King" Sunday evening at the Methodist church. A large audience is expected as the community appreciates the efforts of the society.

Derwood Ridway was operated on Tuesday at Hicksville for a growth on the side of his neck. Dr. Scudder Hull performed the operation The growth has been about a year coming and of late it grew so rapidly that he was unable to work. He stood the operation fine and if nothing interferes will be home by the first of next week.

Execration of Judas Marks Mexican Easter

Easter throughout Mexico is celebrated by the hanging of Judas. For two weeks before the end of Lent the shops display hundreds of quaint figures ranging in size and price from a little toy a couple of inches long and costing only 1 cent to an eight-foot image of the arch betrayer marked at $25. All are made alike, being constructed with a light wooden framework and papier mache head with a brightly painted complexion and bristling mop of coarse hair of ravelled rope-yarn dyed black. Sometimes Judas has a flowing beard, sometimes only fierce mustaches, but he is always made as repulsive as possible, cross-eyed and beetle-browed, with huge outstanding ears and leering lips. On the very small Judases the hirsute adornments are merely painted, but what can be expected for only a cent? Judas is always clothed in paper garments of many colors, green predominating, though why that particular hue should be associated with the crime of the ages is a mystery as great as the custom itself. The more expensive Judas dolls are filled with fireworks that explode and make a great racket when the match is applied to the effigy. Others are stuffed with candy, but these are only hung in private grounds where the purchaser and his friends can enjoy the sweets while watching Judas burn.

Though the hated figure is destroyed in different ways it is always first hung with appropriate maledictions and insults, and left to dangle in the breeze until nightfall, when it is either set fire to where it hangs, if it is possible to do so without endangering property, or cut down and thrown on huge bonfires kindled for the purpose. Sometimes Judas is dragged through the streets by a rope attended by a singing, shouting mob of men and boys until nothing is left of the grotesque manikin but a few scraps of torn paper. All day long, while it hangs from clothes lines, balconies, street signs, hitching posts or trees, Judas is stoned by every passing man, woman and child. Many broken windows are the result, but nobody complains, because it is the proper thing to do. A Mexican would as soon forget to go to mass on Good Friday as to pass a Judas without pelting it with sticks, stones, chunks of mud, tin cans, empty bottles or any missile nearest to his hand.

Great American Surgeon

The father of American surgery is a title sometimes given to Philip Syng Physick, a Philadelphia surgeon and physician, born in 1768, died in 1837. His name and profession made him a butt of the punsters.

Lion Dislikes Men's Hats

Carolina, the lioness in the London zoo, always snorts angrily at any man wearing a light gray hat.

Soil Demonstration Was A Success

The B & O. Soil Improvement special train was at St. Joe Monday morning and a fine crowd of farmers were waiting for its arrival. Some over thirty samples of soil were brought in for testing and a careful analysis was made by Purdue experts to determine the condition. Many of the results were surprising, as only a ton of limestone to the acre was suggested in many cases. The agriculture classes of St. Joe and Spencerville were also present to get the benefit from the lectures. The farmers are to be commended upon their interest in this farm project and also of their appreciation of the B & O. in bringing this opportunity to their door. A car load of lime stone was given to farmers, free of charge for demonstration, and the results will be tabulated by Purdue.

St. Joe looked like olden days, when the farmer came to town by wagon. Practically every tie place in town was occupied.

Call For Help From Red Cross

The terrible storm of March 18, left a path of death and destruction across southern Indiana DeKalb county has never been visited by such a calamity. Are we who escaped this terrible storm willing to do our part in providing relief for those less fortunate? Each city or town seems to be doing what ever seems fit regarding aid for the tornado sufferers. We here appeal to the people of Concord township to give at least just consideration to this notice.

If any one cares to respond to this worthy call you may leave your money at the St Joe Valley Bank or with any one of the following committee: Hattie Widney, Clara Foltz, Della Storer and Hattie Draggoo.

St. Joe Teacher Is Seeking Admission

An application for admission to the DeKalb county bar was filed in the DeKalb circuit court Saturday by Faye Edna Bangs

Miss Bangs is a daughter of Mr and Mrs Charles H Bangs of Richland township and she is now teaching school at St. Joe. She states in her petition that she is a graduate of Tri State college, that she took college work at Huntington college, Winona college, and the University of Wisconsin and that she is a graduate of King's School of Oratory, Pittsburgh. She adds that she has been a teacher in the public schools for six years and that she has studied law for two years while engaged in teaching.

Even a dentist couldn't kill the nerve of some people.

All the late magazines at News office. Place your order—we will save one for you.

Mr and Mrs. Glen Abel of Peru, came Wednesday and visited until Thursday with the former's parents, Mr. and Mrs. J C F Abel

Fay Reichelderfer, wife and son of Fort Wayne, spent over Saturday night with his uncle, John Betz and wife. On Sunday they all motored to Defiance and spent the day with Olen Helf and wife.

Harry D Draggoo of Auburn, was arrested late Thursday on an affidavit signed by his wife, Grace I. Draggoo, charging him with driving an automobile while intoxicated. When arraigned in the circuit court, he pleaded not guilty and was released on $2,000 bond signed by Frank Draggoo. Draggoo was sentenced to the penal farm last September by Mayor Lige for six months on a similar charge. He recently returned from the penal farm. The time of his trial in the circuit court has not been fixed.

Spirit of Easter

"Christ the Lord has risen!"

The Christian world celebrates the great festival.

Christ the Lord gave the world a message.

"Whatsoever ye would that men should do to you do ye even so to them.

"Love your enemies, bless them that curse you, do good to them that hate you and pray for them which despitefully use you and persecute you."

If the doctrine of Christ is professed it must also be practised, else it is but ashes.

Easter Fifty Years Ago

IT IS a little more than 50 years ago that I, as a young minister of a suburban church, was invited to preach, one Sunday morning in April, at the Broadway Tabernacle church, then standing at the corner of Broadway and Thirty-fourth street in New York city, Washington Gladden, D. D., LL. D., writes in the Woman's Home Companion. It happened to be Easter Sunday, as I knew; and although almost no notice of the day was taken at that time by the non-Episcopal Protestant churches, it had been my custom to preach an Easter sermon, and I ventured to bring one with me for that service. There were no Easter flowers, and there was no Easter music. I doubt if it had occurred to the minister or to any member of the congregation that it was Easter Sunday. I thought it prudent, therefore, to make a virtual apology for preaching a sermon on the resurrection, saying that while we, as the children of the Puritans, had little to do with sacred days, it might not be unfitting for us, on the day when many Christians were celebrating the resurrection of our Lord, to turn our thoughts in that direction.

Shows Time's Changes.

After the sermon my good and great friend, then pastor of that church, had just one word of commendation, and that referred to the sentence in which I said that we as Congregationalists had little use for sacred days. "I am glad," he said, "that you emphasized that fact." The incident will illustrate the change which has taken place in the attitude toward the Easter festival of the Protestant churches during the last half century. It is now the day of the Christian year most generally observed in all the churches.

The message of the Easter day to you and me and to all men—what is it? In what words shall we phrase it? We might get some idea of the message from the conduct of those who hear it.

See that man sitting solitary and dejected within his home. There is a knock at the door, and a messenger enters. Now he is delivering his message. The downcast look has gone from the face of the listener; he is all attention; watch him. He springs to his feet; his hands smite each other with a ringing blow; his face is all ablaze with joyful emotion; his voice is pitched in a high key; his movements are full of energy. You have not heard a word that the messenger has spoken, but you know that he must have brought a joyful message.

"Joyful News, Good Tidings."

So if you look into the face of humanity on Easter day, and listen to its accents, and watch its movements, wherever the message of Easter has been spoken, you know that it is joyful news, good tidings. The pealing bells, the jubilant songs, the churches and the homes bright with the flowers of spring, the festive garments, the whole costume and utterance of Christendom show that the word that has been spoken is a word of cheer, a word of hope, a summons to rejoicing. Is not this, in itself, a great achievement? To fill the heart of the world with a great hope and an unselfish joy, is not that a great good? That Jesus the Christ has done all this for the world no man can deny.

There is reason in this rejoicing. It is the truth that Easter tells that makes the whole earth glad. What is this truth? It is the truth that there is life beyond the grave. To the perfect man there is a spiritual principle over which death has no power. This has been the unquenchable hope of mankind in all the ages and the resurrection of Christ gives to this hope a great confirmation.

Not at All Incredible.

"Why," cries the great apostle, "should it be thought a thing incredible that God should raise the dead?" It seems to me the most natural thing in the world, provided that Nature is the outcome of a loving will. Why should not the gracious Providence who watches over the world and guides its destinies in the track of righteousness, fling into the dark of time this spark of light divine to kindle hope in the hearts of his children? It was in the darkest hour of history that this star arose; it was when the Greek and Roman civilizations were falling to pieces through their own corruption, and the pagan mythologies had lost their hold on the human intellect; when skepticism and despair were almost universal. Surely, if there is a good Father in heaven, and if it is true that He has life for His children beyond the grave, and if this is the very truth for lack of which they are sinking into despair, He will find some way of revealing it to them. Thus the story of Easter day appears to me sublimely probable.

THE THREE GIFTS

BEHOLD, unto thy hand, oh Earth,
Hath He delivered three gifts
Accept, on bended knee,
In prayerful attitude, the first,
His cross.

Accept, erect and unafraid, the second,
One most precious, His agony.

Accept, transfigured, exultant,
Electrified, His smile.
—Patience Worth.

The Time of Singing

EVERY season of the year has its lessons. There is no time that does not teach us. The universe is as full of wisdom as it is of God. A thousand objects speak to us, a thousand voices call, a thousand influences breathe out the varied and ceaseless revelation of nature.

Every reanimation of a dead world is a resurrection wrought by divine power. Spring breaks forth upon the branches that a little time before were sparkling with frost and all nature laughs into life; timid grasses peep out, climbing vines stretch forth their tendrils, shadows of foliage thicken and weave rarer figures on pavement and roadway, birds fly back, streams freshen and sing, skies soften, the landscape is alive, the unbound earth rejoices.

The first lesson of spring is joyfulness. "The time of the singing has come." Where singing is there is joy, gladness, freedom. Nature now smiles and laughs out in very glee. Christianity is not an unnatural system, a gloomy system. Devils may say so, but a thousand eyes that sparkle with hope, a thousand hearts that beat happily declare it false. To the Christian earth and ocean and stars, birds and blossoms all teach God, the Gospel, the goodness of the Creator. Man should rejoice with a rejoicing universe. "The Time of the Singing" is a time of praise, adoration, gratitude. So the earth teaches us, and so the Great Teacher sent from God.

Another lesson—resurrection. Earth is full of it. The unfolding of spring filled poet and philosopher with vague revelations as they watched the analogies of nature. If God can so care for the plants and insects, why not man? The insect on the grass blade becomes the living air blossom; the coarse tuber blooms forth in the beautiful flower; the lifeless egg becomes the eagle soaring above its broken prison and riveting its eye on the sun. Is not man's destiny as noble, beautiful, sublime? Shall not man's fleshly body go again to the dust and his spirit assume a more glorious body? Is not night the death of the day and morning its resurrection? Winter the death of the year and spring its resurrection? "As in Adam all die, so in Christ shall all be made alive."

Another lesson the season teaches is work—preparation for the future. When the time of the singing comes all nature is busy, sprouting, blossoming, growing, getting ready for some future time. The farmer is busy preparing the soil and sowing the seed with an eye to the future. So the seed time of life comes which comes but once, and once lost cannot be regained. The day, the hour, the moment is now. O that men would let the earth teach them! A wider vision comes, a sweet holier hope, as we look not at the things that are seen, but at the things that are unseen.—Rev. Dr. Frederick D. Power.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of St. Joe News, published weekly at St. Joe, Indiana, for April 1, 1925

State of Indiana, County of DeKalb, ss: and for the state and county aforesaid,

Before me, S. S. Widney, a Notary Public, in personally appeared Fred B. Leighty, who, having been duly sworn according to law, deposes and says that he is the Editor and Publisher of the St. Joe News, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher, Fred B. Leighty, St. Joe, Ind.

Editor, Fred B. Leighty, St. Joe, Ind.

Managing Editor, Fred B. Leighty, St. Joe, Ind.

Business Manager, Fred B. Leighty, St. Joe, Ind.

2. That the owners are:

Fred B. Leighty, St. Joe, Ind.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are:

None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

FRED B. LEIGHTY.

Sworn to and subscribed before me this 6th, day of April 1925.

S. S. WIDNEY, N. P.

Commission expires Jan. 7, 1927.

NEWVILLE

Aunt Julie Wyatt was taken to the home of her daughter, Mrs. George Simanton last week. She continues quite poorly.

John Miller and family visited Dewey Miller and family at Auburn Sunday.

The people in this vicinity are cleaning their premises and planting early garden

Mesdames Imo Miller, Lela Smith and Bessie Shaffer and little son, attended the International Bible School lecture at Auburn, Thursday afternoon and evening.

Mrs Jane Hatch spent the week end at the home of Jacob Presler and wife at Hicksville. Mr. Presler is seriously ill with no hope of recovery. They are former residents of Newville.

Frank Richmond threw a horse shoe Friday evening which came down on the head of little Bernice Killian's head, cutting a gash an inch long.

Lute and Guitar

The lute is a stringed musical instrument of the guitar family. The formal difference between a lute and a guitar is to be found in the back, which in the lute is pear-shaped and in the guitar is flat. The lute is without ribs, which are essential to the framing of the guitar.

Thing That Really Hurts

Says the Osborne Enterprise: "We don't mind having a man lie to us once in a while, but the thing that gets irksome is the balance of the lingo he puts in for good measure."—Atlanta Constitution.

MICKIE SAYS—

Fall Results In Death of Young Man

The second accidental death in the Gratz family was that of last week when Harold Carpenter, son in law of Jacob Gratz, whose death resulted from a falling limb, fell from the balcony in a Fort Wayne lumber yard where employed, death resulting a few days later

Harrison M. Carpenter was born at Tama, Iowa, June 11, 1888 and died at his home in Fort Wayne, Indiana, March 29, 1925 aged 36 years, 9 months and 18 days.

He was united in marriage to Olive Gratz, September 3, 1918 He is survived by his wife, his father, Emory C. Carpenter, one brother, Jessie A Carpenter of New Orleans, La., and two sisters Mrs. Aylma Mairley and Grace Carpenter, both of Chicago. Less than a year ago he united with the First Presbyterian church of Fort Wayne and remained a faithful member to the end of his life.

He was a good husband, kind friend and neighbor and an excellent citizen. He had high ideals of life and leaves a worthy example to all.

The funeral was conducted by Rev. S. D Steffey at the home of the late Jacob Gratz on April 1st, at 2 o'clock. The burial was at Leo cemetery.

SPENCERVILLE

See Furnish for Batteries.

Receipt books on sale at News office.

For good glasses see Grieat at American Building Hicksville, Ohio.

Charles Chapman and family arrived home last week after spending the winter in Florida.

The Woman's Home Missionary society of the Methodist church will meet this (Thursday) afternoon with Mrs. Pearl Farver.

Time to begin to think about contracting for the raising of pickles this summer. Contracts at S. S. Widney's and News office.

Joel Betz and wife and Edward Billman and wife spent Sunday at Defiance, guests of Mr. Betz's sister, Mrs. Heft and family.

A fat Ladies Home Journal for a thin dime is still the world's best buy. For all housewives who want their fiction, fashion, art, household helps, needle work and children's section inside the same two covers—Get one at News office.

One More Deposit Will Make the First Thousand--

Are you one of the many happy families of this community who are nearing or have passed their **First Thousand Dollars** in their Savings Account? If you have never experienced this worth-while thrill, now is a good time to start toward it. We have never had as many depositors as now and they are your friends and neighbors. Think about it and then act wisely.

Farmers' & Merchants' State Bank

Spencerville, Ind.

See Furnish for Tires.

Mrs. Lee Chapman is seriously ill.

Mrs. Sarah Butler is quite ill at the home of her daughter, Mrs. Clyde Rectenwall.

Mrs Kathryn Steward and Miss Vera Silberg of Garrett, spent the weekend with relatives at this place

Eugene Hensil, wife and daughter, Naomi, spent Saturday and Sunday with friends at this place.

For Sale: Some goose feathers also a good fresh cow. Spencerville phone, L. F. Adkins. 15t2.

Miss Mame Bair was a guest last week of her sister, Mrs. Adrain Miller and family of near Hicksville.

The play, "The Path Across the Hill" was given on Saturday evening for the benefit of the community hall, to the largest crowd that has ever been at the hall, nearly 500 people. The play was given in an extra good manner. It was directed by Mrs. Roscoe Walter. The company expect to give it to several other towns in the near future.

Mrs Ray Means was very pleasantly surprised on her twenty-eighth birthday which occurred on Sunday, by a number of friends. Those present were Mr and Mrs. Arthur Chester and children of near New Haven, Mr. Carl Wilmot and family and Faye Thomas of Fort Wayne, Earl Stiman and family of Rehobeth and Mrs. Alice Zimmerman and daughter, Bina.

See Furnish for that new Chevrolet.

Ashur Culp, wife and children of Foraker, Indiana, were Saturday night and Sunday guests of Frank Odle and wife.

Miss Ada Markle spent several days last week with her sister, Mrs. Lyle Barr and husband at Fort Wayne. Mrs. Barr has been ill.

Mr. and Mrs. John Bachmann entertained at Sunday dinner, Alfred Bachmann and wife, August Baltsli, wife and children and Ernest Keefer and family all of Fort Wayne and Robert Bachmann and family of Hicksville.

Easter Morning

"Christ the Lord is risen today," sons of men and angels say.
Raise your joys and triumphs high; sing, ye heavens, and earth reply.

"Is It Nothing to You?"

THERE is a seething mob in the narrow streets. Hooting, yelling, jeering and sniggering taunts. Breast-plates of Roman soldiers glitter in the morning sunshine. A rattle of arms. A sudden move to protect the prisoner in the center. For a vile beggar from the gutters tries to break through the cordon to spit on the passive face. A snarl from the centurion, applause from the mob, hisses, flouting and mocking gibes. There is a short halt, a wooden cross is brought from a carpenter shop. It is placed on the prisoner's shoulder. Then the march is resumed, a squirming, seething column of passion-heated human beings. Out over the road of sorrows to a hill in the distance. That is Jerusalem 2,000 years ago, Pierre Van Paessen writes, in the Atlanta Constitution. The prisoner is Jesus Christ, son of Mary of Nazareth, a dreamer, One who called Himself a king. There He goes to be nailed to the cross.

He hangs on the cross. The midday sun is beating down on the bare hill. His hands are torn with the weight of His own body on the nails. Blood streams over His face. For there is a crown of thorns on His head. But from the tortured man's lips come gentle words for His mother, who stands at His feet. Overwhelming faith lies in the promise to the thief at his side: "Verily, this day thou shalt be with Me in Paradise." The sky darkens suddenly. The cross assumes huge proportions in the spreading gloom. It rises out of the earth as a terrible fantastic shape. The face of the sufferer cannot be seen any longer, but His voice is heard again. Not in Hebrew, nor in Latin, but in the tongue of His mother, the speech from the land of Galilee. For it is in the hour of greatest agony that man returns to his mother's tongue. "My God, My God, why hast Thou forsaken Me?" Not yet is the end. Other words must be spoken. At last they come. "It is finished. Father, in Thy hands I commend My spirit." That is voluntary death. So speaketh One who commands death. So dieth not a mere human. So died Jesus Christ, Son of God.

Down at the foot of the cross stands the captain of troops. He has warred in Spain and Germania. He has borne the eagles of Rome in far-off Gaul, he has seen cruelties and atrocities. He has seen men die by the thousands. But never saw he such a scene. Anxiously he cast his eyes from the darkening sky to the figure in the center of the three crosses. What supernatural mystery is here? The earth trembles, there is panic among the spectators. The Roman stoic beats his breast. "Verily this man was the Son of God."

In the marble palace of the pro-consul a silent man walks up and down. His hands are folded across his breast. His white toga is draped around his shoulders. He is Pontius Pilate. Remorse has come to him after the condemnation. Mature reflection has convinced him that he has shed innocent blood. To the messengers from Calvary who come with a request he thunders in blazing anger. He will not change the inscription over the cross. "Go ye hence. What I have written, I have written." That's the last we hear of Pilate, the Roman jurist, the representative of Caesar, who prides himself on justice and right. Remorseful, bitter, disillusioned and cynical he passes into history, and his place knows him no more.

Joy Among His Enemies.

Preparations for Easter are going on in the palatial residence of the high priest. The candles are burning and the meats and viands for the holidays spread a delicious aroma. Calaphas is in a joyful mood. He has with him as guest his father-in-law, Annas. They discuss the crucifixion. Their eyes are brilliant with fanatic passion. Their hatred for the cursed Galilean distorts their noble patrician faces. But there is satisfaction. The heretic is dead. Word has just been brought from Calvary's hill. He who called himself a king, who went about undermining the authority of the Torah. It is a good day. Easter will be a splendid feast.

Supple oriental dancing girls are swaying to and fro. Slaves carry trays with food and golden wine vessels. Incense and exotic perfumes prevade the atmosphere. There is the irresistible rhythm of sweet, intoxicating music. On a gilt throne languishes Herod, king in name. A load has fallen from his shoulders. A messenger has just told him that the Nazarene has given up the ghost on Golgotha. He sighs with relief. No longer will that specter of John the Baptist disturb his sleep. For he had an idea that Jesus was the Baptist risen from the dead. And it was Herod who ordered John executed. But now his mind is set at rest. He orders more wine, he commands the orchestra leader to strike up the latest melody from fashionable Rome, and he drinks himself into a senseless stupor.

The Faithful Few.

Out in the slums of Jerusalem there is a little gathering. In a backroom, upstairs. At the foot of the stairs a man stands on guard. In the bare room there is sorrow, overwhelming grief, intense affliction. A man walks up and down, silently. That is Andrew, the brother of Peter. In a corner sits a woman. She cannot speak. Her grief is too great for words. That is Mary, mother of Jesus. Some one lays a hand on her shoulder as if to comfort her. That is John, the beloved disciple. Suddenly the door bursts open. A man enters, his eyes stare wildly before him. His chest is bare and covered with blood. He is beating himself with a stone in oriental fashion. That is Peter, who betrayed his Master. He runs to Mary and buries his head on her knees. Mary's hand strokes his head. That is forgiveness. The most sublime instance of mother love in all the ages.

The moon is chasing high in the cloudy sky. Dogs are snarling below in the valley. They are fighting over bones. Human bones. The bones of Judas Iscariot. He who sold his Master and in terrible agony of self-accusation hanged himself, fell downward from a cliff when the cord around his neck snapped in twain.

City Gripped by Fear.

Rumors pass through the bazaars of the city. There is a hint that the veil in front of the Holy of Holies has been rent in twain. That darkness at three o'clock? That earthquake? Can it have anything to do with the death of the Man from Nazareth? Conjectures, opinions, boisterous bravado, yet secret anxiety. The people are worried about their own words before Pilate in the morning: "His blood be on us and upon our children." It's a dark hour in the world's history.

Soldiers are gambling by torchlight in front of the tomb. In that tomb lies the body, wrapped in fine linen and spices; last tribute of secret friends. The festivities for Easter have begun. But the priests are worried and ask that the tomb be sealed. Out in the garden sleeps Jesus, waiting the Resurrection morn.

St. Mark's Story of the Resurrection

"AND when the Sabbath was past, Mary Magdalene, and Mary the mother of James, and Salome, bought spices, that they might come and anoint Him. And very early the first day of the week they came to the tomb when the sun was risen. And they were saying among themselves, Who shall roll us away the stone from the door of the tomb? And, looking up, they saw that the stone was rolled back. And entering into the tomb they saw a young man sitting on the right side, arrayed in a white robe; and they were amazed. And he said unto them, Be ye not amazed; ye seek Jesus, the Nazarene, who hath been crucified; He is risen; He is not here."

GOD'S HAND AND MAN'S

BEHOLD His mercy! This humble God
Smiteth the earth with the rod
Of the lily, and scourgeth her
With gentle rain, while He smiles
Upon the hills and weeps upon the valleys.
Behold, would He veil His eyes
With mists, and cover Earth's wounds
With verdure. His is a hand of mercy,
And man's one of destruction.
—Patience Worth.

Lesson for April 12

THE CRIPPLE AT THE BEAUTIFUL GATE

LESSON TEXT—Acts 3.
GOLDEN TEXT—"I am the Lord that healeth thee."—Ex. 15:26.
PRIMARY TOPIC—The Story of a Lame Man.
JUNIOR TOPIC—The Care of a Cripple.
INTERMEDIATE AND SENIOR TOPIC—Care of a Cripple and Its Results.
YOUNG PEOPLE AND ADULT TOPIC—The Church's Ministry to Body and Soul.

The indications are that some months had elapsed since Pentecost. The believers were being taught by the apostles who were showing their credentials by their mighty works (Acts 2:43).

I. The Lame Man Healed (v. 1-11).

1. The Occasion (v. 1).

Peter and John were going to the house of worship. They were friends who mere mutual complements—each having that which the other lacked. This fellowship was according to the Lord's own arrangment and was most fitting. They were going up to Jerusalem to worship, though they knew full well the corruption of Judaism.

2. The Place (v. 2).

It was at the gate which leads from the outer to the inner court of the temple. It was called beautiful because of its magnificent bronze doors. This man was placed at the entrance to the place of worship because when a man comes closest to God he also comes closest to his fellowmen.

3. The Man (vv. 2-3).

This beggar was infirm from his birth. He was a familiar figure, known by the people for years. When he saw Peter and John he asked alms.

4. The Method (vv. 4-8).

(1) Gained the Man's Attention (v. 4). Peter and John commanded him to look on them. The sinner's attention must be secured before Christ can heal him. Having secured his attention they gave him more than he asked or expected. He asked for money and got healing.

(2) Peter Commanded Him in the Name of Jesus Christ of Nazareth to rise up and walk (v. 6). This was the very thing he was unable to do for so many years. Was not this mocking his very impotency? No! No! for it was in the name of Jesus. With the command went the ability to do.

(3) Peter Took Him by the Right Hand (v. 7). This act was meant to give impetus to his faith, not strength to his ankles.

5. The Man's Response (v. 8).

Strength came to his feet and ankle bones at once. He stood; he walked; he leaped and shouted praises to God. He thoroughly advertised the miracle. He ascribed the honor to God for his healing, and walked into the house of God.

6. The Effect (vv. 9-11).

The people were filled with wonder and amazement. The multitude ran together to see this remarkable thing. There was no question as to the genuineness of the miracle for this man had been a familiar figure for many years. It was evident that something supernatural had occurred.

(1) The helpless beggar had to be carried to the temple gate. Men and women out of Christ are spiritually helpless. We should bring sinners to Christ.

(2) Taking him by the hand shows the manner of Christian help. Ministers of Christ may not have silver or gold, but have something infinitely better to give.

II. Peter Witnessed of Jesus Before the Multitude (vv. 12-26).

This miracle focused the attention of the people upon Peter and John. Peter immediately turned their attention from himself to Christ. Peter seized the opportunity to present Christ to the people who had assembled. He told them that it was by faith in Jesus Christ whom the God of their fathers had glorified, whom they had delivered up and denied before Pilate when he desired to set Him free, and had desired a murderer to be granted to them instead. He showed that the disciples were also witnesses that God had raised Jesus from the dead, and charged home upon them their awful guilt; for they had denied the Holy one and chosen Barabbas, a murderer, instead of Christ, and even killed the Prince of Life. Despite their crime he appealed to them to repent (v. 19). Since they had committed this awful crime in ignorance, God would pardon their sin if they would repent, and he assured them that they should yet enjoy refreshing seasons from the Lord when God would send back Jesus Christ to earth to consummate the work of redemption.

Your Conscience

Remember this: that your conscience is not a law—no; God and reason made the law, and He placed conscience within you to determine.—Sterne.

The Treasure-Chest

God made the earth to supply human needs. Constantly we are proving it to be a treasure-chest. We have but to lift the lid and help ourselves.—Evangelical Tidings.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© by Western Newspaper Union.)

WHY WE DON'T BLEED TO DEATH

A PROMINENT western railroad official, living in Los Angeles, went to his dentist to have an aching tooth pulled. So far as he or any one else knew, he was a perfectly healthy man.

The dentist pulled the tooth and it bled, just as any one's tooth would. But at the end of several hours, instead of gradually decreasing, the bleeding kept up. Every known method was used to stop it. But it didn't stop. It kept on bleeding through that tiny hole in the gum until all the blood in the body was drained out and the man died from luck of blood just as surely as though he had had a great wound or had cut one of the large arteries.

Why did this apparently healthy man bleed to death from a trivial cause? Or, on the other hand, why doesn't everybody keep on bleeding whenever the skin is torn or a blood vessel opened?

Because in the healthy person, there is a substance in the blood that hardens on exposure to the air and causes the blood to clot, plugging up the torn or cut blood vessels and stopping the flow of blood. In some persons, this substance, for some reason is lacking and the blood does not clot but keeps oozing from the wound, no matter how small.

This condition is called hemophilia or "a fondness for bleeding." Persons with such a condition are called "bleeders."

How do they ever live to grow up, you ask? Few of them do. Three-fourths of them die in the first two years of life.

The condition is hereditary, the males being generally the bleeders and the females transmitting the disease to their male children without suffering from it themselves. Bleeders are generally healthy persons with blonde complexions, delicate skin and blue eyes.

Nose bleed, hemorrhage from the gums or from any of the organs or from some slight cut or scratch that does not stop, as in the normal individual, may be the first sign of anything wrong. Strange to say, small wounds bleed more and are more dangerous than large ones. The amount of blood lost is enormous. Fortunately, bleeders stand hemorrhage better than normal persons.

While many remedies have been suggested, transfusion from a healthy person of blood which is capable of clotting, is the most effective treatment.

CATCHING TUBERCULOSIS FROM A COW

IT HAS been known for many years that tuberculosis was carried by milk. But it is not often that a plain, clear-cut connection can be shown between the infected cow and the infected child. The Connecticut state department of health, in a recent bulletin, reports an instance of infection of four children by milk from tubercular cows.

A Connecticut dairyman kept about twenty cows. Most of the milk from these cows he sold to a large distributor, who pasteurized his milk before delivering it to his customers. But he also sold milk to two families, neighbors, who were supplied with fresh raw milk, direct from the cows without pasteurizing.

One family began to purchase milk in July, 1922, and continued until April, 1924. The other began using milk in February, 1922, and continued until February, 1924.

In the first family, there were two children, nine and eleven. In November, 1923, after drinking the raw milk for a little over a year, the older child developed tubercular meningitis and died. The younger child also became ill but recovered as soon as the mother stopped giving her the milk from the neighbor's cow.

In the other family, there were also two children, ten and twelve years old. They both became ill in December, 1923. The younger child developed tubercular glands in the neck as well as consumption and died in April, 1924. The older child had tuberculosis of the bowels, as well as enlarged glands. The child was operated on and the use of the infected milk stopped. It is now slowly recovering.

Four children ill and two of them dead out of four children naturally led to an investigation. The state agricultural commission sent a veterinary to examine the herd. The cows looked well but all reacted to the tuberculin test. When killed, every cow was found to be diseased.

Cows have tuberculosis, just the same as human beings. The germs reach the milk either from the lungs or from the diseased udders. Cows with tuberculosis of the lungs cough up the germs and then swallow them. The germs then get from the manure into the milk.

Where does your milk come from? Unless it is pasteurised it is dangerous, especially to children.

Raw milk should be heated to 140 degrees Fahrenheit for 20 minutes before being fed to children.

WRIGLEY'S
"after every meal"
Parents:—encourage the children to care for their teeth!
Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth.

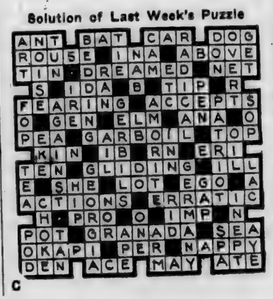
70—To cut
71—Respect

The solution will appear in next issue.

Solution of Last Week's Puzzle



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)

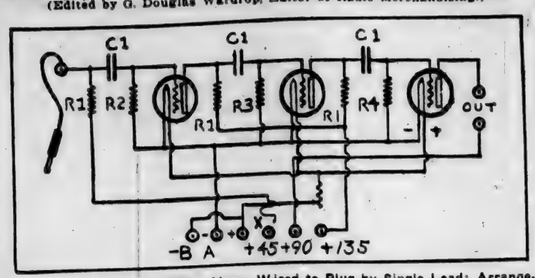


Diagram Showing Amplifier Alone, Wired to Plug by Single Lead; Arrangement Suggested for Adding Resistance Coupling to Any Circuit.

Resistance-coupled audio amplification is meeting with popular favor wherever it has been tried. It reproduces over the entire scale without distortion of any kind. Its only drawback is that three stages are necessary to produce the volume of two stages of transformer-coupled amplification. The diagram shows how a resistance-coupled amplifier can be added to any set.

The coupling resisters, R1, of the A. F. amplifier are 100,000-ohm resistances. This value remains the same for all tubes (practically), as do the .006 mfd. coupling-isolating condensers, C1. The grid leaks, R2, R3 and R4 have respective values of 1 megohm, ½ megohm and ¼ megohm.

The diagram shows the amplifier alone, wired to a plug by a single lead, which arrangement is suggested for adding resistance coupling to any circuit. Practically no knowledge whatever of the receiving circuit is necessary. Wire X should be tapped on 45 volts of B battery.

After tuning in a station on telephone receivers, the phones should be removed and the amplifier plugged into the jack. If no signals are heard, the single wire leading to the plug should be transferred to the other plug terminal. When signals are being amplified, X should be varied over the B battery taps until the response is the strongest without impairing quality.

Transformers Can Be Used.

The amplifier should always be plugged into the lowest stage jack on the receiver proper—the jack that ordinarily gives the weakest response.

Many neutrodynes are so arranged that at least one stage of transformer-coupled audio frequency amplification must be employed. This being the case, no more than two stages of resistance coupling should be added. One extra step generally will suffice. Quality, probably will not suffer through the single stage of transformer-coupled intensification. Properly designed and operated, one transformer-coupled stage should be auditively perfect.

If the receiver to which you contemplate the addition of resistance coupling is a five-tube set, and four tubes are used (lighted) on the lowest jack, it is an indication that one transformer coupled stage is being employed.

High Voltage Is Necessary.

When in-putting from the detector tube, from 45 to 60 volts should be applied to the plate of this bulb—compensating as usual for the voltage drop across the coupling resistor in the plate circuit.

No more than 90 volts should be impressed on the r. f. circuit while 135 volts or more should be used on the a. f. amplifier. This last will function satisfactorily on 90 volts, though higher amplification is quite naturally secured on the increased voltage.

When in-putting from a transformer coupled stage, the normal detector voltage should be used. If only two resistance coupled tubes are used, the leak values should be ½ and ¼ megohm respectively.

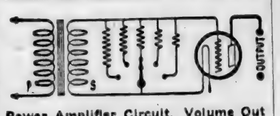
If a single stage is employed the grid-leak should be a 50,000 ohm resistance. The UV-201A, the C-301A and the DeForest DV-2 tubes will function satisfactorily in this amplifier.

Power Amplifiers; Use of C Battery

Facts About Design and Construction Outlined in This Circuit.

The fundamental idea involved in the design and construction of a power amplifier is briefly outlined in the circuit shown in the diagram. First, a low ratio audio frequency transformer is necessary to prevent distortion and unbalance in the input side of the vacuum tube. The resistance from 25,000 to 100,000 ohms directly shunts the secondary of the audio frequency transformer and is a positive means for controlling the volume with its resultant distortion. The commercial types of variable resistance are admirably suited for this use.

In a unit of this kind a power amplifier tube works better than the ordinary type of vacuum tube—the UV-201A. The standard five-watt or any of the better power amplifier tubes are fine for this purpose. Power amplifier tubes require a higher plate voltage tha nthe UV-201A and in most circuits the addition of a C battery in



Power Amplifier Circuit. Volume Output Controlled by Shunt Resistances.

serted in the lower lead of the secondary of the transformer returning to the negative side of the filament supply will often clarify and stabilize the circuit quite noticeably. The negative side of the C battery should connect to the secondary of the transformer and the positive terminal of the C battery should connect to the negative side of the filament supply. The value of C battery is governed by the amount of plate voltage used and is outlined in the following table:

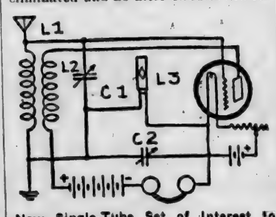
Plate Voltage	C Battery Voltage
40	0.5 to 1.0
60	1.0 to 3.0
80	3.0 to 4.5
100	4.5 to 6.0
120	6.0 to 9.0
150	9.0 to 12.0

The use of C battery in any audio frequency amplifier circuit will materially reduce the current drain on the B batteries, thereby increasing the number of hours of use of these batteries. A C battery will also permit a vacuum tube to function at its most efficient point of operation, amplifying the signal applied to the grid of the tube in a distortionless and also economical manner.—Radio Broadcast.

Single-Tube Set That Is Super-Regenerative

This is a new single-tube receiving circuit, known as the Nacireman. It was developed during a series of experiments with a large number of receiving circuits. This new circuit is not suitable for wired radio because of its tendency to re-radiate, but it is probably the last word in a simplified single-tube set for receiving news and music from the present broadcasting stations.

The circuit is described in the interests of amateurs and the public who may wish to listen to the programs now in the air. The set is super-regenerative. It requires a minimum investment in parts. Practically every amateur already has everything necessary to try out the circuit. It will be noted that all resistances, grid leaks and grid condensers have been eliminated and no filter circuits are required. Any amateur can connect up one of these sets in an hour or two and the results will surprise the most hardened radiophan.



New Single-Tube Set of Interest to Amateurs.

Almost any metallic structure which may be picking up radio waves may be used as an aerial. Connection to a bed spring, wire window screen, steam radiator or fire escape is often all that is necessary. A short overhead aerial, a length of wire strung across the room, concealed behind the picture molding or under the carpet, will also serve.

Tuning is accomplished by rotating the movable coil of the variometer or variocoupler until the tube oscillates. Then adjust condenser No. 1 until the station desired is heard, finally adjusting condenser No. 2 to the frequency of oscillation which brings in clear speech and music. A second fine adjustment all around will increase the volume and some regulation may be secured with the filament rheostat.

1 variometer or variocoupler. L1 is the rotor winding. L2 is the stationary winding.
2 23-plate condensers, preferably with verniers (C1 and C2).
1 750-turn DI, or honeycomb coil or its equivalent (L3).
1 tube, WD-11, UV-201A, or other hard tube.
1 tube socket.
1 filament rheostat (R).
1 A battery, 1½ to 2-volt for WD-11 tube; 6-volt for other tubes.
1 B battery, 45 to 90 volts for WD-11; 45 to 135 volts for other tubes.
1 pair phones.—Radio Digest.

Splendid Loop Set Is Critical for Tuning

By J. W. MAYFIELD

The accompanying hookup shows a splendid loop set with which I have heard New York, Schenectady, Atlanta, Kansas City and Davenport. So many radiophans claim loops are not efficient unless used with one or two steps of radio frequency.

This set is very critical for tuning, but it is highly efficient. As will be noted the tuning is accomplished with a variocoupler with the rotor used for the tickler. A .0005 mfd. condenser—vernier preferred—is shunted across the loop. The vernier rheostat is also of great value.

Owing to extreme regeneration the set will hiss until filament is properly

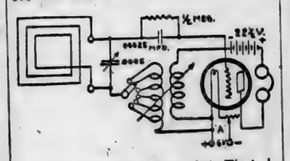


Diagram Showing Loop Set That Is Highly Efficient.

arranged. The grid condenser may be either .00025 mfd. with a ½-megohm leak or .0005 mfd. and a 1-megohm leak. Both were tried out with equal success. The diagram is self explanatory.—Radio Digest.

Easy Way to Take Taps Off in Winding Coils

The easiest way taps may be taken off is by winding on a certain number of turns and twisting the wire together at the point so as to make a five or six-inch loop and a certain number of turns again wound on the tube and the next tap made in a similar manner. Or a neater looking job is made by winding on a certain number of turns before making a tap and then allow six inches for a tap; push a hole in the tube and push the wire through it; push another hole in the tube about a quarter inch from the other and close to the last turn of wire and allow six inches for a tap and join the two six-inch ends on the inside of the tube.

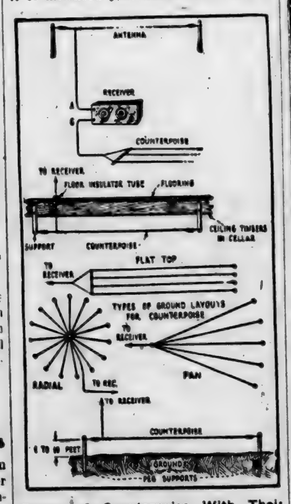
Use Care When You Are Constructing New Set

Many radio fans will rush the construction of some new set that they have seen or heard. In the rushing any kind of connections are made, with a consequence of having the leads long or twisted in all directions.

Usually this results in the failure of the set operating. Though it is not necessary to build a new set on a panel and all ready for putting in a cabinet, still, as much care should be taken with a board layout as with a panel layout, especially when the set is some departure from a standard.

Pointers on Use and Value of Counterpoise

Many operators of receivers are troubled by broad tuning or by their peculiarity of picking up local disturbances caused by telephone ringers house-lighting circuits, vacuum cleaners, elevators, etc. Usually these defects may be attributed to faulty ground systems to which many of the above-named apparatus are connected A counterpoise, very similar to an ordinary flat-top antenna, excepting that it is mounted just above the earth or



Forms of Counterpoise With Their Constructional Details.

in the cellar of one's home, may be advantageously employed to eliminate these forms of disturbances. In the diagram several forms of counterpoise are shown with their constructional details and method of use. It is only necessary to remember that to be efficient they should be well insulated from nearby objects. Any type of wire, insulated or bare, may be used. Porcelain cleats may be economically used as insulators. The counterpoise is connected to the radio receiver in place of the ordinary ground connection.—Radio Broadcast.

Selecting Vacuum Tube

Two factors which should be considered in buying a vacuum tube are whether it is to be used as a detector or amplifier and whether it is to be used with a storage battery or dry cells. Some tubes are "soft" and others "hard." A "soft" tube is one containing more gas or air. It works best as a detector and the "hard" tube as an amplifier. The former requires less plate voltage. Amplifier tubes do not regenerate as easily as "soft" detector tubes.

Weather Bulletins Sent to Aviators

Forecasts and bulletins have been prepared and issued daily for several years by the weather bureau for the benefit of aviators, especially those in the services of the army and navy. When the transcontinental air-mail service was extended across the continent in the summer of 1924, arrangements were made at the request of the Post Office department for special weather forecasts.

These forecasts are issued from Chicago. One covers the route from Bryan, Ohio, to Omaha, Nebr., and the other the route from Omaha to Rock Springs, Wyo. In formulating the forecasts the bureau has in mind conditions at the surface and at 5,000 feet aloft. The predictions are prepared each morning and are made available to both eastbound and westbound flyers at the air-mail field at Omaha. An additional forecast is given in the evening, whenever, in the judgment of the forecaster, decided changes are near.

Matter Was Obviously Question for the Dear

Representative O'Connor was discussing in New York his plan for an investigation of telephone and telegraph companies.

"These companies need investigating, if only for their own good," he said. "They have such a bad habit, when questioned, of giving haughty and evasive answers.

"They're like Colonel Carter of Cartersville. The colonel sat in the lounge of a New York hotel one evening with a New York banker.

"'Yes,' he was saying, 'it's a powerful fertile country down round Carter hall. Why, sah, I know woods down there where the trees grow so close that you can't shove your hand between the trunks. And game. Why, sah, I've seen deer in them woods with a ten-foot spread of antlers. Yes, sah, a ten-foot spread.'

"'But, colonel,' said the banker, 'how can the deer get those antlers between those trunks?'

"Colonel Carter drew himself up.

"'That, sah,' he said, 'is their business.'"

French "Get Together Club" Along New Lines

Tempted by the success of the Marriage club started last year to bring together young men and maidens, the Mutual Aid society of Paris has conceived the idea of organizing a special picnic party with the avowed aim of encouraging young couples to enter the bonds of matrimony. The picnic will be held on the banks of the River Seine, near Paris.

Every young man and woman will be given a number to be worn, the number to correspond to the page of a register which will contain all information concerning his or her character, calling and fortune. A portion of this information, however, will be kept secret until the very last moment. The remainder will be communicated to the youth or maiden interested in a companion found during the days of the revels.

Much Leather Used

There had been a good deal of kicking among the rookies as to the supplies being handed out by the quartermaster department.

"Say," demanded the supply sergeant of a diminutive John who had been especially vociferous, "wot if they are a little too big? Do you know what them shoes cost?"

"Wall," answered the other, as he inspected his new footgear, "they must of cost a right smart lot. They g' pretty nigh a whole cow in them."—American Legion Weekly.

Edible Birds' Nests

A curious nest is the one the swiftlet builds in Borneo, and which is known to commerce as the edible nest of the Chinese gourmet. The bird builds in caverns around the coasts, and nest seekers go with torches and tear them down and export them. It is said that edible nests to the value of 300,000 pounds are imported into China every year. The nest is woven from a secretion the bird produces—hence its food value.

Our Pre-Easter Special

Of

Young Men's

Suits

at

$27

Sizes 33 to 44

With Extra Trousers $33

Tailoring:

Hand-Tailored collars.
Hand-felled sleeve linings.
Hand-felled and padded shoulders.
Hand-felled body linings.
Hand button holes.
All the inside of coats are basted by hand throughout by expert tailors.
The welts and flaps are matched by hand and basted before they are sewed on.

Is Bringing Us the Business

These suits are the very latest fabric and models for high school and college boys and all young men who want the latest in styles and fabrics

Not a suit in the lot but what is a $35 or $40 value and more than two-thirds of them are from the $40 range. But we have taken the entire lot and marked them as a "Pre-Easter Special" at the ONE price $27

Every pattern is a new spring number.
Every suit is in the newest spring model.
Excellent workmanship by expert tailors.
Full cut coats; wide, straight-hanging trousers.

QUALITY CHICK HATCHERY

JESSE RUPP, Manager - - Wauseon, Ohio
13t5p

All hail this joyous Easter morn,
When earth arises newly born.
The daffodil has left the mold
To praise the Lord with lips of gold;
The butterfly its coffin rends
And to the sunlit sky ascends;
And every bush and tree and clod
Uplifts an offering to God.

Salute this glorious Easter day
When angels rolled the stone away,
And from the dark and lowly door
The Lord, arisen, came of yore
His feet among the lilies white,
His garments aureoled with light,
And in His hands for thee and me
The gift of immortality!
—Minna Irving in Kansas City Times.

World's Famous Paintings

SCENES after the crucifixion are found in all the galleries. Several of these are by Titian, who was the most important painter of the Renaissance period, and one of the greatest painters of all times. The canvas known as the "Bewailing or Lamentations Over Christ", is the most noted of these. It hung in the Academy at Venice, but when the city was bombarded by the Austrian airplanes, this treasure was taken from its frame and removed to Rome for safekeeping. The picture is rich in browns, this somber color predominating. It has several figures, but the ones of the dead Christ and the Virgin are the main features. Here the Christ is in a recumbent position, being supported by the Virgin. His face is peaceful with just a glimmer of light from the halo falling over it. The figure is particularly well drawn. The Virgin is robed in dark blue with a brown scarf about her head.

Titian was born at Cadore in 1447. His family belonged to the petty nobility, and early in life he had many educational advantages. He executed commissions for several European rulers and his work became famous throughout Europe. His coloring was remarkable, a splendid golden tone and somber brown suffusing his pictures and adding to the perfect perspective. His composition, too, was unexcelled. Titian lived to be nearly one hundred and died of the plague.

Another famous picture of the Bewailing of Christ is by Ortolano, and hangs in the national gallery at Rome. It is a well-drawn picture, showing Calvary with the three crosses in the background. It is rich in the dull golden blue, deep blues, dull reds and browns. It contains many figures, all of whom are in action, which makes a striking canvas. The dead Christ rests on the arms of His mother, who gently holds one of His hands in hers and looks sorrowfully into the dead face. The Magdalen, her arms upraised, seems to be imploring guidance, while in the background, John wrings his hands in agony. Very little is known of the artist whose brush created this great work, except that he was born in 1490, in a small province in Italy, where his father was a gardener on an estate belonging to the nobility. He studied painting under several masters, being greatly influenced in his work by the Raphael pictures. He died in 1528, while still a young man.

Man's Greatest Victory

Life eternal is doing God's work, knowing Him, and being submissive to His will. What was true of the Good Friday sacrifice is true, in lesser degree, of all sacrifice. Yet men shrink from it—which is natural—but they shrink from it as always an evil, and this is wholly unnatural if human nature is what it ought to be and is capable of becoming. The greatest victory man can win is victory over self and sin.

Dominion Over Death

In their thought of the resurrection of Jesus Christ men have devoted their attention so largely to the empty tomb that they have to some extent failed to take into account the power that was in that life over which death had no more dominion. The death of Christ, and of any one else, is a mere episode in a great process, is in truth a part of life itself. It is through dying that men truly live. Righteousness is eternal and everlasting.

Family Sleeps in Sacking

Close to the famous Battle abbey, in Sussex, England, a poor family of five was found living in tents made of sacking and sleeping on straw with only a blanket for covering.

Charge Account

Administrator's Sale!

I, S. D. Steffey, Administrator of the estate of the late Jacob Gratz, deceased of Jackson township, DeKalb County, Indiana, will sell at Public Sale at the late residence, located 2 miles west of Spencerville, 3 miles east of Maurer's Church, 10 miles south-east of Auburn and 2½ miles north-east of Hurshtown, on

THURSDAY, APRIL 9, 1925

Commencing at 10 o'clock the following to-wit:

17 HORSES—Bay horse 10 yr. old; Black mare 18 yr old; Bay horse 6 yr. old; White horse 8 yr. old; Bay stallion 10 yr. old; Bay colt 2 yr. old; 2 sorrel horses 3 and 6 yr. old; 3 brown horses from 2 to 4 yr. old; Bay horse 5 yr. old; Brown mare and 3 bay mares ages 3 4 and 8 yr. old. Most of these are well bred driving horses and there is some fine saddle horses.

11 HEAD CATTLE—In this herd are 10 cows, some of which are now giving milk. Some of them Pasture bred. 1 Good bull and 3 young calves. If you need a cow, it's an opportn'ty.

27 SHEEP—This flock is the last word in the sheep line and consists of 18 ewes and 9 lambs. There is no better in the county. Come and see them if you want sheep.

5 HOGS—13 shoats weighing about 125 pounds each and two brood sows of a good breeding type.

TOOLS—2 iron kettles, bob sled, slip scraper, lumber, 5 posts McCormick mower, 2 spike tooth drags, spring tooth harrow, Bryan plow, 5 tooth cultivator, single shovel plow, cart, anvil, vise, side delivery rake, hoe drill, Deering binder, Gale corn planter, saddle, 2 set work harness, 5 horse collars, dump rake spring wagon, corn plow, new hay loader, wagon, hay rack, cutting box, galvanized hog feeder and other articles.

Wilson heater, 5 dining chairs, sanitary cot, 9x12 rug, rockers, Singer Sewing machine, clock, dining table, pedestal, cupboard Paragon oil stove, Range cook stove, Air Tight heater, kitchen table, sink, Separator, hall tree, hall carpet, oak library table, 2 leather rockers, settee, Organ and stool, 2 iron beds, springs and mattresses, 6x9 rug, bed complete, vinegar, barrel

2-3 interest in 22 acres Wheat

TERMS: $5 cash. Credit 9 mo. 8 per cent from date if not paid when due.
Dinner served by Spencerville Lutheran Aid Society.

ST. JOE NEWS.

VOL. XXXIX ST. JOE DeKALB COUNTY, INDIANA, THURSDAY APRIL, 16 1925 NO. 16

What is Your Opinion?

Home Town Talks

Clean up your rubbish—your home surroundings speak louder than words.

Pride in our town is as necessary as in one's self—boost every opportunity you have

Some men think they have to get away from home to be appreciated; as a matter of fact they merely have to get away to appreciate home.

It is pleasant to hear a man say "my town" but it is better to hear him say "our town."

Building a home for yourself is building a house for your town—and both things help.

It is concerted effort for the town that gets results; Community Welfare band wouldn't be much of a band unless its members played together.

Say Boss

You all like FRESH FISH dont you?

Harmon de butcher he's shur got de good kind. Try them. Bill says dat if de demand is sufficient he's gwine to have 'em Wednesday's and Thursday's for a whlie at least.

Saturday: Picnic Hams and just the Right Size at.... 20c

St. Joe Meat Market,
WILLIAM HARMAN, Proprietor.

Seeds For SPRING SOWING

Clover, Alsike, Timothy, Common Alfalfa, Grimm Alfalfa, White and Yellow Blossom Sweet Clover.

Place Your Orders NOW. Buy only the highest quality of seeds which we handle. On account of the backward season, there will be a rush for seeds -Get yours now and be sure of them.

The St. JOE ELEVATOR
Samuel Keesler, Mgr. Grain Dept. Bert Jackson, Mgr. Coal Dept.
NOTE—Pay your accounts. They are due now.

Save For a Definite Purpose

You will find it easier to start saving if you save for a definite purpose.

For instance you have a certain note coming due on the first of March. It will be a hardship if you have to raise the money to pay it out of your March income. If you start now, however, you can build up week by week or month by month, a fund that will easily take care of the obligations without straining your resources at that time.

This is the way any big business corporation plans its finances The same method works just as well as for the business plans of the family. It is a simple matter to set aside regular amounts if you come to regard them as the steps toward some definite goal you wish to reach. Start an account with our savings department today, and it will surprise you the rapidity with which it will grow if added to each month.

The St. Joe Valley Bank, A STATE BANK

SCHOOL DAYS

You can't sell a run down house to some other man; why live in a run down house yourself?

You can't make the world any bigger, but you can make it better; and you can do both for this town.

The young man who makes a good start in St Joe will never make a bad finish somewhere else.

The merchant is not the only one who profits or suffers when money is spent here or away from home.

An easy way to increase the value of your property is to encourage others to increase the value of theirs.

Teach your boys not only loyalty to you but to the home and to the town. If you think the city a better place to buy in they will soon think the city a better place to live in.

Parent-Teacher Association

E. R. KINSEY, - - Reporter

The Parent-Teacher meeting will be held Friday night at the high school building and the following program will be rendered:

Opening Song.
Song Male Quartette
Reading Miss Bangs
Musical Reading Mrs. Roy Bowser.
Entertainment by Junior High.
Election of officers.
Pot luck supper.
Be sure and come.

In Society

Two very pleasant meetings were recently held by the Ladies Literary Club. On Wednesday evening, April 1, the members of the club journeyed to the home of Mrs C. A. Woodcox. All were dressed as little girls and the committee in charge helped them enjoy the evening by playing children's games and guessing contests. Delicious refreshments were served by the hostess, assisted by Mrs. Harry Randall, Mrs. Paul Curie and Miss Edna Jackson.

Wednesday afternoon, April 8, the club enjoyed a literary banquet at the home of Mrs. Clyde Havens. Mrs. C. C. Woodcox acted as toastmistress and Mrs. H. A. Kees as hostess. Mrs. Kiger from Daleville, Indiana, gave a very instructive talk on the Indiana Cigaret Law. The following officers were elected for the coming year:

President—Mrs. G. M. Barney
Vice Pres.—Mrs. Paul Curie.
Rec. Sec.—Mrs. C. A Woodcox.
Treasurer—Mrs. Harry Kees.
Critic—Mrs. F. B. Leighty.
Parliamentarian — Mrs. C. H. Havens.
Press Cor.—Mrs. C. C. Woodcox.
Cor. Sec.—Mrs. A. M. Baker.

Two guests were present, Mrs. Mabelle Thornton and Mrs. Kiger of Daleville, Indiana.

Sunday Schoel Council Meets Sunday

The annual meeting of the DeKalb County Council of Religious Education (DeKalb County Sunday School Association,) will be held in the Auburn M. E. church, Sunday afternoon April 19th, at 2:00 o'clock.

At this meeting representatives from every township nd school in the county are expected to be in attendance, in fact those townships that have no delegates, are penalized ten points in their standing with the association, this in accordance with the standards of the International Association. There will be a business session planning the activities of the county group for the year and school problems that the delegates will present. Plans for attendance at the state convention at Winona lake in June, when DeKalb county is expected to have two hundred delegates in attendance, will be made.

Howard W. Mounts, veteran superintendent of the Garrett M. E. Sunday School, will address the meeting on the subject, "Why Should My School Support the Sunday School Association?" The county officers are confidently expecting a record breaking attendance at the council gathering as the DeKalb county schools are getting more alive each year to the value of intelligent organization, as fostered by their association.

The second address, "Oneness of Accord," will be delivered by Geo. O. Bancroft, a man of wide experience as a worker in a nearby county.

Virgil Perry and wife were Sunday guests of M. E. Leighty and wife at the County Farm

Bulk Garden Seeds—Curie's shipments are now in and are selling. Better get yours now. Seeds that will grow are going to be high priced.

Bake Sale, next Saturday by Concord Aid Society, at Widney's Electric Shop. Everything good to eat fresh from the farm. Open at 10 o'clock.

Mrs. Josie Baltz is Asking Damages

In a new suit filed in the DeKalb circuit court, a demand of $2,500 is made by Josie B Baltz, wife of former Sheriff Frank Baltz of Spencer township, for injuries she received when she was knocked down by a locomotive at the Wabash passenger station in Fort Wayne on April 14, 1923.

Mrs. Baltz states that she had bought a ticket for the purpose of traveling from Fort Wayne to her home at Spencerville and that when she was on the platform she was jostled and crowded so close to the tracks that an engine struck her. She was thrown to the pavement and her skull was fractured and her back was hurt.

Mrs Baltz was removed to the Lutheran hospital at Fort Wayne and later to her home. As a result of the injuries, she states she has partially lost the use of her left arm and that her health is permanently impaired She blames the railroad company for not having any guard rails along the tracks and for not having stopped the engine and thus prevented the accident.

Church Makes a Splendid Record

A record worthy of notice has just been completed in the St. Joe Lutheran church, with the Easter service. Sixteen additions were made to the church membership, as a result of the untiring efforts of the pastor, S D. Steffey. Some by confirmation, baptism and others by letter. One small baby was baptised also. Sunday morning closed a week's special Easter meeting at which time communion was administered to over ninety communicant members.

As a summing up of the work of the church since last Easter, forty-five church additions were made, of this number thirty-nine were adults and six children. This is one of the most successful seasons the church has had for some time.

The church was tastefully decorated.

R Earl Peters, a Fort Wayne attorney, has been named Democratic district chairman to succeed Stanley P. Nelson, of Auburn, who resigned. Mr Peters was appointed by Walter S. Chambers, chairman of the Democratic state committee.

Easter Cantata Heard By Large Audience

A packed house witnessed the rendering of an Easter cantata by the Choral Society at the Methodist church, Sunday evening The society is composed of seventeen members this year. The rendering of the Easter story was exceptionally fine and much credit is due the director, C. A. Woodcox. The short season of six weeks for practice not only reveals a love for the work but ability in mastering productions of such high class. The community appreciates the efforts of the society as shown by the attendance given them.

The society will go to Spencerville Lutheran church, Sunday evening and give the same program.

The W. C Patterson property has been sold to H. J. Renner, the deal being made some days ago.

Sam Snyder, a barber of twenty-five years ago was in town Saturday renewing old acquaintances. He is now living at Logansport. Mr. Snyder run his shop in the Freeman Abel rooms on the corner now occupied by the E R. Kinsey residence.

No Milk Is Too Good For The Baby

Infants demand strength-giving food in a form which is best suited to their delicate systems. Milk—pure milk—answers this need.

Koeppe Bros. milk is pure milk from tested cows, kept in sanitary surroundings. It is aerated and bottled and delivered to the patrons in the best of condition.

We now have a St. Joe phone and persons wanting CREAM can have it, if they will call day before they are needing it. No. 9015.

Save Resistant Chestnut Trees

Blight Is Steadily Spreading Over Country, Killing Many.

(Prepared by the United States Department of Agriculture.)

The chestnut blight is steadily spreading over the country, exterminating the American chestnut as it moves. The financial loss has been very heavy for owners who failed to cut their dead chestnut before it deteriorated, and the United States Department of Agriculture and state forestry departments have been active in advocating timely utilization.

Resistant Tree.

However, a few chestnut trees have appeared to show a marked degree of resistance to the blight, and it is desirable that the more resistant trees be located and preserved. Some of these may prove to be the starting pointed for a new growth of chestnut. A tree should have resisted the blight under natural conditions for at least ten years before it can be regarded as worthy of consideration as a resistant tree. Many trees will throw off blight cankers and apparently be doing well for a few years and then quickly succumb to the disease. The office of forest pathology, in the bureau of plant industry of the United States Department of Agriculture at Washington, is interested in receiving reports of exceptionally resistant American chestnuts, that is, trees which survive after nearly all of the chestnuts in the vicinity have been killed. Unusually resistant trees are recorded and examined at some later date. Nuts and grafted trees from the most promising are planted in an experimental orchard at Bell, Md., for further testing.

Interested in Trees.

This office is also interested in reports of Japanese and European chestnuts which have survived the attacks of the blight. The removal of infected limbs and the cutting out of trunk cankers on these foreign chestnuts, will materially assist them in throwing off the disease. The office of forest pathology is, however, primarily interested in trees which are naturally resistant.

Different Varieties of Common Vetch Compared

Common vetch and its varieties is the subject of a new publication just issued by the United States Department of Agriculture as Department Bulletin 1289. The bulletin discusses and compares the different varieties as to seed and straw yield, rate and time of seeding, method and depth of seeding, viability of seed, winter hardiness and numbers of other factors.

Common vetch is a native agricultural crop of the Mediterranean region but was introduced into the United States as early as the Eighteenth century. It is rather exacting as to temperature and soil conditions and the portions of the United States to which it is particularly adapted are limited. As a commercial crop it is confined to the region in Washington, Oregon, and California having mild winter temperatures. Only the most hardy varieties will survive the average winter of the South Atlantic and Gulf Coast states. Not enough experimental work has been done to determine the limitations of the several varieties in the last-named region, but it seems probable that when properly handled the most winter-hardy strains can be grown in limited areas at least.

A copy of the bulletin may be secured upon request, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Ventilation Important in Keeping Apple Crop

Fruit must be considered for storage long before the harvest, according to Prof. D. B. Carrick, New York State College of Agriculture at Ithaca, in calling attention to the condition of some fruit now being taken from storage. Insects and diseases must be eliminated by correct spraying and care.

The fruit should be mature when picked, but not overripe. Of the two it is better to have the fruit slightly underripe, as it ripens slightly after picking. Fruit must be carefully handled, for, when the skin is broken, the decay organisms may enter. The fruit should not be allowed to stand in the sun after picking, but should be cooked as soon as possible.

It is important to select keeping varieties, such as Baldwins, Ben Davis, and Russets.

Any room with good ventilation and a low temperature will do for storing fruit. Ventilation is important in getting a low temperature as soon as possible. A temperature of 30 degrees with 80 per cent relative humidity, is the best for storage.

Have Tools Ready

The degree of success in home gardening and also the amount of pleasure derived from working in the garden is largely determined by the kind of tools used. The variety of labor-saving hand tools is large and they are inexpensive. Look over the equipment of tools on hand and repair them if necessary. In selecting new tools particular soil conditions should be kept in mind, as all tools will not work under all conditions. If your garden is one-fifteenth of an acre or larger in size you should have a hand wheel hoe.

Aid Greenhouse Men in War on Insects

Much Progress Has Been Made During Last Year.

(Prepared by the United States Department of Agriculture.)

Of especial interest to greenhouse men are the studies of greenhouse insects and problems of greenhouse fumigation conducted by the bureau of entomology of the United States Department of Agriculture. Distinct progress has been made in this field during the past year. Among some of the insects on which work has been done may be mentioned the larger bulb fly, the cyclamen mite, the Cattleya fly, and the tip moth of pine seedlings.

Life history studies of the larger bulb fly have been started, and experiments conducted in the disinfection of bulbs from the insect. The larvae appear to be very resistant to vacuum fumigation with carbon disulphide at the rate of 4 and 10 pounds per 1,000 cubic feet of space. Control experiments intended to test the efficacy of nicotine, sulphur, oil emulsions, soap sprays, pyrethrum, hydrocyanic-acid gas, carbon disulphide, etc., against the cyclamen mite have been begun. Fumigation against the Cattleya fly with hydrocyanic-acid gas has not thus far proved of value in any of its stages, and other control methods are being studied.

Investigation in the general field of fumigation have included the testing of various dosages and exposures on a variety of plants, such as orchids and various bulbs. The killing power of calcium cynide for certain greenhouse aphids compares favorably with equivalent dosages of sodium cyanide. Under greenhouse conditions it was found that overnight fumigation at the rate of ¼ ounce of calcium cyanide to 1,000 cubic feet of space gave 100 per cent kill for three species of aphids. A higher proportion, combined with high humidity, caused severe burning of many varieties of plants.

Pennsylvania Improves Cattle Feeding Methods

Cattle feeding methods in the Lancaster district have been changed completely in the past ten years because of the results obtained in steer feeding at the Pennsylvania State college, states Dr. John M. Thomas, president of the college, in a report on "The Service of the Pennsylvania State College to the Commonwealth."

"The old method has been changed to the modern method as developed at the experiment station," says President Thomas. "According to the best available information, only 10 per cent of the cattle feeders in the Lancaster district had silos on their farms in 1914. Approximately 80 per cent of all the cattle feeders in that district are now using silos in their steer feeding work. This change in the method of feeding has resulted in more economical production and has meant many thousands of dollars to the cattle feeders of Pennsylvania.

"The experimental work in maintaining a beef-feeding herd has been a stimulus for the establishment of more such herds in Pennsylvania, the number of which is constantly increasing."

Value of Silage Varies With the Price of Corn

Silage made from corn that will yield 50 bushels per acre is worth from $6 to $6.50 per ton, depending when the corn was put into the silo.

Corn that is put into the silo when it is denting and all the leaves are green will weigh more than it will when it is more nearly ripe and some of the husks and leaves have begun to dry.

The value of a ton of silage always varies with the price of corn per bushel and also upon the quality of the corn. When corn is put into the silo before it is in the glazing stage, it is not worth as much as it would have been if it were more mature.

Farm Hints

Good cows are kept; poor cows maintained.

• • •

Those who wish to start the year wrong will buy cheap seed.

• • •

Wet days in spring are well spent in cleaning and oiling the harness.

• • •

Even the poorest garden spot contains "buried treasure" for the real gardener.

• • •

Perhaps the farm home garden is often a failure because it is not taken seriously enough.

• • •

Though sunlight costs nothing, it is about the most valuable thing you can give your chicks.

• • •

If you fail to beautify your premises with flowers and shrubbery, you cheat yourself and your visitors.

• • •

In starting a new crop year it is well to remember that the incentive to agriculture is not chiefly profit but the satisfying of the human interest in creative production.

• • •

All crops except timothy give better yields when they are grown in rotation than when grown in continuous culture, experiments at the New York State College of Agriculture show.

ROAD BUILDING

PAVING PROGRAM OF NATION INCREASED

A new automobile was bought in 1924 for every 18 feet of rural highway constructed throughout the country. If all the new automobiles were strung in line along all the new roads, each would be able to move only five or six feet before traffic would be blocked. The result of this situation is that 1925 will see the greatest program of new road building ever known in America. Populous districts already have started to do what the railroads did years ago—double track existing rights of way.

Pavements in metropolitan districts constructed a few years ago are not wide enough to care for the increase in traffic. Wayne county, Michigan, in which Detroit is located, fittingly took the first step to rectify this condition. That county spent $1,000,000 in 1924 acquiring wider rights of way and will pursue a similar policy this year. The program planned there involves super highways with widths of 86, 120 and 204 feet, according to traffic demands.

About 64,112,565 square yards of rural highway was constructed last year, equivalent to 6,071 miles of 18-foot road. This exceeded the record of any previous year by nearly 875 miles. Hard-surfaced highways in this country now total 31,700 miles. The greatest increase in pavement construction was in the building of streets and alleys, which totaled 34,927,862 square yards, or 40 per cent more than in 1923. This work is equivalent to 9,378 miles of 18-foot highway, or enough to run a band 54 feet wide from the Atlantic to the Pacific. In addition, contracts for 2,000 miles of hard-surfaced highways were carried over into this year.

Asphalt pavements laid on the streets and highways of the United States in 1924 total 118,800,000 square yards. This is an increase of 10 per cent over the yardage laid in 1923. Reports from Washington, Oregon, California, Arizona and Nevada indicate that 72 per cent of all paving contracts let in those states in 1924 were for asphalt.

Telegraphic forecasts from 37 state highway commissioners and 40 city engineers of cities of 100,000 population or over indicate the 1925 paving will run 20 per cent over 1924.

Grade Separation Urged for Safety of Public

Separation of all grades, either by depressing the railroads or elevating them, is advocated as the only sure method of eliminating the appalling loss of life at such danger points. Sooner or later, an aroused public indignation will force the separation of all grades, such as have been brought about in European countries.

Just now the railroads are making a "last-ditch" stand by attempting to get through congress an act which would make every motor car stop at every railroad crossing. This is an attempt to deprive ordinary citizens of all rights to damages in case of accident between a motor car and a railroad train.

Such a law would not reduce crossing accidents to any appreciable degree, because many motorists are not sufficiently acquainted with the territory in which they are driving to know when they are approaching a railroad crossing. Oftentimes it is safer to proceed across them than to stop.

There is one answer to this problem. Either make the locomotive stop, which is perfectly feasible, since the engineer knows just where every crossing is, and economically it would be cheaper than to waste the time stopping all motorists; or separate all grades and eliminate the hazard once and for all.

Much Road Work Done by Forest Service Bureau

More than 1,800 miles of roads and nearly 5,000 miles of trails were constructed within or adjacent to the 147 national forests during the fiscal year ending June 30, 1924, according to the annual report made by the chief of the forest service to the secretary of agriculture. In addition maintenance work was performed on 7,423 miles of roads and 32,105 miles of trails.

Including the construction work completed within the last year, the total mileage of national forest roads constructed by June 30 of this year stood at 8,707 and the total mileage of trails at 15,855.

The sum of $9,351,142 was expended on the road and trail work of the forest service during the last fiscal year, the report says. This sum was augmented by funds from co-operative agencies, such as states, counties and local organizations.

Saved Good Road Taxes

Some of the automobile owners concerned now with good roads taxes of dimes during the year will be more het up at times over extra car expenses in dollars, relatively speaking. A dollar of "taxes saved" is quite apt to mean a "ten-spot" lost—rung out of your wallet and up on the cash register in the garage. The big question is: "Shall we split good roads savings to get more good roads?" It is worthy of consideration by those concerned.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1925, Western Newspaper Union.)

INHERITING WEB FINGERS

MR. BRYAN doesn't believe in evolution. If Mr. Bryan would study comparative embryology, he would learn that each individual living thing, in its growth, passes in a few weeks or months through all the forms which its race has passed through in hundreds of thousands of years. Each animal body, whether a frog, a bird, a lion or a man, is for a short time in its growth like all the other and lower forms from which it has come.

Man has developed or evolved from and through all the lower forms of life and each has left its marks on him. These have generally been lost or covered up but sometimes, for some strange reasons, these marks of our lowly origin remain. They are what comparative anatomists call "vestigial remnants."

One of these strange occasional survivals is a webbing of the fingers and toes. The fish have fins, broad flat paddles by which they can force their way through the water. Frogs have distinct toes, but they are joined together by skin so as to form a broad propeller. Ducks, like all water fowl, have webbed feet.

But when man got away from the sea and became a land animal he lost his webs on his hands and feet. He needed fingers and toes more than he did swimming apparatus, so they became separate and ununited down to the base of the third joint. The human hand is a wonderful piece of machinery, more useful than the paw of any animal and it is the human hand that has made man superior to and more powerful than all beasts.

Occasionally an individual "throws back" to his sea-born ancestors and is born with webbed fingers or toes. Why nobody knows.

An unusual series of such cases is reported by Dr. Douglas P. Murphy in a recent issue of the Journal of the American Medical Association. In five generations of a family in a mountain community, fourteen cases were found. The first member, a mountaineer, had the second and third toes on his right foot webbed. Although this is the first case which Doctor Murphy saw it was evidently considered a family mark since the mountaineer threatened to disown his first child if it did not have this defect. Fortunately for his domestic happiness, his first son had all his fingers and toes webbed. The son had ten children, three of which had webbed fingers or toes. In the next two generations, nine of the children had this family mark.

What is the cause of this peculiarity? No one knows. It occurred in boys as often as in girls. In this family, it was found in one-third of all the children. It only occurred in the children of web-fingered parents. Neither the children nor grandchildren of normal members showed this deformity.

CRYING BABIES

THE scientific study of babies has exceeded in efficiency the thoroughness of the Chicago stock yards. In that center of business energy it is an old story that every part of the pig except the squeal is used. In a recent issue of the American Journal of Diseases of Children, three doctors devote 28 pages to the effect of crying on new-born babies. They don't say anything about the effect of the babies crying on other members of the household.

Put into plain language, the questions which the investigators were trying to answer were: how much energy does the baby spend in crying and how much food is needed to furnish this energy.

They found that crying uses up a baby's energy, just as physical work uses up the energy of an adult, and that this lost energy must be restored by food. In other words, crying is work for a baby, and sometimes hard work.

Few of us grownups realize how hard a baby works when it cries. The authors estimated that if a baby cried continuously for 24 hours (which, thank God, it never does), and if it was 20 per cent efficient in using its energy, which would be better than the best locomotive, it would do an amount of work equal to lifting its own weight to the top of the Washington monument. And all this on only three tablespoonfuls of milk! As a fuel saver, the baby has the best power plant ever built backed off the boards.

How much energy the father expends in walking the floor with the baby while it is crying, the article does not state.

But the important fact is that crying is not a harmless amusement on the part of the baby. It is work. It uses up strength and energy, which the baby needs for growing. It tires the baby and makes him feel miserable, and then he cries some more.

Yet it is the only way he has of making the stupid, grown-up world know that he is uncomfortable.

Crying is his danger signal and his safety valve. If he is well and happy and comfortable, he won't cry. Then everybody else is happy. He only cries when there is something wrong, and the sooner this is corrected the less energy he'll waste.

Wit and Humor

GENERAL KNOWLEDGE

"Jack," said the teacher, "what is a cape?"

"A cape is a piece of land extending into the water."

"That's right. Now, Jimmy, define a gulf."

"A gulf is a piece of water extending into the land."

"Good. Hector," to a small, eager-looking little chap, "can you tell me what a mountain is?"

"A mountain," responded Hector, "is a piece of land extending into the air."
—Japan Advertiser.

Not Well Trained

Peggy had been to the circus and mother thought to impress a lesson.

"When dogs, and ponies, and monkeys obey so well, don't you think a little girl ought to obey even more quickly?" she said.

"So I should, mummy," was the instant reply, "if I'd been as well trained as they have."

Where She Looked

"Darling, that encyclopedia you bought is no good at all."

"Why, whatever's wrong with it?"

"This morning I wanted to find out why swallows migrate in winter."

"And you couldn't find it? Where did you look for it?"

"I looked under 'why,' and I couldn't even find the word there at all."

DANCING ARTISTS

He—You're an artist at dancing.
She—And you're a caricature at it.

Economy

Economy we practice now,
We're gradually learning it.
This thing of saving cash, we vow,
Is harder still than earning it!

Let Others Worry

Anxious Wife—Able, have you done anything about that horrible Black Hand letter?

Able—Oh, ain't I, though. I turned it over to my insurance company. They got $20,000 tied up in me; let them worry.—Moorestown Star.

Desperate Case

"That fellow looks downcast."

"Yes, they are going to shoot him at sunrise."

"A deserter?"

"No, a movie star. And that's a darn mean hour to get out on the lot."

Business Man

Gentleman—What? Begging here? You usually stand in Main street?

Panhandler—Yes, but I have opened a branch store here.—Dorfbarbier (Berlin).

Class

"Must be a gentleman farmer located near by."

"What makes you think that?"

"I noticed the last scarecrow we passed had on golf togs."

WILL RAISE PRICE

Mother—Silence is golden, Willie, not silver, as you say.

Willie—I'm glad to hear that—sister has never given me more'n a quarter, you know.

Get Back Your Health!

Are you dragging around day after day with a dull backache? Are you tired and lame mornings—subject to headaches, dizzy spells and sharp, stabbing pains? Then there's surely something wrong. Probably it's kidney weakness! Don't wait for more serious kidney trouble. Get back your health and keep it. For quick relief get *Doan's Pills*, a stimulant diuretic to the kidneys. They have helped thousands and should help you. *Ask your neighbor!*

An Ohio Case

Geo. A. Holl, shoemaker, Ohio Street, Vermilion, Ohio, says: "A dull ache across my kidneys wore on me. When I bent over, sharp pains darted through my back and I could hardly straighten. My kidneys were weak and many nights I had to get up to pass the secretions. Doan's Pills rid me of the backache and I soon felt better."

DOAN'S PILLS 60c

STIMULANT DIURETIC TO THE KIDNEYS

Foster-Milburn Co., Mfg. Chem., Buffalo, N.Y.

Kitten's Interesting Trip

A locomotive engineer, who was inspecting his engine before a run, noticed a kitten clinging to the pipe beneath the boiler. He left it there for the moment and then forgot about it. Before he thought of it again the kitten had made two round trips between Jersey City and Crawford, N. J. At Crawford he removed it, and some one took it to the station house. The kitten must have had an interesting story to tell its mother and will probably have a much more interesting one to tell its grandchildren.—Youth's Companion.

Sportsman's Paradise

The deer forests of Scotland have now a serious rival in the wooded mountain regions of the north and south islands of New Zealand.

Before 1861 deer were unknown in New Zealand, but that year one stag and two hinds from Thorndon park, in Essex, England, were let loose in the Nelson province. Then, in 1870, a few animals were imported from the Dalhousie forests in Forfarshire. That was the beginning of the great Otago herd.

Snowy linens are the pride of every housewife. Keep them in that condition by using Red Cross Ball Blue in your laundry. At all grocers.—Advertisement.

The White Flag

Doris, three years old, had desired something for a plaything, but was told by daddy that she "was too short" for it. She continued her demands and he continued his denials and admonitions until at last, with a final "you're too short," he arose and started toward the little girl.

"I know I am, I know I am," she hastened to assure him.—Indianapolis News.

Love and Friendship

Love can live upon itself alone, but friendship must feed on worthiness. Therefore, the way to secure a friend is to be one.—C. G. Goss.

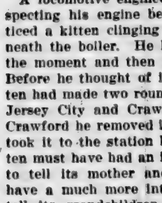
Smarting, scalding, sticky eyes relieved by morning if Roman Eye Balsam is used when retiring. 372 Pearl St., N. Y. Adv.

Not His Line

"Is Jack good at cross-word puzzles?" "Oh, no! He's too sweet for words!"—London Opinion.

Women, Why Suffer?

Quincy, Ill.—"I was relieved of feminine trouble, which had caused me to suffer with headache and other distressing feelings, by simply taking a few bottles of Dr. Pierce's Favorite Prescription. I have had no return of the trouble and I am glad to recommend this tonic to all women who suffer. I wish someone had told me about this remedy long before they did."—Mrs. Rose Davis, 525 S. 3rd St.



Obtain this "Prescription" of your dealer, in tablets or liquid. Write Dr. Pierce for free medical advice, to Invalids' Hotel, in Buffalo, N. Y.

KEEP YOUR SCALP Clean and Healthy WITH CUTICURA

Hoosier News Briefly Told

Bedford.—A gruesome find was made on the Dunn farm, three miles northwest of here, when the skeleton of a man, decapitated, was found in a shallow grave by Shelly Salyards.

Evansville.—Lieut. Gov. Harold Van Orman, illustrious potentate of the Hadi temple of Evansville, had charge of the annual spring ceremonial, which was attended by hundreds of Shriners from the pocket territory and from neighboring states.

Noblesville.—By the terms of the will of Mrs. Hannah Wainwright, widow of Maj. W. A. Wainwright, probated in this city, all the estate with the exception of some personal property goes to the son, L. M. Wainwright of Indianapolis.

South Bend.—Federal court prisoners will be housed in the St. Joseph county jail, it has been decided. It has been the custom to remove federal prisoners to the Marion county jail at Indianapolis. A Federal court recently was provided for South Bend.

Lafayette.—Edward G. Proulx, age forty-four, of Purdue university, state chemist since 1918, and state seed commissioner since enactment of the pure seed law in 1921, died in a hospital here, following several months' illness.

South Bend.—Police and sheriffs' posses of northern Indiana and southern Michigan are searching the countryside for four young men who held up the Laketon State bank and escaped with approximately $1,500 in currency.

Franklin.—Opening up the first day the new motor speed law was placed into effect, State Highway Policeman Clarence Baker and City Marshal Harrison arrested seven violators between Franklin and Edinburg, a ten-mile drive.

Indianapolis.—Gov. Ed Jackson went to the State Tuberculosis hospital near Rockville to inspect the plant, where, in the winter, trouble was experienced with the water system. Dr. Amos D. Carter is superintendent of the institution.

Bloomington.—Bloomington G. A. R.'s and delegations from the civic organizations are going to invade Princeton in June, during the state Grand Army of the Republic encampment, in an effort to bring the 1926 encampment to this city.

Noblesville.—Freeman Baldwin, charged with manufacturing white mule, and Raymond Manford, charged with transporting liquor, pleaded guilty in the City court and were sentenced to 120 days at the state farm and fined $200 each. Manford said he lived in Indianapolis.

Indianapolis.—A report presenting an argument in favor of maintaining the Indianapolis teachers' pension fund separate from the state teachers' pension system, has been submitted to the members of the board of school commissioners by the committee of teachers favoring the retention of the Indianapolis fund system.

South Bend.—Funeral services for Schuyler Colfax, Jr., former mayor of South Bend, were held at St. Paul's Memorial M. E. church, the Rev. J. B. Rosemurgy officiating. Burial was in the city cemetery beside the body of his father, who for several years served as speaker of the national house of representatives, and also was vice president under Grant.

Logansport.—E. H. Kimball and Frank Tukey, federal prohibition men; police; Walter Bowyer, sheriff, and deputies made raids here that resulted in the arrest of 23 persons on charges of selling intoxicating liquor. Included in the list are four women. All those arrested were held in jail for three hours before being admitted to bail.

Indianapolis.—Approximately $2,500,000 worth of hard surface road building contracts will be opened by the state highway commission on April 21, John D. Williams, director, announced. In addition, stone or gravel surfacing contracts totaling about $700,000 also will be opened. The hard surface bids will be for 88 miles and the stone and gravel projects for 55 miles.

Indianapolis.—A thrilling chase over country roads east of Indianapolis ended when the automobile of George McKinney and Marion White ran out of gasoline and was overtaken by police. Both were arrested as the two men who were alleged to have held up an automobile about a mile east of Knightstown, taking $280 from one of the two men in the automobile.

Brazil.—The new state law providing that persons convicted of driving an automobile while intoxicated may be enjoined from driving for one year, was put in effect for the first time in the Clay Circuit court when Jacob Mathis, Jr., of Harmony was found guilty of the charge and was enjoined by Judge Hutchinson from driving his car for a year. If he violates the order a sentence of six months in prison and a fine of $500 and costs will be enforced.

Richmond.—Wiping out of a bonded indebtedness of $287,000 on the municipal electric light plant by the transfer of $35,000 from the general funds to its sinking fund, will place the city of Richmond in a position to enjoy part of a monthly income of $50,000 which the plant is earning.

Corydon.—William Ridly, seventy-four years old, president of the Corydon State bank, ex-judge of the Harrison circuit court and a past grand master of the Indiana Masons, died here after a lingering illness which began with influenza last fall.

GRIFFIN RULED BY COMMITTEE

Evansville.—The nucleus of a permanent organization of government for the town of Griffin was formed when a committee was named at a meeting of townspeople, headed by Henry Baker, national Red Cross director of rehabilitation work for the area, which committee will appoint a town treasurer and auditor and will pass on all refinancing and adjustments. This committee will assist in making a revaluation of all property losses.

Each family is to have whatever it needs to assist it in becoming a going concern. Household furniture, clothing and provisions are to be provided as necessary. Cooking utensils and dishes were distributed to families able to do their own cooking. About two dozen tents are being used by Griffin families. It is reported that half a dozen houses are almost ready for occupancy.

A Red Cross restaurant is now in operation in Griffin, under the direction of J. R. Wheeler and M. Pfeister of Mount Vernon. Approximately 200 are fed there each day without charge.

Logansport.—Abraham Miller, seventy-eight, prominent in Republican politics for many years, ended his life. Despondency over ill health was the cause.

Petersburg.—Charles Humes, a grocer, of Winslow, was robbed of $350. Humes' wife died three weeks ago, and Humes had received the money to pay for the funeral expenses.

Boonville.—Mary Bell Young, four-year-old daughter of Roscoe Young of Richland, was burned to death when her clothing caught fire while at play in the yard of her home.

Columbus.—Fire that started on the farm of John Brand, in Ohio township, west of this city, spread to the farm of William Elkins, where it burned over a tract of more than 80 acres.

Indianapolis.—The new trial of John Thomas Shaw, colored, once convicted on a charge of murder in connection with the death of Helen Hager Welchel, was set for April 27 by Judge James A. Collins of Criminal court.

Clinton.—George Baugh, age forty-eight, a carpenter, living at the edge of Clinton, was fatally injured and Frank Huffman, age fifty, was seriously hurt when an automobile in which they were riding was struck by an interurban car.

Evansville.—Though the establishment of Maj. Leonard Coop (Chicago) Red Cross chapter, in charge at Griffin, has eliminated the need of Evansville workers remaining on the ground, groups go out from Evansville headquarters each day, by request of Major Coop, to assist in the distribution of clothing, which will continue for several days.

Marion.—The program for commencement at Taylor university, Upland, was announced by Dr. John Paul, president of the university. The program and service connected with the graduation exercises will start Thursday, June 4, and ten days will be taken with an evangelistic and missionary convention, which is to lead up to the commencement.

Indianapolis.—Keeping alive the cultural stimulus of college days, improving business and social conditions and creating a bond between foreign and American college women, are a few of the objects of the American Association of University Women, according to Mrs. Frank D. Hatfield, general chairman of the committee preparing for the fortieth annual convention of the association, to be held April 8 to 11.

Indianapolis.—The reins of the city, county and state government passed into the hands of Indianapolis boy scouts for one hour last Thursday in observance of Civic day, which formed a part of the program for boy scout week. From 10 to 11 o'clock Gov. Ed Jackson, Mayor Lew Shank, Herman F. Rikoff, chief of police; John J. O'Brien, chief of the fire department, and Frank Lahr, judge of juvenile court, left their official chairs to make way for the scouts.

Indianapolis.—D. C. Stephenson of Indianapolis was arrested on five indictments returned a few minutes prior to his arrest by the Marion county grand jury before Judge James A. Collins, in the Criminal court. He was released on $25,000 bond. The indictments were returned in connection with an alleged attack recently on Miss Madge Oberholtzer, daughter of Mr. and Mrs. George E. Oberholtzer, 5802 University avenue. The indictments charge Stephenson with assault and battery with intent to kill, assault and battery with intent to rape, malicious mayhem, kidnapping and conspiracy to commit a felony. An indictment also was returned against Earl Klenk and Earl Gentry, who are alleged to have been involved in the case.

Indianapolis.—The little Methodist church at Griffin, which was battered into a mass of ruins by the tornado two weeks ago, will be rebuilt by the Trinity Methodist Episcopal church of Evansville, Dr. Harry Andrews King, superintendent of the Indianapolis district, said, following the announcement by Dr. George H. Murphy, superintendent of the Evansville district.

Indianapolis.—As a result of intensive maintenance work in the last few days, the greater mileage of gravel and stone roads in the state highway system is in splendid shape

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(©, 1925, Western Newspaper Union.)

Lesson for April 19

LIFE IN THE EARLY CHURCH

LESSON TEXT—Acts 4:31-5:11.

GOLDEN TEXT—"The multitude of them that believed were of one heart and of one soul."—Acts 4:32.

PRIMARY TOPIC—A Story About Giving.

JUNIOR TOPIC—How the First Christians Loved One Another.

INTERMEDIATE AND SENIOR TOPIC—How the Early Christians Lived Together.

YOUNG PEOPLE AND ADULT TOPIC—Lesson From the Early Church.

I. Characteristics of the Primitive Church (vv. 31-35).

1. It Was a Praying Church (v. 31).

These early Christians for every want and every need betook themselves to God in prayer.

2. It Was a Spirit-filled Church (v. 31).

When they prayed, the place was shaken wherein they were gathered together, and they were all filled with the Holy Spirit.

3. It Was a Church Which Had Great Boldness in Preaching the Word of God (v. 31).

The ministers of a Spirit-filled church will not offer any apology for the Bible, but will expend all their energy in fearlessly preaching it.

4. It Was a United Church (v. 32).

They were all of one heart and one soul. This shows that they had a unity of feeling and purpose.

5. It Was a Charitable and Generous Church (v. 32).

They held nothing back from those who had need. As needs arose, supplies were given from a common fund.

6. Its Ministers Had a Powerful Testimony (v. 33).

This shows that there must be a personal experience before there can be a powerful testimony.

7. It Was a Church Whose Membership Exhibited Unblemished Character (v. 33).

Great grace was upon them all.

II. Barnabas' Generous Act (vv. 36-37).

He sold a piece of land and turned over all the proceeds thereof to be used for the help of those in need. It should be borne in mind, however, that it is not said that Barnabas sold all the land he had.

III. The Sanctity of the Church Vindicated (5:1-11).

This new community is now for the first time called the church. The mention of the church in Acts 2:47 is spurious. They now have broken with Judaism so that their success depends upon their being recognized. Since this new community superseded the old, God was to make His dwelling place among them—the very sacredness of the tabernacle and temple was transferred to them. This lesson, the church itself must learn, as well as the Jewish mass surrounding it. The sacredness of God's dwelling place men are slow to learn. Moses did not take off his shoes until bidden by the Lord. Nadab and Abihu must be stricken down in the beginning of the Mosaic economy for their presumptuous offering of strange fire before the Lord. Achan was put to death for secreting a part of the booty soon after entering the promised land. So at the beginning of the church, this warning was needed on the part of the church to prevent the hypocrisy of double service.

1. The Occasion Which Brought This Dreadful Judgment on Ananias and Sapphira (vv. 1-4).

It was their hypocritical imitation of the generous act of Barnabas. He and his wife conspired together in this defiance of God. They wanted the honor without paying the price. The same love of praise is causing many in the church today to imitate their dreadful mistake. Peter told them they had not lied to men, but to God. So far as we know Ananias did not speak a word, but his actions spoke louder than his words. Such actions could only be accounted for by the fact that Satan filled their hearts. But that did not excuse them. They were responsible for allowing Satan a place in their hearts. We should learn from this that God and mammon cannot be served at the same time. People today are walking in the way of Ananias when they sit down at the Lord's table with unregenerate hearts.

2. The Judgment Which Fell (vv. 5-10).

Both Ananias and Sapphira fell down dead and the young men carried them away for burial.

3. Great Fear Came Upon the Church (v. 11).

This vindication caused the people to know that God was with them, and it also kept the hypocrites from joining with them (v. 13). Let us beware!

Presistence of Life

Strange, isn't it, that marvelous persistence of life! But that is a way that life has. We speak of it sometimes as very fleeting and transitory, and yet there are so many things about us, after all, that are very hard to kill.

Tears Shall Come No More

God washes the eyes by tears until they can behold the invisible land, where tears shall come no more.—H. W. Beecher.

Has Made Success of Marriage and Career

Mary Roberts Rinehart, discussing her family life, her success and what it has meant to her, in Hearst's International-Cosmopolitan, prompts Ray Long to say:

"Mary Roberts Rinehart is like a breath of fresh air. She is a refreshing answer to those women who talk of the impossibility of marriage and a career. She has made the wonderful discovery that her marriage—her family—is what makes a career worth while.

"Here she is—this mother whose six-foot sons treat her as a 'pal'—beautiful, a charming hostess, distinguished as a novelist, as a playwright, as a short-story writer, as a traveler who describes what she sees with picturesque humor.

"Mrs. Rinehart succeeds in so many things because she wants success for others, not for herself. She loves her work, takes fine pride in it, of course. But back of it all is the urge to do for others. And that, after all, is the biggest thing in life; to lay the fruits of your effort at the feet of some one you love."

Cuticura Comforts Baby's Skin

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Reasonable Guess

"Hobbs Hoobie, from down there in Booger Holler, has been away for quite a spell," said Gap Johnson of Rumpus Ridge. "I reckon he was dodging the revenuers, or something that-a-way."

"Did he tell you so?" inquired Gabe Giggery.

"No; but when I sorter asked him if he hadn't been he said it wasn't none of my d—n business."—Kansas City Star.

The housewife smiles with satisfaction as she looks at the basket of clear, white clothes and thanks Red Cross Ball Blue. At all grocers.—Advertisement.

Hints to Parents

If you wish to hear frequently from your children at school, give them a small allowance. That is, if you desire to hear directly. If you prefer to hear from them indirectly, give a large allowance.—Judge.

One 50-cent bottle of Dr. Peery's "Dead Shot" will save money, time, anxiety and health. One dose expels Worms or Tapeworm. 372 Pearl St., N. Y. Adv.

Many a man has learned how to condense a peck of trouble into a quart cup.

Hoxsie's Croup Remedy for croup and congestive colds, prevents pneumonia. 50c. All druggists. Kells Co., Newburgh, N. Y., Mfrs.—Adv.

Heroic measures are several sizes too large for the average man.

Another Nurse Praises Tanlac

"As a nurse I have seen many marvelous results from Tanlac. For anaemia, nervousness, stomach trouble and building up the system after operations I consider Tanlac great!" Mrs. K. M. Lowe, Walnut Park, Cal.

NURSE Lowe's statement merely backs up what over one hundred thousand grateful Tanlac users have said about this great natural tonic and builder. Our files are packed with such testimony.

If your system is run down, if you can't seem to eat or sleep, have lost weight or suffer from trying pain, why not let Tanlac start to bring you back to vigorous strength and health.

No long, wretched wait to get results! Tanlac starts right in to build you up. It cleans the blood, revitalizes digestive organs, fixes up the liver and makes you feel like a new person.

For Constipation Take Tanlac Vegetable Pills

TANLAC FOR YOUR HEALTH

They Don't Show

Somebody asks if the women of today have any illusions. They are not wearing them if they have.—Toledo Blade.

SICK WOMEN ATTENTION!

Read this Remarkable Testimony Regarding Results from Taking Lydia E. Pinkham's Vegetable Compound

Norfolk, Virginia.—"If you only knew how many women and girls have taken your medicine by hearing my testimony, it would seem wonderful to you. Every day and every chance I have I advise some one to try it. It was in June, 1904, when I had given up to never get well, that I wrote to you. My husband went to the drug-store and brought the Vegetable Compound home to me. In a few days I began to improve and I have often taken it since. I am now passing through the Change of Life and still stick by it and am enjoying wonderful health. When I first started with your medicines I was a mere shadow. My health seemed to be gone. The last doctor I had said he would give me no more local treatments unless I went to the Hospital and was operated on. That was when I gave the doctors up. Now I am a healthy robust woman. I wish I could tell the world what a wonderful medicine Lydia E. Pinkham's Vegetable Compound is. I will be only too glad to answer letters from anywhere. I wish all sick women would take it."—Mrs. J. A. Jones, 317 Colley Avenue, Norfolk, Virginia.

Man 81 Owes Health to Beecham's Pills

"Eighteen years ago my husband was troubled with bad spells of dizziness and dyspepsia. Someone told us about Beecham's Pills and he has been a well man since taking them.

"He is eighty-one years old and goes to his office every day from 7 till 5.

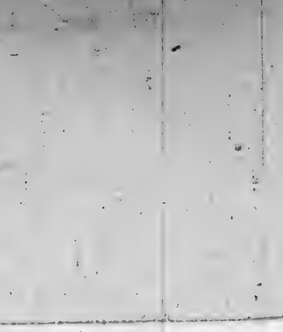
AWAKES OLD WINTER

OLD WINTER had been pretty cross when he blustered down from his cold North. He came early, too—before the last fall flowers were ready to leave the garden—and though they fussed and fussed and told Old Winter it was not time for them to go, he only blustered the more and said he would not have such gay goings on.

"All this fuss and noise you have all summer is folly," he roared. "I just won't have it, so now be gone, all of you."

One little bird braver than the others lingered in a tree, and though he shivered a little in the early morning the



One Little Bird Began to Pipe His Song.

friendly sun warmed him and he began to pipe his song.

"Won't have it," roared Old Winter, blowing his cold breath on the little bird, and as if that was not enough he called his brother Old North Wind, to help him scare the birds and straggling flowers away.

"Now I will see if we can have a little peace and quiet in the land," said cross Old Winter. "How my sister, Summer, can live in such a noisy world I do not understand—squirrels a-chattering and brooks a-babbling, bees a-humming and birds singing their heads off.

"No, siree! Quiet for me and stillness, such as my big white blanket brings, is the sort of life I like, and now we will have it around here for a while anyway."

Then Old Winter threw his big white blanket over all the land and crawled under it and went to sleep.

So still and quiet did he make things that he forgot all about his home in the cold North or that he must get up and let Spring reign in his place.

But when it was time for Spring to make her appearance she tripped along the edge of the meadows and fields and found Old Winter still asleep.

"He must wake up and go home," she said, and then she gently shook him. "Get up! It is time for me to begin my work."

"Go away and let me alone," said Old Winter, peeking out to see who was disturbing his comfort. "O, it is you, is it? Now, if you do not run back home I'll throw my big white coat over you and freeze you."

But Spring was not afraid of him. She always had just so much fussing to put up with from Old Winter, so after shaking and coaxing awhile and still Old Winter remained stubborn she ran off to get Mr. Sunnah's help, and the next morning all the birds were chattering and the crocuses were peeping out even through the snow.

The squirrels began to chatter and brooks began to bubble and gurgle as they saw Old Winter feebly trying to cover Spring with his white coat.

At last she jumped away and began to laugh and all the springtime visitors joined her, until Old Winter caught up his ragged white coat and with his hands over his ears ran off to his home vowing he would get even with them for making such a racket and disturbing his sleep.

But Spring knew that if she had stayed away even another month Old Winter would not have been willing to leave even then, for he was a grouchy old fellow and loved to have his own way, and once he settles in a place it is hard work to get him to move.

The Why of Superstitions

By H. IRVING KING

SEA-GOING ROOSTERS

THE crowing of a cock at sea, when the bird is especially vociferous, is thought by sailors to be an omen of good luck—a prosperous voyage for a merchantman; victory for a man of war. A crowing cock predicted to Themistocles before the battle of Salamis his great naval victory. On board Admiral Rodney's flagship when he achieved his great victory over De Grasse in 1782 was a cock, which crowed lustily each time the admiral fired a broadside which was, to the sailors, an assurance of success; and on one of the ships at the battle of Fort Fisher in the Civil war was a cock whose constant crowing was taken as an omen of the capture of the fort.

In more ancient times the sacrifice of a cock was supposed to insure favorable winds for mariners and today those who search for a dead body in Norwegian streams take along a cock in their boat which is supposed to crow when the shallop arrives over the place where the body is.

Among sailors of the northern races the cock's reputation as a harbinger of victory when he crows amid the din of battle is evidently a reminiscence coming down from the days of the Vikings. For in the old Norse myth of Ragnarock, that last great battle, the Norseman's Armageddon, the cock is represented as crowing lustily amid the conflict, heralding the regeneration of the world and the reign of the sons of Odin. So, also, we may see why he crows in a boat when it reaches the place where a sought-for drowned body lies, for his crowing at Ragnarock awakened the dead god, Baldur.

The belief of Themistocles that the crowing of a cock promised him victory at Salamis, and the modern superstition among sailors that the crowing of a cock on board ship portends good luck, as well as the modern land superstition that the crowing of a cock when it is raining means that soon the sun will be shining, comes from quite another source than the belief in the bird's shrill clarion as a harbinger of victory amid the din of the sea fight. These latter superstitions are derived from the fact that the cock was the sacred bird of Apollo, the sun-god, the mighty protector from evil and master of prophecy. They are relics of sun-worship.

SUCH LUCK.

When ended is the daily grind
A weary'd agent
Turns homeward, but alas, to find
The cook has went.

Have You This Habit?

By Margaret Morison

MONTAGU D'ARCY

"THREE of my volumes of Irving missing," lamented Ella, "and each one is a first edition."

"Of course they're first editions," answered Bridget. "Montagu D'Arcy never borrows any but first editions."

Ella groaned. Then he got out his hat and stick and walked round to the D'Arcy house. In the library he waited for the notorious Montagu. The corners of the room were piled with books, and along the tops of the rows on the shelves they were huddled in horizontally. Ella did not see how anything as individual as his three Irvings could ever come forth from that confusion. So, when D'Arcy appeared all smiles and cordiality and promised that the borrowed volumes should be sent back, Ella had his misgivings.

He was not surprised when two weeks passed and nothing happened. Again he called at the D'Arcy house. Alone in the library, he made a hasty and hopeless search down the shelves. Then, with a sense of welcoming back one given up for dead, he came upon his Irvings. When word came that D'Arcy was not at home, it was all that Ella, the super-courteous, could do to leave his beloved Irvings behind.

After that Ella made periodic visits to keep track of the prisoners. D'Arcy always managed to make it impossible to rescue them without discourtesy. Then, one day as Ella was leading up to the point of the books, D'Arcy interrupted casually: "Oh, by the way—I know you won't mind—I lent your copies of Irving I borrowed the other day to Jones. No one appreciates good books like Jones, you know, and these Irvings of yours are good."

"That's true," sighed Ella, now definitely giving up his first editions as "missing."

At the club that night he found a rueful group of friends discussing recent casualties in their libraries. All had suffered losses. In the course of conversation some one mentioned Montagu D'Arcy as a connoisseur.

"Yes," put in a bitter voice, "of other men's books."

Then the plan was hatched. It was noted that Montagu, who had a fixed aversion of returning, was nevertheless as ready a lender as he was a borrower. A careful list, therefore, was made of the chief missing treasures of each man present. Gradually, they agreed, Ella should borrow back Smith's books, and Smith Ella's; Brown would rescue Doctor Williams' pet Poe's poems and Doctor Williams Brown's volume of modern plays. Then there would be a grand exchange to rightful owners.

A month later it was a disconsolate D'Arcy that came one day to see Ella. He didn't know what had happened—people wouldn't even talk books with him any more. Now, that Bryant of Ella's up there—might he borrow—

But Bryant was otherwise engaged. "Verily," thought Ella, "the habit of borrowing hath its own reward!"

MAY IDENTIFY TOMB WHERE SAVIOR LAY

Discovery of Shrine Stone Is Important.

A discovery, which may prove of far-reaching importance, has been made near the entrance to the Garden tomb, outside the Damascus gate of Jerusalem. Some loose stones were being removed from the ground in front of the entrance of the tomb in the process of tidying up the garden, when one of them attracted the attention of Miss Hussey, who is in charge of the tomb, owing to the fact that it had markings upon it. She had it removed, partly cleaned it, and reported the find to the government department of antiquities.

A few days after its discovery it was viewed by Professor Brandenburg, who was commissioned by the Berlin Society of Palestinian Research to investigate the rock tombs of Palestine a year ago, and whose reputation as an authority on rock architecture in the Mediterranean is admittedly high. He immediately, and without hesitation, identified it as "a shrine of the goddess Cybele or Aphrodite (Venus), with the column and tree of Adonis or Attys beside it," declaring that such shrines were found in temples of Venus. A more careful cleansing of the stone further indorsed his first impression, for it clearly revealed the fruit on the tree.

The importance of this discovery, if the identification be correct, as seems

Shrine Stone Found at the Garden Tomb.

probable, lies not so much in itself as in its association with the Garden tomb. This tomb is regarded by many as perhaps the very tomb of the Resurrection. It is a fact of history that in A. D. 135, when, on the suppression of the revolt of the self-styled Messiah, Barchocheba, the second and more complete Roman destruction of Jerusalem took place, the Emperor Hadrian built a new Roman city, named Aelia Capitolina, on the ruins, and, among other things, erected a temple of Venus over the Tomb of the Resurrection, with the purpose of completely desecrating it. It is evident, therefore, that in seeking to identify the Tomb of the resurrection we may expect to find traces of this temple.

If the identification of this stone as a shrine of Venus be finally established, it will naturally follow that the definite identification of the remains of a Temple of Venus over a large Jewish tomb of the period, which otherwise bears out all descriptions of the tomb of Joseph of Arimathaea, must naturally carry with it a strong presumption that that tomb may indeed be no other than that of the Resurrection itself. This stone may thus be found to be another important link in the chain of identification.

Sunrise Service

The Easter morning service in the Hollywood bowl, at Hollywood, Calif., begins just as the sun rises. The cross is formed by a chorus of 500 tiny children. The great community orchestra is at the left of the platform behind a bank of lilies. Thousands attend the service.

Crucifixion's Lesson

On the first Good Friday afternoon was completed that great act by which light conquered darkness and goodness conquered sin. That is the wonder of our Savior's crucifixion.—Phillips Brooks

NEWS OF THE TOWN

You can get transfer paper at News office in large or small sheets.

Roy Bowser and wife were Sunday guests of John Willett and family.

The fruit prospects this season look exceptionally encouraging, especially the apples.

Chas. Miser commenced work this week in the surveyor's office at Auburn, assisting Calvin Cain in the ditch and road work.

Mrs. Hattie Widney and Della Huffman spent Sunday in the Ray Davis home at Auburn.

The members of the Vocational class of the local school, were entertained Friday evening after church at the H. J. Renner home.

Ethel and Lawrence Pflaumer of Springfield, were over Easter guests of their parents, returning to their school on Monday.

Mrs. Leslie Tatman and two children of Logansport returned to their home Monday morning after visiting in the C. H. Havens home.

One of the funniest things in the world to us is to see the kind of automobiles some fellows put locks on. Just notice this if you haven't already.

M. H. Andress, Clayton Wyatt, F. M. Monroe and H. G. Hursh, accompanied by their wives, spent Sunday with Stanley Monroe and family at West Unity, Ohio.

The Citizens Military Training Camp will be held at Ft. Benjamin Harrison, Indiana, from July 8 to August 6. Young men between the ages of 17 to 21 are eligible. St. Joe should have at least three applicants. This camp presents an opportunity to each eligible young men to combine a vacation of four weeks with excellent instruction. For application or information, inquire of Elgin Curie.

Clarence Green, superintendent of the rural schools, has completed the grading of papers submitted by eighth grade students who took the state examination in March. Two hundred and four students submitted papers. Of this number 92 passed, 17 failed and 95 were conditioned. Another examination will be held next Saturday. Those who failed and those who were conditioned will have another chance to get a passing grade.

A stray dog took up sleeping room in Rice's drugstor last Thursday evening and in the night it was aroused from its slumbers by the candy rabbits hopping about in the show window and Mr Dog proceeded at once to see what was going on, so he pounced into the display and devoured several of the candy bunnies, leaving only a few portions scattered about. In the scirmish to hide from the dog a number of them were upset and scattered about the window. When Mr. Rice arrived in the morning the dog was still on watch.

Embroideries Enrich Spring's Dressy Coats

Among the dressier coats for spring, rich embroideries reveal sumptuous colors and oriental designs in wide, irregular bandings. Embroidery in the coat shown here extends nearly to the hemline and covers at least half of the sleeve. A collar of dyed squirrel carries out its warm brown tones.

Bacteria Found Useful in Growth of Plants

Substances working on plants much as vitamins A and B do on animals have been studied by Dr. Florence A. Mockeridge of University college at Swansea, England. The materials she found stimulating the growth of plants were associated with certain soil bacteria. In her experiments Doctor Mockeridge used small, green water plants called duckweeds. One lot of duckweeds was put into dishes of water containing merely all the needed minerals. A second lot was put into similar dishes with a small amount of a killed culture of soil bacteria in addition to the minerals. At the end of nine weeks there were about twice as many plants in the second lot as in the first. Moreover, the plants that received the small amount of bacterial material averaged larger and were more healthy in appearance. The increase due to the bacterial culture was apparently out of all proportion to the actual substance added. Furthermore, increasing the amount of dead bacterial culture did not appreciably increase the remarkable benefits to the plants, in this way acting differently from an addition of mere food material. The bacteria contributed something that behaved like a vitamin, enabling the plant to utilize to greater advantage food materials already available.

Stock Fluctuation Not Cause of Excitement

One morning about 10:15 when the market was enjoying one of its jamborees, a newspaper man walked into the private office of one of the largest Wall street brokerage firms. Three of the partners were so intent on their conference and heads were so close together studying the paper spread before them that the scribe stood unnoted for several minutes. At last one of them looked up and literally shouted:

"Here is a man who can help us out."

The writer, flattered, advanced to hear and give his advice. Another of the partners said:

"For the love of Pete, give us a synonym of four letters for criterion, so that we can finish this cross-word puzzle and get back to work."

Women Judges in India

Mrs. Shirley Hodgkinson, who has been appointed an honorary presidency magistrate in Bombay, is the first woman in that city to receive such an honor. Mrs. Hodgkinson is a member of the Bombay corporation and has shown conspicuous ability. She was one of the four women who several months ago were made justices of the peace. Mrs. James Cousins of Madras was the first woman in India to be made an honorary magistrate and the fact that Mrs. Hodgkinson attained the same recognition in Bombay proved the success of the experiment of putting women forward in public service in the Orient.—Aggonaut.

Canadian Immigration

A total of 7,659 persons took out naturalization papers in Canada last year. Of this number, Russians exceeded all others. The number of them who became Canadian citizens was 1,274; Italians came next, with 1,069, and Americans third, with 928. Next in order were: Austrians, 903; Poles, 807; Rumanians, 576; Greeks, 309; Swedes, 232; Germans, 221; Belgians, 141; Syrian Turks, 122; French, 103, and Norwegian, 101. The rest of the total was made up of miscellaneous assortment of nationalities.

His Idea

"Why is it, do you s'pose," musingly asked Mrs. Fumblegate, in the midst of her perusal of the weekly paper, "that 'most always when you read about a lady being up in court the account tells how she was dressed, but when it is a man not a word is said about his clothes?"

"Well, I reckon," replied Farmer Fumblegate, "that mostly by the time he's been pulled to pieces by the lawyers he ain't got—that is, his clothes ain't worth describing."—Kansas City Star.

Arbitration in Japan

Disputes between landowners and tenant farmers of Japan are to be arbitrated, according to a law recently passed by the Japanese diet.

Stevenson Manuscript Sold

The original manuscript of "Kidnaped," by Robert Louis Stevenson, recently was sold at auction for $10,000.

Community Building

Planning to Clean Up "Back Yards" of Cities

The "back yards" of American cities and towns are to be cleaned up and made comparatively as attractive as the front yards. Investigation has developed the fact that industry and population have been lost to towns because of unattractive, or, one might say repulsive, condition along the railroad's approach. The glimpse one gets of a place through the window of a speeding train has been known to influence decisions which have resulted in serious losses. It is related that a capitalist refused to buy the bonds of a certain little city because, as he frankly admitted, the place did not look worth while to him. Asked if he had ever visited the place he said he had not and did not intend to because he had seen enough of it as he passed through on a train. Some time later he did visit the city. He expressed regret that he had libeled the place. It happens that the city is very attractive after one has got beyond the railroad tracks and the station.

The real estate men of the country are organizing a movement that will bring the beauty of American towns right down to the railroad tracks. Under the auspices of the National Association of real estate boards, the "back yards" of towns and cities are to be tidied up. Paint, whitewash and shrubbery are to be employed in the work. Ash and rubbish heaps, if they must exist, are to be screened from the eyes of the traveler. Pride in the appearance of cities' back yards is to be developed, so that in a few years America may refute the charge that its back yards are not as attractive as those of foreign countries.

Large and Small Cities Have United Interests

The larger towns and cities cannot make progress and prosper without the smaller communities and rural sections. Nor can the latter expand and succeed in achievement of the things that are worth while without general co-operative impulses from the centers of population. They are dependent one upon the other. Here lies a wide opportunity for service by the city, town and rural press through realization of their mutual interests and constructive efforts in their advancement. The closer the cities and rural sections are drawn together, both in their social and industrial relations, the better for both. Let no city publisher or country publisher imagine that he can live unto himself. He cannot. Quick communication through the automobile, rural free delivery, telephone and many other means of intimate association have made centers of population and rural communities increasingly dependent upon one another.—Birmingham Age-Herald.

House Tells Own Story

No expenditure is so important as that which you make for a home. You are to live in it for a period of years; you will see it every day, and every day your neighbors will see it. It must have the quality of strength and durability—that is, it must wear, and it must have style. The quality you want for the comfort, safety and welfare of yourself and family; the style you want to satisfy your own and their taste. Both, you want for your neighbors and even passing strangers to judge you by. The manner of the house indicates the manner of the man within. It indicates, as it were, your standing in the community; and certainly, if circumstances lead you to move elsewhere, you want in your house, as a commercial asset, both strength and beauty, for these are sure to get you a better return in rent or sale—that is, from every point of view, an attractive home will prove to be a wise investment.

Home Purchase

The South Bend (Ind.) real estate board has been making a special feature of a real estate sales plan whereby it is possible to purchase a home with a 10 per cent cash payment.

"The present efficient machinery of finance," one of their advertisements points out, "makes it possible for the buyer to start with a small sum of from $100 to $1,000 and purchase a good home ranging in price from perhaps $2,500 to $10,000."

"Just What You Make It"

Oneonta is just what you make it. If you don't like the town, you will probably find that the town doesn't like you. But if you have the right attitude, then you will find the community friendly. It is a mirror in which you will find a reflection of your disposition.—Oneonta Southern Democrat.

Good Time to Brush Up

During the leisure, dull season there are so many things that might be done to repair and paint up the old home, that would prove the best investment of the year. Don't neglect or forget this.—Talladega Home.

Home Ownership Best

A community whose units are rooted to the soil thinks twice before it indulges in industrial revolution. Home ownership breeds patience and consideration.

MICKIE SAYS—

Obituary

George W. Morr, was born Sep. 8, 1837 and died April 11, 1925, being 87 years, 9 months and 2 days old.

He was the father of ten children. Five have died and the five living are, William, of Detroit, George of Midland, Mich., Marcus of Elkhart, Mattie Burroughs of Los Angeles, Cal., and Mrs. Cal Olinger of Niles, Mich.

Mr. Morr made his home with his daughter living in Niles, Michigan for the past fifteen years. He was a good man. When he lived in the Concord community was a regular attendant at the church and taught a class in the Sunday School. He was a member of the Concord church. He was a member of the F. and A. M. Fraternity, joining when he was just past 21 years of age. Besides his children there are many grandchildren, relatives and friends to mourn his departure.

The funeral was held from the Concord church, Monday afternoon, Rev. C. H. Havens, officiating. Burial at St Joe.

NEWVILLE

Carl Clark and wife, Mrs. Anna Clark, Ethel Clark and Lottie Friend of Fort Wayne were Newville visitors Sunday.

Ross Nelson and wife and Mrs Jane Hatch attended the funeral of Jacob Presler at Hicksville Sunday. Mr. Presler was a veteran of the Civil War.

Doing One Thing Well

is better than doing a dozen things indifferently. We specialize because we know that the care of the eyes is too vital and important a service to be conducted as a side line. Persons who buy bargain counter or jewelery store glasses are "penny wise and pound foolish" Lowered efficiency, the discomfort, the injury to the eyes that result from wearing incorrect glasses represent a loss that can't be estimated in dollars and cents. We spend our time, study and attention to the fitting of glasses We have an exclusive optical office with the proper lighting arrangements and equipment, which together with years of experience and special training guarantees to you a clear and positive conception of your optical needs. Call and see us.

Prices reasonable and work is guaranteed

Beni. F. Griest

Eyesight Specialists
Office American Building
HICKSVILLE, OHIO

Newville school will be out next Friday, April 17th.

Elsworth Traxler and wife were Sunday guests of Hugh Traxler's.

A. L. Gengnagle and wife spent Sunday with relatives in Butler.

Raise pickles and get some ready cash. It is time to begin to sign contracts. 12t1

Charlie Sucher and family of Butler, spent Sunday with Chubb Richmond's

Dr Brunson has bought three old houses to make chicken houses on his farm north of town.

Mack Hatch and wife are planning to move in the near future to their property at the north side.

Ira Mendenhall and son Harold of Auburn, spent from Friday until Sunday with John Miller's.

Nelson Ayers, who spent the winter at Detroit, Michigan, returned to his home here last week

J. B. Benner and wife accompanied Levertie McDaniels and wife to Milborn, Ohio, Sunday, to visit A. C. Koeppe and wife.

Dewey Miller and little son, Ronald, of Auburn, came to Newville Sunday evening and Mrs Jane Hatch accompanied them home to care for the new baby and Mrs. Miller.

SPENCERVILLE

See Furnish for Batteries.

Receipt books on sale at News office.

For good glasses see Griest at American Building Hicksville, Ohio.

Mr. and Mrs. Ada Markle left Monday to work in the James General Store at Harlan.

H. J. Renner of St Joe, Mrs. Estella Goldsmith and Prof. Smith of this end of the county, attended a meeting at Waterloo Thursday evening in the interest of the Boys and Girls clubs of DeKalb and Steuben counties to have a club camp near some lake this summer. M. Hall of Purdue was also present.

The following guests very pleasantly assisted Master Lloyd Perkins in observing his eleventh birthday anniversary near Harlan, Joel Betz and wife, Edward Billman and wife, Sylvester Perkins and family and Willis Boston and wife of Harlan, Wm. Perkins, Sr. and wife, Wm. Perkins, Jr. and wife and Moses Price of Black Creek.

The last meeting of the year of the Parent-Teacher Association was held on Tuesday evening at the school house. The meeting opened with several songs led by Mrs Bernice Wilder. A stunt was given by the Girls Sewing Club which was greatly enjoyed. The same girls sang a song, "My Old Ford." A club committee for the township was then named as follows: Mrs. Goldsmith, Mrs. B. O. Shook and Prof. Smith. A brush drill was greatly enjoyed. Prizes were won by Lucile Miller, Wilard Chapman, Fred Laub and Miss Miller was voted best of all in the drill. We were then favored with two readings by Miss Cupp of Ft. Wayne. This was followed by election of officers with the result: President, John Koch; Vice president, Clyde Hart; Sec.-Treas., Ray Farver.

One More Deposit Will Make the First Thousand--

Are you one of the many happy families of this community who are nearing or have passed their **First Thousand Dollars** in their Savings Account? If you have never experienced this worth-while thrill, now is a good time to start toward it. We have never had as many depositors as now and they are your friends and neighbors. Think about it and then act wisely.

Farmers' & Merchants' State Bank

Spencerville, Ind.

See Furnish for Tires.

Gerry Wasson and wife were Sunday dinner guests of Frank Wertman and wife.

For Sale: Some goose feathers also a good fresh cow. Spencerville phone, L. F. Adkins. 15t2.

Burdett Smith spent the weekend with his grandmother, Mrs. Luella Smith.

Miss Leone Widdifield, of Cincinnatti, Ohio, is visiting her parents, Mortie Widdifield and wife.

Charles Davis, wife and son, Jack, Mr. and Mrs. John Brandon and daughter, Josephine, Dan Jetmore and family and Miss Violette Reasoner all of Auburn and Ivan Reasoner of St. Joe, were Sunday dinner guests of Herman Reasoner and wife. Monday guests were Mrs. Follis and daughter of south of town.

The funeral of Mrs. Sadie Butler was held on Thursday morning at the home of her daughter, Mrs. Clyde Rectenwall at 10 o'clock. Mrs. Butler was 76 years old and had been an invalid for years. She leaves two daughters, Mrs Rectenwall and Mrs. Frances Chapman; four grandchildren; one sister, Mrs. M. E. Singer of Kansas; five brothers, Jason Keyes of Fort Wayne, Thomas Keyes of Kansas, Harry Keyes of Canton, Ohio, James Keyes of Ohio and William Keyes of Virginia. Mrs. Butler was a member of the Methodist church and Rev. Brown the pastor, officiated. Interment in White City Cemetery.

Henry Beams, of Detroit, spent the weekend here with his parents, Mr. and Mrs. F. L. Beams.

Time to begin to think about contracting for the raising of pickles this summer. Contracts at S. S. Widney's and News office.

C. F. Zeis and wife of Springfield Center and Herschel Zeis were Sunday dinner guests of Mrs. Luella Smith and family. Beatrice Dwyer was an afternoon guest.

Raymond Randall and family of Muncie, were weekend guests in the Wm. Randall home. Mrs. Randall and babe remained for the week.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Record Sailing Voyage That Astonished World

Historians of the Yankee merchant marine grow boastfully eloquent when they write of the peerless clipper. In fairness, permit the Canadian to blow his own horn. One of the fastest ships that ever sailed was the Marco Polo, launched in Courtenay bay, St. John, in 1850, and commanded by "Bully" Forbes. Carrying a thousand immigrants, the ship left Liverpool for Melbourne, Forbes announcing that he would be in the Mersey again within six months. He was laughed at.

With a willing crew of 60 men the Marco Polo reeled through the "Roaring Forties" and ran its easting down. Day after day the booming westerly gales of the high south latitudes drove it along. It was able to beat the steamer Australia to Melbourne by a week, making the passage in 68 days. Homeward bound it made the record passage of 76 days. The round voyage had been sailed in 5 months and 21 days. The shipping world was astounded. Thousands of people came down to view the Marco Polo as it lay in the Salthouse dock. They were thrilled with pride when they gazed at the huge banner hung between the fore and main masts, "The Fastest Ship in the World."

Capt. "Bully" Forbes was the British sailors' hero, a match for the famous masters of Yankee clipper ships. The saying "Hell or Melbourne" is credited to him—the yarn being that this was his reply to a committee of frightened passengers who begged him to shorten sail while he was shoving his ship along in a wicked gale. Characteristic of him was his boast to his cabin passengers as he sat at the head of the dinner table, "Ladies and gentlemen, last trip I astonished the world with the sailing of this ship. This time I intend to astonish God Almighty!"—Ralph D. Paine, in the New York Sun.

Most Famous Stoic

Epictetus was a Greek Stoic philosopher who lived approximately between the years 50 and 125. He was born a slave in Phrygia, banished from Rome by Domitian and taught philosophy in Epirus. The nobility and moral earnestness of the man and simplicity of his style have made him a favorite with many not otherwise interested in the subject which he taught and of which he wrote.

Night and Day

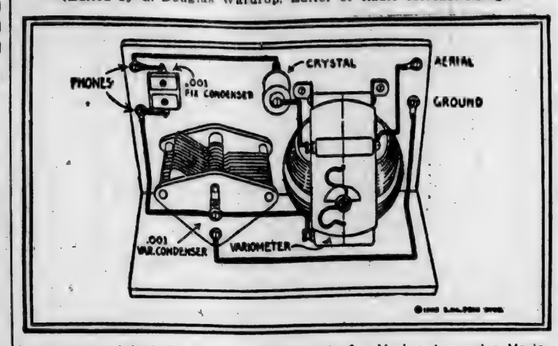
The earth is every day overspread with the veil of night, for the same reason as the cages of birds are darkened—viz., that we may the more readily apprehend the higher harmonies of thought, in the hush and quiet of darkness. Thoughts, which day turns into smoke and mist, stand about us in the night, as lights and flames; even as the column which fluctuates above the crater of Vesuvius in the daytime appears a pillar of cloud, but by night a pillar of fire.—Jean Paul Richter.

Niagara Falls

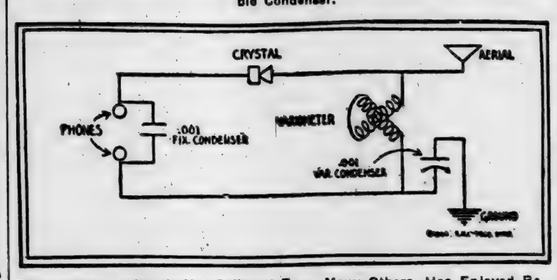
The water that flows over Niagara has flowed from the four great lakes and the hundreds of rivers that flow into them, more than one-half the fresh water of the world, according to one authority. The fact that evaporation and precipitation in the form of rain and snow are continually going on in the enormous area of the great lakes region renders it unlikely that the Great Lakes will ever be drained in this manner.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)



Set Illustrated Includes Simple Arrangement of a Variometer and a Variable Condenser.



This Circuit, Although Not Different From Many Others, Has Enjoyed Remarkable Success.

Among the great army of radio fans in the world today there are hundreds still using crystal-type receivers. There is a reason for this. A good crystal is perfect in reproduction of voice and music.

The crystal set requires no batteries and therefore has no upkeep expense. For one who seeks reception over short distances of about fifty miles a set of this kind is more than satisfactory. There are many fans owning multitube receivers who still keep their crystal sets for local reception. The clear natural tones are a pleasant change from the loud speaker. No harm will result if you take a little snooze, for there are no batteries to run down and no tubes to turn out.

Selectivity Limited.

The principal objection to the crystal set is the lack of selectivity. It lacks the power of the tube receiver to cut one station in and another out. If necessary tuning devices are used that are essential to make a crystal set selective, the resistance created seriously impairs the volume and shortens the range. The energy used in a radio set is infinitesimally small. If all that is accumulated on the average antenna in a year's time were collected into one charge it would not be sufficient to light a flashlight bulb. It is so small there are no instruments delicate enough to accurately measure it. It is therefore necessary to conserve all the energy possible.

There are several methods that may be used to make a crystal set selective. These are loose coupling of the tuning inductances, the use of several variable condensers, or adding a wavetrap arrangement. Aside from being added expense these methods are not wholly efficient. One result is obtained through the sacrifice of another.

Characteristics of Set.

The set shown is a simple arrangement of a variometer and a variable condenser. This circuit, although not basically different from many others, has enjoyed remarkable success. It has good selectivity, good volume, and an exceptional receiving range. In some cases it has been possible to operate a loud speaker on nearby stations and distances of five to seven hundred miles have been heard on the phones. The results are all that could be expected from a crystal receiver.

The reason for this is it has both inductive and capacity tuning and practically no losses. All taps and sliders characteristic of most crystal sets have been abolished and workmanship and materials of vacuum tube quality have been used throughout. It is the usual practice to build a crystal set as cheaply as possible. This accounts for at least four-fifths of the trouble experienced with crystal sets and is responsible for the limitations put on sets of this type. One wouldn't expect a tube set to work efficiently with a crude tapped coil and "junk" parts, so it is hardly logical to expect it of a crystal set. Before the days of tube receivers the amateurs built crystal sets, using good apparatus, and got results that would make many owners of tube sets today envious. This can be done now as well as it was done then. All that is necessary is to get good parts, be careful to hook them up as shown, and use an antenna and ground as described.

Antenna, Ground Parts.

The antenna should be of the single-wire type about 125 feet long. It should be run in a perfectly straight line; use only one wire and no angles. A multistrand wire of about No. 14 gauge is all right for this purpose. The ground is just as important as the antenna, although it is the one item generally given the least consideration. The best ground is one connected to natural objects such as a water pipe, radiator, metal stake driven in the ground, gas pipe, etc. In this manner a low resistance ground is sure to be obtained and will retain its value under all conditions. The length of the ground lead makes little difference. It may be 50 feet long if necessary. Use a large-gauge wire. You may use uninsulated if more convenient.

The parts necessary to construct the set are as follows:

One variometer (should have about 80 turns on both rotor and stator).

One .001 variable condenser, about 43 plates.

One variable crystal detector.

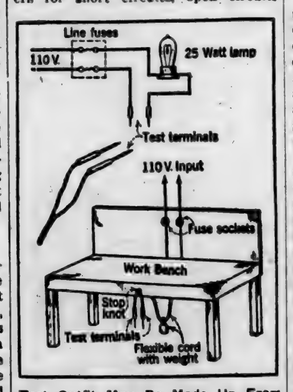
One seven by nine panel.

Baseboard, binding posts, screws, wire, etc.—Boston Traveler.

Describes Simple Tester for Circuit Continuity

By F. E. MADDOX

I have assembled a very simple test outfit made up from odds and ends around the work shop which helps considerably in determining whether purchased parts and laboratory odds and ends are defective or not. It has also been found useful in testing out radio sets for continuity of circuit, testing fixed and variable condensers for short circuits, jacks and sockets for loose connections, and transformers for short circuits, open circuits and ground. This test unit consists of a 25-watt lamp inserted in one side of the 110-volt line to which are connected two awls. The test leads are of flexible wire. Two fuse sockets and fuses are inserted one in each side of the line at its input. The circuit diagram is shown in the illustration.



Test Outfit May Be Made Up From Odds and Ends.

The lamp flashes when a circuit is closed indicating that the circuit of the unit tested is continuous. In testing audio transformers, the awl points are touched to the primary posts and if the secondary side is momentarily short circuited, a spark discharge may be observed at its terminals.

Must Use Care to Keep Vacuum Tubes in Order

To prolong the life of vacuum tubes they should be burned as dimly as possible at all times. Excessive filament current and plate voltage have the property of destroying the coating of thorium on the filament. If the operator finds that the tube has to be burned brightly and the plate voltage must be over 90 for good volume, the tube should be taken back to the place where it was purchased and a test made. Should one find that it is impossible to guess at the proper brilliancy, a voltmeter should be added to the set.

Do Not Use Steel or Iron

When mounting inductances of any sort avoid the use of steel or iron brackets. These metals impair the efficiency of the inductance by the introduction of magnetic metals into the field of the coil. Use brass brackets

An Amplifier Can Be Built at Home

Important Part, Simple to Make, Will Add to Receiving Set.

By J. FOABERT

The first step in the construction is the two end plates. These are made up of either cardboard, hard rubber or any of the numerous insulating materials on the market. If hardwood is used these should be cut two inches square and one-half inch thick. The center core hole should be drilled 7-16 inch in diameter and the two small holes are made with a number 30 drill.

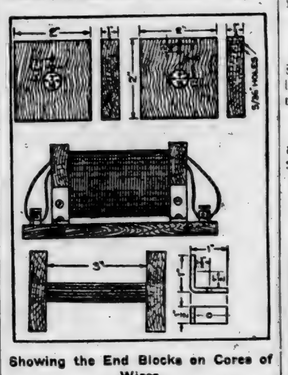
It will be noted that the small holes are located differently in the two end blocks. The one side is for the primary and the other for the secondary wires. The edges of these holes should be well rounded to avoid chafing of the fine wire.

The end pieces are mounted on a bundle of core wires. The space between the end plates is three inches. Care should be taken to see that these core wires are kept perfectly straight and parallel. It is suggested that the wires be slightly moistened with oil to avoid rust.

After the end pieces are properly spaced the core should be wrapped twice around with two layers of waxed paper. This should exactly fill the space between the end blocks in order to avoid short circuiting the wires on the core.

For convenience it would be advisable to let the core wires project from one end plate one inch. This will permit mounting in a lathe chuck, thus facilitating the coil winding. The supply spool from which the wire is unwound should rotate with a slight friction in order to avoid any tendency of spinning and thus accumulating an unnecessary length of loose wire. Care should be taken not to attempt winding too rapidly. Start slowly and gradually increase the speed as the work proceeds.

The primary winding should be wound in smooth consecutive layers



Showing the End Blocks on Cores of Wires.

until the diameter is 13-16 inch. In calipering this diameter the sharp ends of the calipers should not scratch or damage the insulation on the wire. Avoid all kinks in the wire. In fact, a kink should be treated as a break and the two ends should be twisted together, soldered and then wrapped with a thin piece of silk.

The wire must be wound on evenly from end to end. This method of winding avoids any comparatively large differences of potential between layers. After the primary winding has been completed it should be tested with a milliammeter or galvanometer and a 6-volt battery. The ends of the primary winding should project through the two holes nearest to the core holes.

When the primary winding is complete, two or three layers of paraffin paper should be wrapped around the primary winding to provide an insulation between the coils. The secondary coil is wound in the same manner to a diameter of 1¾ inches. The beginning and end should be reinforced with a heavier gauge wire and then led out through the end piece in the holes farthest out.

When the secondary winding is complete, cover it with a layer or two of paraffin paper and then wind tightly with tape.

The complete coil is mounted on a wooden or fiber base plate and fastened in place by means of four angles, as shown. The ends of the primary and secondary are secured to binding posts and marked in the usual manner.—Radio Digest.

Counterpoise and Its Use as Ground for Set

A counterpoise in most cases will be found considerably better than an ordinary ground. Before attempting to construct one, however, it is well to try an efficient ground connection. This is best obtained by grounding to everything in sight—that is, to water pipes, vent pipes, etc., omitting gas pipes, as they seldom improve radio reception.

To construct a counterpoise string wires under the antenna. For receiving purposes the number of wires in the counterpoise should be at least equal to the number in the aerial and, if space permits, directly under the antenna. The best construction is to have it about five feet longer than the aerial and from one to twelve feet off the ground. It will be easy to see that the antenna system will have a lower natural period when a counterpoise is employed. This, however, in all probability, will make no difference.

Do You Want to Put on Flesh This Spring?

If you are below normal weight you are in danger. The chances are that the food you eat will not enable you to build up normal flesh. You need a spring food tonic such as Father John's Medicine which is all pure, wholesome nourishment.

Thousands of people find that they gain weight steadily while taking this old-fashioned prescription which is a real food tonic and not a stimulant. It rebuilds and strengthens without using alcohol or dangerous drugs.

Not Impressed by After-Dinner Talk

Jeff Webb, who has been toastmaster and chairman at innumerable Detroit gatherings, says the really effective speakers always show some signs of nervousness before their turn comes. Once on their feet the symptoms of fright usually disappear.

He recalled the story of the man at the banquet who noticed that his neighbor was abstaining from food.

"Why don't you eat?" the man asked him.

"Well, I've got to speak and I can't talk well right after eating."

The man listened with unmoved countenance to the speech of his neighbor and when the latter took his seat, leaned over to him and remarked:

"Well, I think you might as well have et."—Detroit News.

Divorces Discouraged

The parliament of the Irish Free State has passed an order making it illegal for divorced persons to remarry within the borders of the state.

Wicked men obey for fear; but the good for love.

What Pretty Girl Did for Sick Stomach

Miss E. Rich of Brooklyn, N. Y., says: "I don't know what the cause was, but every few days my stomach would feel all bloated up with gas, my appetite was poor and I felt sick to my stomach—to say nothing of headaches.

"I never thought of using Carter's Little Liver Pills until nothing seemed to help. After using Carter's I felt relieved at once—and now as soon as my stomach 'talks' back I answer with Carter's and have the last word."

"I HATE YOU!"

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a black man, evidently a savage. Croft rescues her. Croft discovers a party of blacks, evidently reconnoitering, but they leave without attempting to harm the pair. Croft fixes up an electrical guard to scare off attacking natives.

PART TWO—Continued.

—6—

Quietly, as if explaining the mechanism of a watch, he explained how it worked.

"I will load it, and fix it ready for use," he concluded.

And the girl who, in England, had shrunk from all firearms, took the little weapon from him eagerly, welcoming it as a trained friend bringing, possibly, the greatest succor of all. . . .

As they sat in the dark hut, upon their upturned suitcases, near the window aperture, the strain upon Barbara's nerves became almost unbearable. With every minute her faith in the electric ruse, never strong, grew weaker; until it ebbed away, leaving only a ghastly death, or worse, creeping nearer with the rising of every star. . . . She faced the moment when, her companion slain, she would seize the revolver, turn the dark muzzle to her fluttering heart, place her finger on the trigger. . . . She clasped and unclasped her clammy hands, sitting upright; then crouching back against the bamboo. . . . Only fear of disgrace in her companion's opinion restrained her wild impulse to rise and flee somewhere—anywhere—to escape this fearful ordeal. Had Croft touched her or spoken, her control would have snapped altogether. But he sat perfectly still, his gaze fixed upon the dark slope down which their enemies would come, his mind apparently oblivious to all else.

As she watched him, her fevered brain seemed gradually to grow calm, her faith in his confidence and ingenuity to strengthen. . . . The strain relaxed. Hope struggled feebly within her heart. She no longer felt the wild desire to scream or to escape. Her clenched hands parted, and she sat back with a sigh.

Those who, from lack of imagination and its sense of fear, face a terrible ordeal with gallantry, are justly called brave; but those who, tortured by these possessions, foreseeing all with shrinking dread, yet meet it with no outward flinch, deserve the laurels of heroism. Some such thoughts flitted through Croft's mind, as he sat waiting, fully conscious of the suffering silently endured by his companion. When she relaxed against his shoulder, he drew a breath of relief. . . .

What seemed like hours passed in the silence and darkness. Then Barbara suddenly raised her head.

"Have I been asleep?" she whispered, in astonishment.

He turned to answer, whipping suddenly back to the aperture, and craning forward. A sound had reached his intent ears—the faint distant crepitation of snapping twigs.

Now that the dreaded moment had arrived, Barbara was conscious of an utter lack of agitation. Save that her fingers closed upon his arm, she gave no sign: her eyes followed his, peering into the starlit dusk without.

For several minutes nothing more was heard. The girl was beginning to think it had been a false alarm, when all at once a slight rubbing noise reached them, as of something wriggling over rough ground. At the same instant a dark form was dimly discernible flitting, shadow-like, from a distant tree to the shelter of a large rock, there falling to the earth. Presently, from behind this rock, issued a little, snaky, black stream—three or four bodies waddling along on their fronts, their outline faintly distinguishable.

Minutely sweeping the whole visible horizon with his keen eyes, Croft now perceived other black streams, issuing from other temporary shelters, slowly trickling down the slope. . . . He leaned back.

"They are crawling along upon their stomachs, as I predicted, to avoid detection," he whispered.

Presently, two or three figures detached themselves from the moving mass and wriggled forward with incredible swiftness, leaving the remainder some yards behind.

"Scouts!" whispered Croft.

Barbara caught her breath sharply, drawing back into the hut.

Croft, his eyes fixed upon the advancing figures, laid his hand upon the transmitter, with forefinger outstretched toward the little key upon which so much depended. No sign of the wire encircling the hut was visible in the comparative gloom.

A few tense moments. . . . then he pressed the key, keeping it down, giving the spark gap a slight adjustment.

Then, from all around, rose a deafening medley of howls and frenzied yells, partly of pain but more often of fear, as the advancing men came in contact with the wire, seeing the wicked blue sparks hiss at their bare flesh, feeling the sharp sting of the electricity. Those who escaped it were equally terrified, and the whole order broke up. Some rolled upon the ground rubbing themselves, still howling; others fled, screaming, toward the south. A few, braver, tried again to reach the goal; and again retreated, half petrified with fear of the unnatural.

Croft waited until but a few stragglers remained near the hut.

"Now," he cried, "we must show ourselves, and complete the illusion!"

"Oh!" remonstrated Barbara, "is that necessary?"

"Yes; if it's to be a success."

Seizing her arm, he dragged upon the door, and whirled her round to the landward end.

Those natives who remained uttered loud, fearful shouts, at sight of the two white figures; falling upon their faces, they stretched out arms of supplication, gabbling what seemed to Barbara unintelligible nonsense. Those fleeing turned, halted, then likewise fell upon their faces, terrified at these apparitions in the starlight.

For a moment the girl thought her companion had lost his senses. Loosing her arm, he sprang forward with a bound, his arms wildly waving. Appearing unnaturally tall, his white shirt and bandaged head increasing the supernatural effect in eyes used only to a dark naked skin, he went through a pantomime of weird gestures. Now and then this was interspersed with extraordinary utterances snarled from between gleaming teeth and cruel, drawn-back lips. The wild awful fury, seeming to emanate from every pore, terrified her: he looked every inch a savage himself. His weird babble bore strong resemblance to that of her pursuer. Apparently the prostrate natives understood at least part of the discourse; for occasionally eager hands were raised in supplication, accompanied by cries or moaning replies. . . .

Suddenly, as if at some command, the groveling wretches scrambled to their feet. With another torrent of wild words, he wheeled round, and, to her amazement, threw his arms around her, pressing her close. . . . What seemed, in the excitement of the moment, like a cloud of smoke, together with a sharp explosion, momentarily dazed her senses. . . .

She felt herself lifted bodily, whirled back again round the hut and in at the entrance; while, from without arose a fresh confusion of howling cries, with the tread of running feet, as the warriors, terrified by the magnified effects of the revolver shot in the dusk, dashed for their lives away up the slope. . . .

Once inside, he leaned back against the bamboo, still holding her close, his breath coming first, every nerve tingling, primitive man among primitive men, after the savage state into which he had worked himself.

"Well done!" he panted, laughing wildly. "The revolver—just then—was an inspiration! Vanishing in a puff of smoke finished the trick!"

Barbara gasped, too much astonished to realize that she was still clasped in his arms, having forgotten the existence of the revolver during the last scene. It hung from her hand, still smoking a little from its accidental discharge.

"W-what—were—you doing?" she stammered.

Again he laughed wildly. "Telling them we were sent here by their gods, and should blast the island into a thousand bits if they showed us hostility! You saw the effect?"

"I did, indeed!" Realizing their position, she tried to free herself, but his arms tightened.

"Among natives," he continued, excitedly, "a wife is tabu to her husband. To—to make you doubly safe, I told them you were my—my wife."

"Your—" Words failed her. More vehemently she struggled, suddenly afraid of him, of his savage grip, and of the eyes which glittered strangely in the semi-darkness.

But ordinary shackles of restraint had fallen from Croft for the moment. Since those wonderful hours of the night before, the girl had assumed a new prominence in his mind. He had become acutely aware of her, as he had never yet been aware of any woman. It was all strange, bewildering. Life or death, man and woman, savage, primitive passions pitted against savage, primitive passions. . . . No drawing room code of morals or manners was guiding their destinies out here.

He laughed again, pressing her fiercely up against his chest. "So—while we are here, you are mine! Don't forget. You may belong to another in England; but here, you—you are mine!"

His tone was exultant, and he bent her backward so that her face was upturned, unprotected beneath his own. His breath came hot and fast above her lips.

Some primeval, caged beast instinct seized her, too, sweeping away fear. Raising her free hand, she dealt him, with sudden passion of rage, a blow in the face while struggling violently in his grasp.

His arms loosed her so abruptly that she nearly fell. For a moment he stood before her, his hands groping at his head, looking dazed, or as if awakening after some vivid dream. She confronted him with the fury of a little wildcat.

"You are mad! Mad! I—oh—I hate you!"

Covering her face with both hands, she strove to subdue the extraordinary tumult within her . . . then looked up at the sound of the door being hastily shut with a crash of bamboo canes.

With a gasp of relief, she realized that she was alone.

V

After the natives' attack, a new phase began between the pair. Paradoxical though it may sound, the hours which brought them so near together widened the gulf between them. Had that eventful night ended with the accidental discharge of the revolver, their daily life might have continued more or less placidly, like the waters of some river, with but an occasional rock obstructing its even course. But Croft's amazing lack of self-control had been like a huge stone hurled violently into the center of the river, causing ever-widening circles to extend. Intensified a hundredfold, all the fears of her first afternoon upon the island rushed riotously back. She became conscious of him as she had never been before; not only of the force of his will, but of the strength of the passions lying dormant under a cold exterior.

Nothing more had been said concerning the episode. Half expecting some kind of apology, she had decided, next morning, to accept it frigidly, drawing close the cloak of her own reserve and dignity.

But the apology never came. He did not appear at all until nearly midday, when he arrived with arms full of fresh fruit. Then it was he who

. . . Seized the Coconut and Hurled It Down the Beach.

seemed encased in a mantle of such icy reserve that her own attempts dwindled to mere foolishness. She took refuge in silence. A stone wall and ten miles of land might have divided them. He spent the afternoon fetching things over from the reef, leaving her severely alone.

This position endured for some days. He seemed to keep away as much as possible, and her loneliness became at times intolerable. But she learned many practical things. He taught her to create fire by friction with wood; to bake breadfruit—that substitute for a cereal in the South seas—in hot embers, then scoop out the interior; or preserve it by drying thin slices in the sun. She soon acquired primitive ways of preparing, with a campfire and a few old native vessels, the strange fish, birds and the fruits he brought.

Then, one day, he came striding down the slope, after being absent for hours, looking strangely haggard round the eyes. With disconcerting suddenness, in characteristic, brief sentences, he demanded, more than suggested, friendship between them.

"We can't go on . . . this life's unbearable. . . . ." His voice was unusually curt, the sentences were disjointed, his nerves evidently worn thin.

She was taken unawares, at a moment of deep depression, when everything seemed very dark. Not pausing to reflect on the possibility of similar suffering having impelled this request from one unaccustomed to beg, she shrank back, her fears and suspicions crowding in.

"I'm afraid I can't trust your—friendship. I can't forget—"

He looked at her queerly, with eyes that flashed in sudden anger.

"D—n it all! That was an exceptional night. Can't you understand?" But years of Puritan surroundings are not wiped out in less than a week. "I'm afraid not. I—"

"Then you must lump it!" He turned away with an expressive shrug, and disappeared up the hill.

That was the only overture he ever made; and the strain between them increased.

Barbara welcomed anything which made work to absorb her thoughts. For the terrible feeling of impotence, the sheer homesickness, the loneliness, were ever below the surface, ready, all together or individually, to spring upon her at any moment.

A day arrived on which the onsets came "not singly but in battalions." She had been alone for hours. When Croft arrived, her spirits were below zero, her nerves frayed, her temper was not of the best. He glanced at her shrewdly, but appeared to notice nothing. Coming to the hut, he dropped a large coconut into her lap, where she sat outside the door.

"There you are, my child! Get busy!" he remarked casually.

Uncontrollable irritation, the result of solitary fretting, welled up within her. Impulsively she seized the coconut and hurled it down the beach. "Don't call me that! I'm not your 'child'—nor anything to do with you."

There was a moment's silence; then he gave a little laugh.

"No, indeed! Let's thank the good Lord for that, at all events."

She looked up, dumfounded; but he had turned away into the hut.

So that was the position? Her dislike was returned in full? A sharp stab of hurt pride and desolation caused sudden tears to rise and roll down her cheeks. She scrambled to her feet and, out of sight among the brushwood, lay down and sobbed out her heart.

Croft got his own supper that night. He made no comment on her swollen eyes and lack of appetite. But when she took the large shells used for plates to wash in the lagoon, he rose, impulsively, to follow her. After a few steps, however, he paused uncertainly. With a little helpless shrug, he returned to the hut.

Each day he spent much time upon the reef, salving all that was possible of the machine, until what remained was swept away one night by the tide.

A dozen times a day, one or both climbed the hill and vainly searched the horizon—gathering, with dwindling hopes, more fuel to heap upon the growing pile which some day might flare into a beacon to attract a passing vessel.

The natives seldom ventured far from their settlement. Whenever Croft encountered one, the frightened wretch took to his heels. Only once did he meet one with sufficient courage to reply to the white man's questions. But, at the first allusion to ships and other white men, his fortitude gave completely away; with a wailing cry of fear, he turned and vanished among the trees, leaving Croft no wiser. . . .

Barbara was haunted by thoughts of Hugh's suffering. To be alive, in splendid health, yet unable to inform those mourning her death, could be equaled only by a like impotence upon the other side of the grave to allay the sufferings of those beloved upon earth. After a lifetime, too, of inseparable companionship, this new existence, in which Hugh had no part, seemed strangely incomplete. Yet, paradoxically again, his presence was not needed here: he would have seemed as much out of place as the proverbial fish out of water.

Croft, on the other hand, appeared daily more suited to his environment, fitting in as if it were indeed his "natural sphere." Gradually, as the past grew fainter, her confidence returned. His apparent disinclination for her company, though reassuring in one way, piqued her in another. So she withdrew into her own shell; and the invisible wall grew higher between them: only occasional chinks appearing, or thin places through which they came a little nearer. At these times the girl regretted her refusal of his one friendly overture. . . .

It was one evening, two or three weeks after the natives' attack, that the largest chink in the wall appeared.

The day had been unusually hot; and she strolled listlessly up to the river to bathe. With bare sunburned feet, and the revolver—without which she seldom stirred—stuck in her belt she passed through the grove, through the tall dark avennes beyond, to the clearing by the water's edge. There she halted, amazed.

Face downward lay Croft, his dark head buried in his arms; beside him were one or two branches of bananas; a couple of breadfruit had rolled, unnoticed, a few yards away.

Barbara is shocked by Croft's display of passion. Yet she is piqued by his show of indifference. What next?

(TO BE CONTINUED.)

"To Walk Spanish"

To make a person "walk Spanish" is to make him come up to time, or to make him act under compulsion. It refers to the old sport among boys in which one boy seizes another by the collar and the seat of the trousers and forces him along on tiptoe. Hence, by extension, it means to walk gingerly. Apparently the expression originally referred to the manner in which the Spanish pirates used to handle their prisoners while starting them out on the plank.—Exchange.

Famous Forts in U. S. History

By ELMO SCOTT WATSON

(©, 1926, Western Newspaper Union.)

A Fort That Once Was a Territorial Capital

Among the military posts established by the federal government, Fort Whipple in Arizona is one of the few that can boast of having been a center of civil as well as military government and that it once served the state in which it stands as a territorial capital. It was built in 1863 near Granite creek by Maj. E. B. Willis of Col. James H. Carleton's famous "California column" and it was established there to help hold the southwest for the Union after Carleton had driven the Confederates out. It was named in honor of Brig. Gen. Amiel Weeks Whipple, who in his youthful military career had explored a part of the wilderness of Arizona before the Civil war and who lost his life at the battle of Chancellorsville.

In January, 1864, John N. Goodwin, governor of the newly-created territory of Arizona, arrived at Fort Whipple and immediately designated it as the temporary capital. In May the fort was moved about 20 miles southwest to its present location and by July there had sprung up near it a thriving little town which was named Prescott in honor of the distinguished historian. During the following years there was a spirited rivalry between Prescott and Tucson for the honor of being capital of Arizona. Eventually both lost out to Phoenix, but for a long time Prescott seemed to have the better claim, partly because of its nearness to Fort Whipple, the center of military affairs in the territory.

In 1869 Fort Whipple was made headquarters of the military department of Arizona and Southern California and there in 1872 came Gen. George Crook to subdue the hostile Apaches who had terrorized the southwest from the days of the earliest white occupancy. Fort Whipple at that time was described by one of Crook's officers as "a ramshackle, tumbled-down palisade of unbarked pine logs hewn from the adjacent forest slopes, which was supposed to 'command' something—exactly what it is not known for it was so dilapidated that every time the wind blew we were afraid it was doomed."

Unimpressive as the old fort was, however, it deserves a place in history if for no other reason than that it was the base of operations of Crook's campaigns against the Apaches, as brilliant an achievement as any in the annals of the American army, which brought a greater period of peace to the harried border than it had known for centuries. Today Fort Whipple is only one of a number of posts, which the war department maintains in the west, whose glory lies in the past when the red man rode the war trail against the whites.

"He Who Finds Gold Dies in the Almshouse"

He was a Swiss adventurer, born in Germany, schooled in the French army and a member of a band of trappers who crossed the western plains to California in 1838. There the Spanish governor Juan Alvaredo, made him a general and presented him with 11 square leagues of land upon which he built, at the junction of the American river and the Sacramento, a fort which he named Fort New Helvetia.

With an army of 50 men as a garrison, he dwelt here in feudal state, ruling over thousands of Indians who cultivated his broad acres of wheat, tended his vineyards or cared for his herds of 12,000 cattle, 10,000 sheep and 2,000 horses and mules. Governor Micheltorean, Alvaredo's successor, presented him with an additional 11 square leagues of land and so Gen. John A. Sutter was truly a "monarch of all he surveyed."

Then on January 24, 1848, Capt. James W. Marshall, employed by Sutter to build a sawmill at Coloma up the American river, found in the sands some shining particles. He told Sutter about it and although they tried to keep secret the discovery of gold, the news leaked out. One day in May a man walked down the streets of San Francisco holding aloft a bottle of shining dust and shouting, "Gold! Gold! Gold from the American river!"

The news depopulated San Francisco. Sailors deserted their ships in the harbor. A tide of gold-mad humanity surged around Fort New Helvetia or Fort Sacramento, as it was also called. The Swiss "king's" stores were looted by reckless adventurers who soon followed the first argonauts; his live stock was stolen; his lands were overrun by squatters.

"He who finds gold will die in the almshouse." So runs an old Spanish proverb. Gen. John A. Sutter learned the bitter truth of that. California became a part of the United States and the titles given by the Spanish governors were no longer recognized. He appealed to the United States courts for recompense and justice. For awhile he was given a monthly pension of $250 but relinquished this bounty after receiving it 14 years. Embittered and poverty-stricken he went east and settled in the little town of Litits, Pa. There he died in 1880.

Fort New Helvetia, Sutter's Fort, is now the city of Sacramento, the capital of California.

Four Road Contracts Let Wednesday

Four gravel road contracts were awarded Wednesday by the DeKalb county commissioners as follows:

To Betts and Essinger of Columbia City, the Surfus road on the Keyser-Richland township line for $13,350. This road will be three miles in length, with gravel 12 feet wide and 8 inches deep and a grade of 22 feet.

To Keller & Baker of Butler, the Christian Funk road in Smithfield township for $9,074 60. This road will be 2¼ miles in length, with a grade of 24 feet, gravel 14 feet wide and 10 inches deep.

To Keller & Baker, the John Wing road in Franklin township for $9,348 77. This road will be 2½ miles long, with a grade of 24 feet and gravel 14 feet in width and 10 inches deep.

To Keller & Baker, the David Shook road in Richland township for $9,780 25. This road will be 2 miles in length, with gravel 14 feet wide and 10 inches deep, and a grade of 24 feet.

The Walb Construction Co. bid $9,500 on the Funk road, $13,360 on the Surfus road, $9,780 on the Wing road and $10,380 on the Shook road.

Glidden, Myers & Williams submitted a bid of $9 500.55 on the Wing road. No other bids were entered.

The estimates of County Surveyor Calvin C. Cain follow: Funk road, $9,833.90; Wing road, $10,012 95; Surfus road, $13,368 90; Shook road, $10,794.

The firm of Keller & Baker is composed of Clarence Keller and O. D. Baker of north of St. Joe.

VIEWERS NAMED

In the petition of Samuel C. Morr and others for a highway in Concord township, Charles Bartels and Isaac Barker were appointed viewers, with Mr. Kain as engineer.

Henry Bates and Joseph Heitz were appointed viewers for the Ira Bone road in Concord township, with Mr. Kain engineer.

Al Gengnagle and Marion DeLong were made the viewers and Mr. Kain the engineer for the Merritt C. Sechler road in Concord township.

Sherman Meek and John Shaffer were named as viewers and Mr. Kain engineer for the Robert Nicholls road in Concord township.

The viewers named for the Geo. H. Abel road in Union township are H. M. Widney and Walter Mertz, with Mr. Kain as engineer.

J. G. Benninghoff and family of Fort Wayne were Easter guests in the H S Bowman home. The visit was also to celebrate the birthdays of the Bowman daughters.

Slats' Diary
By Ross Farquhar

Friday—Seems like when ever ma gets Co. they just come manely for sum thing to eat and when enny body cums to see pa why they want him to do sum thing for them or else do them a favor. and today they was a fellow cum to see the family and after he had told us what fine peopul we was why he ast pa to help get him a pointment to a job in the Eternal Revenew department. And also dissided he wood stay for dinner to if they insisted on it.

Sat.—When Mrs. Gillem left here tonite ma ast pa how did he like her new out fit and she got about ½ sore when pa said that he liked it pritty well oney he diddent care for Bloon Type stockings like she wore.

Sunday—Sum peopul gets sick awfull sudint. Oney just today Hen Dobbs was at Sunday skool this morning and tawking and laffing and three hours after wards he was a mile away from his appendix. He was in the Hospittle and it was in alcohall in the Dr. office.

Monday—well Ive changed my mind about Slippery being a real sport. I went down to his house after skool this evning to see sum books he went and boughten and he taken me up to his room. And it was papered and finished up in Pink and Pail Blue. I don't think he will play on the nine with are gang this summer.

Teusday—I gess ma is threw with mail order houses for good in all. About a week ago she went and ordered a pair of nickers to wear nex summer when we take are otto trip down south. Today she got a packige from there and when she opened it up that had sent her a Pup tent. Pa says he rilly beleaves they musta made a mistake or sum thing

Wensday—Ant Emmy sed she diddent beleave that wimen shud ough. to put there money in there stocking. She sed Why how are you going to get it if they are a lot of men around. Ma said If you are slick enuff why you wont need to get your money. When men is around.

Thursday—went to a recital tonite and they was a girl there whom was home frum collige and ma was telling pa that she wirked hard to out strip all the girls in her class Pa sed Well from the looks of her dress I think she must of succeeded

Lutheran Notes

Sunday School 9:30.

Pravermeeting Thursday evening

On account of the Choral Society giving their cantata at Spencerville Sunday evening, there will be no preaching service at this place.

S. D. Steffey, Pastor.

Wool Grading Demonstration at 1:30

Thursday afternoon at 1:30 at the Merritt Sechler farm, one mile north of town will be held a demonstration meeting on wool grading and docking. Mr. Claude Harpe, Extension Sheep Specialist will conduct the meeting. Probably no other man in Indiana has had such a wide acquaintance and understands the sheep industry in all its phases as well as does Mr Harper.

This is an exceptional opportunity. Mr. Harper will also be able to answer other questions on sheep raising.

A Good Thing - DON'T MISS IT

Send your name and address plainly written, together with 10 cents, stamps or coin (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing CHAMBERLAIN'S TABLETS for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; CHAMBERLAIN'S COLIC AND DIARRHOEA REMEDY for pain in stomach and bowels, intestinal cramp, colic and diarrhoea; CHAMBERLAIN'S SALVE, needed in every family for burns, scalds, wounds, piles and skin affections. Try these valued family medicines for only 10 cents. Don't miss it.

Home Bureau Activities
Mrs. Daisy Woodcox

Mrs. Pluma Hamilton entertained the Home Bureau on Friday, April 10. The committee in charge gave a little play entitled "Old Maid's Tea Party." It was well given and furnished much amusement. Mrs Belle Means gave an interesting talk on perennial flowers. Mrs. Widney conducted a round table discussion on poultry. The regular project clothing was given by Mrs. Beulah Coburn. Four new members were added to the roll. At roll call the members responded with quotations on spring. The committee served delicious refreshments.

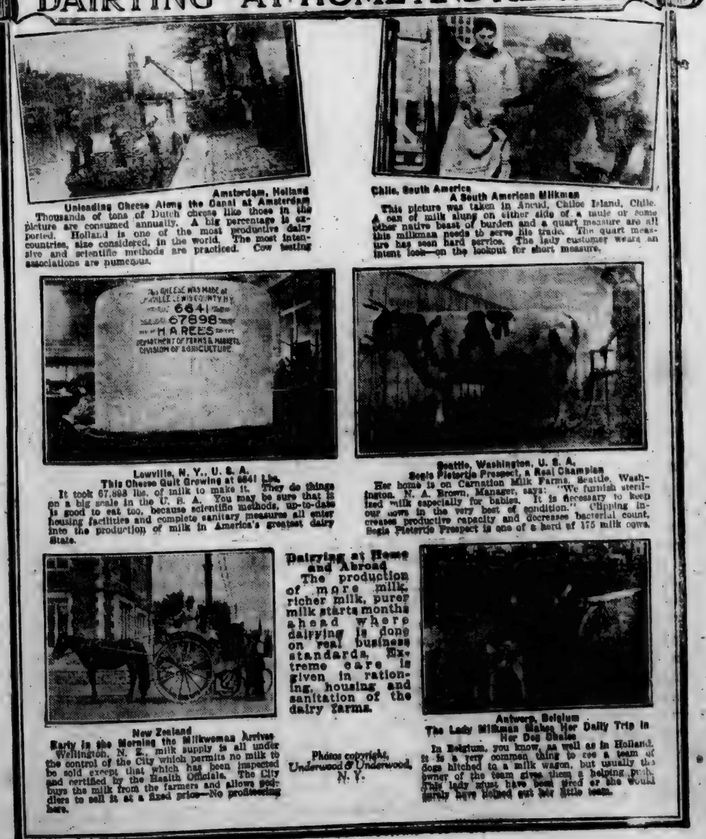
DAIRYING - AT HOME AND ABROAD



Unloading Cheese Along the Canal at Amsterdam, Holland
Thousands of tons of Dutch cheese like those in the picture are consumed annually. A big percentage is exported. Holland is one of the most productive dairy countries, also considered, in the world. The most intensive and scientific methods are practiced. Cow testing associations are numerous.

Chile, South America
A South American Milkman
This picture was taken in Ancud, Chiloe Island, Chile. A can of milk slung on either side of a mule or some other native beast of burden and a quart measure are all this milkman needs to serve his trade. The quart measure has seen hard service. The lady customer wears an intent look—on the lookout for short measure.

Lowville, N. Y., U. S. A.
This Cheese Quit Growing at 6641 Lbs.
It took 67,898 lbs. of milk to make it. They do things on a big scale in the U. S. A. You may be sure that it is good to eat too, because scientific methods, up-to-date housing facilities and complete sanitary measures all enter into the production of milk in America's greatest dairy State.

Seattle, Washington, U. S. A.
Begis Pietertje Prospect, a Real Champion
Her home is on Carnation Milk Farms, Seattle, Washington. N. A. Brown, Manager, says: "We furnish sterilized milk especially for babies. It is necessary to keep our cows in the very best of condition." Clipping increases productive capacity and decreases bacterial count. Begis Pietertje Prospect is one of a herd of 175 milk cows.

New Zealand
Early in the Morning the Milkwoman Arrives
Wellington, N. Z., milk supply is all under the control of the City which permits no milk to be sold except that which has been inspected and certified by the Health Officials. The City buys the milk from the farmers and allows peddlers to sell it at a fixed price—No profiteering here.

Dairying at Home and Abroad
The production of more milk, richer milk, purer milk starts months ahead where dairying is done on real business standards. Extreme care is given in rationing, housing and sanitation of the dairy farms.

Photos copyright, Underwood & Underwood, N. Y.

Antwerp, Belgium
The Lady Milkman Makes Her Daily Trip in Her Dog Chaise
In Belgium, you know as well as in Holland, it is a very common thing to see a team of dogs hitched to a milk wagon, but usually the owner of the team gives them a helping push. This lady must have been used or she would surely have helped out her little team.

ST. JOE NEWS.

VOL. XXXIX ST. JOE DeKALB COUNTY, INDIANA, THURSDAY APRIL, 23 1925 NO. 17

What is Your Opinion?

Public Pride Is A Necessity

St. Joe has always been noted as a town of cleanliness, but as yet our officials say that there are some who are continually breaking down this pride by doing the wrong thing at the right time. We all have a sense of responsibility when it comes to a matter of sanitation, even though the fault of this lies at the door of some one else, and we should not hesitate as citizens of St. Joe to rise up and demand observance of the sanitary laws under which our Health Officer, Dr. Minnick is working. A public dumping ground is a necessity and yet a nuisance. People who use it for discarding vegetable matter ought to know better. Only rubbish that is free from decay can possibly be expected to be dumped in the St. Joe dump as houses are too near for the town to permit anything else But yet, we have people in St Joe who care not f r the comfort of anyone else and will abuse every privilege granted her citizens.

Dr. Minnick has ordered that no vegetable matter be dumped in the fill at the cemetery, and if any offender is learned, he will be compelled to remove same or suffer prosecution.

This notice ought to be sufficient, but will it? We have some folks who used to live in Missouri.

At the meeting of the town board Monday evening the matter of a final clean-up of St. Joe was discussed at the request of the health officer, Dr. Minnick, and the week of May 11 to 16 was decided upon. He reports that there are still ashes limbs, tin cans and trash laying about in prominent places of St. Joe that need attention and that some of the toilets should be cared for by that date. The Marshal will be instructed to see that the desires of the board be carried out in detail Let us all help and make this final for the season.

By Order of
St. Joe Town Board.
Health Officer.

The St. JOE ELEVATOR
Samuel Keesler, Mgr. Grain Dept. **Bert Jackson,** Mgr. Coal Dept.
NOTE—Pay your accounts. They are due now.

Save For a
Definite Purpose

You will find it easier to start saving if you save for a definite purpose.

For instance you have a certain note coming due on the first of March. It will be a hardship if you have to raise the money to pay it out of your March income. If you start now, however, you can build up week by week or month by month, a fund that will easily take care of the obligations without straining your resources at that time.

This is the way any big business corporation plans its finances The same method works just as well as for the business plans of the family. It is a simple matter to set aside regular amounts if you come to regard them as the steps toward some definite goal you wish to reach. Start an account with our savings department today, and it will surprise you the rapidity with which it will grow if added to each month.

The St. Joe Valley Bank, A STATE BANK

SCHOOL DAYS

To Observe Childrens Week Program

The Members of the Children's Division of the Concord Township Council met Sunday afternoon at the Lutheran church and planned for the observance of Children's Week, May 3-10. A publicity committee consisting of Fred B. Leighty, Stanley Means, Ada Bassett and Harriet Draggoo was appointed.

On Sunday May 3rd. each Sunday School is asked to have an opening program by the children.

On each day of the week, children from 4 to 12 years of age inclusive are asked to come to the Lutheran church at 2 o'clock. For an hour they will engage in singing and story tellling.

May 4—Mrs. C. H. Havens and Mrs E. R. Kinsey will have charge of the children.

May 5—Mrs. Henry Culbertson and Mrs. Fred Elson.

May 6—Mrs. Agnes Monroe and Mrs. Floyd Ridgway.

May 7—Mrs. Lester Pugsley and Mrs. Craig Sheffer.

May 8—Mrs. Roy Keller and Mrs. F. M Thornton.

May 9—Mrs Ernest Johnson and Mrs. C. C. Woodcox.

Thursday evening the children are asked to go either to the M. P. or Lutheran church where the pastors will conduct an hour's service beginning at 7:30.

On Sunday, May 10, each church is asked to conduct the closing the week in an appropriate way.

Choral Society Receives Compliments

The St. Joe Choral Society rendered their Easter cantata "The Thorn-Crowned King" at Spencerville Lutheran church last Sunday evening, before a very large, appreciative audience. The rendition of the musical surpassed that of a week ago in St. Joe in every way and the members are to be congratulated for the fine way in which they interpreted the resurrection story. The cantata was composed of thirteen numbers and it was hard to judge just which number was given the best. The pastor very nicely commended the singers for their friendly attitude toward him each year, when asked to sing at his churches and also for the great good that such an organization can do for a community. The editor wishes to add that this is the "Best Ever."

For Sale: Cabbage, Tomato and Sweat Potato plants. Mrs. G. W. Woodcox. 17t2p.

Violin Recital Tuesday Evening

There is perhaps no sweeter music than that produced on the violin and St. Joe citizens will appreciate the opportunity of attending the violin recital put on at the Lutheran church next Tuesday evening, April 28th by Miss Charlotte Miller and her students of the community. The recital will be absolutely free to all and The News speaks a good crowd for them, not because of the free admission but because folks here are all lovers of music. Miss Miller is deserving of a good crowd, because she is filling a very important place in getting young people started in music. The recital that will be given here will be given at Spencerville on the 24 and at Harlan on April 29th.

In Society

Mrs. Kate A. Leighty entertained the final meeting of the season of the Ladies Culture Club Wednesday evening with the assistance of Mesdames Blanch Leighty, Elnora Kinsey, Maude Jenkins and Dema Curie, who were the entertainment committee. The business of the evening was election of officers to serve the coming year:

President—Cora Price.
Vice President—Lena Meek.
Second Vice Pres.—Minnie Pepple.
Secretary—Neva Hursh.
Assistant—Mayola Kinsey.
Treasurer—Dorothea Scholes.
Critic—Katherine Bowser.
Assistant—Rosella Mendallshon.
Press Cor.—Esther Bowman.

Mrs, Leighty will also entertain the midsummer meeting the third Wednesday in July.

Carl D. Carpenter of near St. Joe and Mary Lucile Ballinger of Pioneer, Ohio, were united in marriage, April 11th, at Pioneer. Mr. and Mrs. Elwood Ballinger, parents of the bride, gave them an Easter wedding dinner with all the family present. They will reside on his father's farm, north of St. Joe.

Friday evening their neighbors and friends to the number of forty gave them a rousing belling (not forgetting the truck ride,) afterwards treating them to ham and weiner sandwiches, pickles, cake and coffee. They received many fine as well as useful presents.

Parent-Teacher Association

E. R. KINSEY, - - Reporter

The Parent-Teacher Association held the regular monthly meeting last Friday night at the school house. The Assembly room was packed to the limit and many people expressed the thought that we need a new hall.

The program as advertised was carried out and afforded entertainment. The chorus in costumes by Junior High Girls and the Dramitization of Ichabod Crane by the Freshman were fine.

Mrs. H. M. Widney and Miss Bangs gave a complete report of the Hot Lunch and a vote was taken to continue the lunch ne t year.

The treasurer's report showed the cash on hand to be $35 32.

The following officers were elected to serve next year:

President—Mrs. C. H Havens.
1st Vice Pres.—The Principal of School.
2nd. Vice Pres.—Ed Storer.
Secretary—The teacher of 3rd and 4th. grades.
Treasurer—Ed Schrader.

A rising vote of thanks was given to the retiring officers for their activities during the past two years then adjournment to enjoy a pot luck supper.

Only Member Remaining on Guard

Isaac Meese of St. Joe, bears the very prominent distinction of being the only charter member living, of Co. H., 88th. Indiana. The honor came to him last week in the death of Jacob Presler of Hicksville. These two men were sharing this honor together until last week when taps were sounded and now Mr. Meese stands on guard alone, not one of his company comrades remaining.

Doctor Advised Operation Friend Said Try Lydia E. Pinkham's Vegetable Compound First

St. Paul, Minnesota.—"I was all run-down from overwork and worry, had no appetite, could not sleep at night, and looked like a corpse. I have six children (five boys and one girl) and did not get any strength after my last baby was born. I was getting worse and thinner every day. The doctor said I had to go to the Hospital but this I could not do on account of my family. So I went to a friend of mine and told her what the doctor had told me and she said, 'Now do as I tell you. Try Lydia E. Pinkham's Vegetable Compound as I have done. It helped me.' So I started taking the Vegetable Compound and I noticed after the first few bottles that I felt considerably better. After taking 9 or 10 bottles I got over my fainting spells. Everybody who sees me now notices the great improvement in my health. I am gaining in weight and strength and am feeling fine. Eat well and sleep good nights. Any woman can write to me and I will answer her letter."—Mrs. MARY WILHELMY, 309 Duke Street, St. Paul, Minnesota.

More Green Food Eaten

An increase in the United States of 400,000 acres of vegetables in 1924 as compared with 1918 shows that we are all eating more green food. The increase of lettuce from 16,800 acres to some 63,000 acres proves positively that our national appetite for salads is on the increase. Probably less meat and white flour and more salad and fruit will not injure our national digestion.

Sore eyes, blood-shot eyes, watery eyes, sticky eyes, all healed promptly with nightly applications of Roman Eye Balsam. Adv.

Origin of Word "Nubia"

The name of Nubia, the land from which the Egyptians obtained their gold, is derived from "nub," the Egyptian word for gold.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

For babies tortured by chafing or rashes

or any of the other skin troubles to which infants and children are subject, mothers will find the Resinol Ointment stands unsurpassed. Doctors and nurses recommend it with utmost confidence because of its harmless ingredients and its success in healing eczema.

Stops the itching and burning at once, and hastens the healing.

Resinol Soap might well be called a toilet soap for babies, because its action is so gentle yet it cleanses so thoroughly. Many mothers have adopted its use exclusively, claiming that it keeps baby's skin healthy and his hair soft and silky. Sold by all druggists.

RESINOL

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

"IT'S SO LONELY"

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a cannibal. Croft rescues her. Croft discovers a party of blacks, evidently reconnoitering. Croft fixes up an electrical guard which scares off an attacking party. Secure from immediate danger, Croft and Barbara settle down to make the best of things. Croft already has recognized the charm of the girl and fears the outcome of their situation.

PART TWO—Continued.

—7—

Strangely embarrassed, Barbara hesitated, uncertain whether to go or stay. She was in the act of turning away, when he lifted his head and saw her.

For a moment both were silent. In his face was the look she had seen there on the morning after the wreck. He rose to his feet; and, conquering her embarrassment, she went toward him.

"What is it?" she asked earnestly.

He looked down into the misty blue eyes raised, full of shy sympathy, to his face.

"What is it?" he repeated. "H—l! That's what it is," He stooped to pick up the fruit. "What are you doing here? Going to bathe?"

"I was," she replied, hesitatingly. "But—don't go. Can't we sit down and talk? It—it's so lonely."

Again he looked down into her eyes, almost hungrily. Nothing she could have said could have hit the mark with surer aim. But he clenched his hands and put them behind him.

She gave a quick look at his gloomy face, threw pride to the winds, and plunged with her old impulsiveness.

"Can't we be—friends?" she asked.

He remained silent, with hands still clasped at his back, watching her curiously.

"I thought you did not wish it," he remarked at last.

She sat down upon a rock, abstractedly picking out bits of the moss which covered it.

"I—I've—forgotten that—" She paused, flushing. "If—we shared our thoughts more, things might not seem quite so bad," she suggested.

The ghost of a smile moved his lips.

"You shall have more company soon. We are going to visit the natives. I have sent a message to the chief."

"About what?"

"To come to see me and be prepared to conduct us back to their settlement. To make friends."

"Friends! Those savages—"

"It's necessary. They leave us alone now through fear, which probably won't last. They will hate what they fear; and in time only the hate may remain. That's not the right keynote for a happy life here; is it?" He looked quietly up at her, with a smile full of hidden meaning.

"No." She flushed a little; then gave a dreary laugh. "But I can't imagine what could be, in these circumstances."

"Can't you?" He looked away at the water tumbling over the huge bowlder catching here and there flashes of sunlight through the network of branches overhead. "You were going to find out all about that, in crowded cities; weren't you?"

"About what?"

"What the keynote is which you have found missing to the vast harmony of creation."

She glanced at him in pleased surprise.

"How nicely you express it! I never realized it so clearly as that; it was all vague. Yes. I suppose that is what I felt. It's strange, but I haven't felt it so much here."

She watched him collect his fruit.

"Have you found the keynote?" she asked boldly.

He looked at her for a moment thoughtfully; then answered, guardedly: "I know what it is. And I have only fully realized its necessity since—coming here! We all use substitutes out in the world. It has a lot of branches—or, rather, sub-keys. Perhaps few people ever discover it. . . . Well, Barbara, have your dip."

He was about to turn away; but, acting upon some impulse, paused behind her.

"Is it all very dreary for you—here? Do you hate it so much?"

There was a wonderful, unusual gentleness in his voice—an undercurrent of something, almost yearning, which touched her unaccountably.

"It's no worse for me than for you," she replied, responding to his tone in the natural generosity of her heart. He made no reply for a moment. Then lightly, he pressed her shoulder with his hand

"Come and tell me when the loneliness is too bad."

And he was gone, his footsteps dying away upon the loose twigs of bamboo cane.

She undressed and stood, fair and slim as Psyche, beside the water, a fresh interest awakened in her companion. As she lowered herself into the shimmering ripples, she resolved to follow up this talk, to press through this thin piece of wall; and, by a process of subtle siege, win the friendship which all at once seemed extremely desirable.

But, as usual, disappointment met her efforts when next she assailed the wall. The gap proved to be firmly patched up, even barred across. It was impregnable. Baffled, she could only finger the bars and wonder. . . .

The old chief appeared, keeping a safe distance, soon after receiving the white man's message. But an outbreak of sickness was raging in the settlement; therefore, much to the girl's relief, their visit was postponed. Having ascertained from him that no trade was carried on with other islands, that no ships came to the south, Croft threw himself with renewed zest into the building of a new hut. As if to drown all thought, he worked incessantly, sometimes moodily silent, sometimes seeming keenly to enjoy the new comradeship that had established itself, little by little, between them. A month or more passed before the native chief's wrinkled black face appeared again, two warriors in attendance.

Croft thrust a hand through her arm, when they joined the natives; and again she was conscious of the old magnetic stimulation of his personality, which had sustained her during the first terrible nights and days.

VI

Fear and curiosity formed the chief elements of the unusual animation in the natives' settlement. Great bustle of preparation was in progress—spearing of fish, gathering of fruit, by men; while the smoke of many fires, ascending into the still air, indicated the occupation of the women.

Had not the chief ordered unlimited feasting to pacify the stomachs, music to delight the senses of the Terrible Ones? Balhuaka, the stone god, looked incongruous among garlands of trailing vine and the feathery leaves of tree ferns. Before him stood the sacrificial table—a massive tree trunk stripped of its bark, upon which was piled a heap of dried sticks and undergrowth.

Balhuaka ever demanded a sacrifice at full moon, and the moon was now at the full; and the people trembled, for the selection had been reserved for the Great White Chief, and who could tell what ruthless cruelties he might not exact?

Meamaa sat by her sick child and wept. People shunned her hut, although it was not yet proclaimed tabu. She knew well what was in their minds. With no superficial civilization causing them to hide their natural instinct of self-protection, they openly hailed this possible substitute for an offering. Some of her friends even taunted her with their hopes, if she appeared outside.

"A-aa! a-aa! Weep, Meamaa! The little one is with thee for the day; but, a-aa! with the setting of the sun he shall become as the smoke curling up to the nostrils of the Great White Chief! Weep, Meamaa!"

Yet she was one of themselves, and the child a favorite. She thought none the worse of them; they knew not the art of wearing double-faced masks.

Meanwhile, the dreaded visitors were being escorted with some dignity, through the intricacies of the thick inland vegetation. Although obviously terrified, the old chief bore himself well, maintaining a natural dignity with his humility.

Chimabahol, emboldened by a friendly overture, put into words a question which had long troubled him.

"Where dwell thy tribe, O Mighty Chief?" he inquired, with some trepidation. "No white warriors were visible around thy dwelling upon the coral shore. Do they, perchance, live in the rocks, or in holes deep within the earth?"

For a moment the other was mystified. Then, remembering the natives' tribal instinct, he seized this advantage and stood up, waving his arms as if to include the universe.

"My tribe," he explained equivocally, "is ever present; it ever surrounds us! Armed and ready at any moment to come to our aid, it waits, though invisible to mortal eye. Earthly habitation is not necessary for the White Chief's warriors."

The old native glanced about uneasily, a look of alarm overspreading his face. His sense of drama rising with the situation, Alan stretched out a regal hand.

"Peace, O Chief! Have no fear! They will not touch thee without my command.

"I and my tribe would be friendly to thee and thine. Why hast thou been hostile unto us? Why has thou so tempted the wrath of the gods who sent us hither, by greeting us with spear and arrow?"

Chimabahol beat his breast, looking fearfully at Croft.

"It was the Vow," he said in a low tone.

"The Vow? What vow?"

"The Vow of Vengeance—of Hate!" The old man rose, and walked to and fro, feverishly pulling his beard, obviously laboring under some strong emotion. At last he paused opposite them, and they saw tears upon his wrinkled black cheeks. "Hearken, Great Chief!" he said. "The white man came before, not many summers past. He came in great numbers, and he kill! A-aa! He let loose his magic, and he kill most of my tribe with his smoke! It hit them, making holes, leaving little hard ball-devils behind. Our homes were near thine own, even in the huts beside the waving palms. They also were shattered by the smoke and its ball-devils. My warriors lay dead, bleeding on the ground. Our women also, our little ones, they spared not!" He paused, overcome, for a moment.

Croft sat listening intently, with dawning comprehension.

"How did they come?" he asked.

"The lagoon was black with strange canoes, Great Chief. Beyond, near the big gap in the reef, floated an island. . . . A-aa! a strange sight, filling the bravest with fear—" He stopped, again overcome, and turned away.

Hastily Croft interpreted this conversation to the girl.

"Didst thou attack these white men first?" he asked.

The old man shook his head. "We feared their arrival! We but gathered together, outside our houses, to see the

"Thou Hadst to Learn the Fear of Us and Our Wrath."

wondrous sight. The hand of Death has been heavy upon us, and we were small in number, even then. That day less than half were left alive. . . . My sons were all slain. . . .

"The d—d murderers!"

Chimabahol looked up, startled by this burst of vehement English. Croft controlled his indignation, making further inquiries, which elicited the answers he expected.

"They were all men," the native told him. "After they had killed, they fled away to their canoes. They were covered with dark clothing, each like unto each. When they spoke, they spoke strangely—here," he stroked his throat, "and their words were like the sounds made by one whose stomach is too full, and who must return somewhat lying therein."

This vivid description of the Teutonic tongue convinced his listener.

"Ha! The d—d Huns! I thought as much." He again interpreted for the girl at his side. "Now let me think. We must turn this to our advantage. It proves what we talked about that evening by the river; don't it? The effects of our 'civilized' war were felt even here!" He ran his fingers through his hair, watching Chimabahol thoughtfully.

"And thy Vow was of vengeance upon all white men?"

"Even so, Great Chief."

"H'm! . . ." His fertile brain speedily conceived a plan which, if wild, was yet founded on fact.

"Chief," he began confidently, "those white men who murdered thy sons were an enemy tribe waging war against my tribe. And their ways were treacherous, their weapons terrible!"

Chimabahol was unusually intelligent for a native. Quick to grasp the meaning of this stranger, who spoke a dialect so much resembling his own, a flash of comprehension leapt into his eyes.

"And they came hither thinking to find thee here, Great Chief, so that they might slay thee?"

A smile lit up Croft's face. If not strictly accurate, this surmise would suit his purpose admirably.

"Even so! And, seeing thy tribe of a different hue, they were filled with fear and cried, saying 'Let us slay them!'"—he had a vague impression of Biblical eloquence, but it translated very well—"And they slew all thy sons in their fear; then ran to their boats. For their hearts are as the fermented breadfruit long stored in a pit."

Pausing to refresh his oratory, he proceeded to picture their mutual enemy in lurid colors, assuring the chief of their downfall. This gave him another inspiration.

"The gods sent us hither to tell thee that thy Vow of Vengeance had already overtaken the tribe;" he announced coolly. "But, because thou camest against us, we could not carry out our mission. The gods were angered, therefore, and visited thy tribe with sickness. Thou hadst to learn the fear of us and our wrath. Therefore, Chief, see that thou and thine fall not again into sin by lifting thy hands against us, the friends of all the gods!"

This flow of eloquence made a tremendous impression upon Chimabahol. His relief was intense. That this god-like pair, with their wonderful powers, had come upon a mission of peace and friendship, inspired visions of renewed prosperity in his simple mind. Coming closer, he prostrated himself at their feet, in submission.

After this they set forth again. It was no longer difficult to make Chimabahol talk. His delight was almost childlike, resulting in a garrulity difficult at times to understand. But Croft realized that the little tribe, with the natives' melancholy sense of fatalism, had become convinced of its extinction, this conviction producing inertia. Apparently all attempts at cultivation had ceased, with all forethought for future generations.

When they emerged from the southern end of the forest, the little colony of huts came into view.

"The huts are deserted," Barbara observed. "Where is everybody?"

"Dressing for dinner, perhaps," he suggested lightly. "Oh, lord! I am dry. And they won't supply a whisky and soda! Celestial life has its drawbacks."

"I wonder what they wear?"

"Who? Gods?"

"No. The natives—for dinner."

He gave a shout of laughter, causing Chimabahol to jump with fright.

"Oh, just a reed or two, maybe. What we may come to, yet."

Barbara said no more.

VII

The cause of the deserted appearance of the place was soon clear. Chimabahol led his guests around the western outskirts of the little settlement, toward the belt of verdure reaching down on that side almost to the lagoon. Here, in a large clearing used for council chamber, with carpet of moss, walls of lofty trees, roof frescoed with blue and green tracery, was assembled apparently the entire tribe.

Upon the white chief's appearance a wailing murmur arose, interspersed by the occasional frightened cry of a child. At a shout from their chief, they all fell upon their faces. Three times they raised their bodies, swaying backward, then down again to the earth. After the third obeisance they rose to their feet, eying the strangers curiously, fearfully.

While the old chief launched into a lengthy oration, and as she watched the varying expressions upon their faces, it dawned upon Barbara that these might be, henceforth, the only human beings in her life! This appalling probability shocked her, as she realized it, with almost the effect of a sudden, reeling blow. Shuddering, she turned from the small dusky bodies and looked at Croft's fine physique His head was averted, his attention entirely engrossed by Chimabahol's gabbling speech.

Conscious of mental nausea, like one drowning, she clutched at the only remaining link with life—the companion destined to the same fate. For the first time in her life she called him by name, grasping his arm:

"Alan!"

Quickly he turned, in astonishment.

"We may never see any other human beings!" she gasped.

With his usual swift penetration he understood, by the desperation in her voice and eyes, the overwhelming horrors raised by this thought. For a moment he hesitated; then, pulling her hand down into his, he clasped it close, saying nothing. At his reassuring touch the awful loneliness faded gradually, as the autumn mists when the sun breaks through.

A sudden outburst of exultant cries rent the air. The lengthy eulogy came to an end at last. The pathetic relief in every swarthy breast manifested itself in wild leaps and jubilant shouts.

Croft, like Mr. Micawber, was not slow in seizing an opportunity for eloquence. Raising his free hand to command silence, he glibly reeled off other duties assigned to him.

It was, he stated confidently, the gods' desire that he and his wife should live upon the island to assist the tribe in the recovery of its strength and prosperity. This provoked more uproarious shouting.

Of course this state of affairs cannot last. It's against human nature. How would you write the next installment?

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Lesson for April 26

STEPHEN, THE FIRST MARTYR

LESSON TEXT—Acts 6:1-7; 60.

GOLDEN TEXT—"Be thou faithful unto death, and I will give thee a crown of life."—Rev. 2:10.

PRIMARY TOPIC—The Story of a Brave Man.

JUNIOR TOPIC—Stephen, the First Martyr.

INTERMEDIATE AND SENIOR TOPIC—Stephen a Christian Hero.

YOUNG PEOPLE AND ADULT TOPIC—Character and Message of Stephen.

I. Stephen the Deacon (6:1-8).

The early church was threatened with disruption over suspected partiality in the distribution of alms. Thus we see that as soon as the church had relief from external troubles, difficulties arose from within. A congregational meeting was called, and the case was placed before the church, which was instructed to select seven Spirit-filled men of good reputation to administer the temporalities of the church, thus giving the apostles the necessary time for prayer and the ministry of God's word.

II. Stephen Before the Council (6:9-15).

The success of this movement soon came to be noted by the enemies of Christ.

1. Disputing With Stephen (vv. 9-10).

Certain foreign-speaking Jews took the lead in this controversy. Perhaps the fact that Stephen was a Greek Jew provoked them to act. He was more than a match for them while the debate was carried along the lines of reason and Scripture. Beaten along these lines they had him arrested and brought before the council.

2. Charged With Blasphemy (vv. 11-14).

They trumped up this charge and endeavored to support it by secretly finding and inducing men to perjure themselves in their testimony. Stephen showed in his preaching that God's purpose is progressive, and that the policy instituted by Moses should be superseded by the new faith since it was the culmination of what Moses began. He showed that the old dispensation would be superseded by the new, and that the church would come out into the liberty of Christ. Christianity did not destroy Judaism but caused it to blossom forth into the glory of the new order.

3. Stephen's Face Transfigured (v 15).

He was so completely filled with Christ that as he saw the angry mob and realized how soon he would be violently dealt with and pass into the presence of the Lord, his face shone as the face of an angel. It was the glory of Christ shining through him.

III. Stephen's Defense (7:1-53).

In refuting their charge he showed by the history of God's dealing with the Jews that they had always resisted Him. Therefore their attitude was because of their unwillingness to move forward with the divine purpose. As indicated by Dr. Stifler, four points stand out in his defense:

1. God's dealing with the Jews showed progress. The end was not reached by a single leap, but by gradual stages.

2. The temple was not the only holy place. God appeared at different places and at different times.

3. Israel invariably opposed God as He tried to lead them on.

4. He showed his loyalty to Moses by constantly referring to him.

IV. Stephen Stoned (7:54-60).

His words were too much for them so they gnashed upon him with their teeth.

1. He Looked Steadfastly Into Heaven (v. 55).

Instead of looking about upon his murderers in their raging fury, he looked up to heaven. This was the secret of his calm. If he had looked about him, he might have been afraid.

2. He Saw the Glory of God (v. 55).

A vision of God's glory can only be seen by those who are loyal to Him, even unto death.

3. He Saw Jesus Standing on the Right Hand of God (vv. 55-56).

The fact that Jesus was standing shows that He was actually interested in the suffering of His faithful witness.

4. They Cast Him Out of the City and Stoned Him (vv. 58-59).

5. His Prayer (v. 60).

He kneeled down, and cried with a loud voice, "Lord, lay not this sin to their charge." How like the prayer of Jesus on the cross! Christ so completely filled him that he could thus act.

6. He Fell Asleep (v. 60).

The Christian's death is only a sleep. This sublime scene must have vitally affected Saul, who was consenting unto his death.

Worth Remembering

Over and over again we need to comfort and strengthen ourselves with the remembrance that there is a very wonderful, enduring quality to the things that are good and clean and sound and honest.

Prayer for the Day

Let each new day bring to our lips the prayer: "Make me sane, and sweet, and strong for all the day holds of care and contradiction, of toil and trouble."

Scraps of Humor

O—WELL—

A young woman, having decided that it was just at present the fashionable thing to know all about business and town industries, was being shown through a garter factory.

"Goodness!" she exclaimed, "90,000 pairs in one week! I don't see where they all go."

"Neither do I," replied the young man who was guiding her, coloring slightly.—Holmes Store News.

ASTOUNDING, VERY

Mr. Overseas—A most remarkable coincidence, what?

Mr. Eaglebird—What's that?

Mr. Overseas—That your first President and your capital city should have the same identical name.

What to Do?

Of all the strange things in this world,
This is the strangest one;
So many things are easier said
Than ever they are done.

One on the Heckler

Lecturer—Now for a few minutes, ladies and gentlemen, we shall consider the fundamental principles of architecture. The Etruscans—

Voice From the Rear—How d'ye build a hoghouse?

Lecturer (promptly)—Do you contemplate moving, sir?

Settling Mother

He—Tomorrow morning you will meet me at the Cosy cafe.

She—But supposing mother insists on coming with me?

He—She won't; I have invited her to meet me at the same time at River restaurant.

TAKING RISKS

Dentist—Don't be afraid. You'll be profoundly unconscious while I'm extracting those teeth.

Patient—That's what troubles me, doc. Isn't there some safe place where I can leave my roll before I take the gas?

On the Radio

Eena, Meena, Minah, Mo—
Catch a song on the radio;
If it's squeaky, don't let go,
Tune it in a little mo'.

The Better Way

After capturing many "firsts" for athletic prowess, a young woman decided to take up cooking lessons.

"A wise decision," declared the instructor. "Join our waffle class tomorrow. We give a medal for waffles."

But when the young lady showed up wearing all her trophies, the instructor said: "Maybe we'd better give you a waffle for medals."

Wanted a Tablet

A conversation recently overheard in a modern drug store which deals in many things besides drugs:

"Gimme a tablet."

"What kind?"

"A yellow one."

"But what's the matter with you?"

"I want to write a letter."—Everybody's.

Very Often

Mrs. Gay—I always agree with my husband.

Mrs. Guy—Very sweet of you.

Mrs. Gay—Except, of course, when he is wrong.

How Obstinate

The Editor—Why do you persist in bringing me these old jokes?

The Artist—Well, you know, I must live.

The Editor—Now, now—don't be pigheaded.—Sydney Bulletin.

Too Honest

Son-in-Law—Say, you have paid me a thousand marks too much!

Father-in-Law—And this is the idiot to whom I have intrusted my daughter!—Dorfbarbier, Berlin.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

HOW BAD TEETH CAUSE CONSUMPTION

CONSUMPTION is not hereditary but it is now generally agreed among tuberculosis experts that, no matter when the disease develops, infection generally takes place in child hood.

This infection, like all other germ infections, can only happen if there is a break somewhere in the skin or the lining of the body cavities. The membrane which lines our nose, mouth throat, bronchial tubes and lung spaces is a continuation of the skin, and, like it, is not affected by germs, except as they can find an opening somewhere to allow them to enter the substance of the body and begin to grow. Any break or tear in this membrane is just like an open gate in a city wall. It is a gap through which the enemy can enter.

One of the earliest and most common signs of tubercular infection in children is a swelling of the lymph glands of the neck. The lymph glands of the body, which lie just under the skin, are the filters or drains which stop and hold any infectious matter which may enter the body and so prevent it from reaching the deeper-seated vital organs. They are the second line of defense, like the street barricades which the defenders of a city would throw up to stop the enemy, after the gates had broken down.

Now it has long been know that in many, if not all cases of tubercular glands in the neck, the teeth would be found to be decayed. Even if the decayed teeth are pulled, infection may enter through the holes left in the gums. If decay has gone far enough so as to kill the pulp in the tooth, the softening opens up the canals in the roots of the teeth and root abscesses may result. The tuberculosis germs may then pass from the root abscesses into the fine lymph vessels. The first lymph gland they come to catches and holds them. If they are few in number, they may be killed in the gland without doing any harm. But if they are many they make the gland work so hard that the glands become swollen and tender and finally break down and form little abscesses.

Bad teeth or openings in the gums caused by bad teeth are ideal breeding places for the tuberculosis germs as the warmth and moisture in the mouth gives them just the conditions they need for growth.

Sound teeth and clean mouths are a protection against disease. Children especially should be taught to keep their mouths clean. Bad teeth should be removed or filled at once, not only to save the other teeth but also to keep out any disease germs that may cause trouble in after life.

CONTROLLING HAY FEVER

HAY fever is a disease which is not dangerous to life but which often makes the victim wish it was.

It is called hay fever, because the most common form comes in the early fall, during the haying season. Just how the idea originated that it had any connection with hay is hard to see. Probably because people working in the hay fields were found to be especially subject to it. This is not due to the hay but to the fact that many weeds, growing among the hay, become ripe and throw off their pollen about haying time. These weeds, cut down with the hay and dried, are raked up and handled in haying, so that the air in which the haymaker works is full of dried pollen. The small sharp-pointed seeds, drawn into the nose in breathing, are extremely irritating and cause the well-known symptoms of constant sneezing, congestion and obstruction of the nose, ther watery irritating discharge.

It was long ago noticed that these attacks happened at other times than the early fall. The so-called "rose colds" occur in May and June. Similar attacks may occur almost any time in the year. So it is not only the pollen of weeds at haying time which may cause this condition, but any irritating substance in the air.

I have seen typical hay fever attacks in the middle of the winter, due to breathing street sweepings blown about by the stray winds of January or February. I have also seen attacks brought on by breathing formalin or formaldehyde.

Hay fever may be due to the pollen laden air from the hay fields, but it may also be due to many other causes. The principal cause is the individual. A dozen people will breathe the same air under the same conditions, only one or two will show any discomfort. Those who do will be found to have two peculiarities: some obstruction in their nose and a nasal mucous membrane that is unusually sensitive. So long as there is no irritating substance in the air, they are all right. But if the air is filled with pollen of rag weed, golden rod, wild oats, Bermuda grass, sage brush or any of the many irritating seeds, immediately the sensitive victims begin to sneeze.

We have learned much about this miserable ailment in late years and now know that it is caused by many kinds of dust, instead of only by hay seed as we formerly believed.

Yeast Foam

Good bread makers everywhere prefer it

Hear it crackle and snap as you knead it

The well-risen loaf that Yeast Foam assures has made it the favorite of home bread makers.

Teacher—Why isn't distance on the ocean measured by the mile?

Johnny—Because it's knot.

Knows How

"Maud still stays young." "Yes; it's an old habit of hers."—Boston Transcript.

Let this great Tonic build you up!

IF your body is skinny and run-down; if you can't eat or sleep, have fits of nervousness, pimply complexion, you need Tanlac to put some solid flesh on your starved bones and bring you back to health.

Tanlac is Nature's great tonic and builder. It is made, after the famous Tanlac formula, of roots, barks and curative herbs gathered from the four corners of the globe.

Get a bottle of Tanlac at your druggist's today. Start the good work at once. You'll feel better right from the first. In a week's time you'll feel like a new person.

For Tanlac gets right down to the seat of trouble. It purifies the blood, aids digestion, helps the appetite, puts on pounds of flesh.

Millions of men and women who were once sickly and discouraged have been lifted right back to health and strength by the Tanlac treatment. Our files contain one hundred thousand glowing testimonials from grateful users.

Tanlac will help you just as it has helped millions of others. Buy a bottle at your drug store today and start the winning fight for prime, vigorous health.

Nurse Endorses TANLAC

"In my fifteen years' nursing experience I have seen Tanlac restore dozens of run-down people to health and strength. I have recommended it time and again with surprising results."

Mrs. M. E. Chappelle, Nurse
Wauwatosa, Wisconsin

Follow Nature's Idea When Planting Trees

Take the roadside in a low and wet landscape, where you want to emphasize and still not hide the beauty of such a landscape. Nothing is more fitting than the red osier dogwood. You need not be afraid of overdoing the amount of planting in such a situation; it will always be in scale with the great open country surrounding it and will never dominate the landscape. There may be other places where an overdose of red osier dogwood would become grotesque and irritating, but not so in the open country.

Imagine a sloping hill, covered with roses, or if in a pine country, with junipers or harebells, or in the South with yuccas. Such a sight might be worth going many miles to see. The top of a bluff may be crowned with oak or maple, and in the pine country with white pine. If there be a rock cliff at a turn, such plants as native grape, bittersweet, red elderberry, yellow honeysuckle, junipers, harebells, blueberries, goat-beard spirea, etc., all in accordance with what will grow in that section of the country and make the most beautiful picture, should be planted. There are a great many other plants that will grow in such a situation, and enhance the barren cliff, as there are many other plants that will grow on the clay or gravelly bank, than those I have mentioned. The native vegetation is always the correct and sure guide to follow. Avoid stiff formality of planting.—Indianapolis Star.

Home Ownership One of Life's Big Steps

To own your own home seems a normal way of starting family life. The first question that presents itself in solving this problem is that of expense. The man or woman who has ready, idle cash need not worry, but the wage-earner, who can pay only a certain amount down and the rest on the installment basis, should do some careful planning.

Building and loan offerings solve the problem for many very satisfactorily. Learning to save consistently is another way of reaching the goal. It is generally considered good business to wait until we are able to pay one-fifth in cash for house and lot, then go ahead and borrow for the building.

Location is an important point to consider for those in moderate circumstances. Property in a central and improved section may cost a trifle more at the outset, but it also is likely to improve in value and be more salable should occasion arise to dispose of it. In growing cities, it is safe to risk a little in this way on the investment.

Value of Faith in Self

If cities of Alabama with all their resources and opportunities for development, were completely "sold" to their own people, they would soon feel much greater effects upon their progress and expansion. There is nothing like faith in oneself as an argument to others. Alabama cities have not been fully "sold" to their people as have Miami and some of the California cities. Many of the long residents of Birmingham, for example, do not even know what the community has in industrial achievements or opportunities. Half the people do not know what is manufactured here and what can be made, as is often demonstrated by new industries established by outsiders. And so with other Alabama cities.—Birmingham Age-Herald.

Another Grade

By DOUGLAS MALLOCH

FOLKS can't always find the word
For the things to say.
Now and then a man's a bird
Sayin' right away
Just the thing at just the time
That is proper, right and prime;
But the glibbest ones by far
Often poor performers are.

So, my girl, I haven't got
Sense to say it right—
Think of somethin', like as not,
By tomorrow night—
Then you'll be a hundred miles—
Yes, sir, gone and took your smiles
Where there ain't a chance to see
Only in my memory.

I'll remember, don't you fear—
I'll remember when
You and me was youngsters here,
Thinkin' others then
In their twenties gittin' old.
Goodness, how the time has rolled!—
Here you are, and here I be,
Twenty-one and twenty-three.

You was always smart at school—
There ain't many such,
Me, I guess I used to fool,
Fool around too much.
I was older, but one day
You caught up with me—and, say,
You could just have knocked me dead
When you passed a grade ahead!

Guess that's what you're doin' now—
Made another grade
Hitched and harnessed to the plow
I am, I'm afraid;
But you're growin' ev'ry hour,
Bloomin' like a garden flow'r,
Life has, as it ought to do,
Once again promoted you.

Folks the word can't always find
For to say a thing;
But up yonder look behind
Where the swallows sing,
You'll be busy, I expect,
But just try to recollect
Me—no special reason why—
Just remember. Well, good-by.

Your Last Name

IS IT MOODY?

ONE authority says that Moody is derived from a personal name Muthe, while another authority assures us that Moody is an adjective nickname from the word which now means morose, but which at the time that it was first used as a name had the older meaning of valiant. Muddiman is akin to it, having originally been Moodyman or valiant man.

Undoubtedly the family is of English origin. The first to settle here was William Moody of Ipswich, England, who came to this country in the Mary and John in 1633 and first settled at Bayfield, Mass. In the home he built there, his heirs were born for the next two hundred and twenty years.

It is said that this William Moody belonged to an ancient English family which "went down with the house of Lancaster in 1471." William married Sarah Pierce and had four sons, whose names were Samuel, Joshua, Caleb and William. Joshua, a Harvard graduate, was a famous minister in his day. Caleb was the ancestor of Dwight Moody. It is the boast of the Moody family that from the time of Joshua Moody the family never lacked for an exceptionally great preacher. Joshua outshone them in the Seventeenth century, Samuel in the Eighteenth and Dwight Moody in the Nineteenth century.

POMEROY—This is an old French name derived from a word pommeral, meaning appleyard. Of course the Pomeroys derived their name from some place called Pommeria but there are many such places.

Two-Piece Dresses Score a Triumph

Spring has brought with it a rival of the one-piece day frock—and fashion has given it a warm welcome. In fact, the two-piece dress has scored a triumph. It is chic, simple and youthful and is developed in many sorts of dress fabrics—with kasha and silk alpaca in great favor. It is pictured here in the latter material.

High-Crowned Hats Are Chic This Spring

While small, close-fitting shapes predominate in the new season's millinery, there are many larger hats. Crowns are high; brims soft in outline and colors entrancing. Three chic models shown here reflect the style features of the mode.

Death of Miss Florence Langley

Miss Florence Virginia Langley, head nurse of the Brokaw hospital at Bloomington, Illinois, and formerly public health director of Normal, died of pneumonia at the Brokaw hospital last week.

Miss Langley was the daughter of J. M. and Annie M. Langley, and was born at York, Medinma county, Ohio, July 23, 1871. She lived for a number of years in Indiana, and then went to Holder with her parents, her father being pastor of the Methodist church at that place.

She was graduated from the Brokaw training school for nurses in 1908, later serving as surgical nurse at the American and Post Graduate Hospital in Chicago, and for several years was health director and visiting nurse in the Bloomington schools.

In 1917, Miss Langley enlisted as a war nurse in the Red Cross, and was assigned to service in the East during the influenza epidemic, later being transferred to the Federal hospital service, then immediately embarked for France, where she served with the American Expeditionary Forces until the close of the war.

Miss Langley was one of the most prominently known nurses in that section of Illinois, because of her long public and private service, and overseas record is an excellent one. The good she did over there, alleviating suffering and cheering up the wounded and homesick, can never be told in words.

About a year ago, Miss Langley returned to Brokaw hospital as supervising nurse, and was so serving at the time of her demise.

She is survived by a brother, Frank, of St. Joe and a number of other relatives.

Funeral services were held at 2:30 o'clock Wednesday of last week from the John A. Beck company chapel at Bloomington, Ill., with Rev. E. V. Young, pastor of the Grave M. E. church in charge.

Miss Langley will be remembered here by most of the people, having resided here some years ago, when her father was pastor of the M. P. church.

One Place Where I Reall Make Showing

I am 25 cents.

I am not on speaking terms with the butcher.

I am too small to buy a quart of ice cream.

I am not large enough to purchase a box of candy.

I am too small to buy a ticket to the movie.

I am hardly fit for a tip, but—believe me, when I go to church on Sunday I am considered some money.

Matrons' Millinery Smart and Dignified

Ingenious and beautiful workmanship in hats made of lustrous and rich materials give to matrons' millinery the required dignity. The three models shown here are typical of the spirited shapes and intricate trimmings that give them chic.

LAKETON, INDIANA.

Obituary

William Peter, second child of Lewis Wallace and Cora C. Steward, was born in Allen county, Indiana, March 7, 1887 and departed this life April 17, 1925, aged 38 years, 1 month and 10 days

While a boy, only eleven months old his folks moved to Spencerville, where Peter has lived his entire life.

On March 20, 1909 he was united in marriage to Hazel Berry from St. Joe and to this union were born three children: Ercil Carl, Erma June, who slipped away at one year of age, and Florence Louise.

Thirteen years ago in February his father passed to the great beyond and six years last October his only brother died at Camp Taylor Kentucky.

He leaves to mourn their loss the widow and two children; his mother and two sisters, Miss Arminta and Mrs. Jennie Walter, and a hoet of other relatives and friends.

Peter was a member of the Masonic Order and the Knights of Pythias at Spencerville; a member of the Scottish Rite and of the Mizpa Shrine at Fort Wayne. He was a director of the bank at Spencerville and a very influential factor in our community life.

For the last eight weeks he has been working as traveling salesman with the Mercantile Security company of Columbus, Ohio. In this capacity he drove his car to Lebanon, Indiana on Tuesday of last week. Was sick when he arrived there and Wednesday was taken to the Witham Memorial Hospital of Lebanon, with double pneumonia and Thursday afternoon he dictated a letter to be sent his wife, thinking that he would soon be well and come home but soon after was taken worse and died Friday morning. The family did not receive the letter nor any knowledge of his sickness until after they received the telegram of his death.

Funeral services were held from the home Monday afternoon, with burial at White City. Rev. Brown officiating.

Card of Thanks

In this sad hour, we pause and desire to publicly express our appreciation of the many kind and consoling words spoken in our behalf, and also for the floral offerings and kind deeds of neighbors and friends.

Mrs. Hazel Steward and Children
Mrs. Cora Steward and Daughters

RESOLUTIONS OF RESPECT

Green be his memory, in the Order's heart,
He loved so well, through all his true life's span;
Bless'd be his rest, who acted well his part,
Who honor'd God in doing good to man.

And when a few more days are flown,
And the last lingering sand is gone,—
With Jesus nigh;—
How blessed then to lay me down and die.

In Memory Of

Brother W. P. Steward who died April 17, 1925.

Once again the Supreme Chancellor of the Universe hath summoned, through death, a Brother Knight, from the labors of the Castle here to the joys of the beautiful Castle in the New Jerusalem. He has completed his labors of Friendship in helping his fellow brother; of Charity in relieving the cries of the distressed, and in Benevolence in ministering at the bedside of the sick. As a recompense of his service under the tri-colored banner, he has received the plaudit, "well done," from the Great Father.

And Whereas, The all-wise and merciful Father has called our beloved and respected Brother home; and he having been a true and faithful Brother of our Mystic Order, therefore be it

Resolved, That Spencerville Lodge, No 321, Knights of Pythias, of Indiana, in testimony of our loss tenders to the family of our deceased Brother our sincere condolence in this deep affliction, and that a copy of these resolutions be sent to the family.

Catarrhal Deafness

is often caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or Imperfect Hearing. Unless the inflammation can be reduced, your hearing may be destroyed forever.

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

Sold by all druggists for over 40 Years.

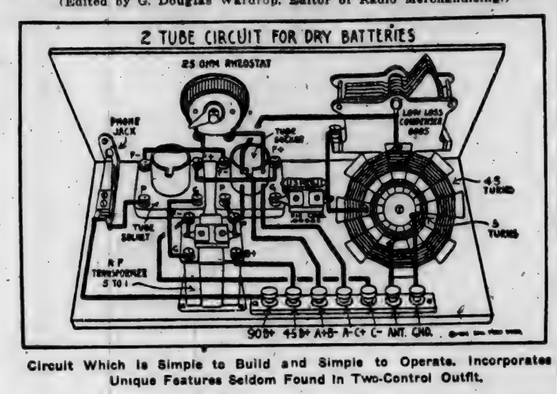
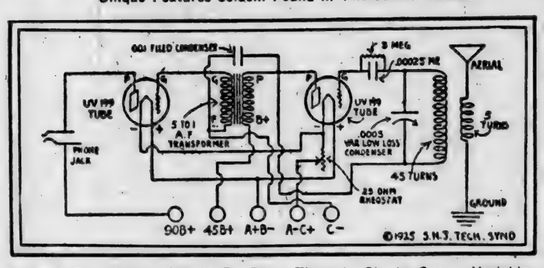
RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)



Circuit Which Is Simple to Build and Simple to Operate. Incorporates Unique Features Seldom Found In Two-Control Outfit.



Ratio of Transformer Should Be From Three to Six to One. Variable Condenser Also Must Be of the Proper Capacity.

By F. M. RUSSELL

When a radio receiver is to be used in the home where it is operated by all members of the family, both young and old, it should possess certain features such as simplicity in operation, perfectly clear and howliess reception, good receiving range, loud-speaking output, and a logged dial that eliminates the guess-work of tuning and makes it possible for one who never saw or heard the set before to get any station desired with it, by referring to the dial reading.

The little two-tube set illustrated will do all the above things in an efficient manner. This is due to the circuit used which is simple to build and simple to operate, but incorporates several unique features that give it qualities seldom found in even a two-control outfit. It has automatic or spontaneous regeneration and an aperiodic primary. The regeneration increases volume and receiving range and the aperiodic primary makes the set selective and allows logging of the single tuning control.

Never under any circumstances will the set howl if the parts are arranged correctly and the values are as specified. The secret of this is in the method of obtaining regeneration and the fixed condenser across the audio-frequency transformer.

The readings of the variable condenser dial, which is the only control, are permanent. If a station is once received at say 20 degrees it will always be received again at that point. This applies to distant as well as local stations.

Parts Used.

The above results are obtained by virtue of a special tuning unit in the form of a coupler. It consists of two spiderweb coils, one of five turns and one of 45 turns. The five-turn coil is the aperiodic primary and the other is the combined plate and secondary coil. It is not difficult to build the unit. Spiderweb coils of the proper size can be purchased at a radio store or they can be home wound on a cardboard or wood frame. This should have 11, 13 or 15 spokes. The winding method is two over and two under, in other words, the wire is first wound under two spokes and then over two spokes, etc. About one-half pound of No. 22 double silk or cotton-covered wire is necessary for this. Do not use enamel.

To Construct.

Mount the coils when finished as shown in the illustration. The coupling between them may vary anywhere from one-quarter to one-half inch according to the selectivity desired. Lay out the sockets, transformer and the rest of the apparatus as shown and wire with the direct connection method, that is, make all connections direct from terminal to terminal in the shortest possible manner. This may not look "pretty" but it will reduce the resistance and inter-circuit interference, and make the set more efficient. After all it's results we want, not beauty.

The parts necessary to construct the set aside from the special coupler are as follows:

One .0005 variable condenser.
One geared vernier dial for condenser.
One low ratio audio frequency transformer.
One .001 fixed mica condenser.
Two 199-type sockets.
One 25-ohm rheostat.
One 2 to 5-megohm grid leak and .00025 fixed condenser.
One 7 by 14 panel.
One single-circuit jack.
Baseboard, binding posts, screws, wire, etc.

The ratio of the transformer should be anywhere from three to six to one, but not higher. The set will distort if this is violated. The variable condenser also must be of the proper capacity. Any smaller or larger will either not allow the reception of certain wave lengths or bunch the stations up on half the capacity variation. Only one rheostat is used on both tubes.

The adjustment on either is critical and a 25-ohm resistance will take care of them. The connections for the .001 fixed condenser are across the primary and secondary of the transformer to the P and F posts. This must be placed in this position, not across the primary as is customary.

To Tune Set.

Tuning the set merely requires adjusting the rheostat and turning the dial. The stations will come in sometimes without a carrier wave whistle, so it is advisable to turn the dial very slowly and listen intently to be sure a station is not missed. On long distance the adjustment is apt to be critical. A geared vernier is essential because of this. With the ordinary dial many stations would be passed up without the operator's knowledge.—Boston Traveler.

How to Use Pattern to Build Your Sub-Panel

Locating a number of sockets, transformers and other instruments on a sub-base can easily be accomplished without tedious measuring and possible errors by means of a pattern.

The outline of the sub-panel is

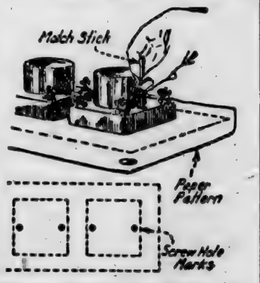


Diagram Showing the Pattern Plan for Sub-Panel.

drawn on a stiff piece of paper and the instruments are placed on it in the exact location to be occupied in the final assembly. As each device is provided with screw holes the work of locating is thereby simplified. When the instruments are finally located to the satisfaction of the builder the end of a match stick is dipped in ink and a mark is made on the paper by passing the stick through each hole. The sketch shows the idea.

Service of Loop Aerial in Securing Selectivity

The greatest objection to the use of a loop aerial in securing maximum selectivity is the loss of volume. When difficulty is experienced from the interference of two or more stations near the same wave length, or when the static becomes so heavy as to drown out even the locals, the trouble may be reduced at least 75 per cent by closing the ground switch, thus grounding the aerial, and connecting the set to a 3 or 4-foot loop of 10 or 12 turns, shunted by a variable condenser, the loop to be placed as near as possible to the wire connecting the aerial to the ground.

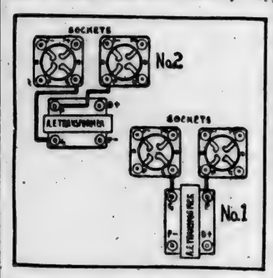
Using an ordinary three-circuit tuner and a WD-11 tube, a correspondent writes, I regularly receive 1,000 miles through static that would make reception impossible otherwise, and also cut out code interference practically entirely. The method is equally efficient with a two-circuit set, the only requisite being that the loop be not more than 2 or 3 feet from the ground wire. A plaster wall separating them seems to make no difference however.—Radio Digest.

Find Short Leads Will Work Better

Parallel Wires Should Be Avoided in Hooking Up Receiver.

There is a right and a wrong way to do everything. This is particularly applicable to radio. Most trouble encountered in a receiver can be traced directly or indirectly to the method of construction. The most difficult feature of this is the wiring. Every set has what is termed "an invisible circuit."

This is the flow of energy that is created between two wires carrying different frequencies when they are too close to one another. Particularly is this so when they are parallel. From this it would seem that the only way



Mount Transformers and Sockets to Obtain Shortest Leads.

to avoid this is to run all wires at angles to one another. This cannot be done when the set is wired up with square corners. The best and most efficient way to wire a set is to make connections directly from terminal to terminal in the shortest possible manner.

This not only prevents parallel wires but it also reduces the resistance of the set as a whole, further increasing its efficiency. For this a flexible wire of several strands and about 16-gauge may be used. It should be insulated. Figure 1 shows a connection made directly from terminal to terminal and Figure 2 shows the same connection made with square corners. Note the difference.

Squeaks and Squeals and How to Stop Them

W-h-e-e-e-e! Also S-q-u-a-a-w-k! This is about how the noises that sometimes come out of the loud speaker or earphones ought to look on paper. But it is difficult to give an adequate description on paper of their astounding diversity and their excruciating effect when some particularly fine music is coming in.

Most squeaks and squeals can be removed. Here are some of the sources and remedies:

1. Neighboring installations. Oscillating receivers in the vicinity of a set will cause noises. This is the hardest sort of interference to overcome, but it can be done to some extent by the use of a blocking tube circuit, and a loop antenna.

2. Faulty connections. All connections should be electrically correct.

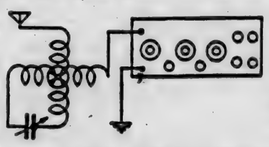
3. Internal oscillations. These may be caused by the position of audio frequency transformers with respect to each other; by failure to ground proper transformer terminals; or by having grid and plate leads too close, or parallel to each other.

4. Defective tubes. Only standard tubes should be used, and they should not be injured by burning too brightly.

5. Battery trouble. When the storage battery gets too low, the set will go into and out of oscillation at various points on the dial, producing howls and distorted reception. The moral here is, keep the battery charged, and this involves the use of a good charger.

Split Variometer Used in Wave-Trap Circuit

It has been found that one of the best wave traps may be made with the use of a split variometer. The illustration shows how the variometer was used in connection with a 11-plate variable condenser placed between the rotor and stator coils. The aerial is



Variable Condenser Placed Between Rotor and Stator Coils.

attached to one end of the stator coil and the wire leading to the set is attached to the open end of the rotor coil.—Radio Digest.

Things to Know About Operation of Chargers

The instruction sheets which accompany many types of chargers for use on storage A and B batteries direct that the battery be disconnected from the receiving set while the charger is in use. This is because there is a chance that a short-circuit may occur through the grounded circuits of the receiver. The antenna circuit is, of course, insulated from the ground and if you connect a .5 mfd. condenser in series with the ground lead, your whole set will be insulated so that you will not have to disconnect the batteries while you are charging them. The condenser will not affect your reception.

INDIANA NEWS

South Bend.—"The conquest of the American continent challenges human imagination and incidentally proves that facts are sometimes stranger than fiction," said Richard Lieber, director of the department of conservation of Indiana, in an address before several hundred members of the Progress club at the Knights of Pythias auditorium. "But the change from an unbroken wilderness into modern conditions is destroying much of the beauty of the woods and the purity of the waters and has encroached seriously on wild life."

South Bend.—Rev. W. Culp, who disappeared from his home here a few days ago, at the same time his brother's wife, Mrs. Dorothy Culp of Nappanee, disappeared from her home, has returned to South Bend and is again at the domicile in River Park with his wife and ten children grouped around him. Culp returned to South Bend alone and went directly to the home he had deserted. He was alone and it is presumed that Mrs. Dorothy Culp has returned to her home at Nappanee.

Shelbyville.—Richard Walters, age forty-three, owner and operator of a garage at Morristown, Shelby county, was shot and killed it is alleged by C. S. Mercer, editor and manager of the Morristown Sun, a weekly newspaper, which he published at Morristown. Mercer was arrested. The shooting was the result of an article published by Mercer in the Morristown Sun, and which concerned Walters. Mr. Mercer formerly edited the Seymour Democrat.

Shelbyville.—Business today is ordinary business in which there is a profitable future for the merchant who is willing to apply modern business methods of cost accounting, buy for rapid turnover, display and advertise his goods so as to overcome the appeal of house-to-house canvassers and through all apply his personality, said speakers on the first spring courtesy trip of the wholesale trade division of the Indianapolis Chamber of Commerce.

Vincennes.—Bishop Frederick D. Leete, of the Indianapolis area of the Methodist Episcopal church, held at the Grand hotel a conference with Dr. George P. Murphy, Dr. C. L. Peterson, Dr. M. H. Lohr, and Rev. L. L. McKown relative to the situation of the church in the devastated district of southern Indiana and southern Illinois. Bishop Leete plans to go into the devastated district personally to get information first hand.

Greensburg.—Riggs Boyd and W. M. Hobbs, of this city, and D. C. Patterson, of Indianapolis, bridge carpenters for the Big Four railway, were seriously injured here when a motor car on which they were riding was derailed.

Indianapolis.—The Indiana Methodist hospitals' advance, a movement to pledge $1,500,000 for the four Methodist hospitals at Indianapolis, Fort Wayne, Gary and Princeton, was started when 17 "armies" of workers began solicitation over the state.

Huntington.—Mrs. Archangel Engleman, eighty-one, last "princess" of the once powerful tribe of Miami Indians that lived in the forks of the Little and Wabash rivers, is dead at her home here following a long illness with heart trouble.

Bloomington.—Glenn Campbell, twenty-one years old, a clerk at the Austin Robinson general store at Dolan, six miles north of here, died at the Bloomington hospital as a result of a gunshot wound inflicted by a burglar in the store.

Shelbyville.—Mrs. R. C. Hodges, was painfully burned on the back and arms when her clothing caught fire from a gas stove near which she was working. Mrs. Hodges rolled herself in several heavy rugs and put out the fire.

Muncie.—John Reyburn, age forty, a farmer, of Shideler, was severely injured when the automobile in which he and two women companions were riding was struck by an Indiana Union Traction company car.

Indianapolis.—Asa B. Clark, B. W. Taylor and Artie Haskett, Logansport, were severely scalded when the boiler of a Pennsylvania railroad freight train engine exploded while the train was passing through Ben Davis.

Kentland.—Archie Patanude and his wife were killed near here when the automobile in which they were going to the funeral of a relative in Illinois was struck by a New York Central freight train at a grade crossing.

Warsaw.—Chester Stewart was fined $80 and Charles Wiltshirt was assessed $15 when both pleaded guilty to charges of violating the liquor laws. Liquor was found in their automobile by policemen.

Peru.—Suit for $457,000 damages has been filed against the Nickel Plate Railroad company in the Miami Circuit court here by the Peru Canning company, and 28 fire insurance companies, as a result of a fire that destroyed the cannery buildings last November. It is charged that the fire was caused by employees of the railroad company burning grass.

Greenwood.—The seventy-fifth anniversary of the organization of the First Methodist Episcopal church in Greenwood was observed with special services

WARNS MOTORISTS AGAINST SPEEDING

Brazil.—"My department did not make the new automobile law, but it is our duty to enforce it, so we warn you to limit your speed on country roads to 35 miles an hour," said Frederick Schortemeier, secretary of state, before the Brazil Civic club.

Mr. Schortemeier cited a dozen laws passed by the legislature that should benefit business, chief among which are the new blue sky law and the garnishee law. He said the legislature also did well failing to approve the proposed child labor amendment as it was written and by failing to raise the mortgage exemption law, but slipped a little by failing to pass the bad check law.

He said that all applications to sell securities in Indiana will be examined critically before permission is given, and that the men behind such sales must have good reputations for their business undertakings.

Indianapolis.—The state purchasing committee, which in conjunction with the state purchasing agent, has charge of buying supplies for all state institutions, was reorganized and increased from five to seven members at a meeting of the general state purchasing committee in the statehouse. The general committee consists of a representative from each of the 21 state institutions. Daily McCoy, recently chosen secretary of the committee, ordinarily called purchasing agent, was an active figure at the meeting. The new committee to have charge of the purchases consists of Moses Epstein, John Moorman, Robert Neff, Mrs. Frances Beadle, Dr. W. C. Van Nuys, Roy Howard, and James G. Jackson, brother of Governor Jackson.

Indianapolis.—Pleas of not guilty were entered in the criminal court by five of the six men indicted on charges of grand larceny and embezzlement in connection with the disposal of surplus war materials received by the state highway commission from the federal government. John D. Williams, director of the highway department, and Earl Crawford, a member of the highway commission, pleaded not guilty. Moses and Vic Goldberg, to whom, it is alleged, some of the surplus materials were sold, pleaded not guilty. C. William Whaley, to whom it was alleged machinery was sold, pleaded not guilty.

Michigan City.—Recognition of a young lifetime's devotion to charitable enterprises was granted Mrs. Howard H. Spaulding, heiress to the millions of her father, the late John H. Baker of the Haskell & Baker Car company, when she became the first woman in America to receive the military order of the Holy Sepulchre, one of the highest honors of the Catholic church. The historic honor also was accorded Edward J. Fogarty, warden of the Indiana state prison, and T. C. Mullen, Michigan City attorney.

Seymour.—Six persons were injured, two of them seriously, when an automobile in which they were riding turned over at the foot of a hill near Kossuth. Those injured are: Miss Avenell Galter, age fourteen, of Brownstown; John Barker, of Smedley, Washington county; Miss Jewell Cornett, age fourteen; Ralph Meyers, age seventeen, of Campbellsburg; Miss Minnie Cornet, age eighteen, and Miss Mabel Hatton, age seventeen.

Columbus.—Lee R. Walker, who, at a meeting of the city council was reduced from chief of police to night patrolman, filed with the city clerk a declaration of his candidacy for mayor of Columbus on the Democratic ticket. Mr. Walker was ousted after the council had held several sessions, during which it heard charges of neglect of duty filed against him by five members of the night police force.

Peru.—Marion Woodward, forty years old, of Peru is at liberty under $2,000 bond following his arrest on a charge of manslaughter as a result of the death of Whitfield Bailey, thirty-six years old, from injuries sustained when an automobile in which he was riding was struck by a large car driven by Woodward.

Wabash.—Mrs. W. A. Werner died at her home in Kentland on the same day funeral services were held for her son, Wilbur, twenty-nine, who was accidentally killed at Treaty, near here, while on his way to visit his mother. His automobile was struck by a traction car.

Nashville.—During a forest fire in the western part of Brown county, the house owned and occupied by E. W. Tomlin, formerly of Indianapolis, was destroyed. The loss is estimated at $1,200.

Columbus.—Mr. and Mrs. Ivan Eickleberry celebrated the fiftieth anniversary of their wedding at the home in East Columbus by giving a 12 o'clock dinner for a large group of relatives.

Wabash.—It cost .008 cent each for the dispatching of 15,000 rats, killed in the rodent extermination contest conducted in Wabash county, under the direction of the Wabash Chamber of Commerce. The total cost of the drive was $188.23.

Fort Wayne.—Frank E. Smith, forty-seven, ended his life by hanging himself at the factory where he was employed.

Marion.—Miss Audrey Ione Morris, age twenty-two, committed suicide by swallowing poison. Ill health is given as the cause for the act.

The Greatest Body Builder

FATHER JOHN'S MEDICINE All Pure Food

OVER 69 YEARS OF SUCCESS

Pimples

BLOOD impurities are pumped by the heart into the face. That is what causes that grainy appearance, that muddiness, sallowness, pimples, blackheads, acne, red spots, and that impossible "something" which no face cream, massage, or face powder can cover up or beautify! The foundation for a beautiful skin simply is not there, and no face treatment can give it to you. But increase your red-blood-cells, — and quickly the ruby tint of purity begins to glow in the cheeks, the complexion becomes Venus-like and immaculate! Try it.

Free Booklet
Send name and address to S. S. S. Co., 111 S. S. S. Bldg., Atlanta, Ga., for special booklet on the Blood.

It will do it every time. S. S. S. builds the red-blood-cells you need for a beautiful complexion. Begin using S. S. S. at once, and give yourself what you have been working for, for years.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

McLain, 188 Wisconsin St. Liquid or tablets at your dealers, or send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. Write for free advice.

Physique Value

When Frank A. Vanderlip was presiding over the largest financial institution America has ever known, the National City bank of New York, he said:

"In picking a man for a highly responsible executive position, I always take into account both his physical condition and his physique. Unless he has built up a strong, healthy body, I don't want him, because during the terrible stress and strain of a great crisis, when you need his services most, he is likely to cave in."—Hearst's International-Cosmopolitan.

Rice Griddle Cakes

2 eggs, well beaten
½ to 1 cup sweet milk
2 level teaspoons Calumet Baking Powder
2 tablespoons sugar
1 cup well cooked rice
¼ teaspoon salt

Mix ingredients thoroughly, adding enough flour to make a medium batter. Bake the same as any griddle cakes.

Biblical Anniversary

The four hundredth anniversary of the publication of Tyndale's translation of the New Testament into English occurs this year. The first edition was brought out in 1525 at Worms, Germany, whither he had fled.

No ugly, grimy streaks on the clothes when Red Cross Ball Blue is used. Good bluing gets good results. All grocers carry it.—Advertisement.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

BIRDS MAKE GOOD AS SHEEP HERDERS

Two sheep herders that have only two legs and can fly are proving their value so effectively to August Boeller, owner of a large ranch near Hosum, Wash., that he is thinking of getting rid of all his collies.

The new guardians of the flocks are South American birds called yukamiks. A relative shipped two of the birds to Boeller last summer from Venezuela and now they have matured they are inseparable from the sheep. They are a sort of crane, long domesticated, and, dog-like, show faithfulness and intelligence.

They will attack, mercilessly, eagles, coyotes and foxes, beating them off with their powerful wings. They disdain dogs and have kept collies on the ranch in terror for weeks.

Positive Proof That Baby Was No Bargain

Otis A. Marshall, 2103 East Riverside parkway, several days ago related to a number of his friends how his niece, Mary Jean, age five, exploded a "bomb shell" in the midst of the family group one evening some time ago when a neighbor was calling.

Mary Jean, with childish curiosity, asked the neighbor why she was so fond of the dollar bargain sales she spoke of so frequently. Not wishing to discuss "dollar sales" to any great length the neighbor replied that "there were some wonderful things obtainable on $1 bargain counters."

Not to be discouraged the child asked what could be obtained.

"Why, honey, your mother got you at a dollar sale," the neighbor said.

"Oh, no, she did not," Mary Jean replied. "My mother got me on Sunday and all the stores were closed."—Indianapolis News.

Army and Navy Cadets

The graduates of the United States Military academy at West Point and the United States Naval academy at Annapolis make an agreement upon entering the academies that they will serve a period of eight years, four years of which is the schooling at the academies and four years' service upon graduation. However, in special circumstances resignations are accepted before the termination of this period.

Moisture in Trees

The forest products laboratory says that the moisture in different green trees or in different parts of the tree may vary considerably, but as a general average, 40 to 50 per cent of the weight of the wood in the tree may be water. The rest of the wood, that is, the wood fiber itself, will commonly contain about 50 per cent carbon, so that of the original wood 50 per cent is water, 25 per cent is carbon and the other 25 per cent of the tree consists mostly of hydrogen and oxygen in chemical combinations with the carbon.

Charity Box

In every home there should be a drawer or box where worn clothing, discarded toys, outgrown shoes, clothes, etc., are placed. Then when a call comes for help from some charitable institution there is not a frantic search for something to give away. The plan also permits keeping your own belongings away from unused articles.

Prefer Imported Leather

To promote the wearing of home-produced leather, leather traders of Great Britain introduced an "all-British" boot, but retailers have refused to co-operate because they claim that wearers prefer footwear from other countries.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

The Letter of Application

MOST of us before we die must present ourselves, in one way or another, as an applicant for a favor, or for a job. Such application is most wisely done in person, but this is not always possible. If it is done in writing, as it must frequently be done, it should be done well.

Years ago, when I was the head of an important department, I received an application for a position from a young fellow just graduating from a well-known college in New England. It was in some ways the best letter of the sort that I had ever received. It told the conventional things that one is supposed to tell in such a letter—age, training, experience—but it told much more than this. It gave me a very clear light insight into the young man's character, his temperament, his pleasures, his recreations, and his ambitions. When I had read it through, I felt that I knew him personally, and that he was just the sort of man who would fit into the place for which he was applying.

As circumstances later developed, it was not possible for him to take the position, but his letter interested me so much that I have ever since followed his career. He has gone steadily forward in his profession, he has proved himself just what his letter, written twenty years ago, indicated he would do, and he is today known all over the country as one of the leading men in the profession into which he went. It is interesting to see that he was able so clearly to indicate his strength, and character, and possibilities, in the letter which he wrote so long ago.

It is not easy to blow one's own horn mellifluously, fairly to estimate one's own strong points without prejudice or exaggeration. A young man came to me not long ago to ask me to write him a letter of recommendation.

"If you will carefully and truthfully estimate your own qualifications for the position for which you are applying," I said to him, "if you will write out the things that you feel can, and should be said about you in such a letter as you ask me to write, I shall be glad to sign it."

He went away with enthusiasm, but he came back the next morning somewhat depressed.

"I can't think of much to say," he said, "that is true and that is greatly to my credit."

It is just such a task, however, as I set the young man, that one has to accomplish who writes a letter of application. He is to ask for the position—that is very simple—but in addition to that, he is so to present himself as to seem to possess some special qualifications, and fitness for filling that position. What should a man say when making application for any special position, or job?

He should first study the position itself, and try intelligently to understand what is necessary to do well the work involved. If he has had any previous experience in the same sort of work, and has proved himself capable, this will not be difficult; if he is without experience, then his task is greater. Having determined what the necessary qualifications are, he should study himself to determine how fully he meets the requirements which he has decided are necessary.

Your experience, your education, your personal history, most people who consider employing you, would like to know. Where you have been, what you have done during your vacations while you were in school or college, if you have had such an experience, should be told, and the names and addresses of the people for whom you have worked, are good things to include.

Frankness is an excellent quality to be revealed in such a letter, a frankness that does not hesitate to admit a lack of certain qualifications and a willingness to be taught what is lacking.

"I have never had any experience in selling the particular product which you manufacture, nor do I yet know its selling points," a young fellow says who is applying for a position as salesman for a certain firm, "but I have had five years of experience in the selling game, and I am pretty sure that human nature is not different, whether one is trying to sell tractors or fountain pens."

A young fellow starting into a new position, is too often concerned with what he is going to receive, rather than with what he is to give. It is well to remember that opportunity to show his ability, and to prove his worth is, usually, of more value to a young fellow, than his initial salary. Few people starting into any business, ever earn their salaries, and fewer still who have been at it a long time, ever get half of what they earn. Be satisfied at first to have a chance to show what you can do, even if you are paid little for it.

The new law, which when it goes into effect, will forbid anybody in Indiana carrying firearms without first obtaining a permit from the clerks of courts, ought to serve in reducing serious crime. Bandits will scarcely hold up anybody without possessing the ever-ready gun. The law provides that persons armed when committing a crime will be liable to additional punishment of imprisonment of from one to five years. For the second offense, the judge may double the penalty and for the third offense triple it to a maximum of fifteen years. Pistol toting in Indiana will become a dangerous pastime when this law becomes effective with the promulgation of the 1925 acts by Governor Jackson.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY APRIL, 30 1925 | NO. 18

To Observe Childrens Week Program

The Sunday Schools of Concord township are co-operating with the County Association through the leadership of Mrs. Cora Price, township superintendent of Children's Division, in putting on the Children's Week program, commencing Sunday, May 3rd.

On Sunday May 3rd. each Sunday School is asked to have an opening program by the children.

On each day of the week, children from 4 to 12 years of age inclusive are asked to come to the Lutheran church at 2 o'clock. For an hour they will engage in singing and story tellling.

May 4—Mrs. C. H. Havens and Mrs E. R Kinsey will have charge of the children.

May 5—Mrs. Henry Culbertson and Mrs. Fred Elson.

May 6—Mrs. Agnes Monroe and Mrs. Floyd Ridgway.

May 7—Mrs. Lester Pugsley and Mrs. Craig Sheffer.

May 8—Mrs. Roy Keller and Mrs. F. M. Thornton.

May 9—Mrs Ernest Johnson and Mrs. C. C. Woodcox.

Thursday evening the children are asked to go either to the M P or Lutheran church where the pastors will conduct an hour's service beginning at 7:30

On Sunday, May 10, each church is asked to conduct the closing the week in an appropriate way.

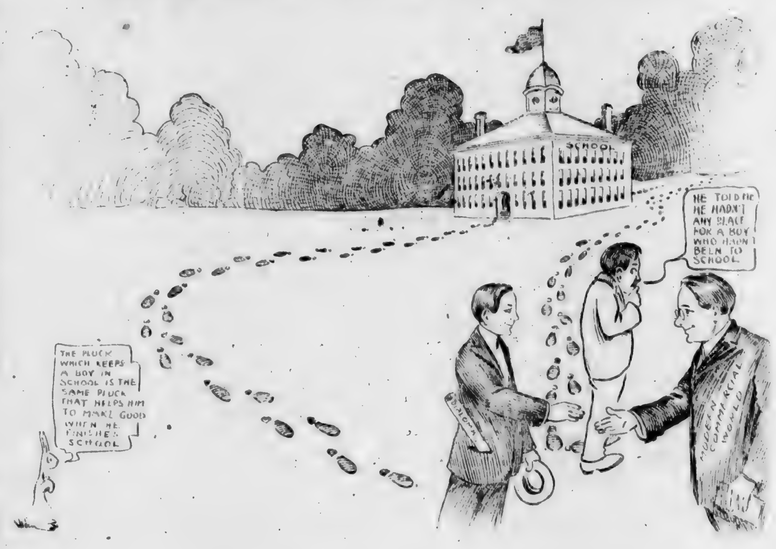
The purpose of this program is the emphasizing of the religious nurture of childhood.

In planning the program for Concord township, emphasis must be placed upon a community observance and the carrying back into the local school the interest of children in the service in order to bring about in the churches and the community a more wholesome environment for religious nurture and a strong program for the religious nurture of childhood.

The purpose of the Story Hour at the afternoon meetings is to carry to the boys and girls the types of stories that boys and girls should have for development. Adults and young people and teachers of children are invited to sit in the back of the room and note the type of stories and the telling of the stories. Emphasis is placed upon this so that boys and girls may receive even in their homes the type of stories essential to their developement.

Parents are asked to give their support to the local workers in the efforts to make the week's program a real success.

What the Completion of a High School Education Means to the Young Person of Today.



Speed up when approaching a corner, then ten feet from it, apply your brakes. This will show you how they are working.

Never let the Marshal win an argument with you. Talk right up to him.

Never dim your headlights. If people didn't like bright lights they wouldn't put street lamps on Main street.

Never blow your horn when approaching a corner There might be no one coming and your effort would be in vain.

Try to run over Dan McCann when ever you see him. One man tried it—Why not you?

If the man ahead of you don't start up fast enough, give him a bump. He'll tell you how he appreciates it.

Never let a big truck crowd you off the street. Get out and dare the truck driver down.

Fish Meeting Is Called Off

Because of the Senior class play being held Friday night, the Fish and Game Club have postponed their meeting as announced last week. Members please notice and inform others.

Persons wanting ice delivered regularly make arrangements at St. Joe Meat Market.

Earl Coburn moved his family from the Frank Hart residence into the Perry home in Hamburg.

No Milk Is Too Good For The Baby

Infants demand strength-giving food in a form which is best suited to their delicate systems. Milk—pure milk—answers this need.

Koeppe Bros milk is pure milk from tested cows, kept in sanitary surroundings. It is aerated and bottled and delivered to the patrons in the best of condition.

We now have a St. Joe phone and persons wanting CREAM can have it, if they will call day before they are needing it. No. 9015.

The St. JOE ELEVATOR

Samuel Keesler, Mgr. Grain Dept.
Bert Jackson, Mgr. Coal Dept.

NOTE—Pay your accounts. They are due now.

Observe, Remember and Compare

These three characteristics form the basis of education and scientific development.

You have to do the observing yourself, yet a person trained in observation can see far more than one untrained. You have to do your own remembering, yet the memory can be cultivated and be assisted by well kept records and account books, so that it becomes much more effective. The comparing becomes much more valuable to you if you compare not only the things you yourself have seen, but the experiences of many other people as well.

In a business way these comparisons may best be made here at the bank where we have constantly before us the experience of any number of people working under all kinds of circumstances If you depend only on your personal observations for the advancement of your business experience, progress must be slow, but if you will come to the bank and let us help you make use of the experience of others and compare your observations with theirs, your advancement may be far more rapid and your success assured.

The St. Joe Valley Bank, A STATE BANK

Keith Yeiser Unconscious From Fall

Wilbur Yeiser was called to South Whitley early Wednesday morning on account of the serious injuries received by his brother, Keith, who fell from the roof of a building to a cement walk below, late Tuesday afternoon, receiving injuries to his head, a broken jaw and a dislocated shoulder. The message received here at 5:15 Wednesday morning stated that he was still in an unconscious condition and had been bleeding at the mouth all night.

Two Business Deals Closed Monday

St. Joe will have a new business enterprise and one that really has a place in the business life of our little town. Chas. Cochran has purchased the brick building of S S. Widney and will operate a Home Bakery. The change will take place this week and the room will be arranged for occupancy.

Mr. Widney will again take up his residence in a portion of The News office where he conducted his business for so many years.

J. P. Buckingham is erecting a 16x18 garage on the rear of his lot.

New Traffic Laws To Be Enforced

"We are going to be reasonable, but firm," commented J. D. Thacker of LaGrange, state highway officer, in discussing his department's attitude toward the new traffic laws.

Special attention was called by Mr. Thacker to the section of the law pertaining to the age limit. It provides that no person under the age of seventeen years can drive a motor vehicle, even when with their parents or other older persons, excepting that a boy or girl of sixteen can drive providing a special permit is secured from the secretary of state. Such permits will be issued only in case it is necessary for a person of such age to drive a car.

The new speed limit is thirty-five miles an hour in the country, twenty-five miles in the residence districts and fifteen miles in the business districts. The new law provides that headlights must not be more than 21 candle power and that they must be dimmed in meeting other cars. No colored lights will be permitted in front. The minimum penalty for driving with only one headlight is a fine of $25. Tail lights are necessary and must be kept burning when a car is parked on any street or highway. No cut-outs are permitted in either town or country.

Many arrests have already been made and it is anticipated there will be many more before the public becomes accustomed to the new and stricter laws.

Automobile arm signals are the feature of the revised automobile control law passed by the recent Indiana general assembly March 14. The drivers' signals are defined as follows: Extend the left arm in a horizontal position to indicate a left turn; extend the left arm with the forearm raised perpendicularly to indicate a right turn; extend the left arm horizontal and move it up and down to indicate a stop or slow-down; extend the left arm in a horizontal position to indicate intention to back out or head out from a curb. This act carries an emergency clause and is now a law.

Violation of the drivers' signals is regarded as a felony and is punishable bp revocation of license or a fine and imprisonment.

In connection with the above general regulations for driving your auto there are a few additional simple rules that if followed when driving your car around St. Joe, old age won't bother you

When you hear the fire bell drive in the middle of the street, the view is better.

Fresh, CLEAN Meats

Awaits you at our market at all times. You will find the juiciest cuts and the tenderest pieces here. We also handle Smoked and Dried Meats, Cheese and Oleo. Come in and see us.

"HELP US BOTH!"

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a cannibal. Croft rescues her. Croft discovers a party of blacks, evidently reconnoitering. Croft fixes up an electrical guard which scares off an attacking party. Secure from immediate danger, Croft and Barbara settle down to make the best of things. Croft already has recognized the charm of the girl and fears the outcome of their situation. Croft, who has traveled much among savages, makes friends with the blacks.

PART TWO—Continued.

—8—

"They would have you to cultivate again the taro plant, which now is as a weed; weave much tapestry for your huts from the reeds; dry the sliced kernels of the cocount; cultivate the cotton seed. Then, perchance, when we remove to other lands, we shall send great ships hither with wondrous gifts in return for the fruits of your toil" Further shouts arose. "The gods would have us to visit freely your habitations and show you how to prevent the pestilences which devour your numbers."

This program was vociferously acclaimed; but Croft's experience of natives was too wide to allow of reliance upon their momentary enthusiasm. Flashing a stern glance around, he awed them into silence.

"If all this is done peacefully," he continued, in threatening tones, "ye shall rest in safety. But if again your hands are lifted against us, your bodies shall be burned afresh with blue fire-devils! Your women shall be slain; your little ones thrown to the sharks! The wrath of your god will I bring down!" waving his hand threateningly skyward, "and turn you into tortured slaves, if ever again ye molest the great white chief or his wife!"

Fear overawed the natives' enthusiasm. They fell on their faces again, babbling incoherently of obedience and mercy. He motioned them to rise; then he drew back, satisfied. He had established comparative safety for them both, for the time being at all events, and explained the scene to Barbara, exultantly.

This introduction over, Chimabahol now informed his guest of his privilege in choosing the great sacrifice to be offered up at the close of the feast. Should the great white chief decide upon human sacrifice— The old man waved toward the crowd of faces, watching in tense apprehension: "All are here, O Mighty Chief."

Upon this arose a chorus of dissentient cries, mixed with shouts of "Meamaa! Meamaa!" The natives pressed forward in eager anxiety.

Chimabahol glanced up quickly.

"Where is Meamaa? I see her not. Where is Roowa, her husband? And Lualo, her son?"

A little black figure was thrust roughly forward. He glanced round, fearfully, uncertain whether to cry or prove the manhood of his five years. Deciding upon the former course, his eyes, in the act of screwing up, encountered those of the white girl watching him curiously; and he paused, gazing at her, his mouth open. She smiled. A wondering grin slowly overspread his small impish face, and he moved nearer, looking up at her with childish adoration.

For the first time Barbara felt the humanity behind the repulsive exterior of these folk. She held out her free hand. The little fellow came shyly toward it, but some one roughly pulled him back; and she remembered, with some amusement, that she was tabu!

Accompanied by much muttering and scuffling, a man whose face was distinctly more intelligent than that of many of his fellows, slowly advanced. Croft watched him closely.

"Roowa!" cried Chimabahol, "where are Meamaa and thy babe, that they obeyed not the command to greet the great white chief?"

Many eager voices broke in, before he could reply.

"The babe is sick, O Chief!"

"The scourge, O Chief! It is again in the house of Roowa! Let the great white chief save us from the scourge, at the Sacrifice of the Full Moon tonight—"

Roowa uttered a great cry, and fell on his knees before Croft, eyes wild, arms outstretched, babbling protestations and pitiful supplications.

The white man fully realised the craftiness of these fellows, also the delicacy of his own position, with the necessity of causing no offense in this first action as overlord. His face set in its most determined, impenetrable lines; his eyes flashed round on all present, inspiring fear in the hearts of those upon whom they occasionally rested. Recognizing at last the man he sought, he motioned him forward.

Larger than most, more brutal of countenance, Barbara quickly recognized her late pursuer.

"What is he called?" Croft demanded of Chimabahol.

"Babooma, O Greatest of Chiefs!"

The two men regarded each other silently; and in the look of the native Croft recognized hatred and defiance, in spite of the fear lurking in the bold eyes which met his own.

A dull murmur arose, in which his ear was quick to note hostility. The old chief's face was full of anxiety as he stepped forward, pulling his beard nervously.

"Few have so straight an aim as Babooma, Great Chief. He is of kin to my house. He will become chief in my stead. Myny," he added in a low voice, "would have him now; for I am old and my heart is dead with my sons."

"He hath not found favor in my sight," replied the gods' messenger curtly, frowning upon the wretch, whose expression of defiance was rapidly fading. "He hath raised his eyes and his hand to the white chief's wife!" he thundered, glaring ferociously at the now trembling figure.

Like a sudden breeze rippling over a group of poplars, a breath of fear swept across the listening crowd. Babooma began a stream of gabbling protest; he was unaware of the sinfulness of his action; he had not seen the great chief nor heard of his mission from the gods; it was the Vow. . . .

Croft waved him away.

"Thou knowest now. Take heed, over-bold one!" Then he turned to Roowa, still on his knees in despair.

"Roowa," he asked, "thou lovest thy little ones?"

"A-aa! As myself, Mighty Chief!"

The look in his eyes touched Barbara. It was another glimpse into a human soul, although as yet she understood nothing of his trouble.

"It is well. Take heart, Roowa! My will is not to offer up thy sick babe; but to go with thee now to thy hut, and, perchance, cure the child."

The joy which transfigured the native's face was indescribable. Upon the dismissal of the tribe, he led the visitors to his hut, incoherent in his excitement. As Croft had guessed, the child only suffered from fever, needing more air and cleanliness—the filth and stench being abominable. Ordering those necessities, he produced from his pockets one of his fever antidotes, Meamaa watching him in terrified bewilderment; then he precipitately pushed Barbara out into the fresh air again.

The feast, to which they were now led, was spread upon the ground in an open space between the huts and the lagoon. Only the men squatted round to eat, the women—occupying a lower position—waited upon them, with the pleasant expectation of finishing their leavings.

At the end of the feast the pair became aware that all eyes were fastened on them. The sun had set. The sacrifice must be decided upon. An air of anxiety, of strained expectation, was manifest.

Croft's wits had not been slumbering. "Our gods have told me," he informed Chimabahol confidentially, "that thy god, Balhuaka, doth not hunger for the flesh of man this moon; neither doth he desire fish or bird to be offered unto him. He desireth to taste the dishes thou hast prepared for those who have sailed here from the skies. All that we have left uneaten shalt thou collect, therefore, and offer unto him. It is food tabu to those sent by the gods; therefore doth he require it beyond all other food."

This distinct greediness seemed more in character with a peevish child than a celestial being; but to Chimabahol it appeared natural enough. He communicated the decision to the tribe, which showed vociferously its unmistakable relief.

The ambrosial remains were therefore gathered together and placed in receptacles of plaited reeds. Lighted reed torches were produced for everybody, and the procession set forth, headed by the old chief and the white visitors. Turning westward through the council chamber, they bore a little inland to the sacred palm grove.

Within a few moments the torches had formed two waving lines of light, as the natives divided upon either side of the central path. The bearers of the sacrifice advanced up the center and laid it upon the unlighted bonfire; the musicians squatted on the ground near the altar, beginning again their uncanny music.

The preliminary rites ceased, and Chimabahol turned to Croft.

"Thou, O Great White Chief, shalt make the flames arise, straight and high! Thus shall we know that our sacrifice is accepted by our god."

The great white chief inclined his head. Stepping forward with the assurance of one used to guiding sacrificial flames from childhood, he advanced to the altar, Barbara watching him in astonishment. There he paused for a solemn moment—whether to give the effect of reverence, or to grasp some elusive memory, or from sheer joy in the situation, she could not tell. . . . Slowly, at last, he raised his arms, waving the flaring torch high above his head. Then he embarked upon a short display of physical drill, as if invoking the spirits of an unseen host. It impressed the natives into awestruck silence, while filling the girl with an almost irrepressible desire to laugh. After this performance, he bent slowly down and held his torch to the heap of dry sticks and leaves. Immediately the fire caught on, crackling and fizzling, sending up leaping yellow flames and thick curling smoke into the somber vault above.

This instant and splendid conflagration was a sign of the offering being acceptable to Balhuaka. Another burst of excited incantation broke from the assembly, the musicians once more blowing upon their reeds and shells. The torches flared, the bonfire bellied forth thick gusts of flame and smoke, its roar mingling with the music and wild singing.

At last the flames reached the sacrifice and the air was filled with the smell of burning food.

A great shout went up. The god was even now eating of their offering! Health and prosperity would be theirs for at least the duration of this moon! The music abruptly ceased; the dancers sank breathless to the ground; an awed hush fell upon the gathering.

When the fire had died down to a glowing heap of red embers, the silence broke stormily in an outburst of joyous hilarity. The procession started back to the settlement, the riotous merriment continuing all the way, the waving torches making the moon seem pale by contrast.

At a small hut on the outskirts Chimabahol paused, intimating that it was the best they could offer and would in future be tabu to the great white chief. Then the revelers dispersed, the torches flickering like miniature fires among the neighboring huts. The man and the girl were left alone.

The barbaric excitement still tingled in their veins and shone in their eyes, when, for a moment, they looked

"We—We—Can't Stay—Here!"

at each other. Instinctively Barbara caught her breath, putting her hand to her throat, as if to wrestle with something choking her; her torch fell to the ground.

"We-we—can't stay—here!" she muttered, half to herself.

She felt his hand upon her arm; the touch sent a wild tremor through her entire frame. It was as if in her wrought-up state, an electric wire had touched her, imparting strange currents which, with waves of magnetism, dragged her close within their field, while simultaneously repelling her with an unknown fear. Feebly she resisted, but his grip tightened, pulling her across the threshold.

"The natives are watching!" he muttered in her ear.

His torch showed the interior to be small and bare, the sole contents being two rolls of reed-matting or "tapestry." Loosing her, he fixed the torch in the ground and took up one of these heaps.

"They roll themselves in this, to sleep," he said. "It will make a substitute for a door."

She mechanically helped him to fix it across the opening. Like revelers in a Continental carnival, the natives were too much excited to settle down for the night; the noise outside was still boisterous.

Alan, the same primitive tingling in his blood, talked rather wildly as he arranged the cover.

"We are savages now! Conventions don't count here. As you remarked, these may henceforth be our sole companions. And they regard you as my—wife—remember!" Finishing his job, he turned round, his eyes glittering in the dim light. "You must play up, too, for—for your own sake. . . . What is it, Barbara. . . . What's the matter? Why—do you look at me—like that?" He caught both her wrists.

"W-we—can't stay—here!" she muttered again, not moving in his grasp.

"But we—we've shared a hut before—all these weeks! Why are you afraid now? Tell me!" He bent over her. "Tell me, Barbara—"

"I can't . . . I don't know. . . I—I'm not—" Desperately she tried to withdraw her hands and eyes from his. She felt powerless, as if she were slipping down some precipice into roaring torrents which would engulf her, sweep her away from every known landmark. This was utterly different from that other night's fear. Then it had been fear of him, and tangible. Now it was subtle, terrifying, and—of herself, in some strange way.

He drew her suddenly closer; but with all the strength of her will, she flung herself back in his grasp.

"Don't—touch me! I don't—understand— Oh. . . Alan—help us both!"

The cry was one of desperation. It startled him. For a long moment he gazed deep within her darkened eyes, the blood mounting in his face, throbbing in his temples, his very lips trembling. Then, almost violently, but with a strange look of exultation, he let her go.

"I'll go and see if—if—all's safe outside," he stammered.

She heard him leave the hut; and she sank down in the far corner, trembling violently. . . . . She heard him enter later; and she buried her head in her arms.

He threw himself down across the threshold without a word.

From outside, the noise of the revelers still came to their ears, growing gradually fainter . . . and fainter . . . until, at last, silence fell.

VIII

After that memorable night, Barbara and Alan had walked back together early next morning, Alan for the most part silent, Barbara talking feverishly of the natives' feast, music, rites—anything to prevent awkward pauses. From that day another paradoxical phase opened before them. For, though they now had many surface interests in common to heighten their companionship, the wall between was yet more strengthened. And, this time, it was the girl who unconsciously built up the crumbling bricks with hasty fingers, not daring to look at that yawning precipice beyond.

From a pocket-book diary they were able to keep count of the days and nights which flitted by so rapidly now. The natives left them alone; save when, at Croft's command, they brought rolls of reed-matting, or swords, spears, implements. Only one as he knew well, still hid defiance under the cloak of subjection, biding his time.

Thus, for a while, all danger seemed past. Barbara, blissfully unconscious of any flaw in this pact of friendship, lost her fear of these childlike folk. Having proved the effect of a random shot from the revolver, she felt safe.

One evening, shortly before Christmas day, having prepared their supper she wandered down to the shore, waiting for Alan's arrival. Sitting idly upon a rock, she watched the spray and foam glistening in the sunshine against the distant reef, her thoughts occupied by a variety of small things, chief among them being a cottonless future? The constant mending of their combined wardrobe had drained her slender resources of thread. Pins had been resorted to that day. Alan sat on one and swore loudly; she smiled lingeringly over the recollection.

Her face sobered and she leaned forward, then rose quickly to her feet. Slowly moving through the clear water not far from the shore, appeared a large gray outline suggesting in its general shape an airship. Barbara drew in her breath quickly, watching the silent bulk glide slowly by until, making a large circuit, it disappeared in the direction of the reef.

It was, she guessed, a shark.

For the first time the remembrance dawned upon her of islands in the Pacific ocean being often shark-infested; the recollection brought, in a flash, full realization of the risks Alan took when he swam with her to land.

With another chaotic tumult of mind she remembered Alan's further risks when salving all necessities for their comfort, his stubborn refusal of her offers of help, his stringent commands against bathing in the lagoon. . . . She realized, too, his consideration in not mentioning this horrible danger to add to her dread of those which already menaced their lives.

A wave of gratitude—or admiration—swept over her, and she covered her face, hiding the hot involuntary blush, shutting out the sudden, unbearable glory of sky and sea. . . .

Presently, lowering her hands, she turned her glowing face inland. . . . With a gasp, she grew rigid.

A heavy cloud of smoke hung in dense plumes over the hilltop! Even as she looked, a long jagged flame leapt up . . . then another, and another. . . . The beacon was on fire! She gazed at it, fascinated. What did it mean? Rescue at last? The rescue for which they had looked, and longed and lived, all these weeks and months . . . Suddenly, like a heavy cloak, all the previous excitement and exultation fell from her.

A feeling as of a cold wind, full of vague foreboding, chilled her heart in that warm evening air.

Anyway, both man and woman now have the same thoughts and feelings. What next?

(TO BE CONTINUED.)

Remarkable Poem

A remarkable poem is "Cleon and I," by Charles Mackay, the Scotch poet and journalist. It is composed of four stanzas of four lines, each of which ends either in "I" or a rhyming syllable.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1925, Western Newspaper Union.)

DANGER OF POORLY FITTING GLASSES

THE danger of poorly-fitting spectacles does not lie entirely in the glasses. A pair of lenses in reading glasses which are not suited to the eyes may produce headache, nausea and sleeplessness, because of eye-strain. Even if they do not cause any discomfort, unless they are the right glasses for the eyes, they will fail to improve the sight and so will deprive the patient of the comfort and relief to which he is entitled and for which he has paid.

But even if the glasses are perfect, much harm can be done by ill-fitting frames. Spectacles worn constantly, as is usually the case with old people, or those with a serious eye defect, are apt to cause considerable irritation, and very likely will do so, unless they are made to fit the face and are so adjusted as to cause no friction or irritation of the skin. This is especially important in old persons, as the skin in old age becomes more sensitive and more apt to be permanently injured by pressure or scratching.

There are three points where spectacles, if not properly fitted, may cause trouble. These are the bridge of the nose, where the bridge of the spectacle frame rests, the ears, where the wires hook behind the ears. That spectacles cause irritation at these points is shown by the fact that we frequently see old people who have wrapped the bridge, the sides or the tips of their spectacles with tape, thread or strips of cloth in order to prevent rubbing.

Any rubbing or scratching of the skin, continued over a long period of time, will cause trouble, especially in old persons. Long-continued irritation, even mild, may cause the skin to become inflamed and finally produce an ulcer. These ulcers, in the old, are not only painful and very slow in healing, but they are also apt to become the seat of a skin cancer.

If your spectacles fit, they won't cause any trouble. If they don't, get some that do.

FASTING FOR HEALTH

FASTING, or the voluntary abstaining from food for a certain period or a certain number of days, is an old custom. Whether it originated through necessity or choice, it is usually found as a religious observance. It is practically universal.

Savage tribes have certain days on which food is taboo. The remains of ancient civilization, such as Assyria and Nineveh, Babylon and Egypt, show that fasting was a part of the religious life of these early peoples. The Jews fasted often, as the Old Testament shows. The early Christians considered fasting an important part of their religious duty. In the Middle Ages, fast days were frequently ordered by rulers or priests to prevent or check pestilence, wars, floods and other calamities.

Practically all the religious orders of monks and nuns required fasting as a part of their discipline. "Fasting, meditation and prayer" were the three duties which the young candidate for admission to any of these orders had to assume.

The observance of Lent, a forty-day period of self-denial by all good Christians, includes a partial fast in the form of a greatly reduced diet, with occasional days of complete fasting. Catholics observe Friday by abstaining from meat, which is merely a survival of the earlier custom of marking the day of Christ's death by a complete fast.

Fasting is common in all religions. Buddhists and Mohammedans fast oftener and more rigidly than Christians. On certain fast days, the pious Mohammedan will not only go without food and water but will not even swallow his own saliva, from sunrise to sunset.

The object of fasting as a religious observance is to purify the soul. But many men for many centuries have claimed that fasting was also a valuable method of curing disease, that going without food stimulated the body, increased its power of resistance and made it possible to cast off certain accumulated poisons. Whatever truth there may be in these ideas, it is probably true that, barring cases of extreme poverty and malnutrition, most of us eat too much and eat as a habit rather than from necessity. But the difficulty in proving anything on these questions is that most of our views are based on personal opinion rather than impartial evidence.

And now comes the cold, impersonal verdict of the scientific student. Two assistants of Dr. A. J. Carlson, professor of physiology at the University of Chicago, say that they have proved, by carefully conducted experiments, that during a reasonable period of fasting the body metabolism is increased and that the cells actually become younger and more active.

Maybe there is something after all in the age-old custom of fasting. Maybe it's just as good for the body as it is for the soul.

Wit and Humor

TOO CANDID

An elderly beau had been delivering himself of certain forcible home truths when lecturing his nephew.

"Wonderful chap, your uncle," observed a friend when the old gentleman had disappeared. "So well preserved."

"I don't know so much about his being well preserved," growled the offended nephew, "but he is unpleasantly candid."—Youth's Companion.

HIS HEART IN HIS HEAD

"He's a cold proposition—a regular cabbage!"

"How's that?"

"Got his heart in his head."

Accepting Terms

Never get discouraged,
Do not let your valor fade,
When you get a lemon,
Just make lemonade.

Just Complaint

Two men registered in a Buffalo hotel and asked for a double room. Not long after they reached the room one phoned to the front office.

"I thought you told us this was a double room," he said.

"It is," answered the room clerk. "Why, isn't the bed big enough?"

"The bed is all right," said the guest, "but where is the other Bible?"

SAME GIRL

Son—Dad, I want to marry Dottie Dimples, the chorus girl.

Dad—I wanted to marry her myself when I was your age!

For Cross-Examination

Investigations hold their sway—
Will some one send a letter
To call the man who used to say
We're daily growing better!

All But Halt

"My poor fellow," said the lady, "here is a quarter for you. Goodness, gracious, it must be dreadful to be lame, but just think how much worse it would be if you were blind."

"Yer right, lady," agreed the beggar, "when I was blind I was always getting counterfeit money."—Judge.

The Baker's Figures

A baker was accused of making 50 per cent profit.

"No," he expostulated; "I only make 1 per cent profit. See here; this costs me one cent! I sell it for two cents! That's 1 per cent profit, isn't it?"

Fortunately he is now able to make 2 per cent.—Kikeriki, Vienna.

Low-Down

An Iowa girl en route to visit friends in New York entered the city by the Hudson tunnel, then took the subway to their address.

"What do you think of the city?" they asked on her arrival.

"I couldn't say," she replied. "I've had only a worm's eye view."

Our Daily Bread

Little Frances had been struggling to learn the Lord's prayer, and her grandmother asked her how she was getting on.

"Pretty well, grandma," said she. "I can say down to the eating part already."—Everybody's Magazine.

First to Ask

He—Lina, am I the first man to ask you for a kiss?

She—Yes—the others took them without asking.—Kasper, Stokholm.

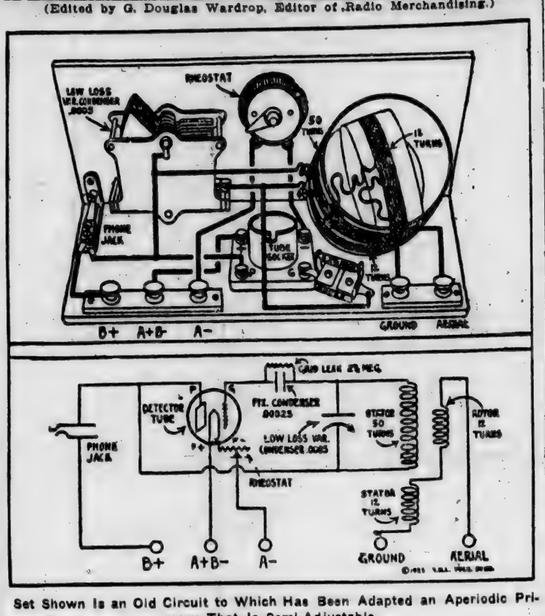
RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)



Set Shown Is an Old Circuit to Which Has Been Adapted an Aperiodic Primary That Is Semi-Adjustable.

The most revolutionary principle developed in radio-tuning devices in the last year is the aperiodic coupler. This is one in which a few turns of wire is substituted for the customary variable condenser and tapped coil primary. Its benefits are manifold. The new three-circuit set that has enjoyed the limelight this season along with the superheterodyne owes its exceptional properties entirely to the aperiodic primary. Aside from this it was nothing but an old single circuit blooper.

The set shown is an old circuit to which has been adapted an aperiodic primary that is semi-adjustable so as to control the degree of selectivity. With but little effort this principle can be adapted to any of the old-style circuits.

Ordinary Parts.

The parts used are the ordinary variable condenser of .0005 capacity or 23 plates and a variocoupler either of the 90 or 180-degree variety. This last has to be rewound according to specifications that will be given.

The basic circuit is that of the original De Forest Ultra audion and has an excellent range, volume, and tonal quality. In its original form it was susceptible to radiation, and therefore was undesirable as an up-to-date receiver. In its new form practically all radiation is eliminated if the tube is kept below the oscillating or live point.

The set when finished is capable of satisfying the most critical fan on the points of selectivity, as it can be adjusted to any degree so that it can tune out powerful near-by interference or broadened for distance when there is little interference.

Parts Required.

The tuning units and construction material utilized in building the aperiodic set are:

One variocoupler (special winding).
One .0005 or 23-plate variable condenser.
One 7 by 9 panel.
One rheostat.
One socket.
One plunger-type variable grid leak.
One .00025 grid condenser.
Baseboard, dials, wire, screws, binding posts, etc.

Good parts, of course, tend toward making the set more efficient, the most important being the variable condenser which should be of the low-loss type grounded metal and plates connected to the rotor.

The aperiodic coupler is made up of three separate windings, one of 50 turns and one of 12 turns on the stator of the coupler, and other of 12 turns on the rotor. The 50-turn winding and 12-turn are spaced about ⅜ of an inch apart. The rotor winding is exactly in the center of the rotor ball or tube. The two 12-turn coils are connected to one another as shown in the illustration and form the aperiodic primary. The 50-turn coil is the secondary and is tuned by the variable condenser which is shunted across it. Wind the coils tightly and fasten the ends of the wire firmly. About No. 24 gauge double silk or double cotton-covered wire should be used throughout. The connection between the 12-turn stator and rotor coils should be made with a piece of flexible Litzendraught of multi-strand flexible wire. Do not use the frame or bearing, as a friction contact is noisy at the best.

Mounting.

Mount the coupler and variable condenser on the two opposite sides of the panel about three or four inches apart. Care should be taken when wiring to make all leads as shown and direct as possible disregarding square corners. Note the lead from the secondary to the plate connection. This is in no way connected to the filament or ground.

Any type of vacuum tube works effectively. Use a rheostat of the proper ohmage and 45 volts of "B" battery on 199 and 201-A types, 22½ volts on WD-11 and 12, and UV-200 types. The grid leak being flexible can be adjusted for any tube.

The tuning control is the variable condenser. This logs and the settings are permanent for all stations. The rotor of the coupler is solely for the purpose of controlling selectivity.—Boston Traveler.

Input Transformer or Filter Sharply Tuned

As is now well known, the superheterodyne has seven more or less distinct parts. First, there is the receiving device and tuner shown at the left of the diagram. This inputs into the first tube. The third part is the oscillator, which also inputs a frequency into the first tube, the oscillator input and the receiver input differing by a certain fixed frequency for which the group of intermediate transformers are especially tuned.

To avoid other frequencies creeping into the intermediate amplifier, there is placed before it an input transformer, more properly called a

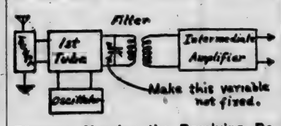


Diagram Showing the Receiving Device, Tuner and Oscillator.

filter, for its purpose is to transmit through only that frequency for which the intermediate transformers are adapted.

To make this input transformer or filter sharply tuned, a condenser is placed across its primary. This is always specified as a fixed condenser, usually .0005 mfd. Experience with hundreds of them has shown, however, that a fixed condenser here is wrong, because the condensers vary, the filters vary and the transformers vary. This filter determines the intermediate frequency, and a variable condenser should always be used and adjusted in combination with the oscillator condenser for greatest volume. The oscillator frequency must be varied, as on adjust this new condenser. When the new condenser is adjusted to one station, it should not again be touched. Its setting is then permanent. It is important, however, in first getting the right setting, to adjust the oscillator dial every time the filter condenser is changed, just as you adjust primary and secondary condensers on any set.

How Taps on Coils Will Aid in Tuning

Tapped connections to coils are made to provide a step-by-step variation in the number of turns. The more common use of the tapped switch is in connection with the primary, where the aerial is made more responsive to a high or low wave by the position of the switch.

In the aerial circuit the switch controls the primary coil by terminals connecting from every fifth turn of the coil to a tap or metal button, the aerial connecting to the switch arm and the ground to one end of the coil.

Regarding the aerial and ground as the plates of a fixed condenser of a capacity equal to that of a grid condenser, or .00025 microfarada, which it actually is, it is seen that it is necessary to add a certain number of turns to the coil to make it tune to a given wave length.

Tuning in the secondary is accomplished by a fixed coil and a variable condenser, and in the primary coil inductance. The result is practically the same if one or the other is varied, but both may not be fixed to obtain efficiency. The fixed primary is a compromise to simplicity.

Battery Acid

Ammonia or bicarbonate of soda will check acid that has been spilled from a battery from eating into the fiber of the cloth.

Simple Homemade Battery Charger

Construction and Operation Is Not So Difficult, According to Writer.

By C. M. DE LANO

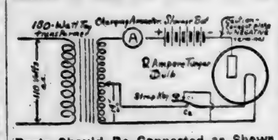
The construction and operation of a simple as well as moderate-priced storage battery charger is not so difficult. Its outstanding features include the facts that with this device a six-ampere charge can be applied to the storage battery through the medium of a single two-ampere Tungar tube, and also that the tube filament is in series with the storage battery, thus obviating the necessity for a specially constructed transformer having a filament supply winding distinct from the charging current winding.

Apparatus Required.

The apparatus required follows:

One 150-watt toy transformer of the tapped type; one two-ampere Tungar bulb rated 12 amperes at two and three-tenths volts; one standard porcelain base lamp receptacle; one strap-type telegraph key having contacts on both upper and lower sides which will pass five or six amperes continuously; one battery-charging ammeter; one asbestos panel about 12 by 14 inches and a few feet of scrap wire for connections.

Reference to the sketch will show that the filament terminals are connected across the 14-volt taps on the transformer. Inasmuch as the bulb is rated at but 2.3 volts, the question may arise, "Why use the 14-volt pressure across the filament terminals?" Actual experience indicates that when the transformer current is first applied to the filament terminals considerably more than the rated voltage must be impressed across the filament terminals of the Tungar bulb in order to start same; this is where the strap key, which is used as a starting switch, comes in; normally the contact is continuous at C1 in the attached diagram; however, when it is desired to start the charger the key



Parts Should Be Connected as Shown in Diagram.

is depressed so that the contact at C1 is broken, and in its stead contact is momentarily made at C2. This contact should be for just long enough to light the filament, after which time the filament will remain lighted until the circuit supplying it is opened; simultaneously with this the charger is, by the way, operating automatically. Should, by any chance, the filament not remain in operation when the key contact at C2 is broken, the process of depressing the key should be repeated until the tube does remain lighted, which indicates that the charger is operating.

Action of Strap Key.

Reference to the diagram makes it apparent that the strap key acts as a filament short-circuiting switch, and experience proves that it is desirable, though not absolutely necessary, to short-circuit the filament terminals as soon as the charging action is started; the reason for this lies in the fact that the filament operates at an extreme temperature and if all the filament current is passed through but one of the supporting prongs it is kept at too hot a temperature, whereas if the terminals are short-circuited the heating current which, please note, is also the charging current, is divided and consequently the prongs operate at a lower temperature, and with consequent less danger of cracking the bulb through overheating.

The writer has a charging outfit of this kind which has been in use for over two years and is used to charge both radio and auto batteries; to date the original bulb operates as well as when new.—Radio Journal.

Several Methods for Graining Your Panel

There are several methods for graining a panel. The first and simplest is the use of No. 000 sandpaper. This is rubbed across the panel in straight steady strokes until every portion seems to have a dull grained finish. It then may be rubbed with an oily rag. Care should be taken not to use too much oil, as this will tend to collect dust and make the panel a high-resistance conductor. Another method is the use of powdered pumice stone and a piece of cloth. This is prepared in the same manner as the first method. Emery cloth should never be employed for this purpose, as it tends to scratch the panel too deep.

Condensers

The fixed condensers in a receiving set should have mica dielectrics for best results. Do not use condensers in which the dielectric is paraffined paper. For the best operation of a set it is important to use the condenser of the proper capacity for the part of the circuit it is in.

Enemies of Efficiency

A few specks of dust between the variable condenser plates or on the coils, loose connections and rundown batteries lower the range of many sets. Generally the troublesome squeals and howls in a radio set are caused by little things which go unnoticed as seem unimportant.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

High Explosives Put Through Severe Test

The new high explosives, which found their first large scale use during the great war, are "insensitive"—i. e., reluctant to go off. So markedly so, indeed, that they are as safe to handle as cornmeal or baking powder.

This quality is extremely important, inasmuch as it makes them easy to deal with. To make them explode, a fuse is used.

They are mostly coal-tar products. From coal tar are obtained benzine and toluene, which are converted into high explosives by treating them with nitric acid. T N T is an example.

High explosives purchased by the United States government are tested to determine their degree of sensitiveness. Samples of them are set up and fired at with a rifle. If the impact of the bullet sets them off, they are considered unsafe and are rejected.

To Have a Clear, Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Advertisement.

Pierce's Old Home

Work upon the restoration of one of New Hampshire's historic sites is reported from Hillsboro as follows: "A fence of the style a century ago now surrounds the Franklin Pierce home at the Lower Village. This, with the removal of the piazzas and the addition of porches at the side doors, makes the house as it was in the days of Gov. Benjamin Pierce, father of the President, by whom the mansion was erected."—Concord Monitor.

The use of soft coal will make laundry work heavier this winter. Red Cross Ball Blue will help to remove that grimy look. At all grocers—Advertisement.

Finds Oil in Madagascar

M. Barrabe, a geologist and member of the French Ecole Normale, has made a geological expedition into Madagascar, and brought back information that will be commercially important. He has many specimens of carboniferous sands, indicating that while the coal fields are not as important as those of Indo-China the petroleum and bituminous sands are more important.

Dr. Peery's "Dead Shot" not only expels Worms or Tapeworm but cleans out the mucus in which they breed and tones up the digestion. One dose does it. Adv.

MANY HOUSEKEEPERS TOO ILL TO WORK

How Many Are Finding Relief from Weakness and Pain. Mrs. Brandenburg a Notable Case

MRS. EMIL O. BRANDENBURG
861 87TH STREET, MILWAUKEE, WISCONSIN

Milwaukee, Wisconsin.—"I was in a badly run-down condition and I would get weak spells and terrible headaches. I felt so badly last year that I could not do any housecleaning. The minute I would lift or stoop it seemed as if I was going to fall to pieces. I told a neighbor how I felt and she said that Lydia E. Pinkham's Vegetable Compound was surely the right thing for me. I took four bottles then and in the fall of the year I took three. I had been treated by a doctor, but he gave me an iron tonic and that did not help me. It seemed that the tonic did not have in it what the Vegetable Compound did. That gave me the strength and ambition I needed and I have gained in weight. This year before I started to clean house I got four bottles of the Vegetable Compound and am taking it right along. I tell all my friends about it and how much good it does me. They can notice it because I have gained in weight. I weigh 118 now and do all my work myself again."—Mrs. EMIL O. BRANDENBURG, 861 87th Street, Milwaukee, Wisconsin.

Mrs. Earl's Recovery

Horace, Nebraska.—"I had terrible pains and backache, so bad that I could hardly move, and I would have to lie down at times. I read advertisements of Lydia E. Pinkham's Vegetable Compound and I was so sick that I thought I would try it. My husband knew it was good as he knew a woman it had helped. It took all my pains away and I don't have any backache now. I do my own housework, take care of a few chickens and my garden, and have a little girl three years old to look out for. I recommend the Vegetable Compound to my friends and I will answer all the questions I can, if any one writes to me."—Mrs. ADA EARL, Box 22, Horace, Nebraska.

THE TEACHER

By DOUGLAS MALLOCH

FOR half a century, and more,
The feet of boys forever wore
A pathway to the teacher's door.

Yet, fifty years he took his stand,
A Latin grammar in his hand,
And taught the children of the land.

A general, a great divine,
Yes, men whose names with luster shine,
Learned Latin at that simple shrine.

For often here the great began
To dream, to wish, to hope, to plan;
Today is born tomorrow's man.

And so the teacher grew to gray;
Yes, fifty years have passed away
When someone happens on a day

To pause before the teacher's door,
The threshold that the children wore
A half a century or more,

And asks, as that good man appears:
"Are you not weary, tired to tears,
Of teaching Latin all the years?"

A simple answer he employs
To tell a teacher's holy joys:
"I don't teach Latin—I teach boys."

God bless the teacher who can look
Above, beyond, the open book,
The one who teaching undertook,

Not merely for the Latin's sake
But for the holy chance to make
Tomorrow's man, a soul to wake;

Whom nothing wearies, naught annoys,
But gladly all his life employs,
Not teaching Latin—teaching boys.

(© by McClure Newspaper Syndicate.)

Mother's Cook Book

Loving words will cost but little
Journeying up the hill of life,
But they make the weak and weary
Stronger for the strife.

Do you count them only trifles?
What to earth are sun and rain?
Never was a kind word wasted,
Never was one said in vain.

FAVORITE FRUIT DISHES

A LUSCIOUS basket of fruit garnished when possible with its own leaves, is an ornament to any table. Next to taste and palatability, we like to have our food appeal to the eye. Food nicely served and daintily garnished will be much more appetizing than that which is served carelessly.

Salpicon of Fruit.

Shred pineapple, add a banana or two cut fine, an orange and a grapefruit broken into bits. Mix with a cupful of sugar and a tablespoonful of water, boiled together until it hairs; add a tablespoonful of lemon juice, and when cool pour over the fruit. Serve chilled in tall glasses and garnish with a cherry. For those who cannot eat uncooked apples or pears, here is a dainty dish: Stew the fruit in a rich sirup until tender enough to pierce easily, then decorate with quartered blanched almonds, dust with powdered sugar and return to the oven to finish cooking. Pour the sirup around them and use to baste the apples during the cooking. Serve with whipped cream and the thick rich sirup. If pears are used add a little lemon juice to the sirup.

When fresh fruit is not to be obtained use a few preserved strawberries added to a lemon jelly or orange jelly; serve in quivering mounds with whipped cream and garnish with a few berries.

Cored apples filled with nuts and marmalade, covered with a meringue is an attractive way of serving such fruit.

Grated apple added to the white of an egg and powdered sugar and beaten until stiff makes a delicious dessert. Serve garnished with cubes of bright-colored jelly.

Peaches put through a sieve added to plain almond-flavored ice cream are delicious.

Halves of ripe peaches, filled with chopped nuts, heaped with sweetened and flavored whipped cream are very good. Canned peaches may be used, placing one-half on rounds of sponge cake, with plenty of the fruit juice. Serve with cream.

Stewed pears cored and filled with jelly, served with cream, is still another way with fruit.

Orange Juice.

For an elderly member of the family who needs a tonic and a jog to the digestive tract, orange juice, from one orange, at least three times a day, is a wonderful health-giver. A month of its use will show real results. The orange juice contains mineral salts, fruit acids and life-giving principles which cannot be given in a more pleasant form. Very small babies are fed a teaspoonful of orange juice between feedings, thus doing away with cathartics which, except in rare cases, are inadvisable.

For Supper or Luncheon.

Oysters wrapped in bacon and cooked under a gas flame until the bacon is crisp, served on toast with a pepper sauce prepared as for peppers on toast, omitting the celery, make a fine supper or luncheon dish. Place the oysters on a deep platter and the sauce in the center.

John Dilley and family of nea Waterloo, were Sunday dinner guests of his mother, Mrs Anna Dilley. Mr. and Mrs. Simeon Maurer of Auburn were afternoon guests.

The DeKalb Furniture Mfg. Co., at Auburn was totally destroyed by fire last Friday afternoon with a loss of $8 ,000 With Auburn, Garrett and Waterloo fire departments, no portion of the factory was saved.

In a complaint filed in the DeKalb circuit court, Frank W. Silberg states that on September 1, 1923, George A Mansfield and William Mansfield gave a note to the Butler Auto Sales Co for $233.-79, due in three months and another note on December 1, 1923, n the sum of of $176 81 was due in three months. The notes were assigned to the plaintiff and a judgment of $500 on each note is asked.

Mrs. Mark Moor of Elkhart, Mrs. Guy Pettit, Mrs. Wm. Benninghoff and little daughter and Mrs. J. G. Benninghoff and baby of Fort Wayne, Mesdames Paul Curie, Chas Rice, Clayton Wyatt, Floyd Reasoner, H G. Hursh and F. B. Leighty, were very pleasantly entertained Friday at the new home of Mrs. George Ringle at Ft Wayne.

Joyous Hats Announce the Coming of Spring

In the joyous procession of new hats that announce the coming of spring, there are many types—all the way from audacious and amusing to picturesque and dignified. Two outstanding style features distinguish them—they are colorful and they are trimmed. In the three hats shown above the new modes are reflected with a tall-crowned hat of ombre georgette at the top. Its upturned straw brim is covered with varicolored little blossoms and a pompon of them is perched on the crown. The hat below is a dignified turban with a rich applique trimming on the coronet. The group is finished with a lovely picture hat having flowers made of shaded ribbon at the front.

Graceful Kid Shoes in Sedate Colors

Simple styles and sedate colors are the choice of fashionable women for their footwear. Black, white, tan, champagne and many brown shades are liked, because any of them harmonize with the season's accepted colors and all the colors combine well with black. To assure perfect fit kid is preferred to other leathers.

Mrs. Tope Has Operation Tuesday

Mrs. F. D. Tope surprised St. Joe citizens Tuesday when it was announced that she had been operated on at a Fort Wayne hospital, for a growth at the butt of her right ear. She was always at the store and no one knew that any thing was wrong. For five years, we learn, she was bothered. The operation revealed a sack of puss and a small black pebble about the size of a pea. This is a mystery to the physicians and also Mrs. Tope. This might be traced to childhood play but she has no recollection. She is recovering nicely.

You can get transfer paper at News office in large or small sheets.

Frank Odle and wife spent over Sunday visiting their daughter and husband at Muncie, Indiana.

R. U. Bowser and wife were Sunday afternoon guests of Richard Culberson and wife at Auburn.

Gerry Wasson and wife were Sunday dinner guests of his brother, Wall Wasson and family north of St. Joe.

Friends of Rev. R. S. Brown will be glad to know that he has been returned to the Spencerville charge which now includes the Scipio M. E. church

Mr. and Mrs. Jason Keyes, who resided in Fort Wayne, moved their household goods into the Koontz proberty, where they will make their home.

Lightning Rods, better yet and cheaper than the rest and they save insurance.
Bowser & Reed.

The Alumni of the high school met on Thursday evening at the school house and named their committees for the banquet to be given in honor of the Senior class on Saturday night, May 9 at the Community Hall.

Mr. and Mrs. John Bachmann entertained the following guests for Sunday dinner: Alfred Bachmann, wife and son, August Baltzli and family, Mrs. Ernest Keefer and daughter and Mrs. Lucy Koffel all of Fort Wayne, Robert Bachmann and family of Hicksville and Jacob Augsburger and family of Geneva.

The following guests gathered at the home of Earl Stiman and wife in honor of Harold Farver, who spent the past year in Florida. Those for dinner were, J. L. Farver, Floyd Farver and family of Auburn, Samuel Potts, wife and babe of Corunna and Mrs. Nellie Farver and daughters of Rehobeth. The afternoon and supper guests were Ray Farver and family of this place, Thomas Jackson and wife of Fort Wayne, Don Washler and wife and Curt Washler and wife of Newville, Ralph Bartles and wife and Emmett Armstrong.

In Society

Saturday morning at 11 o'clock at the home of Rev. Konkle at Butler, occurred the marriage of Miss Dorothy E. Lake, 19, daughter of Mr. and Mrs W. O Lake and Mr. and Karl V. D. Hart, 21, son of Mr. and Mrs. Clyde Hart, of Spencer township. Mrs. Hart has taught two terms of school, the 5th and 6th grades at Spencerville, while Mr Hart has just finished his third term at South Scipio. They are still contemplating teaching and left this week for Angola, where they will both take an eighteen weeks course at T. S. N. C.

Mr. and Mrs. Hart are among Spencer township's highest type of young people and they have a host of friends who wish them success in their wedded life and vocation as teachers.

Would Be Wasted Time

"Ol Satan don' have to set traps foh sinners," said Uncle Eben, "owin' to his havin' his hands full tendin' to dem as is standin' in line to buy tickets."—Washington Star.

Helena D'Algy

Beautiful Miss D'Algy is one of the newest "finds" of a popular producing company, and she promises to be seen to good advantage in the "movies." She is regarded as one of the most graceful women in motion pictures.

Your Health

By ANDREW F. CURRIER, M. D.

SHINGLES

SHINGLES, also known as herpes zoster, is painful and supposed to be due to some kind of infecting poison.

It is an acute, inflammatory disease, usually following the course of some nerve distributed over the skin.

It begins with general discomfort, loss of appetite, perhaps with a chill and fever (like so many infectious diseases) and with great sensitiveness in the skin.

Its constant feature is a blisterlike eruption along the course of the infected nerve.

These blisters are usually only on one side of the body, become inflamed, and leave scars which are sometimes prominent and disfiguring.

The disease occurs in children, in young adults, and the aged, often persisting with the latter for months and years.

The fever, with which it begins, lasts three or four days, the pain being sometimes dull and sometimes sharp. Sometimes the pain subsides after the eruption appears, but recurs from time to time.

This pain is severer in the old than in the young, and often is worse at night.

The blisters come in successive crops for four, five or six weeks, and suppurate, discharge, and at length scar over.

The eruption may follow exposure to draughts of cold air, or mental or physical exhaustion, and may occur as an epidemic.

The fluid in the blisters is first clear and watery, then turbid, bloody and purulent, and the resulting sores may resist healing a long time.

On the chest the eruption follows the course of a nerve between two adjacent ribs; on the face it may result in paralysis of the side affected, and the eye may be destroyed by it. It resembles chicken-pox, erysipelas and psoriasis, and is most frequent in cold weather.

A patient with this disease should remain in bed, and should fret and worry as little as possible.

The bowels should be kept open with castor oil or salts, and the diet should be simple, including milk, soups, eggs, cereals, fruits and no meat.

The eruption must be carefully dressed every day, and the blisters must not be broken if this can be avoided.

Gauze moistened with alcohol, or any suitable antiseptic lotion, may be used to protect the surface.

When possible, it is better to have the advice of an intelligent physician than to depend on self-treatment.

This is especially important with the view of obtaining as little ultimate scarring as possible.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

MOST OF US KNOW THAT KIND OF ACHE

Mayor Hilary Howse of Nashville was praising Southern cooking at a banquet.

"Southern cooking," he said, as he took fresh portions of terrapin and Sallie Lunn, "is the best cooking in the world. There isn't a grain of indigestion in a ton of it, either.

"Northern cooking is good but too rich. Too much pork. Too much pastry.

"I once attended a Thanksgiving dinner up North, and the next morning I found my host's young son shoveling the snow off the sidewalks, for it had snowed during the night.

"'Doesn't that work give you a backache, son?' I said.

"'No, sir,' said he.

"'You're young,' I said. 'I guess you've never had the backache.'

"'No, sir,' said he, 'but I had the frontache after yesterday's Thanksgiving dinner.'"

Modern Youth Urged to "Get Into the Air"

Horace Greeley's contribution to the good advice of his generation was: "Go West, young man, go West."

If any other Horace Greeley of this period wants to make his reputation as a sage, he can accomplish it on the slogan: "Get into the air, young man, get into the air."

Just as the future of young men of Greeley's day lay in the West, so does the future of ambitious young men of this day lie in the air, says the Vancouver Sun.

In twenty years nine-tenths of North America's passenger traffic, express traffic and probably a good slice of inland freight traffic will pass through the air.

The pioneers in air transportation will carve a place for themselves in history, just as the Jim Hills, the Shaughnessys and the Van Hornes carved places for themselves in history through the medium of two steel rails.

The sons and grandsons of the men who followed Greeley's advice and "went West" need another Greeley today to catapult them "into the air."

Beetle Broadcasts

The broadcasting of a beetle's love song to its mate was the feature of a program sent out by a London, England, station. The occasion was a national history lecture in which the life cycle and habits of the beetle were discussed. At the appropriate moment, the beetle, which had a special microphone to himself, was permitted to give his call. Many radio fans complimented the beetle on his performance.—New York World.

Of Course He Obeyed Doctor's Orders, but—

Sybrant Wesselius, the political leader of Grand Rapids, said at a banquet:

"I distrust the corporation lawyer. Earning his quarter-million a year at the corporation's hands, what laws won't he deform, if he can, in the corporation's favor?

"In his interpretation of the law this chap is like the bon vivant whose doctor said to him:

"'And only one glass of port a day, general. That's positive and final. Only one glass of port a day hereafter.'

"The old bon vivant bowed his gray head meekly. Then, when the doctor was gone, he called in his butler and said:

"'Calhoun, I'm to have only one glass of port a day. Doctor's orders. See that it's served to me, Calhoun, in the celery glass.'"

A Very Brief Case

Blake—Have you read Brown's novel? Rather stupid, I think.

Drake—Yes, I can't quite get what he's driving at in the first paragraph, when he says the famous lawyer carelessly laid his jury box upon the witness stand.

Life's Span Lengthened

In the last 75 years the average of human life has been lengthened 15 years due, it is said, largely to the activities of public health and hygiene agencies. It is now stated that the average time of human existence will have been lengthened 20 years in the next 50 years.

Franklin on Immortality

Take courage, mortal: Death can't banish thee out of the universe.—Benjamin Franklin.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Letters of Recommendation

ALMOST every mail brings me requests for letters of recommendation of men who have given my name as reference to some individual, or firm to whom they have applied for a position. In only a very small number of cases have these men asked me for permission to do this, or do they often acknowledge the courtesy after it has been done. The least thing that one can do, if he gives your name as reference, is to advise you of that fact, or if possible to ask your permission beforehand to do so. When you ask a man to take the trouble to write you a letter of recommendation (not a "recommend," by the way), good manners require that you, at least, thank him for doing so.

A letter of recommendation is the easiest sort to get from almost anyone, and the people who should be most careful as to what they say—teachers, preachers, and public men in prominent positions—are often the most ready to write letters of recommendation of people whom they do not know personally, or who, at least, they know very slightly. Letters are brought to me every September by young men just entering college, written by men with whom they have no acquaintance, and with whom they have no connection, excepting that the man who writes the letter lives in the same congressional district, as the uncle or the father of the boy, who presents it to me. Such a letter is seldom worth a great deal as evidence.

The letter that is carried by the person recommended to the one to whom it is written, is of far less value than the one that is mailed directly. You are likely to know the contents of a letter that is in your pocket, even if it is sealed, and if you do know, it is quite certain that the writer will have hesitated to make any statements that are not complimentary. If the letter is mailed directly, the writer may be frank; he may touch on the weaknesses, as well as sing the praises of the man of whom he is writing, and so give a more convincing and truthful estimate of him.

There are those who hold that if you are writing a letter of recommendation, you are under obligation to say only good of the man concerned, or to keep silent altogether. I had a very serious argument with a young fellow a few years ago, into whose hands had fallen a letter which I had written about him, in which communication, I had pointed out certain weaknesses of his. He held that, having agreed to write a letter of recommendation for him, I was, by that agreement, under obligation to speak only of his good qualities. There is no greater nonsense than this. A letter of recommendation should attempt to give as faithful and correct an estimate of a man's qualifications as possible, and this, to be fair, should include, also, his weak points. One does not engage a man to fill any position because one thinks him perfect, but because the sum of his personal, and intellectual characteristics seems to be such as to fit him satisfactorily to fill the position in question. To know his weaknesses, and unless he is something more than human, he has them, is more often than otherwise an advantage.

It ought, perhaps, also to be borne in mind that a letter of recommendation is the property, not of the one about whom it is written, but of the one to whom it is written. If such letters are to be of any value, they must generally be confidential, and it is a breach of confidence to give them to the man recommended, or even to let him know of their contents, without the consent of the writer.

A letter of recommendation should ordinarily, indicate the opportunities which the writer has had to become acquainted with the person in question, and the length of time he has known him. It should give something of his training, his experience, and should, especially, dwell upon his unusual, or outstanding characteristics. If he has any qualities which fit him especially for the position for which he has applied, these should be mentioned. Integrity, trustworthiness, willingness to work, and ability to get on with people comfortably, are all qualities worth mentioning.

Every one will, at one time or another, be asked to recommend a man for a position for which neither his character, nor his training fit him. The only reasonable thing to do in such a case is to say frankly to the man who asks for the letter, that you cannot write it. In such a case it would be unfair, both to the applicant, and to those who might employ him, to help him to a position which he was not qualified to fill.

Tersely Told

Fatty fish contain large amounts of fat-soluble vitamines.

Jelly, when it is done, contains more sugar than the solution from which it was made.

Special X-ray apparatus for the study of metals is being installed in the laboratories of many American universities.

Propane and isobutane, two ingredients of illuminating gas, can be used as a refrigerating liquid to take the place of liquid ammonia.

Bulgaria has a system of maternity insurance giving the woman insured care during childbirth and a cash benefit for three months after the birth of the child.

INDIANA BREVITIES

Indianapolis.—With a new site finally selected for the Indiana School for the Blind, trustees of the institution are looking forward to removal of the school from its present location in the proposed War Memorial plaza. A new school of the cottage type of construction is to be built on the site selected at Seventy-fifth street and College avenue. This property, which is part of the Hugh McGowan estate, is a 50-acre tract and was bought for $1,200 an acre, or $60,000 in all, it was announced by Governor Jackson.

Indianapolis.—The cash assets of the Hawkins Mortgage Company of Portland and its subsidiary organizations, representing the tangible resources of "the house of Hawkins" after its more than a century of history, amount to only approximately $10,000, according to a report which was submitted by Lew Wallace, receiver, to Harry C. Sheridan, referee in bankruptcy, in Federal court. The assets were turned over to Warrack Wallace, trustee of the Hawkins assets.

Indianapolis.—Reductions of approximately 10 per cent in rates for automobile fire insurance applying to all insurance companies which are members of the Indiana inspection bureau, have been approved by Thomas S. McMurray, Jr., state insurance commissioner. The rates become effective at once. Extensive changes are to be made in the rates on theft insurance for automobiles.

Columbus. — Marshall Vogler, of Hawcreek township, corn grower, who has several times held the title of corn king of Indiana, has planted four acres in corn, the first in Bartholomew county, and much in advance of the regular planting time. Mr. Vogler planted corn in the latter part of April last year, and it was through the ground in May.

Anderson.—Roy A. Haynes, federal prohibition commissioner, and James E. Watson, United States senator from Indiana, were the principal speakers in the annual session of the north Indiana conference of the Methodist Episcopal church. Both spoke on the Eighteenth amendment to the Constitution of the United States.

Kokomo.—More than 5,000 persons, old and young, from all walks and stations in life filed past the casket of Elwood Haynes as the body of the inventor of the automobile lay in state in the First Presbyterian church preceding the funeral. Burial was made in Memorial Park cemetery here.

Indianapolis.—The old John C. New home, 518 North Pennsylvania street, will become the temporary home of the Indiana Democratic club by terms of a tentative lease arrangement with the Indiana World War Memorial association, it was announced by Joel A. Baker, president of the club.

Indianapolis.—Frederick E. Schortemeier, secretary of state, announced that the state police in the last six days had arrested 66 persons for speeding on the highways throughout the state and a like number for other violations of the state automobile license laws.

Noblesville.—Federal and local officers, who have been working in Hamilton county have 15 men in jail who will be charged with various alleged illegal liquor transactions. This is the largest number of arrests ever made in one day in Hamilton county.

Petersburg.—Miss Ida Walker, age sixteen, daughter of Sydney Walker, a farmer living four miles west of here, is in a serious condition suffering from cuts and wounds about the face and neck as the result of an automobile accident.

Indianapolis.—Low bids on 13 road improvement projects, opened by the state highway commission, were between $30,000 and $40,000 less than the engineer's estimate of the cost of the work. Low bids totaled approximately $250,000.

South Bend.—Elizabeth Aspinwall, age twenty-three, was found guilty by a jury of the robbery of several filling stations, a grocery and several drug stores. She was sentenced to serve from ten to twenty-five years in the Indiana woman's prison.

Marion.—Marion and Grant county honored Judge Willard Gemmill, of the Indiana Supreme court, at a banquet, under the auspices of the Grant County Bar association. Prominent jurists of the state and more than 100 lawyers from a dozen counties were present.

Bloomington.—A $2,000 ornamental gate will be erected at the main entrance of Indiana university's memorial stadium as the memorial of this year's graduating class, it was announced by Sam Ninesa, chairman of the 1925 memorial committee.

Indianapolis.—Dr. John F. Morrison, for many years a practicing physician in this city, died at his home, following an attack of pneumonia. Doctor Morrison was born in Greencastle, October 27, 1854.

Sullivan.—Sullivan was panic-stricken for an hour when a giant "twister" passed over, high in the air, but extensive enough so that a part of it struck the northeast portion of the city, damaging residences and business houses to the extent of several hundred dollars and leveling trees throughout the neighborhood.

Indianapolis.—Mrs. G. G. Derbyshire, president of the Indiana Parent-Teacher federation, announced that the second annual state conference of the federation will be held at Winona Lake July 9-10

THREE INDICTED FOR GIRL'S DEATH

Indianapolis. — Indictments charging D. C. Stephenson, Earl Klinck and Earl Gentry with murder in the first degree in connection with the death of Miss Madge Oberholtzer, age twenty-eight, 5802 University avenue, Indianapolis, were returned in the criminal court by the Marion county grand jury. These are in addition to the indictments on five other charges returned before the death of Miss Oberholtzer.

The indictment charges first degree murder in four counts, and is based on the ground that the three men had refused to provide medical attention for Miss Oberholtzer after she had taken poison in a hotel in Hammond, following an alleged attack by Stephenson.

Miss Oberholtzer died from the effects of bichloride of mercury poison, self-administered.

Chicago.—As a memorial to Roger C. Sullivan, nationally known Democrat, a gift of a $100,000 radio station to the University of Notre Dame, and the offer of a similar station to the University of Illinois, was announced by Boetius H. Sullivan, his son. It is said Notre Dame has accepted the offer. Mr. Sullivan said he hoped the station might be used to broadcast lectures for those who cannot afford to attend the universities. Mr. Sullivan said: "Because of my father's great interest in the education of boys and girls, undoubtedly due to the fact that he was unable to go beyond the eighth grade, I am endeavoring to bring to boys and girls through Illinois and nearby states, who cannot afford a university the lectures given at Notre Dame and Illinois."

Indianapolis.—An important ruling concerning the exemption of certain truck and tractor operators from the payment of the state gasoline tax was given to Lewis S. Bowman, state auditor, by Arthur L. Gilliom, attorney general. The attorney general said a contractor who uses tractors in the construction of a road over a new route which has never been a public highway but which will become a new public highway when the construction work is completed, and who does not operate the tractor on a public highway, is entitled to be reimbursed for the taxes which he has paid.

Washington.—Lieut. A. M. Schur, of Portland, Ore., and Chief Boatswain Earl E. Reber, of San Diego, Cal., were selected by the Navy department to accompany Lieut. Com. Richard E. Byrd, of Winchester, Va., on the MacMillan Arctic exploration expedition this summer. The three officers and three enlisted men will comprise the flying personnel of the expedition. Andrew N. Noid, of Nappanee, was selected as one of the enlisted men.

Indianapolis.—The state board of tax commissioners, in a hearing that lasted only a few minutes, fixed the valuation of the property of the Indianapolis Water company for taxation in 1926 at $15,500,000. This was an increase of $1,000,000 over the total value on which the company is paying this year, as a result of valuations made last year.

Crown Point.—Mrs. Anna Cunningham, Gary widow, who has confessed that she killed three of her children by poison, was arraigned before H. H. Kemp, justice of the peace, in her jail cell as she lay on a cot, and was bound over to the Criminal court of Lake county without bail on the charge of first degree murder.

Evansville.—After a survey of the local post office building by government officials, with a view to housing all federal officers in it, recommendation has been made that the building be equipped with an elevator and that various offices be repaired and renovated.

Evansville.—Rabies again has appeared in Evansville after a few months of relief, Frances Schnake, three-year-old daughter of Ira Schnake, having been bitten by a dog, the head of which, when examined in Indianapolis, showed symptoms of hydrophobia.

Versailles.—Rev. E. M. Harrison, Baptist minister of Louisville, Ky., who has been pastor of three different churches in Ripley county for a number of years, sailed from New York for Burma, India. He will teach English in a boys' school.

Darlington. — George Myers, age thirty, a brakeman on the Terre Haute & Logansport division of the Pennsylvania railroad, was seriously injured when he fell from a train. One arm was severed at the shoulder.

South Bend.—The sum of $52,500 has been appropriated by the St. Joseph county council as the county's share in the expense of eliminating the grade crossings on the Lincoln highway at New Castle.

Greencastle.—Mrs. Charles Herring attempted to kill her husband and then fired two shots from a large revolver into her body. She is not expected to live. The shot aimed at her husband missed. Mr. Herring has been blind for years and ill health is believed to have caused his wife to attempt to end their lives.

Anderson.—Two hundred visitors, including ministers and a few laymen, were present at the preliminary session of the eighty-second annual North Indiana Methodist Episcopal conference at the First M. E. church.

Conquers Bad Breath and is Popular Again

"The day I started taking Carter's Little Liver Pills," says Mr. John A. Perry of New York City, "my habitual bad breath and bad stomach stopped. I strongly recommend them to all those afflicted with these nasty troubles. I assure you that my own case was a bad one, causing me untold embarrassment, and Carter's helped me right from the start."

Bad breath comes from sour stomach and can usually be relieved quickly by Carter's Little Liver Pills.

They are wonderful for constipation, sick-headache and indigestion and they physic the system in a mild and gentle manner, no bad after effects.

Recommended and for sale by all drug stores.

Help That Achy Back!

Are you dragging around, day after day, with a dull, unceasing backache? Are you lame in the morning, bothered with headaches, dizziness and urinary disorders? Feel tired, irritable and discouraged? Then there's surely something wrong, and likely it's kidney weakness. Don't neglect it! Get back your health while you can. Use *Doan's Pills*, a stimulant diuretic to the kidneys. *Doan's* have helped thousands, and should help you. *Ask your neighbor!*

An Ohio Case

Mrs. Will Brown, 112 Hale St., Wellington, Ohio, says: "Overwork weakened my kidneys and my back was lame and sore. When I bent over, sharp pains darted through my back and I could hardly straighten. I often became dizzy. My kidneys were disordered, too. Two boxes of Doan's Pills removed the backache and my kidneys were in a healthy condition."

Ensilage Corn Best for Silo

Results of Tests Made With Two Varieties at Different Stations.

Is it more profitable to plant ensilage corn for the silo than ordinary field corn? is the question that presents itself to many silo owners at this time of the year. In Iowa few are growing special varieties for the silo, the majority of farmers believing that the regular field corn, taking everything into consideration, can be more profitably handled than some special ensilage variety that grows more forage and less grain per acre.

Larger Amount of Water.

There is no doubt but silage made from ensilage corn contains a larger amount of water than that made from field corn. In other words, that the former is more succulent than the latter or that it contains less dry matter per pound or per ton. On the other hand, ensilage corn produces a larger tonnage than field corn and the question arises whether the greater tonnage containing less dry matter per ton is more economical for the dairy cow than field corn silage, which is more concentrated.

The Indiana experiment station has been testing this matter for a number of years and has come to the conclusion that field corn silage produced approximately 1.5 per cent more milk and 3 per cent more fat than ensilage corn silage. Ton for ton, in other words, the field corn produced slightly more milk and fat than ensilage corn silage, but the yield of dry matter or of total nutrients per acre from ensilage corn was much greater than from field corn. The difference in yield of the two kinds of corn was large enough so that ensilage corn proved the more profitable. Similar results have been obtained at the Ohio and Connecticut experiment stations.

Silo Any Part.

There is another factor aside from yield per acre to be considered in connection with this problem of whether to plant ensilage or field corn for the silo. If the entire corn crop is of the same variety, any part of it can be put into the silo. If, on the other hand, ensilage corn is raised for the silo, the particular field that is set aside for that purpose must be used. There are times, owing to late planting or to excessive moisture in the spring, when some part of the corn crop cannot be cultivated as thoroughly as some other part, and may on that account mature a week or so later. In such a case the late corn may be put in the silo, and the handicap due to late maturity partially avoided. Such late corn might not mature, and, unless it could be put in the silo, much of it would be wasted.

Too Early Grazing Sets Back Average Pastures

"Pasture for three and two to eat it," is the recommendation of a veteran live stock breeder who believes in the policy of keeping the growth of grass ahead of the grazing. By this plan, he says, the greatest total yield is secured and the pasture is left in the best shape for winter.

Stock men at Minnesota university farm deprecate the practice of turning out farm animals on pastures too early in the spring. Often one week's delay will give the grass such a start that the pasture season under normal conditions will be materially lengthened. Trampling of the wet and loose soil by the farm animals is destructive of pasturage.

Two acres of average pasture are required for each horse or cow. Six to eight sheep should be allotted about the same pasture as one horse or cow.

Raising Feed for Cows

The dairy farmer who can raise all or almost all of the feed for his cows has a distinct advantage over the dairyman who has to purchase his feed. It is cheaper to raise the feed than to buy it. Such a farmer has two opportunities to make a profit, first, in getting market price for his feed at his farm, and second, he should make a profit on his dairy products. As a matter of fact, a man who has to purchase all of his feed must have an exceptionally good market and efficient cows to make a profit.

Giving Dairy Cows Rest

Giving the dairy cow a rest of four to eight weeks is a matter of common practice among dairymen everywhere, and when we come to study the newer facts of nutrition we are impressed with the necessity of such a period for recuperation. The dairy cow is a hard-worked machine. Many of them give their own weight in milk month after month, and from year to year, and once a year give birth to a calf that may weigh close to 100 pounds.

Cheapen Milk Yield

The cost of milk production depends largely upon the cost of foodstuffs. Therefore, to cheapen milk production dairymen should feed large quantities of leguminous roughages, such as alfalfa, clover hay, bean pods, possessing high digestible content. Corn silage and leguminous roughages should form the basis of the dairy ration. With this source of high digestible materials the grain ration can be materially cut down and the cost of the dairy ration reduced.

Add Milk to Ration of Young Chickens

Adds Greatly to Increased Rate of Growth.

(Prepared by the United States Department of Agriculture.)

That the addition of milk to the regular grain ration of growing chicks leads to a greatly increased rate of growth is a conclusion reached by federal poultry specialists who have studied the matter experimentally. The experiments are still in progress. The conclusion agrees with the experience of commercial poultrymen who have included milk in the rations of young chickens.

Another experiment conducted by the United States Department of Agriculture which promises to be of practical importance is on the relative efficiency of mash rations containing vegetable proteins. The results thus far bear out those of previous years' work to the effect that the addition of certain mineral salts to vegetable proteins makes them compare favorably with animal proteins as a protein supplement for poultry. Unless the minerals are used the protein of animal origin is more efficient.

These experiments are conducted at the bureau of animal industry farm, located at Beltsville, Md., near Washington. Last year the government poultry specialists hatched about 7,500 chicks with good results. The fowls are used for a great variety of studies in breeding, feeding, and management.

Best Kernels to Select as Seed for Corn Crop

Whether to select smooth or rough corn for seed is a subject of general interest. Many farmers believe that smooth, flinty kernels indicate deterioration in quality and lower yields, while others maintain that they secure their highest yields from such seed. General observation and experiments conducted in many states for a number of years show rather conclusively that smoothness of the kernels is not a sign of deterioration in quality, but usually indicates that conditions under which it is grown do not favor a rough deep-kerneled variety.

It is now known that rough kernels are usually deep kernels which require a rich soil and long-growing season to mature.

Smooth kernels, on the other hand, tend to be shallow. They mature early. On thin upland soil or in the drier parts it will be better to select rather shallow kerneled, smooth ears for seed, and somewhat deeper kernels and rougher ears for rich bottom lands.

Find Alfalfa Cheapest Hay Produced on Farm

Cost records kept by southwestern Minnesota farmers show that alfalfa is not only the most valuable to feed but is also the cheapest to produce. The records, kept under the supervision of the farm management division of the Minnesota College of Agriculture, gave $12.51 as the cost of an acre of alfalfa. Since the average yield was 2.2 tons per acre the cost per ton was $5.70.

Factors entering into the cost were as follows:

Man labor, 11.2 hours at 21c	$ 2.34
Horse labor, 13.2 hours at 10c	1.32
Machinery	1.60
Rent	6.00
Seed (one-fourth of total cost)	1.25
Total 2.2 tons	$12.51
Cost per ton	5.70

In addition to the hay, some farms obtained hog pasture from the alfalfa so that the actual net cost was somewhat less than the figure given. Corresponding figures for clover and timothy on the same farms show an average yield of 1.1 tons and a cost of $8.36 per ton.

Farm Hints

Use clean seed.

* * *

Grind screenings before feeding them to stock.

* * *

Treat potato seed with formaldehyde or corrosive sublimate.

* * *

Clean up around edges of fields and other places where needed.

* * *

Plan to grow three and one-half tons of silage and one to two of legume hay per cow.

* * *

Get a good fertilizer for the garden. An 8-4-4 will give good results for all kinds of vegetables.

* * *

Buy legume seed and prepare to plant several acres per plow to turn under for soil improvement.

* * *

Put in a few plants of the red and yellow cherry tomatoes for the children. These baby tomatoes make a big hit with the kids.

* * *

When grass is included in a rotation, it should be accompanied by a legume, and, for its best production, should remain down longer than one year.

* * *

Soy bean seed is frequently destroyed by a pest known as the common bean weevil. Almost complete control of this insect can be secured by exposing the seed to sub-zero temperatures. Place the beans outdoors in a sack on a cold day and leave them from 36 to 48 hours.

Lesson for May 3

THE BENEFITS OF TOTAL ABSTINENCE

LESSON TEXT—Dan. 1:1-20.

GOLDEN TEXT—"Daniel purposed in his heart that he would not defile himself with the king's meat, nor with the wine which he drank."—Dan. 1:8.

PRIMARY TOPIC—Four Sensible Boys.

JUNIOR TOPIC—Benefits of Total Abstinence.

INTERMEDIATE AND SENIOR TOPIC—A Sound Mind and a Sound Body.

YOUNG PEOPLE AND ADULT TOPIC—Some Benefits of Total Abstinence.

I. Daniel and His Companions in Captivity in Babylon (vv. 1-4).

They were carried away to Babylon by Nebuchadnezzar in the first siege of Jerusalem. At the command of the king certain choice young men, including the seed of the king and of the princes, were carried away that they might be made skillful in wisdom, and cunning in knowledge, understanding science so that they might be trained to stand in the king's palace.

II. The Trial of Daniel and His Companions (vv. 5-13).

1. Their Conscience Tested (v. 5).

By the appointment of the king, a daily portion of the king's meat and of the wine which he drank was arranged for them. This was contrary to the custom among the godly Jews. Being contrary to the Jewish customs, they could not conscientiously partake of them. It should ever be borne in mind that conscience is the groundwork of human character.

2. Their Change of Name (vv. 6-7).

Among the Hebrews most significant names were given to children. Daniel means, "God is my judge." The significance of this name was that all the problems of life were submitted to God for His decision. God was made the arbiter of his life. This was the secret of Daniel's life. No doubt this expresses the purpose of his parents in giving him the name. His name was changed to Belteshazzar meaning "Bel's prince," the one whom the chief god of the Babylonians favors. Hananiah means, "gift of" or "beloved of Jehovah," and his name was changed to Shadrach which signifies, "Illumined by the sun god, Rak." Mishael means, "who is as God" and his name was changed to Meshach meaning "who is like the goddess Shesach, the gentle one." Azariah means, "Jehovah is our help," and was changed to Abednego which means, "the servant of Nego." Back of the change of names was the attempt of Satan to wipe out the name of the true God, and have these young men lose their separation and thus become assimilated among the heathen.

3. Their Religious Life (v. 8).

This involved their refusal to eat meat and to drink wine which was contrary to their teaching. In the case of Daniel, at least, it also involved praying three times a day.

4. Their Courtesy (vv. 8-13).

Daniel seems to have been the spokesman for the company. Although Daniel's heart was fixed, he did not forget to be a gentleman. He requested to be excused from this meat and drink in order that he be not defiled. Christians should learn from this to be courteous even in times of great trials. God had brought Daniel into favor and tender love with those who were over him.

III. The Success of Daniel and His Companions (vv. 14-21).

1. Their Physical Health (vv. 14-16).

A test was made for ten days, and it was shown that they were fairer in countenance and fatter in flesh than those who indulged in the king's meat. Godly and temperate living pays. It is obligatory upon God's children today to conscientiously abstain from that which is contrary to His law. It means total abstinence from intoxicating liquors, and everything which would injure the health.

2. Mental Growth (vv. 17-20).

Daniel and his companions were found to be ten times superior to their comrades in matters of wisdom and understanding. It is always true that those who abstain from indulging in the use of strong drink have clearer minds and are mentally better equipped for their work than those who indulge.

3. The Social and Political Preferment (v. 19).

They stood before the king.

4. Their Temporal Influence (v. 21).

They were all advanced to positions of influence and Daniel became president of the college of wise men, and the prime minister of the nation.

5. Spiritual Insight (v. 17).

Because of Daniel's loyalty to God, visions embracing the entire history of the world came to him and Nebuchadnezzar's dream was revealed.

Do Right

Do right, and God's recompense to you will be the power of doing more right. Give, and God's reward to you will be the spirit of giving more. Withhold from God and the accounting will follow.

Society

Society is a more level surface than we imagine. Wise men or absolute fools are hard to be met with; and there are few giants or dwarfs.—Hazlitt.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

BABY WALLABY WAYS

"I've heard," said Baby Wallaby to Billie Brownie, "that babies must be kept very quiet.

"In fact sometimes people will come to the zoo and they will wheel a baby carriage. They wheel it along very gently and sometimes they stop and sit on a bench and let the baby have a long, quiet rest and sleep.

"They are always talking about not disturbing the baby.

"It seems to be a very dull life for a baby to lead."

"That makes it a healthy baby," said Billie Brownie.

"Well," said Baby Wallaby, "that may be so, but I'm glad I'm not a baby of that sort then.

"I'm thankful I'm a Baby Wallaby."

Billie Brownie thought to himself that other babies were doubtless very thankful that they weren't Baby Wallabies, but he thought he wouldn't say just that to the Baby Wallaby.

"Oh, maybe very healthy," said Baby Wallaby again, "but so very dull.

"I am very thankful I don't have to lie in a carriage and be kept so quiet.

"I've never seen a single mother go hopping and jumping along with the baby carriage.

"I've never seen one leaping and bounding along at a high old speed.

"No, they go walking along so slowly and they sing in a low tone sometimes to the baby.

"Now I have some excitement.

"When I was very young I was very small, of course, and I stayed in the comfortable little pouch every mother Wallaby and every mother Kangaroo has for her baby.

"I was so helpless my mother had to put my food right down my throat.

"But even then my mother went jumping and bounding along with me

"I'm Thankful I'm a Baby Wallaby."

riding contentedly in my baby wallaby carriage.

"Then I became a little bigger and I could see all that was going on about me just as I noticed babies will often look about them.

"But did Mother Wallaby keep me quiet even then?

"No, she went bounding along with me just the same as ever.

"She gave gorgeous big leaps and glorious big jumps and there was I in my comfortable pouch she has for me, and I just had the best time ever a baby wallaby had.

"Oh, I have said to myself so often as I've seen babies here in the zoo:

"You poor little dears, you don't know what a good time really is.

"There has been excitement among the Mountain Zebras.

"Mother and Father Mountain Zebra announced to their friends lately that they had a fine son.

"But no sooner had they sent out this notice than they had another to send out.

"The Baby Colt Zebra was only ten hours old when he jumped right over his mother's back as she was lying down.

"Now you know he is a fine baby who is able to do that. I couldn't have done that myself.

"He showed he could do some fine leaping, and such a young baby, too.

"Fancy! He had a trick before he was a day old and a good trick, too.

"He wasn't quite a half-day old.

"That's what I call smart.

"But poor little real babies are kept so quiet. It seems a shame.

"I feel sorry for the poor little dears.

"Yes, if any one wants to know what I think you may tell them that Baby Wallaby thinks they don't have much fun."

So Billie Brownie laughingly promised to deliver the Baby Wallaby's message.

Good Fishing Hole

"My goodness!" remarked the old gentleman as he stopped the young lad with the fine catch of trout. "You've had a very successful day, young man. Where did you catch all these fish?"

"Just walk down that patch marked 'Private' and keep right on till you come to a notice, 'Trespassers will be prosecuted.' A few yards farther on there's a fine pool in the river marked 'No fishing allowed,' and there you are, sir!"—Union Pacific Magazine.

Had Sold the Kiss

Johnnie—Teacher, didn't you say you'd give me a kiss if I could get some greenstuff for your little rabbit?

"Yes, I did."

Johnnie—Here's the greenstuff, and I've sold the kiss to my big brother for 50 cents.

ROAD BUILDING

BETTER ROADS NOW FOLLOW MOTOR CAR

Automobiles led to construction of the network of good roads which weave their way through all parts of the country, but "bad" roads aided materially in development of the American type of motor car to its present supremacy over European cars.

The natural assumption would be that ownership of motor cars in any given section would follow the construction of good highways, but experience proves that the car comes first and good roads follow, inevitably. In other words, the motor car proves its need and desirability even on the worst roads. The owner comes to realize the advantages of good roads, and he soon stirs himself to see that they are built.

Illinois is a good example of this. Its roads were among the worst in the country until the advent of the automobile changed sentiment which fought improved highways. Farmers were at first unalterably opposed to spending money for better roads. But they began to use automobiles. Then they changed their minds. Today Illinois is a leader in the good roads movement.

Meanwhile, bad roads were serving a good purpose. Had it not been for them in the early days of the motor industry it is probable that American designers would have copied European manufacturers, who built their cars at prohibitive cost for use only on European boulevards.

With our "bad" roads, we had to build our cars for rough going. We had to allow enough clearance to get over rocks, stumps and hummocks. We were compelled to devise springs that would carry passengers in comfort even on rough avenues of traffic.

Our cars had to have more power so that they could negotiate hills and mountain grades on "high." European cars carry four or five shifts, and in order to get up even a low grade, it is necessary to use nearly all of them.

If we had had our present splendid system of highways, it is very probable that we would still be building the European type of car. This would mean they would have to be built at a much heavier cost than now. And instead of being for universal use, as they are, cars would be limited to the use of a small class of wealthy citizens.

Canadian Highway From Coast to Coast Planned

A new and vast playground, called more beautiful by many than the most beautiful sections of the Swiss Alps, may be opened to American motorists as a result of the hazardous path-finding trip which Austin F. Bement, secretary of the Lincoln Highway association, made across Canada.

Bement's trip, the first ever made across the Dominion in an automobile, was widely heralded. For 63 miles of the distance he drove his official car over the ties of the Canadian National railroad. This was through the Fraser River canyon between Lytton and Hope, B. C., a section of the proposed transcontinental route which no automobile ever before had been able to negotiate. Seventeen tunnels and 150 trestles, some of them hundreds of feet above the roaring Fraser river, had to be negotiated. It was the most severe test for man and car through which any motorist ever passed successfully.

Bement proved that a way could be won by motor car through the passes of the Sierras which previously had been considered impassable to motorists. Following his record-breaking trip, the Canadian Northwest has awakened to the possibilities for development of the country through roads that will invite American tourists.

Blooming Sweetness on Highways Now Planned

Practical enough appears the St. Louis resident's objection to planting trees all along the state highways. He says, "It's bad enough to run into the ditch, let alone hitting a tree." The trees will not be planted; and experienced motorists will breathe easier.

Still, the highways can be beautified. Safety first, no trees; but rose bushes are not perilous. We believe it is North Carolina that has projected the plan to border its highways with blooming sweetness, says the St. Louis Globe-Decomrat. The sweetbrier once set out takes care of itself. It is a low grower and spreads its pink blossoms over the roadside for at least a month or two.

Along the Missouri valley it seems to be more plentiful than anywhere else, and grows in wild profusion by the railroad embankments.

But the beflowering of highways needn't be confined to rose bushes. Wild flowers can be sown like wheat and the motorist be thus greeted for miles with gales of nature's perfume.

Building "Throughways"

Virginia has made progress in constructing "throughways" for the encouragement of automobile traffic, and now proposes to expand the throughway principle that places of historic interest may be accessible. The state is dotted with places in which all Americans are interested or would become interested were those places called to their attention and could they be reached by good roads. Farmers living along the highways would be benefited.

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

Klan Demands Prosecution

Ku Klux Klansmen of Indianapolis Saturday demanded "prosecution to the full extent of the law," of D. C. Stephenson, former Indiana grand dragon of the hooded order who is under indictment for murder in connection with the death of Miss Madge Oberholtzer.

Resolutions adopted by Marion county klan No. 3 pledged "moral and financial support" if needed in the prosecution of Stephenson.

"Stephenson, a long since banished klansman, is alleged to have brought shame and disgrace upon himself through alleged acts of gross bestiality," the resolutions said. "It has been alleged that he has violated every tenent of decent citizenship and alleged to have defied the laws of God and man.

"We hereby condemn most bitterly the alleged conduct of Stephenson and his confederates and urge their prosecution to the full extent of the law and offer our moral and financial support if it is necessary.

Something to Think About

By F. A. WALKER

BLOCKING THE WAY

THOSE apostles of laxity who can never find time to do anything as it ought to be done go crookedly through life complaining in their semi-serious moments that they are lagging leagues behind their rivals, and never getting anywhere.

They admit this without any apparent sense of shame or compunction of conscience.

Sometimes to their intimates of like ilk, they boast of their shortcomings in a spirit of bravado.

A laziness that distinguishes them from what they disdainfully term the "common class," to whom they will scarcely nod a courteous good morning, seems in their minds to put them upon a worshipful pedestal.

Daily they go about their task in a slipshod manner, shunning responsibility as a hen avoids a pool of water. Everything they do is half done.

Careless in observing how the proficient save time and energy, and thus make of work a pleasure instead of a drag, these listless persons are always in trouble, scowling and finding fault, even when everything about them is cheerful.

Their desks or benches are continually in confusion, quite in keeping with their unmethodical minds.

When urgently needed no paper or tool is in sight or reach.

It is generally hidden somewhere in a disordered heap. Precious minutes are lost while searching for the elusive thing, and should the task of finding it happen to be more vexatious than usual, some innocent fellow-worker is openly charged with pilfering.

Then a storm breaks and the atmosphere is surcharged with anger, which in the customary slowness of cooling off is likely to leave the principals for days and days in sulky humors.

Persons of this character are doomed to fail in everything they undertake, except in the making of quarrels and the wrecking of friendships.

Blameful themselves, they pile their sins on the blameless.

Wherever they are found there is turmoil, inefficiency, disloyalty and unhappiness, four danger signals which block the way in every track of endeavor to promotion to the higher ranks.

Novel and Ingenious Style-Points in Coats

This wrap-around coat introduces a front fullness by means of three wide side plaits, which provide sufficient width without detracting from its slender lines. The embroidered inlay on the collar and cuffs is distinctive and attractive—the design novel and clever.

Slats' Diary

By Ross Farquhar

Friday—A big bunch of wimen was at are house this evning at sum kinda comitty meeting and after bizness was transacted why they got to tawking about thissen and that and pa and me butted in oney I diddent do none of the tawking They was discusting about wimens ages and pa ast 1 of them if sheed tell the truth if he shud ast her how many yrs. old she was and she sed yes she wood tell him the trooth she sed she wood tell him it wassent none of his bizness. and they all laffed hartilly.

Saterday—pa was maddern a wet ben this morning because he got sum bills for stuff ma had went and bought. He sed when he got home he was a going to let her no who was boss at are house but frum the conversation that they had I gess she all reddy new who was boss at are house.

Sunday—I overherd pa giveing 1 of are neibors witch is a yung man sum advise today. He told him to all ways be very care full about smileing at the wimen nowdays He sed if you smile at a woman she is libel to either have you arrested or marry you one of the to

Monday—well I gess pa is going to have the otto painted he dus sent no it yet he thinks he is going to do it his own self and save sum money but I herd ma asting the painter how much it costed to have a ford painted so I spose he is going to beet pa out of a job

Teusda—I ast Jane if she notissed enny thing diffrent about me and after she had give me a good look over she sed Well you must have on a new neckty becuz evry thing else looks so shabby sum how I'm getting so I hate all the girls here of lately.

Wensday—Ma told pa tonite that if he diddent get to ernin. more money and ect. why before long she cuddent by enny close and pa sed well if the close contnyews to keep on getting shorter he wont half to by enny before long

Thirsday—They was a man trying to sell pa a pitcher of sum 1 called Money Lizy for 10 $. Pa sed why he wooden't want to pay ten $ for the picture of a woman when he diddent even no her a tall

PERSONAL PARAGRAPHS

Mrs. Minnie Gee will entertain the Coburn's Corners Ladies Aid at an all day meeting today.

New specialties at Spencerville Community Hall benefit show Saturday night. 10 and 25 cents. Come and have a good time.

One glance at the back yard of each and every resident of St. Joe these fine spring evenings will reveal the fact that they all want to be farmers and if they may not be farmers they are at least going to be good amateur gardeners

Dr Z. H. Stamets has appealed his case to Indiana Appelate court, not being satisfied with the decision entered by Judge Endicott in the case of Wm Randall Mr. Randall had constructed a well for Dr. Stamets on property in Jackson township, but Dr Stamets refused to pay the bill, which was $85 75, on the ground that Mr Randall had drilled deeper than authorized. Judge Endicott recently gave Mr. Randall a verdict dict for the amount asked for, plus $47.75 attorneys' fees, and ordered the lien against the property foreclosed. Dr. Stamets is appealing from this decision.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY MAY, 7 1925 | NO. 19

All Ready For Final Clean-Up

In con pliance with the orders of the City Health Officer, Dr. Minnick, and the town board, St Joe is all ready for the final clean-up of the season, starting next Monday and continuing up to Saturday. St. Joe folks have a real town pride and a clean up week is no slam at that pride

Communities all over the country are now getting busy with their plans These activities are evidences of thrift. The home garden yields both exercise and fresh vegetables producing health and economizing in the financial outlay for food. Cleaning up the premises removes disease breeding dirt and rubbish. Varnishing the floors is the best eradication of vermin.

The ideal way to take care of the premises is from day to day. Yet the winter season always witnesses a rather large accumulation of trash and dirt. With the coming of spring, a clean-up should be the first thing on the schedule. These days should be used for planning Now is the time to think about the minor changes and repairs, to decide on the paint and varnish, to order the seeds for the garden and the replacement of shrubs for the front yard.

Let's plan to make this a clean and beautiful community It takes a strong bit of effort, but wonders can be accomplished by cooperation.

Let's plan and cooperate!

County Council Meetings Scheduled

The Young People's division of the DeKalb County Council of Religious Education, will hold its first county council meeting of the year in the Auburn Y M. C. A Sunday afternoon, May 10, at 2:00 o'clock.

Rev. Howard M. Morgan of Auburn, will give the inspirational address of the afternoon. Plans will be laid for the coming year's work of the young people, and a large delegation is expected from over the county. The young folks of the county will have at least five of their number in the training camps at Lake Geneva, Wisconsin, this year, and all in all, the prospect for this phase of the Sunday School work in DeKalb county has never been brighter. Stanley Means of St Joe, is chairman of this division in the county, and Miss Alice Tustison, also of St. Joe, is president of the Young People's council.

On Friday night of this week the Administrative Department will meet in the Church of God, Auburn. The township officers, pastors, superintendents, assistants and secretaries of schools are to meet in this session. A special program is being prepared and Hartwell Gosney of Fort Wayne will address the meeting.

Mother's Day

To Celebrate Mothers Day

On next Sunday, May 10, the entire nation will join in paying its annual tribute to Mothers. Whether it be through special programs in the churches, schools or public halls, matters not—Mothers will not be forgotten. The busy man who has much to engross his mind, even on Sunday, will not be too busy to breathe a silent prayer for the happiness, the peace and the contentment of mankind's greatest friend—Mother. If she has passed on, then it will be a prayer for a peaceful sleep throughout eternity. If she is living, it should be a prayer spoken aloud, and to her—either by lips or letter.

At any rate, mothers will not be forgotten on this one day dedicated to them. Residents of St. Joe and throughout the entire commonwealth will join with their brothers and sisters in the other forty-seven states in the union in paying a fitting tribute to Mother. White

flowers will be worn in memory of her, and thoughts will turn to the days, now sweet in memory, when we nestled close beside her, basked in her smiles, and learned those lessons which have helped us over the rough places in life's pathway.

We live in a busy world, a world in which the struggle for existence seems to grow more difficult as the years roll on We have our tasks to perform, and our worries to contend with. But we are unfit to hold even the smallest space in this world if we forget on next Sunday to join in some kind of a tribute to the one who made it possible for us to have a place in the world—Mother.

Special services at each of the churches Sunday morning, to which every one is asked to attend.

You can get transfer paper at News office in large or small sheets.

High School Frolic TakesY oung Life

Keith Yeiser, a junior in the South Whitley high school and the son of Editor and Mrs. L. W. Yeiser, fell from the roof edge of the U. B. church, Tuesday midnight of last week, and sustained serious injuries—a fractured skull and badly bruised shoulder and chest, resulting in his death Friday May 1st.

Keith with several classmates thought that the seniors had put their colors on the church roof and he attempted to climb the spouting and had reached the top and in trying to gain the roof, a piece of coping and evespout gave way, and he fell backwards twenty feet, hitting his head on the cement walk. Medical aid was summoned and he was taken to his home but he never regained consciousness.

Keith was born at Avilla, November 14, 1907 and died May 1, 1925 at the age of 17 years, 5 months and 17 days. For seven years he lived north of St Joe with his parents on a farm spending two years in high school here, in 1924 he moved to Butler and then to South Whitley where he was a Junior.

The funeral was largely attended being held Sunday afternoon at Newville U B church, Rev. Bailey of South Whitley officiating, assisted by the local pastor and Rev. Hubbard, former pastor of the Yeiser family. Burial in Newville cemetery.

To Issue Bonds For New Building

Notice is hereby given to the tax payers and citizens of Concord Township, DeKalb County, Indiana, that the township trustee of said township and the township Advisory Board of said township did on the 23rd day of April, 1925 determine to issue bonds of said township in the aggregate sum of $30,000.00 for the purpose of constructing a school building in said town ship; said bonds to consist of thirty series; each series to be composed of two bonds, each bond to be in the sum of $500.00, all bonds to bear interest at the rate of 4½ per cent per annum, payable semi annually on the first day of January and July of each year and you are hereby further notified that unless a remonstrance is filed by tax payers as required by the statute said bonds will be issued and sold as determined upon said trustee and Advisory Board.

Witness our hand and seals this 24th day of April, 1925.

F. L. Milliman, Trustee.

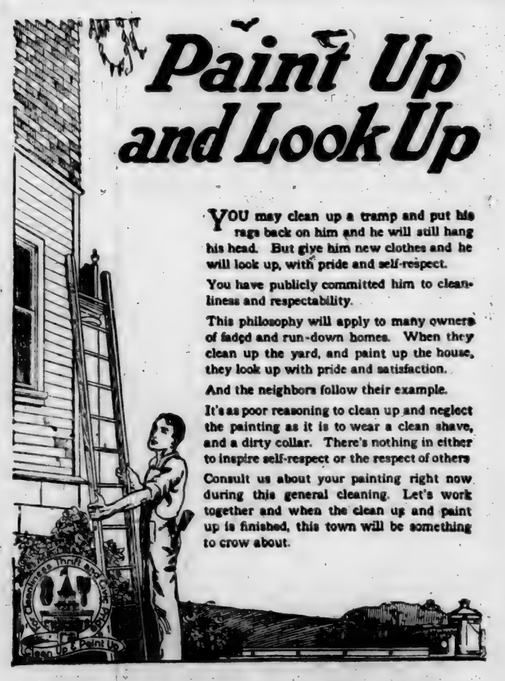
Fresh Fish on Wednesday and Thursday

Observe Clean-Up Week May 11-16

St. Joe Meat Market,

WILLIAM HARMAN, Proprietor.



YOU may clean up a tramp and put his rags back on him and he will still hang his head. But give him new clothes and he will look up, with pride and self-respect.

You have publicly committed him to cleanliness and respectability.

This philosophy will apply to many owners of faded and run-down homes. When they clean up the yard, and paint up the house, they look up with pride and satisfaction.

And the neighbors follow their example.

It's as poor reasoning to clean up and neglect the painting as it is to wear a clean shave, and a dirty collar. There's nothing in either to inspire self-respect or the respect of others

Consult us about your painting right now during this general cleaning. Let's work together and when the clean up and paint up is finished, this town will be something to crow about.

Kinsey Hardware--Furniture

Let us help you to start your Clean-Up. We have anything you need. Come in today.

Final Clean-Up Campaign Week May 11-16.

AILMENTS OF YOUNG GIRLS

Relieved by Lydia E. Pinkham's Vegetable Compound School Teacher's Experience

Evanston, Wyoming.—"A few years ago I had troubles every month such as girls often have, and would suffer awfully every time. I was teaching school and it made it hard for me as I had to go to bed for two or three days. One day my mother suggested that I take Lydia E. Pinkham's Vegetable Compound, which I did, and it did wonders for me. In the course of a year I married and after my first baby was born I got up too soon and it caused a displacement. This troubled me so that I could hardly walk or do my housework. I knew what the Vegetable Compound did for me before so I took it again. It strengthened me and now I have five little kiddies. The eldest is six, the baby is five months old and I have twin boys three years old and a boy of five years. I do all my own housework, washing and ironing, and I never felt better in my life. I owe my health to your wonderful medicine and I recommend it to all my friends."—Mrs. VERBENA CARPENTER, 127 2nd Avenue, Evanston, Wyoming.

How to build up your Weight

TO BE under weight often proves low fighting-power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood-cells, you begin to become plus. That's why S. S. S., since 1826, has meant to thousands of underweight men and women, a plus in their strength. Your body fills to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them.

BE MERCIFUL!

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is seen to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a cannibal. Croft rescues her. Croft discovers a party of blacks, apparently reconnoitering. Croft fixes up an electrical guard which scares off an attacking party. Secure from immediate danger, Croft and Barbara settle down to make the best of things. Croft, who has traveled much among savages, makes friends with the blacks. Croft and Barbara fall in love. The man betrays his passion but restrains it. The girl desperately tries to remain loyal to Hugh.

PART TWO—Continued.

—9—

IX

Near the blazing fire stood Croft. His hands hung loosely at his sides; his gaze was fixed upon the distant, heaving water. At the sound of the girl's hurrying steps, he turned quickly.

"A ship!" he announced briefly.

"Is it coming?"

"No."

Silently they looked at each other: the man inscrutable as ever, the girl clasping and unclasping her hands, her lips a little tremulous. In the turmoil of her emotions, she sank upon the ground at last, and buried her head in her hands.

Croft looked at her, his own feelings in much the same chaotic state. The hope of once again playing the part among his fellowmen—dear to a man of action—of achieving the ambitions ruthlessly destroyed at the very moment of attainment, had been raised and dashed almost simultaneously. But in that same moment he faced the full knowledge of what all this Eden-like existence meant to him—the immensity of his increasing hopes, bittersweet in their uncertainty. And, as the flames ascended, he faced abruptly the probable termination of it all!

He controlled, but not without difficulty, the emotions rioting within his heart, when those tense few minutes, fraught with so much meaning—such crucial pages in the Book of Fate—relaxed. When the far-off spiral of smoke faded into the clouds, as the distant vessel vanished, he leaped upon a bowlder and threw his arms wide. The gesture might have been a welcome to freedom, or an acquiescence in the inevitable; in either case it savored of "kismet."

He turned suddenly toward her.

"I am sorry," he said. "I feared it would upset you—today."

"Why today?" she asked curiously.

A look of incredulity crept into his face.

"It is December twentieth. Wasn't that to be your wedding day?"

She sank back, staring at him blankly. Twice she opened her lips to speak, but no words came. At last, slowly, she turned her gaze seaward.

"It was!" she murmured. "I—had—forgotten." Again her head dropped into her hands.

Low as the words were, he heard them. A wild joy flashed through him. Because he dared not trust himself or his voice, he left her—dashing, with throbbing pulse, toward the palm grove. Was there a singing in the air around, as if every bird upon the island had mistaken coming night for the dawn, or was it the inward song of his heart?

For long Barbara sat where he had left her, without looking up, though knowing that she was alone. She faced her shrinking soul for the first time; the beacon burned itself out beside her; the sun sank lazily in a sky aflame.

Until today she had taken for granted the supposition that, underneath the growing enchantment of this land, the craving for Hugh and rescue still predominated. . . . Full of shame, she realized this supposition to have been but a bubble burst at this first test. She understood, with a sense of shock, the small space now occupied by Hugh in her thoughts. Yet—he seemed, in memory, as dear as ever. Tears brimmed in her eyes; she realized, at last, how this very dearness proved its vast separation from love. . . .

Like a bird newly aware of freedom after narrowly escaping capture, she stood up and looked around with lingering eyes, which now knew how close a hold the brilliant scene had upon her heart. If ever rescue came, it would bring pangs of grief instead of the unalloyed joy she had supposed. . . . Again her thoughts turned to Hugh, wondering what were his feelings today. . . . And her sensitive heart smote her, overwhelming her with renewed shame. . . .

Hurriedly she set about laying supper, hoping vainly to still the awakened depths; then sought further occupation. Her glance fell upon her luggage. With sudden decision, probably induced by a hazy idea of recapturing the instincts of civilization to combat unruly emotions, she seized a box and opened it. . . .

When presently Croft returned, he was met on the threshold by a wistful-eyed figure clothed in something soft and white and altogether womanly, instead of the blouse and old skirt. He stopped abruptly; then with rather grim lips, smiled.

"So we returned to civilization in spirit, if not in fact?"

His uncanny knack of reading her motives caused her to give him, as usual, the swift deep-sea glimpse which he sought.

"Alan, I want to tell you something."

"What is it?" he asked, breathing quickly at what he saw in her eyes.

"I saw a shark today. And," hurriedly, "I—oh, Alan! I realized all you have done for me, all you have risked and spared me—"

"All my invisible halo, in fact?"

She ignored the flippancy. "And I feel simply full of—of—"

"Of—what, Barbara? What?"

"Gratitude—"

"Gratitude!" He turned away, with a short laugh.

"I can do so little in turn to make things tolerable for you here," she went on, in the warmth of her heart.

"Your life was so full—"

He looked round again quickly. "No fuller than yours with the man you—"

"Ah" she interrupted passionately. "Don't! I—know."

Her voice went into silence. For a long time he sat watching the darkness creep swiftly over the water.

A fierce craving for advice, sympathy even disapproval, so long as she could unburden her agitated mind, mastered the girl. She took one of her old impulsive plunges.

"I am so troubled!" she exclaimed suddenly.

"Tell me just what is troubling you," he answered, his voice softening. "Loneliness?"

The clasp of his fingers encouraged confidence.

"No, no! This wild life, this lovely island, seem to creep up and up, engulfing me, so that I—dread the thought of the old restricted existence. Alan, it's terrible. It—it's intoxicating—it frightens me! I never crave for the world and a wider sphere, as I did in Darbury. I know I ought to be pining for rescue; to long for—for—those at home; to be unhappy. I've tried, honestly! But—"

Laughter interrupted her.

"Tried! Have you really? Then—you are happy here?"

"That's the trouble; don't you see? I don't know why, but I am. I was even glad when the ship didn't come tonight! It's just as if there's some spirit in this island which—draws one up and up— Do you think me utterly heartless?"

He laughed again; and she wondered at the exultant ring of it.

"I think you're a goose—waking up! Have you only just realized the—'spirit'—on the island?" Then he became serious. "How could your unhappiness help those in England? They have long ago given us up for dead. Besides, no forced emotions are worth anything."

"No. That's the chief point: they shouldn't need to be forced. Hugh—once—called me heartless—"

He drew her hands downward, pulling her up close behind him.

"I'm going to talk quite straight, Barbara. I gather the real fact is—you are not fretting for—Hugh?"

She made no reply; but the fingers in his closed spasmodically. He went on, his voice low, and deeply earnest.

"Love can be forced least of all. If circumstances combine to prove that mistakes have been made, it is no good struggling against the knowledge! However painful, it is better than a lifetime of vain regret. One of the cruelest tragedies in this funny old world is the ease with which such mistakes can be made—unconsciously—all in good faith."

He turned his face upward and caught the glint of tears in her eyes. "Ah my dear! Don't take it so much to heart."

She gave a strangled little sob. "He—cared. Hugh will ever be—faithful. He is the truest—"

"Yes I know; one of the very best. But marriage with him, wouldn't have satisfied your nature. You know that."

"Oh!" she cried startled. "But I shall still marry him—if we get rescued. Please don't think me so disloyal as all that!"

He smiled over this third unconscious appeal for his good opinion. "D'you call it loyal, then, to carry out a compact when the very motive upon which it was founded has proved an illusion? You would be living a lie all your life—unfair to you both. Surely he wouldn't wish it?"

"You don't quite understand," she protested. "I am just as fond of him. It would still be the same."

"Barbara," he said softly, "the love of man and woman is not fondness."

She could not speak. Her heart seemed to rise in her throat and throb there; her limbs trembled. In sudden panic she tried to free her hands, her womanhood realizing his manhood as it had never consciously done before. The instinct of the wild bird to flee and hide was hers. Her turmoil communicated itself to him, in that vibrant silence. He looked up into her face, seeing there what he had but glimpsed on the night in the natives' hut.

"Barbara!" he whispered shakily, "Barbara! Be true to yourself—"

With a little cry, she wrenched her hands free. As he sprang to his feet she turned, and, without a word, fled into the hut. . . .

He stood still for a minute; then he drew a quick unsteady breath, and strode to the shore, to pace up and down up and down far into the night. . . .

Barbara lay awake throughout long hours facing in terrible isolation the great question of sex. What she had dimly realized and vaguely feared, since that revealing moment during their visit to the natives, now loomed up in its naked reality to alter the whole aspect of their life here together. She faced the true position: realized clearly that she and this man were cut adrift from all the safety of other human companionship, all the restraints of civilization, with this terrible, eternal attraction now menacing them. Escape from it was impossible. She understood now the nature of the abyss yawning below the precipice which had threatened her of late. This new knowledge illumined the past, even to the strange magnetic attraction,

Turned and Fled Into the Hut.

half-fear, in the early days of their acquaintance. It terrified her, shaking her confidence. Her one shield and protector in all they had faced now appeared in the light of the enemy against whom she had no ally!

When she remembered the close clasp of his hands, the pressure of his head upon her breast, her pulse throbbed and her face burned. It must quit, she told herself repeatedly: this delightful, impossible tenderness between them must be stopped at once. She must resolutely hide her womanhood, showing nothing but the sexless comrade!

As soon as the soft light of dawn had entered the tiny room, she rose. Taking her scissors, she cut through handful after handful of her long thick hair, wasting no regrets upon the luxuriant tresses piling round her bare feet.

So far, so good! But it happened that Barbara's heart remained unshorn of its sex, with all its natural tendency to look well. When the hair was cut short to her neck, she hesitated; picked up the diminutive mirror; laid it down; picked up the scissors; hesitated again—then laid them down, and gave her head a vehement shake. The short waves and curls, free from all restraint, followed their own sweet will, waving piquantly around her small head, clustering about her ears. . . .

Alan stood in the outer doorway, watching a bird preening its bright plumage on a rock. He turned in surprise at her early appearance; but the words of greeting died upon his lips.

"What have you done?" he ejaculated.

She laughed self-consciously, giving her "bobbed" head a shake, eluding his eyes.

"Oh! I—just thought I would cut my hair," she replied, with elaborate carelessness.

"All your beautiful hair!" he murmured, his gaze never leaving her.

"Girls are out of place here!" she observed.

A moment's reflection, and he had decided on his course. "I see. Henceforth, then, we are—two gay dogs together? What a good idea!"

His tone was cool enough for a dozen nervous women. She was conscious of a great relief as she joined him in the doorway.

X

The next few days were strangely happy. The faint chance of rescue caused their little hut to seem dearer, the wild free life more enchanting. The spirits of both had never been so high. Barbara, having conquered the sex problem with such sublime simplicity, cast it from her mind, surrendering herself wholly to the engrossing happiness of the moment.

That her very subterfuge, proving all it did, had been the death-knell to her object, never entered her head.

On Christmas eve they collected armfuls of greenery, the girl clinging with unconscious pathos to the old customs in which she had been reared.

"Ah!" she cried inconsequently, "Isn't it all—beautiful?"

"What?" he asked, yet knowing full well.

"Oh—everything! Christmas—here—Freedom from Mr. Horne!" She sprang upon a suitcase, trails of vine in her hands, and laughed down at him.

He came close to her, the same ecstasy lurking in his own eyes.

"I wonder if you realize all you have implied?"

"What?" She looked startled.

She turned away, and fastened a vine tendril to the bamboo. He watched her silently, noticing the change wrought in her by these past months. The wild-rose air had vanished: in its stead the warm blood flowed red beneath a sunburned skin; her feet were brown and hardened. Yet, where the depths were concerned, remained the old timidity which was, paradoxically, her greatest lure and protection. On false step and she would, he knew, be "off on the wing," scared as a young partridge. But Alan's small store of patience had been drained to the last dregs.

Finishing the decoration, she paused beside him, considering the effect. Ferns and palm leaves swayed in the corners; trailing greenery decorated walls and roof; flowers stood upon the cabin table.

"Cozy, isn't it?" she asked, looking up for his approval.

"Very cozy!" he replied, looking only at her. "What a little home-maker you are."

She flushed, and again turned hastily away.

"We'll hang this remaining vine over the entrance, outside. Will you bring the suitcases?"

He carried out the substitute for a ladder; and up she sprang. Deftly with the art of experience, she caught the trailing foliage up here, letting it hang in clusters there.

"And that middle cluster?" asked Alan, beside her. "Is that for mistletoe?"

Her head rose quickly, as that of a young deer scenting danger. With a quick glance down at him, she stretched out her hand toward the bunch; but he put up a long arm to prevent its removal: And, in a flash, all the security of the past days fell to ruins. For while she strove again to seize the vine leaves, the suitcases overbalanced and she toppled down upon him.

He caught her and held her. He clasped her close to a thumping heart and buried his face in her hair. . . .

For a moment she lay inert; then she began to struggle, gasping, sobbing.

But his self-control was going. His grip became fierce; she felt his hot breath upon her neck. . . .

"Alan!" she cried wildly. "For God's sake—"

The fear, as of one drowning, in the cry, steadied his reeling senses. Still clasping her in his arms, he sank down upon the rock. His darkened eyes mesmerized her own; the abyss yawned wide at her feet . . . she was conscious only of being swept along caught in some remorseless torrent toward the edge of the precipice . . . slipping, falling . . . his lips were close to her own. . . .

"Alan!" with almost superhuman effort she managed to gasp his name again. "I can't bear it. No! No! Be merciful!"

Faintly, with parched mouth, the desperate petition seemed wrung from her very soul.

His arms relaxed abruptly, a subtle change coming into their grasp when he realized her trembling.

"Why are you afraid?" he murmured unsteadily.

She raised herself, her face very white under its sunburn.

"Don't you see? If you do—this how can I go on living with you here?"

He smiled faintly, the mad tumult of his blood abating.

"Where else would you live? With the natives for—chaperonage?"

She drew a sobbing breath, looking around with a pathetic gesture of helplessness which touched his heart. The passion faded yet more from his face. He pressed her against him again, this time protectively.

"The way of a maid with a man" is one of the mysteries. What next?

(TO BE CONTINUED.)

WRIGLEY'S

"after every meal"

Parents—encourage the children to care for their teeth!

Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth.

Refreshing and beneficial!

Pocket Screwdriver

An inventor has designed a folding screwdriver that can be carried in the pocket with one's knife. Three blades of different sizes lock and open separately, giving the compact tool a wide range of usefulness. When the blades are not in use, they are locked tight in the handle.

Soap, Ointment, Talcum sold everywhere.

Riches Defined

Riches do not consist in having more gold and silver, but in having more in proportion than our neighbors.—Locke.

Crisis for Men

A traveling salesman standing in the lobby of a downtown hotel was discussing men's clothes. "The trouble with suits," he declared, "is that when you buy one made from a material that will wear a long time you have a suit that is not very attractive. On the other hand, the suit that looks well on you and makes a good impression on others is of the sort of material that not only loses its shape quickly but wears out quickly. I hope some manufacturer some day looms a cloth that will have the toughness of the one mingled with the beauty of the other. Then the situation will be cleared."—Detroit News.

MRS. URQUHART GETS REWARD

Mrs. Urquhart of Omaha wants every housewife to share her good fortune in possessing a handsome reward. Here is what she says: "This is the way I did it. I answered an ad by writing for a free 10c bottle of Liquid Veneer and I found it so wonderful for dusting and polishing that I told fifteen of my friends about it and the makers sent me entirely free and postpaid, a great big, beautiful $2.00 Liquid Veneer Polishing Mop." Then Mrs. Urquhart goes on to say: "I am very proud and pleased with the reward given for what I have done, so will take great pleasure in showing it to friends."

Twenty thousand of these $2.00 Mops are going to be given away to housewives. Write for a free 10c bottle and ask for descriptive circular 15 telling how easily you, too, may have one of these mops. Address Liquid Veneer Company, Dept. L, Buffalo, N. Y.—Adv.

Limit in Laziness

"That fellow Lopp, who loafs around here so much, is very lazy, isn't he?" asked the traveling salesman.

"Eh-yah!" replied the proprietor of the crossroads store. "He's too thundering lazy to even take pleasure in bragging about how hard he used to work before he got down in the back."—Kansas City Star.

Children's handkerchiefs often look hopeless when they come to the laundry. Wash with good soap, rinse in water blued with Red Cross Ball Blue.—Advertisement.

A Poor Cook

Wife (a puzzle fan)—"John, name some food products." Husband—"Dyspepsia and doctor's bills."

Get back that lost weight!

WHEN you start to waste away to a shadow, when the color leaves your cheeks and your poor, tired legs will hardly hold up your weakened body it's high time you started taking a fine tonic and builder like Tanlac.

Tanlac will build you up and make you feel that life's worth living. Made from roots, herbs and bark gathered from the four corners of the Earth and compounded under the exclusive Tanlac formula, Tanlac is just what the poor, starved body needs.

First of all it cleanses the blood stream and puts the digestive organs in order. You find, after a few days' treatment, that you want to eat. Pretty soon the welcome color steals back into your cheeks and the scales tell you that you're gaining weight. From then on it's only a short time until you're feeling fit as a fiddle.

Millions of men and women have taken Tanlac with great benefit. More than one hundred thousand people have written us glowing tributes to this wonderful tonic.

First Bottle Brought Improvement

"Pains in my side and back caused me lots of trouble day and night. I could hardly walk my beat. Tanlac fixed me up quick. I noticed the improvement after the first bottle."

Patrolman Wm. J. Bader
324 Paul Ave., Belleville, Ill.

When you know it has worked wonders for so many folks it's folly not to take advantage of Tanlac's help yourself. Don't put it off another day. Get a bottle at your druggist's now and start the good work right away.

TANLAC
FOR YOUR HEALTH

INDIANA BREVITIES

Indianapolis.—Appointment of Dr. H. C. Haas of Peru and Dr. J. A. Turner of Nashville, as members of the state board of health, was announced. The appointments were made by a statutory committee composed of Gov. Ed Jackson, Frederick E. Shortemeier, secretary of state, and L. S. Bowman, auditor of state. Doctor Haas is the first homeopath ever to receive appointment as a member of the state health board.

Washington, D. C.—The Interstate Commerce commission has ordered an investigation of the lawfulness of the interstate rates and charges on milk and cream by express and by railroad in baggage car service, from, into and through the state of Indiana. The purpose of the investigation is to determine whether the rates and charges are unreasonable or in contravention of the interstate commerce act.

Indianapolis.—Appointment of H. D. McClelland, 3638 North Illinois street, for the last several years director of the automobile license department of the secretary of state's office, as chief clerk of the state highway commission was announced by John D. Williams, director of the highway commission. Richard W. Bruene, of Indianapolis, became head of the automobile license department.

Anderson.—Five persons of one family were killed and the sixth probably fatally injured when an automobile was struck by an interurban train on the Union Traction line near Ingalls. The dead are Mary Cottey, twenty-eight, wife of Ralph Cottey, 2318 North La Salle street, Indianapolis; her children, Jennie, eight; Dorothy, six; Ralph, Jr., three, and Lincoln Cottey, sixty-three, her father-in-law.

Gary.—Former Mayor R. O. Johnson of this city, convicted with others in the famous Gary rum plots, delivered a pre-jail swan song to Gary citizens in the Gary armory, when he staged a public indignation meeting. Immediately afterward he boarded a train, with 35 other convicted officials and minor defendants, for Indianapolis, where he surrendered to federal authorities.

Indianapolis.—Harry Keely, age forty-three, 3768 North Meridian street, was shot and fatally wounded, and police are searching for a mysterious young woman, dressed in black, who Keely told police, shot him. Although Keely said the young woman shot him, he said he did not know her name nor where she lived. Keely died at the City hospital.

Noblesville.—William O'Hara, colored, whose trial for murder in the first degree was to have started in this city Monday, entered a plea of guilty to the charge of murder in the second degree and received a life sentence. Last May O'Hara shot and killed Ella Hester, said to be his common law wife, in Indianapolis, while in a jealous rage.

Kokomo.—M. W. Haynes was appointed administrator of the estate of his father, Elwood Haynes, automobile inventor and manufacturer, who died in this city. He gave bond in the sum of $500,000. Mr. Haynes left no will. The heirs at law are the widow, Mrs. Bertha Haynes, the son and a daughter, Mrs. Bernice Hillis.

South Bend.—South Bend's lightning holdup man, Albert Briant, who, within 30 minutes, held up and robbed four stores while the police were looking for him in connection with the shooting of Joseph Berman, a grocer, has escaped from Marquette (Mich.) prison, local authorities were advised.

Goshen.—Cassius Rockwell, age sixty-three, a farmer, living seven miles south of Allegan, Mich., was robbed of $12,300 while sleeping in his automobile in the park, according to a story he told the police. Police believe that Rockwell was chloroformed and robbed while he slept.

South Bend.—Elizabeth Irene Aspinall, twenty, Peru, was sentenced to serve from ten to twenty-five years in the women's prison at Indianapolis for automobile banditry. She is the first woman in Indiana to be convicted under the auto banditry law.

Indianapolis.—With his wife and nine-year-old daughter with him, Benjamin Gilst, Chicago, was arrested on the National road west of here, with 115 gallons of alcohol in a special compartment in the rear of the car.

Goshen.—All churches of this city were without services Sunday as the result of the city health department's drastic scarlet fever quarantine adopted in an effort to guard against spread of the disease.

Goshen.—Edward A. Rimpler, brother of Mayor George H. Rimpler and chief of police here since January 1, 1922, when the Rimpler administration became effective, resigned, effective April 30.

Logansport.—Israel J. Berry, eighty-five years old, known throughout Cass county as "the sweet singer of Eel river," is dead at his home here.

South Bend.—The sum of $52,500 has been appropriated by the St. Joseph county council as the county's share in the expense of eliminating the notorious grade crossings on the auto trunk highway at New Carlisle. Three subways are to be constructed.

Anderson.—Joseph Hennings of the board of trustees of the Pendleton reformatory said only the roof remains to be finished to complete the new dormitory K, which will provide room for 300 inmates, and relieved congested conditions. There are 1,416 inmates in the institution.

TO URGE WAR ON TUBERCULOSIS

Indianapolis.—A report of a state-wide tuberculosis survey, recently completed by Dr. H. R. Edwards, medical field secretary of the National Tuberculosis association, which contains recommendations for a new modern tuberculosis hospital in southern Indiana and the remodeling of the present institution at Rockville, has been submitted to the state board of health.

State health officials, who are making a study of the report, say that the recommendations point to a goal toward which Indiana must strive if it is to attain the best in treatment and control of tuberculosis.

Doctor Edwards recommends that the board of health form a tuberculosis division and appoint an expert in the cure the disease to direct its activities. He urges the further development of the full-time city and county health-officer system and a more modern, accurate and complete system of recording the disease.

Much can be done along educational lines in the prevention of the disease if a health and anti-spitting crusade is maintained in grammar and high schools, the report asserts.

Indianapolis.—Mercuric poisoning apparently caused the death of Miss Madge Oberholtzer, said the pathologic finding reported to Dr. Paul F. Robinson, coroner, by Dr. Virgil H. Moon, pathologist of the Indiana university school of medicine, who conducted an autopsy on the young woman's body. Miss Oberholtzer died a week ago. She told her parents and Dr. John Kingsbury, the family physician, that she took bichloride of mercury because of humiliation after an attack on her. She alleged the attack was made by D. C. Stephenson, who, with Earl Klinck and Earl Gentry, now are in jail charged in an indictment with first degree murder because of the death of the young woman.

Clinton.—Ralston (Blackie) Linton, convicted bank robber, who escaped from the Owen county jail at Spencer April 15 for the second time, surrendered to Sheriff J. E. Lucan, and two deputy sheriffs after exchanging shots with the Owen county officers and three Clinton patrolmen at Centenary, in which more than 50 shots were said to have been fired. No one was injured.

Wabash.—Damages in the amount of $25,000 have been awarded to heirs of Samue. J. Whitcomb, a Wabash railroad fireman who was killed in an accident near Attica on November 12, 1923. The judgment is apportioned among members of his family, $6,000 going to the widow, Irene Whitcomb, and the remainder being divided among his five children.

Lafayette.—Prof. G. A. Young, head of the school of mechanical engineering at Purdue university, made the address of welcome at the opening session of the state conference of operating engineers, power engineers and executives, which convened in the Purdue Memorial Union building. An exhibition of equipment used by power plants was a feature.

Marion.—Seven persons were injured seriously, when an automobile in which they were riding skidded in fresh gravel and turned over on the Muncie pike four miles east of Matthews. Those hurt were: James Kirkpatrick, Mrs. James H. Kirkpatrick, Mr. and Mrs. William E. Mason, Mr. and Mrs. Lindley Kirkpatrick and child.

Elwood.—The congregation of St. John's Evangelical Lutheran church saw years of effort to obtain a new house of worship realized Sunday when a $35,000 brick church in North A street was dedicated. Members of the denomination from several nearby cities attended.

Anderson.—Temperature of 84 degrees in Anderson caused men to adopt straw hats. Ice dealers reported an increase in business. Farmers reported the weather ideal for growing crops.

Michigan City.—John Hizarek, thirty-one, committed suicide by hanging in a cowshed on his farm near here, where he lived with his mother and brother. They had quarreled.

Fort Wayne.—John J. Dooley, thirty-two, a trained nurse, was sentenced to serve two to fourteen years in prison when convicted on a charge of forging a check for $25.43.

Terre Haute.—Phillips Jones, age seventy-six, commander of the John P. Baird Post of the Grand Army of the Republic, died at his home here.

Huntington.—The state board of health has condemned the high school at Clear Creek the building being held to be insanitary and unfit for use.

Bloomington.—Fifteen Latin pupils in Indiana high schools received their decorations from Indiana university.

Evansville.—Two out of every five persons who filed suits for divorce in Vanderburg county in 1924 had them dismissed before they came to trial, according to Miss Marie Aichtenfeld, deputy county clerk, who has compiled divorce data for the year. Divorces are on a decrease in Vanderburg county, the records show.

Fort Wayne.—Lewellen B. Hissem, fifty-three, and his son, Jesse, thirteen were instantly killed near Bluffton when a truck in which they were riding was struck by a Lake Erie & Western train

Began in Humble Life

Many famous French actors and singers have sprung from working families. Verdier, one of the best singers in France, was a village blacksmith, while Franz, the leading tenor of the Paris opera, was employed by a railroad company as a brakeman until he was forty years old. Antoine, famous actor and manager, started life as a clerk for an electric light company, while the comedian Chevalier had a fruit stand near the Comedie Francaise. Note, once famous baritone, was a railway porter. Xavier Privat, a favorite of the Montmartre cabarets, used to be a beggar. He sang in the streets for a few cents or a crust of bread.

Fresh Strawberry Shortcake.

Sift 4 cups of flour in large mixing bowl, add 4 teaspoons Calumet Baking Powder and 2 teaspoons butter, pinch salt, two eggs and enough milk to make a soft dough. Place the dough in layer cake pan and bake in hot oven for 20 minutes. Cool and split in 3 layers. Spread 3 tablespoons butter between the layers and let cool. Cut cake in desired size and pour fresh crushed strawberries over cake. Serve with whipped cream.

Amounts to Same Thing

There isn't any doubt that a couple of men get the same gratification out of a day of spring fishing that a couple of women get out of a day of spring shopping.

The charm of a bathroom is its spotlessness. By the use of Red Cross Ball Blue all cloths and towels retain their whiteness until worn out.—Advertisement.

Progress of Civilization

It is related that the first table fork was brought to America in 1633. Now we have so many we don't know what they're for.—Toledo Blade.

Dr. Peery's "Dead Shot" is not a lozenge or syrup, but a real, old-fashioned medicine which cleans out Worms or Tapeworm with a single dose. 372 Pearl St., N. Y. Adv.

The SANDMAN STORY

VAIN RED ROSE

ONE morning in a garden there was a little Dewdrop that wanted to get away from the sun's hot breath that it might stay in the garden all day, so it nestled close to a beautiful red rose and whispered: "Hide me, beautiful Rose, in the soft petals of your lovely gown."

The Rose was very vain and thought only of her own beauty, so she told little Dewdrop to creep close inside and nestle in her heart, for she wanted to keep it until moonlight flooded the garden, when her lover the nightingale would come to sing to her his love song.

Away down deep in her heart crept little Dewdrop, thinking that Red Rose must love it to let it rest in her heart and that when night came it would

Lifted It in His Bill and Carried It to Another Rose.

shine on one of the beautiful red petals of the rose and they would be the most admired of all the garden folks.

But it did not know the cold, vain heart of the beautiful rose and all day long she kept Dewdrop from peeping once into the garden, as it longed to do, for fear of losing the jewel she wished to adorn her beauty at night.

By and by when the moonlight crept into the garden and made it almost like day the big red rose opened and told Dewdrop to rest upon one of her soft petals.

"Tonight I shall be the loveliest rose in the garden, for I can see that none of my sisters wears a jewel. How fortunate you are, little Dewdrop, to have me near you!"

Just then the sweet tones of the nightingale's love song filled the garden and Red Rose swayed a little in the breeze that her jewels might sparkle in the moonlight and make her more beautiful in the eyes of her lover.

When the nightingale flew closer and told the vain rose she was indeed the most beautiful rose in the garden she tossed her proud head and down tumbled the poor little dewdrop to the ground.

"Now see what you have done!" said the angry rose. "After I sheltered you all day you repay my kindness in this way." Never a word did she ask about the poor little dewdrop that lay trembling on the ground below.

"Rose, dear Rose," cried the dewdrop, "do bend over and help me to rest again on your soft cheek!"

"Bend over, indeed," replied the rose. "Why, you foolish thing, I might break my slender stem. You have spoiled my evening by tumbling off and you expect me to help you."

"But don't you love me, Rose, dear?" asked the dewdrop, who had been all day close to her heart and had grown to love her deeply.

"Love you!" exclaimed the vain rose. "Why, you silly little drop, I only saved you from the sun that you might make me more beautiful at night when the nightingale came to sing to me."

The nightingale had ceased his singing and had heard what the vain rose said, so he flew down to the dewdrop and gently lifted it in his bill and carried it to another rose more fragrant than Red Rose but not so beautiful.

Into the very heart of the pale pink rose the nightingale dropped the dewdrop. "Here you will find sweetness that will be worthy of your love," said the nightingale. "Here will I come each night and sing my love song, for the red rose has no heart for love. It is filled with vanity."

For her vanity and cruel treatment of little Dewdrop the proud red beauty not only lost her jewel but her lover.

The Why of Superstitions

By H. IRVING KING

THE WREN

IT IS an omen of good luck to have a wren build its nest near the house. This, with the exception that it is also considered in some sections bad luck to kill a wren, appears to be the only survival in this country of the mystic character which pertains to the wren in Europe and has so long attached to it there that Professor Frazer considers the ceremonies attending the wren superstition to have "come down from a very primitive paganism."

The ancient Greeks and Romans, the modern Italians, Spaniards, French, Danes, Swedes, English and Welsh, regard the killing of a wren as sure to bring disaster to the slayer. But notwithstanding such belief the annual custom of "hunting the wren" was, to comparatively recent times, universal throughout Europe and exists in a modified form in many sections today, as, for instance, in the Isle of Man where on St. Stephen's day a wren is annually killed and buried after its body has been taken around the village and shown to the inhabitants.

The ceremony of killing the wren differed slightly in different countries but was everywhere rather elaborate. This annual slaying of an animal considered sacred and not to be killed at other times is a custom found among many peoples still living in a primitive state and was once common to primitive man. Frazer says: "The worshipful animal is killed with especial solemnity once a year and before or after death is carried from door to door that each of his worshipers may receive a portion of the divine virtue that is supposed to emanate from the dead or dying god. Religious processions of this sort must have had a great place in the ritual of European peoples in prehistoric times if we may judge from the numerous traces of them which have survived in folklore."

CARELESS

Jim Crow—My it's a wonder these folks wouldn't have the grass cut in their front yard!

Little Ladies Appear in Coat and Hat Sets

There was never anything sweeter than pretty coat-and-hat sets for little girls of four and up. One of them is shown here, in checked flannel, which may be had in many color combinations. The straw on the hat matches the darker color in the flannel.

Faultless Tailoring in Two-Piece Suits

When stylists call the new two-piece suits "mannish" they refer to their simplicity and irreproachable tailoring, for colors and materials are definitely not mannish. A delightful spring model is pictured in a tan and brown cross-bar material with the fewest number of bone buttons possible to use for finishing. It is a faultless suit with skirt ten inches from the floor.

Notice Administration

2939

NOTICE IS HEREBY GIVEN, that the undersigned has been appointed by the Clerk of the DeKalb Circuit Court, of the State of Indiana, Administratrix of the Estate of William P. Steward, deceased, late of said County.

Said Estate is supposed to be solvent.

HAZEL STEWARD,
Administratrix.

April 28, 1925.
Atkinson & Husselman Attorneys

The Rev. D. G. Holman of Lyons, Ohio, has accepted the pastorate of the Garrett Church of Christ and will take charge on June 7 Rev. Holman is at present pastor of the Lyons Christian church He is a graduate of Bethany college, West Airginia, class of 1923 During the World War, Mr. Holman served overseas with the U S infantry and was wounded while in action. After he graduated from college he taught school for one year in North Carolina. The Rev Holman is a native of Livingstone. Tenn., and is twenty nine years of age.

Day Frocks Require Collar and Cuff Sets

Nearly all those pretty day frocks that form the mainstay of summer wardrobes, whether in silk, linen or cotton, require collar and cuff sets as a finish. These sets are fanciful or tailored, and lace, net, embroidery, ribbons, plain and striped linens and wash silks are used for making them.

Schoolgirls' Coats Remain Smartly Simple

The pretty coat pictured here may be taken as a criterion of good style for the younger schoolgirls. Note its double-breast, simulated patch pockets, which are really slit pockets and straight lines. The rough-surfaced material is in tan and brown.

Pretty Lace Sets Enliven Dark Suits

The suit, coat-frock and day dress of dark dependable wool cloths remain the best choice for busy women of affairs. But in these days of joyous apparel they must be livened up with accessories — collars, vestees, jabots or scarfs that are light in color or white. Dark colors near the face are unbecoming.

FLATULENCE

those distressing pains caused by gasses in the stomach and intestines, often aggravated by liver disorders and constipation, relieved and the tendency overcome by

Chamberlain's Tablets

Slats' Diary

By Ross Farquahr

Friday—Well I diddent have a very good time at the party tonite

down to Elsys house. Jane she seamed to spend the majority of her time a dancing with Blisters and also Pug Stevens and when we did finly get to gather why evry thing I wood say to her why sheed jus anser yes or no or mebby nod her hed. Honastly she was so cold that if she had of set on a cake of ice it wood of burnt her I xpeck.

Saterday—We diddent get to play base Ball today Sum buddy went an plowed up the lot we was useing. Just when we was a getting a good start for the Seeson. I went to ole Man Hix and ast him cud we use his lot from now on. I gess mebby it will be all rite. For he sed. Well yong man I wood like to see you try it.

Sunday—Pa was a telling about Ike Nitson today. His wife kep ensisting at wifes shud ought to be payed Wages. So finely he got tired an he went an got her a job in the lawndry so she cud get her Wages.

Monday—Ant Emmy told us this evning that one of are frends up town called up and wanted us all to go out rideing with him in the New Moon. but she turnt him down She sed he must of ben all entoxicated or sum thing.

Teusday—I ben haveing a grate eel of trubble with my rithmetick here of lately and tonite the teecher kep me in to tawk about it and ect. She sed Is it so hard to lern. And I replyed and sed. No it dussent seam so hard to lern. but it is so easy to fergit thats the trubble I gess.

Wensday—Pa was asting ma if Joe Clute was as old as his new wife is and ma told him. Why I shud say not why he aint even as old as she Says she is.

Thirsday—Ant Emmy wood stir up sum trubble if we wood let her go sum times. Oney today she got all xcited up and finely ma found out that it was becus pa was going down to by a ribbon for her type Riter.

HEARD AROUND THE CORNER

Clarence Henly went to Fort Wayne Saturday evening and remained until Sunday evening with his sister, Mrs. Howard Williams.

Byron Miller, who is doing road work at Roco, Ohio, came home Friday for a few days on account of his mother's illness.

Two children in the Mack Richmond family are suffering with typhoid fever.

Sam Stafford is suffering with rheumatism.

Fashion Chooses the Ensemble Suit

At the very head and front of accepted spring styles stands the ensemble suit, developed in as many ways as there are stars in the sky and adapted to youthful women as well as to older ones. It is here shown with a frock of printed crepe and a coat of a corded material, lined with silk like that in the dress. Fashion has lost its heart and its head over ensemble suits.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

THELMA

NO LIST of feminine names would be complete without the lovely Thelma. It is a Norse name, suggestive of the mythology of the Land of the Midnight Sun where Valkyries drive their gleaming chariots over the battlefield and conduct the glorious dead to their appointed places in Valhalla.

Little was known of Thelma and seldom was the name used outside of Scandinavia, until Marie Corelli in her sensational novel of that name presented the tragic love story of a beautiful Norwegian who was transplanted from the land of fjords to the center of London's smartest and most corrupt society.

From that time the number of Thelmas in England and America were legion. The name has had particular vogue in this country where the Scandinavian immigration is great. As a romantic and poetical name, Thelma is without equal, but her popularity has never extended beyond Scandinavian and English speaking countries.

Amber is Thelma's talismanic stone, it will guard her from all evil, especially from contagion. To wear it on a journey will preserve her from accident. Monday is her lucky day and 7 her lucky number.

Morpheus and Somnus

Morpheus, the ancient Greek god of dreams, was early pictured as an old man with wings. He held in his hands a vial or horn from which issued the sleep-producing vapor. Morpheus was the son of Somnus the god of sleep. The name Morpheus is derived from a form, and the name was given to the god of dreams because of the shapes or forms which he calls up before the dreamer.—Family Herald.

A LINE O' CHEER

By John Kendrick Bangs.

THE ROSE

I'LL never think of this old earth
As lacking utterly in worth
So long as in some garden close
I still can find the budding rose—
Beauty and fragrance all combined
In one rare flower of grace, and kind
To every passer-by with wit
Enough to pause and joy in it.

(© by McClure Newspaper Syndicate.)

Coats That Reveal Spring's Signature

There is no mistaking the signature of Fashion on the handsome coat shown here. It is written in the soft, suede-finished fabric, in its wood-brown color, and finished with many flourishes, in braid embroidery that adorns the front and sleeves. Two small pockets, inserted in the long revers, introduce a new style-point.

Overblouse Adapted to Many Materials

Day by day, in every way, the overblouse grows more simple but not less smart. Here is one which bears this spring's signature, being minus a hipband but possessed of the new slashed collar, laced fastening and satin bindings.

One More Deposit Will Make the First Thousand--

Are you one of the many happy families of this community who are nearing or have passed their **First Thousand Dollars** in their Savings Account? HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

FAMILY OF DOLLS FOR SMALL GIRL

For the modern child has been invented the combination doll. It is many nations, any age and both sexes to the child who has but one doll to caress. Now it is a Dutch girl with flapping cap, long golden braids and bodice, now it is a clown with painted face or a cry-baby with tears on its cheeks. It may be a flossy French toddler with long golden curls or a neat Red Cross nurse with bobbed black curls. It may be a slant-eyed Chinese, a dusky black boy or an Indian papoose. The doll alters its countenance, as well as its frock. Besides a trunk full of dresses, the little mother has a box full of heads. She may get a body with a couple of changes, then add to her family by acquiring more heads. With each head comes a costume to match. The body is made with a brass plug neck and the heads have brass sockets to fit. With two turns the head is removed, and with two more another is fitted snugly in place. Thus a dozen dolls may be had in one.

Taking a Chance

"Want to take a chanst?" asked a producing manager of Yorick Hamm, the eminent comedian. "I can use you in a show, but can't pay salaries until we see whether the show is a winner."

"How's a fella gonna live?"

"That's the chanst I'm offering. In act 2 we eat a meal on the stage. It's a bedroom farce, with sixteen beds. That solves your rooming problem. All you gotta dig up is brekfast, and if you sleep all day you won't need any."—Louisville Courier-Journal.

Interlarded Proposal

"It was at the luncheon table that he proposed to me and he wasn't at all put out at the arrival of the waitress. 'You know, my dear girl,' he began, 'that I have grown very, very fond of you. We'll have something cold, waitress. Cold beef for two. I want you to be my wife. Yes, salad, please. You are quite indispensable to me. Boiled, if you're sure they're mealy, otherwise mashed. You'd like potatoes, wouldn't you, Prissy? Now, darling, do say "Yes" and make me the happiest man in the world. Hi, bring some Vienna rolls, waitress.'"—From an English Book.

Throwing Sand in Eyes

The expression, "Throwing sand in their eyes," is said to have had its origin in southern Siberia, where the tribes depend for safety largely on the fleetness of their horses. The land is very sandy and the method of repulsing an opponent was by means of a handful of sand tossed at him, with the result, if the aim was good, of at least temporary bewilderment and blindness.—Family Herald.

Costly Lawsuit Over Egg

Alexander Muir, a farmer near Aberdeen, Scotland, sold twenty hens to his neighbor, Angus MacDonald, but delivered on the morning of the sale only nineteen, producing the twentieth one late in the afternoon of the sale day. MacDonald asked why, and learned that Muir retained the one hen, which had a peculiarity of laying in the afternoon, until she had produced her daily egg. They went to court on the issue and lawyer fees and court costs soon mounted to $6,000.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

ASTHMA FROM HOUSE DUST

ASTHMA, like hay fever, was until recently a disease which no one could explain. You either had it or you didn't have it. If you had it you were subject to sudden uncontrollable spasms, when you couldn't breathe, when you choked and gasped for air. Other people, perhaps your immediate relatives, sat in the same room, breathed the same air, ate the same foods, did the same work and were entirely unaffected. The spasms would come on without warning, they would disappear without reason. Some patients claimed that their attacks were brought on by going into a stable, driving behind a horse or even passing a horse on the street. But this seemed too ridiculous to consider.

Then it was found that certain foods or drugs would cause attacks in certain persons. Now it is pretty well proven that most cases of asthma are caused by inhaling some substance that is harmless to most people but irritating to the asthmatic. Like hay fever, it may be caused by fine seeds from plants, by dander from a horse, by dust, by chemicals, such as formalin, or whatever is the irritating substance which causes a spasm in each particular person.

This personal sensitiveness to a food, a drug, an odor or a dust, which may produce asthma, hay fever, skin rash or vomiting in the sensitive person but which produces no result whatever in the normal person, is called allergy. What causes it we don't know.

One of these substances is house dust, the dust that collects in the ordinary house, that fills the rugs, the cushions and the curtains, that settles on the mantles and the tops of the book cases. Why it should be especially irritating to some people and harmless to others, we don't know. Out of every 327 asthma cases which Doctor Cooke studied, 109 or 33 per cent were sensitive to house dust.

This may explain why some housewives always have an attack of asthma after spring house cleaning and why some men, who have been accused of laziness because they tried to get out of beating the rugs, were really trying to avoid a spell of asthma.

WILL CORSETS COME BACK?

ACCORDING to the cablegrams and news letters from Paris, that center of woman's dress, corsets are coming back. Once more women are going to have a definite waistline. For many years now the waistline has been on the move. One year, it was up under the arms. The next year it was down nearly to the knees. But wherever it was, it didn't stay long enough to do any harm. A movable waistline does no great damage. It doesn't stay in one place long enough to tempt any woman to make her body fit her waistline, instead of her waistline fit her body. But when it is fixed in one location for years, then it causes trouble.

The present generation doesn't realize what kind of clothes women wore thirty years ago. They regard the pictures they see occasionally in the magazines or the clothes they see on the stage in old plays as burlesques and caricatures. Naturally, each generation thinks the clothes of the previous generation were "screams." Any girl of today who had to wear her mother's clothes would scream getting into them.

Among my cherished treasures I have a photograph of ten girls in my college class of 1894. They were the average age of college seniors, from twenty-two to twenty-four. They look as old as women of fifty do today. Each girl has on a heavy cloth dress, with a high, stiff collar up to her ears. The sleeves of heavy, woolen cloth are skin tight at the wrists, swelling gradually to huge balloon-shaped structures, which rise way above the shoulders. Each girl has on a tight-fitting basque and a long heavy skirt which touches the ground in front and drags behind.

I didn't know as much about women's clothes then as I have since learned, but it's safe to say that every one of those young girls had worn a stiff, tightly laced corset every day of her life, since she was twelve or thirteen years old. They had to catch 'em young in those days. Not only that, but little girls cried to be allowed to wear corsets and long skirts, like their big sisters.

One of the leading authorities on diseases of women, in a book published about this time (1894) said that the average woman, at that time, wore seventeen layers of cloth about her waist and that together they formed a bandage thirty-four feet long. How many layers does the present college girl wear? Vogue, the leading authority on woman's dress, says that the present-day girl wears just three garments under her loose, one-piece dress. The flapper of today hasn't any waistline and never has had and is all the better for it.

Will corsets come back? Not if American girls have anything to say about it.

Lesson for May 10

PHILIP AND THE ETHIOPIAN TREASURER

LESSON TEXT—Acts 8:26-39.

GOLDEN TEXT—"The entrance of Thy words giveth light."—Ps. 119:130.

PRIMARY TOPIC—A Man Did What God Told Him.

JUNIOR TOPIC—Philip and the Ethiopian Treasurer.

INTERMEDIATE AND SENIOR TOPIC—How Philip Won the Ethiopian.

YOUNG PEOPLE AND ADULT TOPIC—The Use of the Bible in Evangelism.

I. Philip Meeting the Ethiopian (vv. 26-30a).

1. Leaving Work by Divine Direction (v. 26).

The Lord called Philip away from a great work in Samaria and specifically directed him to this man. Abrahamlike, he obeyed the divine command not knowing why he should leave the work in Samaria and go into a desert place. As he journeyed on by faith he espied the state chariot of the Ethiopian treasurer. The Spirit of God directed him to go near and join himself to the chariot. The tactful question put to the treasurer gained him a seat by the side of this dignified officer. The mission which at first seemed so unpromising was now clear.

2. An Officer of State Seeking the Way of Salvation (vv. 27-28).

The Ethiopian had been to Jerusalem to worship. Despite his high official position he was not ashamed of the worship of God. The journey from that far off country required much hardship and expense, but to the one whose soul yearns after God, this is all joy.

3. A Providential Meeting in the Desert (vv. 29-30).

The coming together of these two men was clearly the predetermined way of God.

II. Philip Preaching to the Ethiopian (vv. 30b-35).

1. The Ethiopian's Employment on the Way (v. 30).

His occupation at the time of this meeting was reading the Word of God. At the invitation of the Ethiopian Philip joined himself to the chariot and found him reading from the 53d chapter of Isaiah. This is a most excellent way to spend one's time while traveling.

2. The Absolute Need of a Preacher (v. 31).

The Ethiopian was reading one of the clearest testimonies to the Messiah in the Old Testament, yet he was unable to get anything out of it. The fact that the Ethiopian, a great statesman, needed an interpreter of the Scriptures, even such a plain passage as the 53d chapter of Isaiah, shows the absolute need of a preacher. The gospel must be experienced before one can be a witness to its saving power. The human mind is blind to spiritual things, making the work of an evangelist indispensable. If a statesman of this rank was unable to grasp the meaning of such a clear passage, it should not be thought strange that for the rank and file of men a guide is needed. God has designed that through the foolishness of preaching the world should be saved. Preaching the Word of God will always be necessary.

3. Philip's Message (vv. 32-35).

He began at the Scriptures which the Ethiopian was reading and preached unto him Jesus. This shows us that the person represented in the 53d chapter of Isaiah as suffering instead of others was Jesus instead of Israel, also that the central theme of the preacher's message should be Jesus. He did not preach Jesus as a great teacher, but as a Savior who had suffered and died instead of sinners. He preached Him as the one who had offered Himself as a ransom.

III. Philip Baptized the Ethiopian (vv. 36-38).

As a result of Philip's preaching the eunuch proposed baptism. When Christ is truly preached, men naturally desire to confess Him in baptism. Where this feeling is lacking, the gospel in its fullness is evidently not preached. The Ethiopian might have offered many excuses for neglecting this important ordinance, but like every man who is honest before God, he was willing at any cost to render obedience. The proof that men really believe in Jesus is their willingness to render obedience to His Word. It is faith in Christ that saves, but those who have genuine faith desire to seal it in baptism. Having secured from the Ethiopian the proper confession, Philip baptized him.

IV. The Ethiopian Rejoicing (v. 39).

Confession of Christ always brings joy. Those who obey the commandment of the Lord can go on their way rejoicing.

Truth

Truth is as impossible to be soiled by any outward touch as the sunbeam.—Milton.

Makes Life Worth While

It is faith in something and enthusiasm for something that makes a life worth looking at.

Godliness

Godliness shall not be an addition to my life, but it shall be my life itself.—C. H. Spurgeon.

Scraps of Humor

JUST BARLEY SUGAR

An enthusiast entered an antiquarian's shop to have a look round. A young girl stood behind the counter. On the counter on a piece of paper rested a round yellow marble. The enthusiast noticed it.

"That," he said, excitedly, "is either a wonderful topaz or an exceptionally rare piece of amber. Where did you get it?"

"Garn!" said the girl, "that's me bit of barley sugar I just been sucking."

UNIFORM SUCCESS

"There goes Policeman Jones in a captain's rig. Only a year ago he was wearing a sergeant's suit."

"That's so—he's had uniform success."

Nonsense

A little nonsense now and then
Brings sorrow into many a land,
When folks discuss with voice or pen
What they but slightly understand.

Information Disastrous

Wetwash—What drove the light house keeper's wife crazy? Loneliness?

Roughdry—Not exactly. She was listening in at the radio while a big dry goods store ashore was beginning a bargain sale for the next day.—American Legion Weekly.

Why He Wanted Story

Eminent Author—You bought a story of mine ten years ago for $25.

Editor—Yes, but we haven't printed it yet.

Eminent Author—Well, let me have it back for $250. I've got a reputation now and don't want to spoil it.

PROBABLY NOT KNOWN

Guide—There are ten thousand skeletons and skulls in the National museum at Washington.

Tourist—And how many in the capitol, do you know?

So That's That

A woman's dress, from hat to sole,
From lingerie to locket,
Should always make a perfect whole,
And does—in hubby's pocket.

Her Near Side

It was in one of these ultra-smart "Beauty Shoppes." The fair young thing, freshly shampooed, sat before the long mirror awaiting the magic touch of the marceling iron. As the first curl rippled out, the girl turned to the operator and, lifting a dainty manicured left hand, said:

"Please marcel it extra tight on this side. It's the side I dance on."

Gentle Hint

Neil McGuire, the Minjou title artist, had a Japanese art student in his office and during a chat one day Koko remarked that in Japan they had singing insects for pets.

"Well," remarked Mac, "Jack Hines is singing in the next room, but he's a pest, not a pet."

Disappointment

Al—What started the riot last night?

Bert—A misprint.

Al—A misprint?

Bert—Yes, the Lyric advertised a show with 350 people and 100 costumes.—American Legion Weekly.

One Perfect Home

Jackson—There is room for improvement in every home.

Johnson—Not in mine.

Jackson—Oh! Then you consider your home perfect?

Johnson—Oh, but we live in an apartment.

Supreme Test

Howard—Are you sure that you really love Florence?

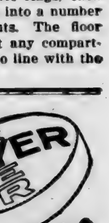
Frank—Absolutely, my boy. I've seen her bob done up in curl papers!

NEXT WEEK

Put in a New Set of Champions

Next week, more than 95,000 equipment dealers will assist you toward greater motoring economy with a special Champion Spark Plug week.

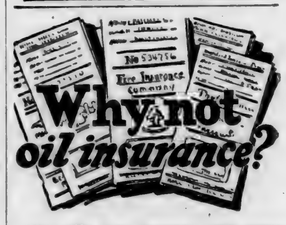
Begin now, with a new set of Champions, to give your engine a real chance to deliver its full power, pick-up and efficiency.



Champion X for Fords is 60 cents. Blue Box for all other cars, 75 cents.

Champion Spark Plug Company
Toledo, Ohio

CHAMPION
Dependable for Every Engine



Your life, your property, your crops are all wisely insured. But service from your car remains a gamble.

And yet, by using only MonaMotor oil you can get the cheapest, most reliable service insurance. MonaMotor Oils have the body and backbone to do the job of lubricating properly.

MonaMotor Oil is service insurance. You can buy both at the sign.

Monarch Manufacturing Co.
Council Bluffs, Iowa Toledo, Ohio

MonaMotor
Oils & Greases

Plan Revolving Garage

A possible solution of the shortage of parking and garage accommodations is offered in a revolving garage to be erected soon in the West end of London, England, says Popular Science Monthly. The floors of the garage will be arranged as concentric rings, each of which will be divided into a number of one-car compartments. The floor will be revolved so that any compartment can be brought into line with the main entrance.

Genuine BAYER

ASPIRIN

Say "Bayer Aspirin"

INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

Safe — Accept only a Bayer package

which contains proven directions
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Light Much Cheaper Now

Since the development of electric energy, light has steadily become cheaper with the result that light for household purposes today is only about one-sixteenth as expensive as it was 40 years ago. This is one of the very few commodities the cost of which has come down in recent years. In 1887 about 1,115 candlepower could be bought for $1, but by 1923 $1 would buy 16,200 candlepower.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the hard calluses, without soreness or irritation.

Love May Yet Be Put on Scientific Basis

The matrimonial reports of our day are undertaking to put love on a sound, scientific basis. Let us skip a few hundred years and behold the synthetic romance of youth and a maid of some generations to come. The young man, armed with a stethoscope, a tape measure and the means of making a blood test, goes to call upon the lady whose charms have attracted him, ventures the Toledo Blade.

He taps a vein, listens to the thump of her heart and to the wind whistling through her bronchial tubes, and ends his labors with a careful examination of the soles of her feet.

Satisfied with the showing, he makes a request for a kiss and obtains one, duly hygienized through a strainer whipped from a vanity bag. That is, he does unless the young woman walops him instead.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and inclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

Wild Animals Being Saved

Concerted world-wide movement undertaken to protect wild animals is proving to be successful. Great Britain started the movement with bird sanctuaries, and America followed. The first wild life sanctuary in the United States was Yellowstone National park. In Africa the movement has taken popular hold. Many types of wild life have become practically extinct, as for instance, the seacow, biggest of amphibians, and the bustard, not to forget the elephant in certain countries.

Granulated eyelids, sties, inflamed eyes relieved overnight by Roman Eye Balsam. One trial convinces. 378 Pearl St., N. Y. Adv.

Should you want your neighbor to agree to your ideas, you have got to agree to some of his.

If people only knew the facts about their skin

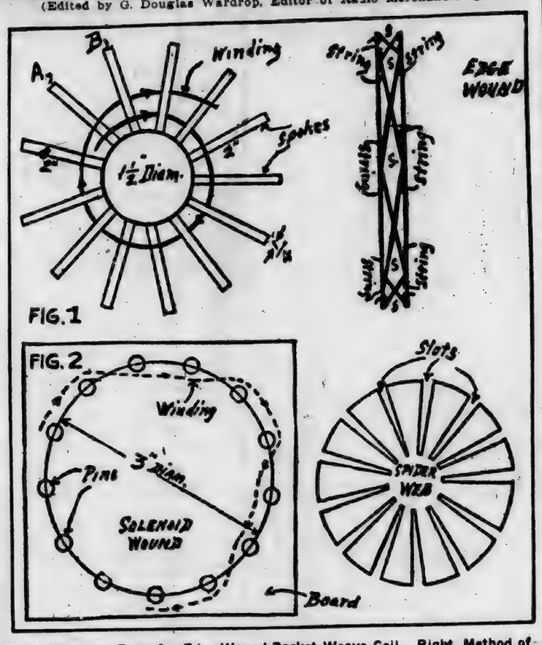
THE real cause of skin trouble—rashes, blackheads, excessive oiliness, etc.—is way down in the lower layers of the skin. It cannot be expected therefore that mere surface remedies can reach the disorder.

Thousands of physicians are daily prescribing Resinol Ointment and Resinol Soap. They know this gentle, yet effective treatment does sink deep, and will often soothe away in a few days the most stubborn rash as well as a trifling blemish. No home should be without these products—the soap for general toilet use—the ointment to check the first bit of skin eruption. At all druggists.

RESINOL

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)



Top Left Shows Form for Edge-Wound Basket Weave Coil. Right, Method of Tying This Type Coil. Lower Left, Solenoid Form for Basket-Weave Coils. Lorenz Winding. Right, Form for Spider-web Coil.

Low-loss coils require large wire, good spacing between turns and, preferably, no supporting dielectric. If one uses a supporting tube or framework he must be sure it is high quality. Keeping metal out of the field of the coil is important.

The method of winding of itself is not essential to low-loss construction, but certain methods of wiring help in many ways to make possible the requirements set forth. A basket-weave coil, for instance, necessarily means spacing between turns and rather large wire.

The difference between the various ways of winding is shown in the figures. Of course, every one knows that a coil wound on a tube, or so that the completed coil itself forms a tube, is known as a solenoid winding. It is probably the most common form of winding we find.

Then there is spiral winding in which the diameter of the coils progressively increases. One turn is wound on top of the other outward so the resulting coil is one turn wide. It resembles somewhat the flat pancake type, the form for which is at the right of Fig. 2.

This type is called the spider-web coil for obvious reasons. The inner diameter or diameter of the first turn, is usually about an inch and a half. There must be an odd number of slots. Usually the winding goes in one slot and out the other, under and over each spoke in turn. There is no reason why it should not go under two and over two just as in the Lorenz windings shown in the other figures. The usual Reinartz coil is a spider-web coil and can be very easily made by cutting a 6 to 8-inch disk of dielectric and slotting it after the manner shown.

Characteristics of Coils.

Basket-weave coils are of two types, edge wound, resembling the spiral and spider-web, or solenoid wound, resembling the coil on a tube. The same forms may be used for basket weave as for Lorenz and are illustrated in Figs. 1 and 2.

In Fig. 1 is shown the most convenient form you can have around the work table. It is a center disk with 13 cylindrical spokes. The made-up form may be purchased complete. It may be made from a sawed-off piece of curtain rod and 13 spokes. The spokes must be removable, however. There must be an odd number of them and they can be any material, as can the center. Thirteen is just a convenient, lucky number.

In winding the edgewise basket weave the wire will go over one spoke and under the next, over and under one spoke at a time. The resulting coil will be a latticework effect similar to the reed baskets so often seen, or reed furniture.

In winding the Lorenz coil, go over two spokes and under two, over and under two at a time continually. Because there is an odd number, you will continually shift the starting point for each turn, as shown at the left of Fig. 1. While both first and second turns start by going over spoke A, one goes over and one goes under spoke B. This is because of the odd number of spokes not divisible by two. The resulting coil is shown at the right of Fig. 1, with more of a trellis effect. Both sides are smooth, while neither side of the basket weave is smooth. The basket weave, however, is self-holding, but the Lorenz coil must be tied with string at the corners as indicated, before pulling out the spokes. That is, the white cord one sees on the coils sold commercially.

The Winding.

The spider-web coil requires the winding form to remain in the coil. The Lorenz type requires tying up. The basket weave is self-supporting and self-holding. The spider-web has somewhat less inductance than either of the others for the same number of turns. The others do not differ materially except in amount of wire and size of coil for the same number of turns.

Both the basket weave and the Lorenz winding may take on the solenoid form by using the winding device shown in Fig. 2. Here, instead of spokes of a wheel, we have pins arranged in a circle and forming, really, a latticework tube. Take a board, strike a 3-inch circle and drive in spikes equally spaced, or erect pins in the board. There must be an odd number. Usually 13 are used, but any odd number can be used, and, of course, the smaller the diameter the less the number of pins. In the solenoid type, the coil will slip off the pins, so the pins are not removable from the board necessarily.

In the solenoid winding, as in the edge winding, the basket-weave coil is obtained by winding over and under one pin at a time. The Lorenz winding is obtained as shown by the dotted line, winding in and out, over and under two pins at a time.

There is no more real satisfaction in construction to be obtained than to wind a set of Lorenz coils both of the solenoid and the edge type. The finish and appearance is perfect with these home-made coils. In both cases do not forget to tie up the corners before removing the coil from the form, whether solenoid or edge.

In general, for number of turns, follow the same standard as the honeycomb or as the solenoid, but wind a few more turns than specified for either. It is a simple matter to unwind a turn or two and cut off the wire, but adding a turn or two means soldering on a piece of wire each time.

What You Should Know About Drilling Panels

The simplest things in radio are the ones that are apt to cause the most trouble. For instance, drilling the panel. This is an almost insurmountable obstacle to some of the builders who have never constructed a mechanical contrivance in their lives and who view the brace and bit as a tool of the master mechanic.

First it is necessary to lay out the position and size of the holes to be drilled. Where an instrument is held in place with two or more setscrews it is best to make a half-inch hole for the center shaft, if the instrument is then slightly off, it will still turn easily on its bearings without binding.

In the cartons containing the instruments are often inclosed templates showing the spacing of the holes to be drilled. These should be used when drilling the holes. If made of paper they can be pasted directly on the panel and the holes drilled through them. The paper is then removed with a wet cloth.

If it is necessary to calculate your own positions, do so by measuring the distance that one side of the hole is from the shaft and then the distance below it. For instance, a rule is laid against the shaft and touching the setscrew. The reading on the ruler with one-half the diameter of the shaft, or an eighth of an inch, will be the distance to one side. Then by doing this straight up and down, instead of sideways, the depth will be found. Now from the center hole-mark, measure the proper distance to one side and the proper depth from there. Mark and drill. The location of the other hole or holes may be determined by reversing the procedure.

Improve the Tuner

The materials and time required to construct a wave trap would remodel a poor tuner into a good coupled circuit hook-up. The cost of a factory-made wave trap would buy an efficient tuning coil and condenser for the present set. In either case the efficient coupled circuit tuner is far ahead of any makeshift with a wave trap.

How Phone Plugs Are Constructed

An "Inside View" of This Handy Little Piece of Apparatus.

The construction of a phone plug is an interesting subject in itself to anyone who has not had the opportunity to dissect one.

In the illustration are shown the "insides" of one well-known telephone plug. In the first step in the assembly the phone tip receptacle "E" is fastened to the base of the plug of which "D" is a threaded screw for holding the cover of the plug and "C" is the knurled rim of the plug. "B" is the shank of the plug and "A" is a hard rubber tube.

"Needle" Insulation.

In the second sketch is shown the receptacle "H" for the other phone tip, which is fastened to a steel needle, "F," which is threaded at both ends. An insulating gasket, "G," is placed between the terminal and the base of the plug.

The hard rubber tube is placed on the steel needle to insulate it from the shank of the plug.

In the third sketch the large headed machine screws "I" are mounted in the terminals for holding the phone tips. A fiber gasket is placed on the steel needle and the brass tip of the plug is screwed on.

Tip Construction.

The tip of the phone plug is screwed down tightly, the end of the steel needle cut off and then riveted down over the tip. This construction de-

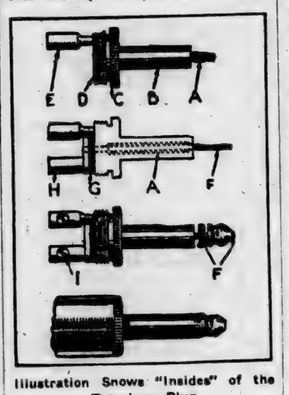


Illustration Snows "Insides" of the Telephone Plug.

tail has two very good features in that it prevents the tip from ever becoming loose and coming off, and the end of the steel needle, rather than the soft wearing brass of the tip, is presented where the most frictional wear takes place.

The insulating cover for the plug is next screwed onto the threaded base of the plug "D" and the manufacturing process is complete.

Avoid plugs that have loose tips that can be unscrewed readily, terminals that are insecurely fastened and plugs that use poor insulating materials at "A" and "G."

Pay Especial Attention to Sockets and Tubes

The humble socket, used to hold the vacuum tube and to provide the means of making an electrical contact between the prongs of the tube and the rest of the circuit, receives less attention from the radio fan than it should.

The socket should be carefully scrutinized, for it is at this point that the plate and grid wires and filament leads come very close to each other. If the socket is made of poor insulating material these currents will leak across the base between the binding posts and become lost. The volume and distance of the receiver will suffer. Nothing less than bakelite should be used.

Do not accept a socket made of material that can be easily cut with a knife or will leave a black mark when rubbed across a piece of white paper. Material that will do this has lampblack in it, which is a very poor insulating substance. As a rule this class of material will melt under the heat of a soldering iron.

Of next importance are the contact springs. Poor contact springs cause a great deal of the noise that is attributed to static. Due to the short distance available on the inside of a socket, and the need for keeping the dimensions of the socket as small as possible, the contact spring must necessarily be short. Due to the shortness of the spring, most of the sockets at present are unsatisfactory because the springs become permanently bent. This requires frequent bending back into their former position so that a good contact can be obtained with the prongs of the tube.

The socket should also be nonmicrophonic. In a receiver which uses ordinary sockets, a loud ring will be heard whenever the set is jarred. Often removing the hand from the tuner dial will be sufficient to cause the tubes to set up this ring.

To cure this many set-builders fasten their sockets on soft rubber sponges to absorb vibration. The chief objection to this method is that if you use screws to hold the socket down to the baseboard or use bus bar wiring to the binding posts, the socket is mechanically connected to the baseboard and the rubber support does not help a great deal in reducing noises.

GOOD ROADS

BETTER HIGHWAYS YIELD BIG PROFIT

American motorists cash in a yearly dividend of 10 per cent on the capital invested through federal aid in the improved highways of the country, according to a statement issued by the American Automobile association.

This dividend actually goes into the pockets of the motorists and represents the difference between the cost of motor vehicle operation over unimproved and improved highways. The differential, which is conservative, is based on extensive engineering tests of motor vehicle operation costs made in different sections of the country and for different types of roads.

A recent survey made in Kentucky shows that there is on the average a saving of 2½ cents a mile in the cost of operation over improved roads and highways. Some time ago a similar investigation conducted in Iowa indicated approximately the same saving.

It has been estimated many times that the average car runs approximately 6,000 miles a year. A saving of 2½ cents a mile for 6,000 miles amounts to $150 a year. For 17,000,000 automobiles this would mean a saving of $2,550,000,000 a year on gasoline, tires, parts, upkeep, renewals and all phases of operation.

This would be the total saving if every mile over which an automobile traveled was improved. But, of course, only 60,000 miles of highway have been improved by federal aid. This 60,000 miles represents slightly more than 2 per cent of the total highway system, which amounts to approximately 2,500,000 miles.

Two per cent of $2,550,000,000 gives $51,000,000 which can be legitimately credited to federal aid. The total capital expenditure for federal aid was $500,000,000, which yields $51,000,000 a year, or 10 per cent in saving to the user of improved highways.

The study made by the Iowa State college, the Iowa highway commission and the bureau of public roads showed that the gasoline consumed on a paved road was only approximately one-half the gasoline consumed on a dirt road per unit of traffic. Incidentally the investigation developed that the gasoline consumed per unit of traffic can be taken as an index of the other costs of motor vehicle operation.

It showed, in fact, that there is a definite relation existing between the gasoline consumption per unit of traffic and other items of cost in vehicle operation. F. R. White, chief engineer of the highway commission, estimated that through improvement of a road surface the gasoline consumption is cut in two, the cost of tires is cut in two, the same applying to other items, including depreciation and repairs.

For the first time these studies make it possible to present in terms of dollars and cents the difference in cost to the motorist and the public in general between improved and unimproved roads.

According to the Iowa study, traffic equaling 500 vehicles per day over earth roads requires an annual expenditure from both private and public funds of $25,600 per mile, while a similar amount of transportation over a concrete surface costs $20,650 per mile.

This means that for a light traffic earth road carrying 500 vehicles a day there would be saved $4,950 per mile per year if the same traffic went over a paved road surface. Assuming the cost of paving a dirt road to be $25,000 per mile the saving in transportation cost would actually pay for the capital outlay in from four to six years. The difference between the cost of operation on a gravel road and a paved road would pay for the difference in the cost of construction in three years.

Work on Post Road

It is planned to do a great deal of work on the New York state section of the Boston Post road, and contracts for part of this work have been let. Traffic on this road is very heavy. A count last season showed 50,000 vehicles passing day and night. The traffic is as heavy at night as in the day time and at times runs heavier during the night. Just when this improvement work is to be started is not known.

Thick Roads in Oregon

The Oregon state highway department recently adopted a design of thickened edges for roads. The specifications call for a cross section seven inches thick at the center and ten inches thick at the edges, the increased thickness graduating to the edge from a point two feet from the edge. The cost is estimated at $24,381 per mile.

Boulevard Out to Sea

The Ocean boulevard, following the string of islands which extend from the extremity of Florida, and which has been under discussion for a long time, is about to be realized, for the details for the operation of the work have been arranged and the work will soon be begun. Contracts have been signed for 25 miles at either end of the line. This is about one-sixth of the total length of the proposed boulevard, which will connect so many of the beautiful islands.

SCHOOL DAYS

Your Last Name

IS IT HERRICK?

THIS name has been traced to a first name used in Anglo-Saxon days—Hereric, which is connected with Eric and also with Richard, both coming from a word meaning king or prince.

One thing is certain and that is that Herrick is thoroughly English and that it is a very old surname. In this country the Herricks were among the early settlers. Henry Herrick, a native of Leicester, England, settled in Salem in 1620. He was the son of Sir William Herrick of Bean Manor, Leicester. The name seems to be most usual in Leicestershire, England, which was apparently the cradle of the Herricks, and the name is spelled in countless different ways in the old records there. Hericke and Heyrick were usually employed methods in old days and are still used by some of the English families.

Among the distinguished descendants of Henry Herrick, the colonist, were John Herrick, educator, who was president of the University of South Dakota and the Pacific university of Oregon; D. Cady Herrick, prominent jurist; Ebenezer, who was representative from Maine at Washington before the Civil war; Joshua H., also Maine representative, and Samuel Herrick, representative from New York.

In England there was an interesting old family of goldsmiths of the name. Sometimes they spelled it Hericke, sometimes Herrick and sometimes Heyrick. Sir William Herrick or Hericke, born in 1562, was the fifth son of John Heyrick or Eyricke of Leicester, who undoubtedly belonged to the same connection to which the colonist, Henry Herrick, belonged. Sir William Herrick was a money lender who won favor with kings and nobles. A son of his named Richard Herrick, born in 1600, was warden of Manchester Collegiate church, and a nephew was Sir Robert Herrick, born in 1591, well-known English poet. His father was Nicholas Herrick, brother of Sir William Herrick, also a goldsmith.

The poet, Herrick, a contemporary of Shakespeare, wrote some charming songs. Among them are:

Gather ye rosebuds while ye may,
Old time is still a-flying.

—and

Cherry ripe, ripe, ripe, I cry,
Full and fair ones—come and buy!

(© by McClure Newspaper Syndicate.)

Something to Think About

By F. A. WALKER

THE LARKS ARE SINGING

TO THOSE hopeful individuals who keep their gaze on the towers of Utopia, glinting like gold in the far-off dreamy distance, give thought to the golden rule and put its fine precepts into actual practice, the larks are always singing.

These humans have their trials and difficulties, "even as you and I" but with them all, they manage to wear a smile of content.

They go about their duties, however discouraging they may seem, with a cheerfulness that gives inspiration to the discontented and fault-finding souls, frequently losing their way and falling in the mire of despair.

They know intuitively when to speak and when to curb their tongues, for they have learned the most difficult of all arts, the art of self-control, which the venerable sages will tell you is the first stepping stone to worldly success and an enduring happiness.

Hope never deserts them even in their darkest hours.

She holds her blazing torch over her head and bids them follow.

So the gloom of somber night is transformed to day, and the trusting disciples move from place to place, confident of their ability to find their way to the hills where the larks are singing and the sky is forever light with glorious sunlight.

The world owes a debt of gratitude to these optimistic people which it never can pay, and you and I being a part of the world, are likewise delinquent and possibly thoughtless of our constantly increasing obligation.

We are too self-centered, too greedy for gain, too faithless.

We brush aside the weak in our pursuit of earthly dross and trample them under our hasty feet, never stopping to look back to see whether we have hurt them. We forget that we all are of one flesh, and if we have injured them, we have injured ourselves.

Every day the wise Keeper of the Book of Life is calling on some debtor to blot out his or her delinquencies, always hanging over his or her head until the account is paid in full,

If you have canceled your obligation and kept the faith, the day of reckoning will have no terrors, for you will find you are as free and happy as the larks singing in gladness all about you when the dawning is rosy and the air is fragrant with the scent of flowers.

The Young Lady Across the Way

The young lady across the way says if we have a gasoline tax the company certainly ought to pay it as it costs the motorists enough already.

(© by McClure Newspaper Syndicate.)

AS TOLD BY Irvin S. Cobb

FIXING BLAME AT ITS SOURCE

THIS little story has one merit, at least. Of my own personal knowledge I can testify that it is true.

A tired business man in New York, coming home after a particularly enervating day, had occasion, or thought he had, to speak sharp words of reproof to his eight-year-old son. He wound up by sending the youngster to bed without any supper.

That night, stealing into the youngster's room to see whether he had fallen asleep, his mother found him wide awake and very scornful of her advances.

"Why, Jackie," she said, "you shouldn't be surly toward me just because your father scolded you. I'm not to blame."

"Yes, you are too!" stated Jackie. "You married the big stiff, and now I got to stand for him!"

Prayermeeting Thursday evening.

S. D. Steffey, Pastor.

Christian Church Notes

Bible School at 9:30, communion service immediately following. Morning sermon by the pastor.

The children splendidly conducted the Sunday School last Sunday morning. Basil Sheffer acted as superintendent, Helen Storer as chorister and Jane Keesler assisted as secretary.

About forty-five attended the council meeting Monday evening of officers and teachers. The Loyal Workers class gave a very interesting program and served lunch.

Horsehair and Snakes

The statement that if you place a horsehair in a puddle of water it will turn into a snake is ridiculous on the face of it, though apparently many people still believe it. It should be easy to demonstrate with a horsehair. The fact that a hair or similar object placed in water has a tendency to wriggle and twist like a live object has given rise to this superstition.

NEWS OF THE TOWN

Dr. and Mrs. G. W. Bodey of North Louisberg, Ohio, were Saturday night and Sunday guests of F. D. Tope and wife.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY MAY 14, 1925 | NO. 20

Auto Accident Takes Life

The following letter was received by Mrs. Ada Bassett from Mrs. W. L. Wallace, a former St. Joe resident. A portion of the letter is as follows:

"It is with a sad heart that I write tonight. I will tell you about our awful trouble. Our boy, Harry, was killed in an automobile accident the 13th of April. He was working for the Purity Chemical Co. here selling an odorless disinfectant, and he and the man he worked for and a woman that was working for the same men, were just starting for eastern Washington. They were about 100 miles from here when the accident happened. They were trying to make the next town which was Aberdeen Wash., to get an early start next day. The woman was domonstrating for the retail trade and Harry was selling at wholesale. It was about 11 P. M. when they came to a reverse curve in the road and Harry was driving slow, for the road was new to him, and a machine coming from the other way at about 40 miles an hour and just crowded him off the road. His machine turned over and threw him out against a tree, crushing the top of his head, it killed him instantly. The woman was also killed, every bone in her body was broken. The other man was not hurt much. That was the nineteenth accident at that same place this year We were in California when we got the message on the 14th, my birthday. We left Long Beach at 4:20 P. M. Tuesday and got here at 9:30 Thursday night and Harry was buried Friday afternoon at 3 o'clock"

Christian Endeavor Rally

Auburn was well represented at the annual county Christian Endeavor rally which was held Sunday at the Lutheran church in St Joe.

More than twenty members of the society from the Presbyterian church attended the after oon session which opened at 2:30 with an address by Professor W. C. Gerichs, superintendent of the Waterloo schools. This same society was represented on the program by a vocal solo by Miss Wilma Knott and a short address by Rev. Howard Morgan. Miss Dawn Hess, a member of the Christian Endeavor Society of the Church of Christ gave a piano solo. The Church of Christ sent sixteen members to the rally.

At the evening session Miss Mildred Wineland of the Lutheran Christian Endeavor society of Auburn, had charge of the meeting. Miss Hilda Weaver, a member of the society, sang a beautiful solo Seventeen were present from the Lutheran young people's society. The principal speaker of the evening was Rev. S D. Steffey.

Elect Superintendent

At the June meeting of township trustees they will elect a county superintendent. There probably will be other candidates than Clarence Green who now holds the position. They will also elect Truant officer.

Jurors Drawn For May Term 1925

In preparation for the opening of the May term of the DeKalb circuit court next Monday, May 18, the jurors and talesmen were drawn Monday by the jury commissioners, Herman L. Brown and Charles S. Arford, and County Clerk J. Harvey Knauer, resulting as follows:

GRAND JURY

O. M. Foote, Richland.
Geo. Treesh, Richland.
Willard Tustison, Newville.
Jerry Varner, Troy.
Linas Likes, Fairfield.
Ernest W. Johnson. Concord.

PETIT JURY

E. L. Mark. Franklin.
Carl A. McGiffin, Fairfield.
Wesley Myers, Troy.
Mrs. Hazel Myers, Troy.
E. L. Brant, Butler City.
Boyd Davis, Smithfield.
Charles H. Bleeke, Concord.
William Potter, Franklin.
W. W. Dever, Troy.
John A. Hoffelder, Smithfield.
William G. Feagler, Keyser.
E. C. Maxwell, Fairfield.

TALESMEN

Mrs. B. J Campbell, Troy.
Elmer E. Walters, Jackson.
J. P. Pessel, Wilmington.
Ora Lockwood, Butler.
John H. Johnson, Richland.
Prudence Blood, Newville.
John W. Mertz, Fairfield.
Merritt Matson, Franklin.
Geo. Simanton, Concord.
Waldo Sattison, Franklin
Frank Ashleman, Union
Vinlon L. Miller, Newville.
August C. Kuckuck, Smithfield.
G. L. Kanage, Fairfield.
F. G. Newton, Union.
Chas. Helmuth, Keyser.
Mrs Mattie Souder, Franklin.
R. U. Bowser, Spencer.
Catherine Murphy, Concord
Mrs. Chas. C Lindorfer, Keyser.
Emo Boese, Fairfield.
Roscoe Farrington, Richland.
Lancaster Morr, Concord.
L. Bidlack, Newville.

DeKalb Boy Figures In Scholarship

Competing in a class of exhibitors, Milford Snyder of Waterloo DeKalb county, and Aloylous Richart, Seymour, Jackson county, were awarded the $100 00 scholarships offered by the Baltimore & Ohio Railroad to the high school members residing in the counties served by its lines in Indiana, and who exhibited eggs at the 17th Annual Egg Show, which is being held this week at Purdue University.

The railroad recognises that the poultry industry returns to the farmers a large part of their cash returns each year and it desires to help create a desire for better poultry along its lines The winners of these scholarships will use them towards a four year course in agriculture at Purdue as soon as they have completed their high school training

LOCAL ITEMS IN BRIEF.

Are you all cleaned up?

Lester Pugsley and Frank Curie left Tuesday night to move a family from Marion to Hicksville.

The closed season for black bass and bluegills started May 1 and will not open again until June 16.

John G. Benninghoff and family of Fort Wayne, were the Sunday guests of Floyd Reasoner and wife.

The Home Bakery rooms are being shaped up and cleaned. This week the painter and paper hanger are both busy and W. E. Baxter is doing the carpenter work.

Another Road Petition

Solomon Shank and others have filed a petition in the DeKalb county commissioners' court for the improvement with gravel of a road to be built in Wilmington township to run along the section lines of 26, 27, 34 and 35 and connect the Mullet and the Auburn-Newville roads. The road is 1½ miles in length and the petition states that when completed it will be the direct route from Fort Wayne to Butler and Hamilton

Parent-Teacher Association

E. R. KINSEY, - - Reporter

The closing meeting for the year will be on Friday evening at the school house and we urge all to be present. The following program will be given:

Opening Song	
Musical Readings	Mrs. Floyd Reasoner
Entertainment	High School
Solo	Miss Bray
Address, Judge Dan Link, "The School Child and Cases of Delinquency I have Handled."

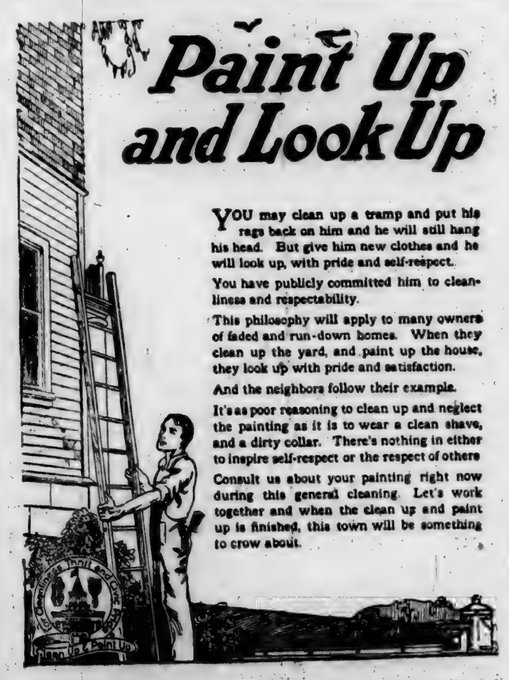
St. Joe Meat Market,
WILLIAM HARMAN, Proprietor.

Paint Up and Look Up



YOU may clean up a tramp and put his rags back on him and he will still hang his head. But give him new clothes and he will look up, with pride and self-respect.

You have publicly committed him to cleanliness and respectability.

This philosophy will apply to many owners of faded and run-down homes. When they clean up the yard, and paint up the house, they look up with pride and satisfaction.

And the neighbors follow their example.

It's as poor reasoning to clean up and neglect the painting as it is to wear a clean shave, and a dirty collar. There's nothing in either to inspire self-respect or the respect of others

Consult us about your painting right now during this general cleaning. Let's work together and when the clean up and paint up is finished, this town will be something to crow about.

Kinsey Hardware--Furniture

Let us help you to start your Clean-Up. We have anything you need. Come in today.

Final Clean-Up Campaign Week May 11-16.

Results Expected From Pure Breds

Information Based on Average Experience of Many Owners of Stock.

(Prepared by the United States Department of Agriculture.)

A report just issued by the United States Department of Agriculture on the progress of the better sires, better stock campaign for the improvemnt of domestic animals states briefly why pure bred animals excel other kinds. The information is based on the average experience of hundreds of stock owners who have been in a position to make comparisons. It thus points to the results which other farmers who are considering the improvement of their live stock may expect from pure bred sires and also from the combined use of pure bred sires and pure bred dams.

Summary of Points.

Following is a summary of the points in which pure breds excel:

Based on utility alone, pure bred live stock has an earning power from a third to one-half greater than scrub stock. Pure breds excel other stock in: Superiority and uniformity in conformation and type, greater sale value, early maturity, and economy in the conversion of feed into meat, milk, wool and work.

Surplus pure breds are salable at satisfactory prices in a majority of cases.

The progeny of pure bred sires has practically a 50 per cent greater sale value than the progeny of sires not pure bred.

Better breeding, combined with proper and adequate feed, practically prevents runty live stock, of which the average farm has about 7 per cent.

Well bred beef cattle, sheep, and swine yield from 5 to 10 per cent more meat than inferior animals of the same live weight, and the meat is of better quality.

Improved live stock makes about 40 per cent more profitable use of feed than common stock. Pure breds excel grades, and grades excel scrubs.

The use of pure bred sires leads to the ownership and use of fully six times as many pure bred female animals.

Points of Pure Breds.

The foregoing brief conclusions are based on thorough analyses of large numbers of reports. The movement for better live stock which the department is conducting, in co-operation with the various states, has resulted in a gradually increasing recognition of the many points in which well bred animals are superior to ordinary livestock. The study and control of animal breeding are among the most important and practical means of making live stock enterprises more profitable to farmers and also of improving the quality of meats.

Good Varieties of Trees to Plant in an Orchard

Much disappointment has resulted in many sections from the planting of inferior or second-grade trees, often because stock of that kind could be bought cheaply. Trees have been misrepresented by unscrupulous fruit-tree peddlers who had no other interest than to dispose of a bunch of cull trees. Considerable misinformation as to how trees should be grown is current.

First-grade nursery trees suitable for average planting will consist of well-grown trees of sufficient size for their age, free from disease and insect pests. Trees which are considerably undersized or extremely oversized should be rejected. Gnarly, misshapen stock seldom develops into satisfactory trees.

There are varieties of apples, peaches, cherries, plums and grapes recommended by the Kansas State Agricultural college for planting an acre orchard:

Apple—One Livland Raspberry, one Oldenburg or Yellow Transparent, five Jonathan, five Grimes Golden, four Delicious, four Winesap, four Champion or York Imperial, four Stayman Winesap.

Peach—Two Belle of Georgia, two Champion, two Eleberta.

Cherry—Three Early Richmond, eight Montmorency.

Plum—Two Wild Goose, two Abundance or Burbank.

Grape—Six Moore Early, six Concord or three Worden and three Concord, six Niagara, six Catawba or Delaware or Brighton.

Root Crops for Poultry Reduce Feed Expenses

By feeding more roots and vegetables the average poultry raiser can reduce his feeding expenses very much and also increase the egg yield. The cheapest feed is that which will make hens lay and the way to make hens lay is to keep them in good health. It is quite impossible to have the flock in good laying condition when only grain is given.

Such foods as carrots, turnips and potatoes are not rich in egg-producing elements. Yet they perform a service which renders all the other foods used considerably more valuable. Let the farmer or dairyman give his cows nothing but corn and his supply of milk would soon be reduced. It is the same with hens, and the egg yield as well. From a standpoint of dietary principles the use of roots is recommended and this will enable one to feed more hens and get a greater egg yield with little or no extra cost.

Bulletin on Caring for Farm Woodlands

Knowledge of Forestry Is Profitable in Farming.

(Prepared by the United States Department of Agriculture.)

"A knowledge of farm forestry, applied along simple lines, should make farming more profitable," according to the bulletin "Forestry Lessons on Home Woodlands," just revised by the United States Department of Agriculture for general distribution.

The bulletin gives the farm woodland a distinctive place in the management of the farm and in the development of the community. The various chapters take up the important local kinds of trees and their uses, the proper location of woodlands on farms, their economic value, the different farm timber products, measuring and marketing timber, utilizing timber correctly, protecting and improving woodlands, and planting young timber.

This bulletin has been prepared to give to the organized school work in elementary and secondary agriculture additional impetus in forestry. It provides material for instruction and furnishes a topic for home projects in forestry that may be worked out profitably in many communities. The bulletin contains subject matter material and a plan of study which should be of real educational value to the pupils themselves.

"Forestry Lessons on Home Woodlands" may be secured on application to the United States Department of Agriculture, Washington, D. C., free of charge as long as the supply lasts. After that it may be secured from the government printing office, Washington, D. C., for 15 cents a copy.

Powdery Mildew Disease Often Very Troublesome

Powdery mildew is another disease which occasionally is troublesome, although it is not usually so. As the name would indicate, when leaves are attacked by this disease, they take on a white, powdery appearance. Generally bordeaux mixture, such as one would use for leaf blight, will control this disease.

There are other diseases which attack the strawberry from time to time but they are not universal enough to need special mention at this time, and where they are largely local in character, the county agents or the state agricultural experiment stations are generally equipped to give the desired information on such insects and diseases.

Pollination of Cherry in Northwest Sections

Studies of sweet cherry pollination in the Northwest have revealed that some of the best varieties, such as Bing, Lambert and Napoleon, are not only self-sterile but are inter-sterile with each other. Two of the best varieties with which to pollinate the above are Long Stem Waterhouse and Black Tartarian. C. L. Long of Oregon and Mr. D. Armstrong of Washington are demonstrating the top working of some of the commercial plantings to these pollen-producing varieties. H. B. Tukey of the Hudson valley section of New York reports results which agree pretty closely with western results. Considering these results, it does not seem advisable for growers to maintain solid plantings of the Bing, Lambert and Napoleon cherries.

Mineral Supplements Is Subject of a Bulletin

"Mineral elements are not to be regarded as medicines to be fed in doses, but as foods to be supplied daily," says L. S. Palmer of the Minnesota agricultural experiment station in special bulletin No. 94 entitled "Minerals fo. Farm Animals."

Five mineral elements are ever likely to be lacking in farm rations—sodium, chlorine, iodine, phosphorus and calcium. Common salt supplies the first two. Iodine can be supplied by feeding sodium or potassium iodide, or as sea salt from which the iodine has not been removed by refining, or as commercially iodized common salt. For phosphorus and calcium deficiency the mineral supplements must be bone meal, spent bone black, or raw rock phosphate floats. Spent bone black is not a uniform product; only that which has been used by the sugar refineries should be fed. Fertilizer bonemeal is not recommended.

FARM FACTS

Maintenance of soil fertility is not a prerogative; it is an obligation.

* * *

Give your boy a colt; both will grow in more ways than one.

* * *

It is not safe to plant the tomato in the open ground until all danger of frost is over.

* * *

Dust the cabbage with a mixture of 10 parts air-slacked lime and one part of dry lead arsenate.

* * *

The onion is the most important of the bulb crops. A few onions should be found in every garden.

* * *

Chinese cabbage is a vegetable well worth knowing. It will not properly head in hot weather, but will quickly bolt to seed, hence it is best to sow seed in July.

Scraps of Humor

SOUNDS RIGHT

The young man on the street car had come out short on his change, and in order to escort his lady friend home was obliged to rely on his wits. Accordingly, he handed the conductor a nickel and awaited results. They came.

"You only gimme one fare," accused the conductor.

"Don't you believe in social equality?"

"Sure; I guess so. What of it?"

"Well, what's fair for one is fair for the other."—American Legion Weekly.

CONSIDERATION FOR HIM

Mrs. Youngbride (in first spat)—My popularity is easily seen in the great number of wedding presents I received!

Mr. Ditto—Quite true; but I notice you were given nothing with a handle, my dear.

Income of Kings

The world is so full
Of such highly priced things,
I think we should all
Have the income of kings.

Needed Inspiration

The tramp was told that if he sawed a pile of wood he would be given his dinner. He started in bravely, but in ten minutes appeared again at the kitchen door.

"Got it finished so soon?" inquired the housewife.

"No, lady," he replied, mopping his perspiring brow. "I thought before doing any more I'd ask if I couldn't look over your bill of fare."

ELIMINATING OVERHEAD

Mrs. Pester—Nice, isn't it, we can sit here at home and listen to a sermon and not bother to dress for church?

Her Husband—And also, they can't pass the collection plate by radio.

Proud Spirit

Oh, why should the spirit
Of mortal be proud?
It wouldn't if his friends
Did their thinking out loud.

Careful of Tacks

"You want to get down to brass tacks in this campaign."

"I mean to," answered Senator Sorghum. "But I vaguely recall a very highly respected admonition to the effect that he who scatters brass tacks for his neighbors must keep a sharp lookout lest he sit on one himself."—Washington Star.

Betting Birds

"Them two 'ens I shut up in the coop together have laid three eggs."

"What awfully good sports! One must have laid the other two to one."—New Haven Register.

So Was She

Wife—A little bird told me you were going to buy a diamond brooch for my birthday.

Hubby—It must have been a little cuckoo.—Pitt Panther.

Best Wishes

Rich Aunt—Arthur, I believe that you really wish for my death!

Nephew—Oh, no, auntie! On the contrary, I wish you eternal life.

Suspicious

After an hour or more of screwing up his courage the bashful young man finally managed to kiss the girl. The response was beyond his wildest dreams.

"Say!" he exclaimed, "I'll bet you wanted me to kiss you all the time!"

Different

Jimmy—She felt bad the way he cut her.

Henry—Snob, eh?

"No, barber."

Seen and Heard In Indiana

Chesterton.—Identity of the Chesterton roadside slayer was revealed to the Gary police by Mrs. Florence Kish Boto, 17 years old, who admitted that she had accompanied the supposed victim the night the killing occurred. Mrs. Boto said the dismembered and charred body found on the Furnessville road was that of Mrs. Josephine Desiderio, 21 years old, of Gary. The two women started from Gary for South Bend on the South Shore electric, Mrs. Boto told the police, but had stopped over at Chesterton, where they had an engagement with two men.

Chicago.—Edward P. Berwanger, former prohibition agent in charge of the Hammond district, is made defendant in a suit for divorce, filed in the Superior court at Chicago by Mrs. Mary J. Berwanger, who charges cruelty and misconduct, naming Ruby Fitch of Calumet City. Judge Sabath issued an injunction restraining the defendant from disposing of real estate valued at $150,000 and cash deposited in various local banks amounting to $42,000.

Indianapolis.—The state board of tax commissioners increased the taxation valuation of the properties of the Interstate Public Service company approximately $800,000. The new valuation fixed by the board of $8,361,440. The 1924 valuation was $7,555,000. The figure covers properties of the company in more than thirty counties in the state. The board also increased the valuation of the property of the Indiana Service Corporation of Fort Wayne from $2,650,000 to $3,000,000.

Richmond.—Protesting against the feature of the new "bone dry" liquor law, which allows the prosecuting attorney a fee of $25 for every conviction on a charge of public intoxication, C. R. Richardson, attorney for William Jennings, took action looking to the possibility of getting a refund of such fees from the prosecutor in the event this section later should be declared unconstitutional. Jennings was fined $10 and costs under the new law in Police court.

Laporte.—Mrs. Anna Tulka of Chicago, held in the Porter County jail at Valparaiso for almost a year on a murder charge, was released, the charge being nolle prossed for lack of evidence. Mrs. Tulka was being held in connection with the killing of Attorney Thad Fancher of Crown Point, who was shot in the holdup of the Halfway House at Cedar Lake on May 4, 1924.

Terre Haute.—A suit was filed in Vigo circuit court by Harry H. Schleppy, automobile salesman, in which he asks damages from Mrs. Viola Koonce, of Edgewood Grove, widow of Arden H. Koonce, asserting an alleged failure to carry out a matrimonial contract. Schleppy fixes the damages to his affections and peace of mind at $25,000 and asks the court to award judgment in that sum.

Indianapolis.—Motorists through Indiana find in some of the tourists' camps "all the conveniences of home." Many of the camps are little communities within themselves. Forty-seven tourist camp sites have been approved by the Indiana board of health and the Hoosier State Automobile association for their sanitation and accommodation and reliability.

Jeffersonville.—Police are waiting for Mrs. Edna Smith, 32 years old, to recover consciousness in hopes she may shed some light on the mystery surrounding the happenings that led to her being found severely beaten and unconscious in bed by the side of her 18-months-old baby. Police believe Mrs. Smith surprised a burglar in her house.

Logansport.—Joseph M. Rabb, age seventy-nine, former judge of the Appellate court and senior member of the law firm of Rabb, Mahoney, Fansler & Douglas, died at his home. He was a sufferer from acute indigestion. Mr. Rabb was born at Covington, Ind., February 14, 1846.

Indianapolis.—Eph Inman, attorney for D. C. Stephenson, Earl Klinck and Earl Gentry, held on the charge of murder in connection with the death of Miss Madge Oberholtzer, appeared in criminal court and announced that he wished to withdraw the petition to have the three men admitted to bail.

Indianapolis.—Court action, seeking the condemnation of eight tracts of land in the proposed Brown county game reserve, has been instigated by the fish and game division of the state conservation department, according to George Mannfeld, chief of the division.

Indianapolis.—The Rev. Campbell Gray, rector of St. Paul's Episcopal church in Peoria, was elevated to the episcopate to succeed the late Bishop John Hazen White, as bishop of northern Indiana.

Washington.—Fire believed of incendiary origin did damage estimated at $30,000 to the building of the Leonard range factory. The plant recently went into the hands of a receiver.

Indianapolis.—Word has been received here of the death of Mrs. Sarah Rector, aged eighty-six, at Lake Maxinkuckee. Mrs. Rector operated a summer resort on the east side of the lake for nearly half a century, and had a wide acquaintance among Indiana people who went there to spend their summer vacations.

Gary.—The police of this city declare their belief that the charred, bullet-riddled and dismembered body of a woman found near Chesterton is that of Mrs. Joseph Desidero of Gary. Identification was made by her mother.

New Indiana Laws Are Now in Effect

Indianapolis.—Acts of the Seventy-fourth general assembly of Indiana became laws with the issuance of a proclamation by Governor Ed Jackson. The laws were declared effective at 4 p. m. April 25, the time when final distribution and receipt of the laws was accomplished.

Among the laws which became effective with the promulgation was the Wright "bone dry" law. Another is that providing that control of all busses in the state is vested in the public service commission. Another law abolishes the present securities commission and provides for administration of the securities law by the secretary of state.

Here are some of the provisions of the new "bone dry" law which officers say will be rigidly enforced:

Purchasing or receiving intoxicating liquor—thirty days to six months, and a fine from $100 to $500.

Possession of intoxicating liquor—thirty days to six months, and a fine of from $100 to $500.

Carrying liquor on the person—thirty days to six months and a fine of from $100 to $500.

Transporting liquor by vehicle—one to two years' imprisonment and a maximum fine of $1,000.

Possession of a still or its use—one to five years and a maximum fine of $1,000.

Selling or giving away intoxicating liquor—thirty days to six months, and a fine of from $100 to $500.

Manufacturing liquor — thirty days to six months and a fine of from $100 to $500.

Operating motor vehicle while intoxicated—thirty days to six months and a maximum fine of $500 and the court may prohibit you from driving any automobile for a year.

Bloomington.—Education has made great strides in Indiana since the establishment of the one-room seminary by Rev. Baynard R. Hall May 6, 1824. That was the progenitor of the present Indiana university. The state legislature provided for a state seminary at Bloomington, January 20, 1820. For years the university celebrated that day as Founders' day. Two years ago the alumni voted to change the celebration from January 20 to May 6, the day the seminary opened. It will be observed this year with Howard Wynegar, New York banker, alumnus of the school, as chief speaker.

Indianapolis.—Governor Jackson has received telegrams from three prominent Mexicans in the United States urging him to commute to life imprisonment the death sentence of Jose Castro of Gary, Ind., awaiting execution on June 12 for killing an officer at Indiana Harbor.

Indianapolis.—An appropriation of $50,000 to repair a number of the hard-surfaced roads in Marion county that are in a bad condition was asked by Thomas Ellis, county road superintendent, at a special meeting of the county council at the courthouse.

Greencastle.—Miss Cornelia Allen, daughter of Mr. and Mrs. Joseph P. Allen, Jr., was recently elected May queen of the annual May day festivities to be held at DePauw university, May 9. Miss Allen is a senior and a member of the Kappa Alpha Theta sorority.

Indianapolis.—Appointment of Herman B. Gray as chief assistant secretary of state and David H. Jennings as securities commissioner was announced by Frederick E. Schortemeier, secretary of state.

South Bend.—Military funeral services were held for Mrs. Margaret Lewis, World war nurse and author of several books on nursing. South Bend physicians who served in the war acted as pallbearers.

Logansport.—Thieves entered the office of a theatre here and carried away a small safe. It was taken to a point nine miles south of Logansport and blown open, where it was found by a farmer. The loss was $100.

Martinsville.—Miss Nancy Maxwell, age seventy-four, died at the Morgan county hospital of injuries received when her buggy was struck by an automobile, said to have been driven by Otto Cook.

Micolgan City.—John Hixarek, thirty one, committed suicide by hanging in a cowshed on his farm near here, where he lived with his mother and brother. They had quarreled.

Greenfield.—Mrs. Gabriella Kelley, age sixty-six, of Fortville, died of heart disease at the side of the coffin containing the body of her aunt, Mrs. Silas Wiggins.

Logansport.—Israel J. Berry, eighty-five years old, known throughout Cass county as "the sweet singer of Eel river," is dead at his home here.

Indianapolis.—Earl Northern, age twenty-two, and Charles Northern, age eighteen, brothers, 614 Riverside avenue, were arrested in connection with the investigation of the South Kokomo bank robbery, March 27. They are held on vagrancy charges under $5,000 bond.

Crown Point.—The case of Mrs. Anna Cunningham, Gary (Ind.) housewife, who is alleged to have confessed she fed fatal doses of arsenic to three of her children, was placed before the Lake county grand jury by August A. Bremer, county prosecutor.

Daddy's Evening Fairy Tale

by MARY GRAHAM BONNER

PARROT TALK

"I must admit that I always considered it a waste of time," said Mrs. Parrot.

"I always thought so, too," said Mrs. P. Parrot.

"You know there is one family of Parrots thinking different," said Mrs. Parrot.

"But only one," said Mrs. P. Parrot. "Of all the many, many kinds of parrots in the world they say that there is only one kind of South American parrot to do such a thing as build a nest.

"I always said to Mr. P.:

"'Mr. P.', I said, 'why waste good parrot time in building a nest when the old hole of a tree will do just as well?'

"Then Mr. P. said to me, he said:

"'Why, indeed?'

"So as both of us agreed perfectly, it was foolish to act any other way.

"We kept the same hole for ever so long. In fact we thought it also a waste of time to keep moving all the time.

"'One home until it is too old to use,' was the way I put it to Mr. P., and Mr. P. said:

"'Right, quite right.'

"There are our South African cousins—but only one or two families of them—who build a lining or ground floor, as it were, to the home-hole; but I didn't even think that was worth while.

"They say that sometimes other animals are to be found in the bottom of a parrot's hole, but why not be hospitable?"

"What does that word mean?" asked Mrs. Parrot.

"That means," said Mrs. P. Parrot, "to be cordial to guests and to show them how kind you can be, and how

He Is Quite a Show.

much you are willing to share with them.

"That's what it means."

"Well," said Mrs. Parrot, "now I know another word. I'll say hospitable, hospitable, though it's not so easy to say as some others I've learned."

"Not so easy," said Mrs. P. Parrot, "but it's well to say more than one or two things. We don't want parrots to get lazy about what they say.

"We don't want them to say so little that people think they aren't so very talkative after all."

"Oh, no, we don't want that," said Mrs. Parrot, "so I'll learn the word and say it some time when my keeper is around. I have heard him use that very word a lot, now that I think of it. It has such a familiar sound."

"I hear," said Mrs. Parrot, "that there are some new arrivals in the zoo. I don't mean babies—I mean some new full-grown animals.

"Is that so?" asked Mrs. Parrot; "I hadn't heard."

"It's so," said Mrs. P. Parrot. "There are a Mr. and Mrs. Lechwe Waterbuck.

"They belong to the antelope or deer family and come from Africa.

"I believe they're a handsome couple, with lovely eyes, such as all those antelopes have.

"Really, the eyes of antelopes are very beautiful, and so are their faces.

"Then there is a Mr. Cape Aard Vark."

"What?" asked Mrs. Parrot, in a very shrill voice.

"Mr. Cape Aard Vark," repeated Mrs. P. Parrot. "His first name, Aard, is from a Dutch word meaning earth, and his second name, Vark, is a Dutch word, too, meaning Pig.

"He is a big, husky creature with a long face and square snout, straight-pointing-up ears, stout short legs, sharp claws, and a fairly long, thick-looking tail.

"They say that he burrows in the earth like anything, and that his skin makes nice leather and his body good food, but no one is going to eat him here.

"He is here for show. And he is quite a show. He's a pretty unusual looking animal—not so pretty as he is so unusual. I mean pretty unusual to go together, you understand."

"Here for show, here for show," shrieked Mrs. Parrot. "Well, we'll shriek and call and they'll come and see us, too. We're here for show as well."

Much Too Many

Father (addressing son at the dinner table)—I see you are at the foot of the spelling class again.

Son—Yes, sir.

Father—How come this time?

Son—I put too many s's in scissors.

BRINGS YOUTH TO OLD FOLKS

One of Tanlac's greatest blessings is the new life and vigor it brings to old folks. Men and women up in the seventies and eighties are writing to us every day to thank us for Tanlac's wondrous benefits.

Tanlac is a natural tonic. It drives poisons from the blood, stirs up the lazy liver and puts digestive organs in working order.

Made after the famous Tanlac formula from roots, barks and rare herbs, it is nature's own tonic and builder—harmless to man or child.

If your body is weakened and run-down, if you lack ambition, can't eat or sleep, you'll be delighted with Tanlac's quick results

Take Tanlac Vegetable Pills for Constipation

TANLAC
FOR YOUR HEALTH

How He Discovered Best Constipation Relief

Mr. Joseph F. Glus of Brooklyn, N. Y., writes "In the past 20 years I have been constantly troubled with constipation. Every remedy I tried would work O.K. for a while—but soon failed. The only remedy I have been able to use steadily with good results have been Carter's Little Liver Pills. I don't guess when I take them—I know I'm going to feel relieved." 25c at all druggists.

For Horses and Cows

Porter's Pain King Salve is made with a base of pure wool fat (lanoline) combined with antiseptic, healing, pain-relieving drugs. There is nothing better for collar and saddle galls, cuts scratches or bruises on horses. It quickly heals sore teats on cows, caked udder, etc. At your dealer's.

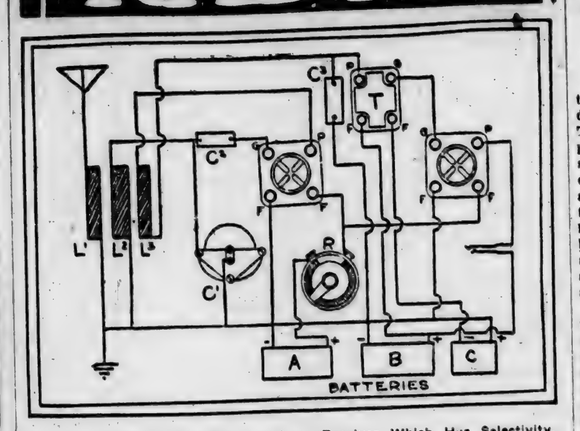
RADIO



Hook-Up Diagram of Two-Tube Low-Loss Receiver Which Has Selectivity, Volume and Lack of Radiation Advantages.

By ISRAEL KLEIN

Selectivity, volume and lack of radiation are the advantages offered by the two-tube, low-loss receiver described here.

Fans needn't expect to reach across the country with it, but with the presence of so many high-powered stations on the air there's no need to go any farther than 500 miles or so. It's clearness that is wanted today, and that is what this receiver affords.

The parts are:

L1, L2, L3, low-loss inductance.

C1, low-loss condenser, .00025 mfd. capacity.

C2, fixed grid condenser, .00025 mfd. No leak is necessary.

C3, fixed condenser, .002 mfd.

R, rheostat, 20 ohms.

T, low-ratio transformer, about 3½ or 4-to-1.

One pound No. 18 DDC wire, two sockets, one 7 by 14-inch panel, one 7 by 18-inch baseboard, one open-circuit jack, six binding posts, one vernier dial.

Winding the Coils.

The low-loss inductance coils are wound as follows:

Draw a circle on a wood block, 3¾ inches in diameter and mark 14 points around the circle, equidistant from one another. Drill ⅛-inch holes half way into the block and set tightly into each hole a ⅛-inch dowel pin, 3 inches long.

The coils are wound on these pins, the wire being drawn first outside one pin, then inside two, outside one, inside two, and so on until the number of windings called for are completed. Coil L1 should have 15 turns. Coil L2, 70 turns. Coil L3, 22 turns.

Before taking a coil off the pegs, drop molten sealing wax over the intersections and let stand until the wax hardens. Or, tie the coils at the intersection with stout thread.

For Selectivity.

Coils L1 and L2 are mounted on the baseboard parallel to each other, and four inches apart. The bottom of each coil is set within two fiber strips, which are held together by a screw. The screw also holds the coil and strips to the baseboard.

Coil L3 is the tickler and is controlled by a shaft arrangement. The shaft and knob should be set very low on the panel, so that the coil L3 may be tied firmly to it so as to give it freedom of vibration with coil L2. It should be about an inch from L3.

To keep the shaft from moving in and out, have a hole bored through it at the inside of the panel and put a pin through it. This and the dial will hold the shaft in place. The bushing for the shaft, in the panel, may be the kind used for jacks, and the shaft of a diameter to fit it closely.

Test Connections.

Both tubes for this set should be of the 201-A type. The B battery should have a voltage of 90 volts and the C battery 4½ volts.

In trying out the set, change the leads on the tickler, L3, to see which side gives best results. Also reverse leads to the C battery for a similar test.

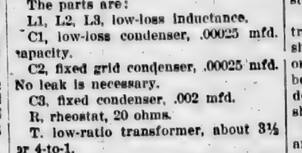
Above all, be sure that you have the shortest possible leads to all connections. Also that the coils L1 and L2 are four inches apart. This makes for very sharp tuning.—Chicago Evening Post.

Stranded Wire; How to Make Good Fastening

There are quite a few listeners-in who use stranded wire for their aerials, or possibly for the guy wires. Those who have tried to fasten this kind of wire to insulators or other supports have found that it is a difficult thing to secure a satisfactory and neat job.

If the following scheme is followed out, a workmanlike fastening can be made that will not only look better, but will be stronger than usually found.

Bend the stranded wire through, or around the insulator, and pull about four inches through. Secure some copper wire, or galvanized iron wire, and begin winding, as shown at "A," very tightly and securely for about one-half



Showing an Excellent Splice That Will Add to Appearance.

to three-quarters of an inch. Then, bend the remaining end over, and continue the winding, as shown at B; cut the extra binding wire off.

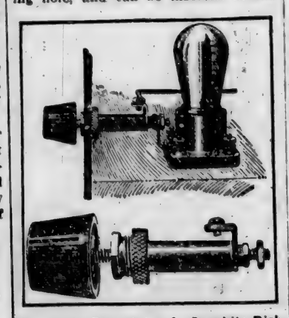
If desired, this joint may be soldered. A fastening will be obtained that will easily stand pull equal to the wire itself.—Radio News.

Harmonics and Meters That Will Interest Fans

Harmonics of a broadcasting wave are the higher frequencies, representing exact multiples of the fundamental frequency. For example, suppose a station is sending on a wave length of 600 meters, which is a frequency of 500 kilocycles. This is, then, the fundamental wave (for frequency). But if the antenna arrangements are bad, or for many other reasons, the wave actually sent out may contain also a frequency of twice 500 kilocycles, or 1,000 kilocycles, which corresponds to 300 meters. This is the first harmonic. Similarly there might be also a frequency of three times 500 kilocycles, or 1,500 kilocycles, corresponding to 200 meters. This would be the second harmonic. There would be a third at 2,000 kilocycles or 150 meters, a fourth at 2,500 kilocycles or 125 meters, and so on. Of course all broadcasting stations try to keep their sending wave as "pure" as possible—that is, to avoid producing these harmonics

Rheostat That Permits of Very Neat Mounting

A new rheostat designed to give a smooth vernier filament control has made its appearance on the market. This rheostat requires only one mounting hole, and can be inserted in the



Compact Rheostat of Graphite-Disk Type Allows Good Arrangement.

hole from which the old rheostat has been removed. It is claimed to be vernier all the way, with but one adjustment to make, and can be used for any tube, or combination of tubes. It is very compact. A particularly neat arrangement of the rheostat is shown in the upper drawing. Here the end of the rheostat is so close to the socket that it can be connected to the latter by means of a lead only about one-half inch long.—Popular Mechanics Magazine.

Weak Signals and What Is Cause of Trouble

If the signals which are customarily loud from a station are suddenly found to be quite weak, the difficulty may be caused by one or more of the following:

The plate battery may be exhausted.

The phone jack may not be making good contact.

The head phones may have become demagnetized.

The filament battery may have become discharged.

The transmitting station may have reduced its power.

The antenna may have become disconnected or the ground connections may have become ineffective, due to existence of insulating paint or gaskets used in making pipe connections.

The crystal detector of the receiving set may have become dirty. In the latter case the metal point which touches the crystal may be filed and the surface of the crystal washed with soap and water.

Marked Progress in Radio Design

How Vacuum Tube Has Opened Up Vast New Fields of Development.

By JOHN R. LOOFBOURO

Before the development of the radio tube, little progress was made in the design of radio receiving circuits. Those who devoted their time to such problems were forced to confine themselves to the use of a single crystal detector, without any means of really amplifying the signals. The vacuum tube, however, opened up vast new fields of development. It could be used both as a detector and as an amplifier and several tubes could be used, one after another, in "cascade," to detect and amplify the signals.

Even in the first days of vacuum tube sets, however, the radio circuit designed for great volume of sound was necessarily a complicated one. In order to secure a fair amount of amplification, several tubes had to be used. A single-tube set such as the one illustrated was only pratical for receiving local stations. The larger sets, with many tubes, capable of receiving the more distant stations, were both expensive and difficult to operate.

Then a discovery was made which revolutionized the design of radio receivers. This discovery enormously

increased the efficiency of the vacuum tube. It enabled the designer to use fewer tubes in attaining the same results.

The invention which so revolutionized the design of radio receivers is the Armstrong regenerative system. Major Armstrong was, at the time of working it out, a student in the graduate school of Columbia university. In experiments that he conducted toward preparing his thesis he thoroughly developed his system.

As soon as the discovery had been made public and sufficient trial had been made of it to prove its practicability, the regeneration craze swept over the country. Nonregenerative sets were regarded at obsolete, and discarded in favor of the new wonder circuit.

Of course Major Armstrong had fully protected himself by patents, so that the commercial production of the circuit was then, and is today, restricted to a few manufacturers. Thousands of amateurs and experimenters throughout the country, however, built circuits for their own use.

It has been over ten years since the first regeneration patents were granted, yet regeneration is still the fundamental principle on which the most efficient radios are based, and seems destined to be for many years to come.

Easy and Inexpensive Way to Fasten Coils

An easy and inexpensive way of fastening coils firmly to the baseboard without using brackets or bolts is illustrated in the accompanying sketch. Cut a piece of bus-bar or round wire (about No. 14 or 16) 1¼ inches long.

How Coils May Be Fastened to Baseboard Without Brackets.

Bend a loop in one end of the wire to fit a small wood screw and then turn the straight part of the wire at right angles to the loop. Form a hook in the straight part, which passes through a hole drilled in the tube about ¼ inch from the bottom. The coil may then be placed on the baseboard and fastened down by using a wood screw through the loop in the clamp.—Radio News.

Stovepipe Antenna Is Designed by Engineer

What has been termed a "stove-pipe antenna" has been designed by Maj. Orin E. Marvel, radio engineer of Dayton, Ohio.

The antenna consists of a wire wound around a mast, and looking from a distance much like a small stove pipe.

Marvel claims for it more height after selectivity and greater volume.

AFTER HER BABY CAME

Mrs. Hollister Unable To Do Her Work for Six Months

Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health

MRS. HENRY HOLLISTER
WYANDOTTE, MICHIGAN

Wyandotte, Michigan. — "After my baby was born I did not do my own work for six months and could hardly take care of my own baby. I always had a pain in my right side and it was so bad I was getting round shoulders. I would feel well one day and then feel so bad for three or four days that I would be in bed. One Sunday my mother came to see how I was, and she said a friend told her to tell me to try Lydia E. Pinkham's Vegetable Compound. So the next day I got a bottle and before it was half taken I got relief. After I was well again I went to the doctor and he asked me how I was getting along. I told him I was taking Lydia E. Pinkham's Vegetable Compound, and he said it did not hurt any one to take it. I am always recommending the Vegetable Compound to others and I always have a bottle of it on hand."—Mrs. HENRY HOLLISTER, R. F. D. No. 1, Box 7, Wyandotte, Michigan.

Another Woman's Case

St. Paul, Minnesota. — "I have a little girl three years old and ever since her birth I have suffered with my back as if it were breaking in two, and bearing-down pains all the time. I also had dizzy spells. I had read several letters of women in the newspapers, and the druggist recommended Lydia E. Pinkham's Vegetable Compound to my husband for me. As a result of taking it my back has stopped aching and the awful bearing-down feeling is gone. I feel stronger and do all of my housework and tend to my little girl. I have also taken Lydia E. Pinkham's Liver Pills for constipation. I have recommended these medicines to some of my friends and you may use this letter as a testimonial if you wish. I will be pleased to answer letters of other women if I can help them by telling them what this medicine has done for me."—Mrs. PRICE, 147 West Summit Avenue, St. Paul, Minnesota.

He labors in vain who tries to please all.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

A coward is a man who knows he is wrong and refuses to admit it.

Red Cross Ball Blue is the finest product of its kind in the world. Every woman who has used it knows this statement to be true.—Advertisement.

Even busy men are never too busy to stop and look at a dog fight.

Indigestion produces disagreeable and sometimes alarming symptoms. Wright's Indian Vegetable Pills remove symptoms and restore digestion. 372 Pearl St., N. Y. Adv.

The turn of a woman's head often turns a man's head.

Obituary

Delbert S. Andress was born July 3, 1850 in Ashland county, Ohio near Ashland and died at St Anne's Hospital, Chicago, Illinois, May 4 1925 at 2 P. M. The body being terned in the private section of the I. O. O. F. Order in the Oak Ridge cemetery.

The funeral services were conducted by Walter T O'Rourke, undertaker with Rev Otterbein, pastor of the First Lutheran church and the order of the I O. O F officiating. The services were held in the chapel of Mr O' Rourke, undertaking parlors, 5418 Division street. Floral pieces were sent bearing the addresses of Masonic Boys, of N. Ave. Station of street railways, I. O. O. F. order, Atlas Lodge No 261, Employers of Electrical Shop of the Commonwealth Edison Co., Mr. and Mrs. Otto Kasch, Mr. and Mrs. Frank Erickson, Mr. and Mrs. Howland Smith and Mr. and Mrs. Edward Mercer.

Mr. Andress was the oldest of four children of David Andress, a Civil War veteran. He is survived by his wife, Mrs. Mary Andress and stepson, Edward, and by one sister and two brothers, Mrs. Howard Northrup and Marshall Andress of St. Joe, Indiana and C. M. Andress of Long Beach, Cal.

At the early age of twelve years he became a member of the Christian church. The latter thirty-five years of his life he spent in Chicago, Ill., 1346 Massasoit Ave, twenty-seven of this time he was a regular employee of the Chicago Surface Lines. The last five years were spent in ill health.

Mr. Andress was a member of the Association of Street and Electrical Employees of America and the Masonic and I. O. O. F. fraternal orders. He applied the golden rule in his industrial and fraternal associations of life, and is reported to have stopped cars many times to pick up a hurrying pedestrian between stops. His life, as his friends will recall was one of christian simplicity and common-ness. His friends will mourn his departure.

A detailed note was requested by his friends and relatives of Chicago and St. Joe, as a means of concise record and memorial, hence the detailed above.

Our Insect Enemies

According to newspaper dispatches from various parts of the country tremendous damage has been done by forest fires and in sectenemies in the past few weeks. In Massachusetts fires spread so rapidly that many farm homes were destroyed, and patrols have been formed to fight the flames raging in Virginia and West Virginia.

But fires are not the only enemies of our forests and our orchards In the last 20 years Maine has lost 40 per cent of her spruce and fir forests through the ravages of the bud worm. The tent caterpillar has done great damage to poplars, a tree valuable to the paper interests; the gypsy moth has stripped many varieties of trees in the New England states, and Massachusetts alone has spent $22,000,000 in the past few years in fighting it. The pine tree blister—brought over from Europe in tree shipments—is also taking a heavy toll in the south and west.

Right now when insect and vegetable life is getting a good start is an excellent time for residents around St Joe to do their bit toward stamping out our natural tree enemies Look over the trees on your place and destroy every appearance of insects before they begin to propagate, and before they have appeared in such large numbers as to make a successful fight against them impossible. Watch closely for the appearance of caterpillars, and if you are not posted on other destrurtive insects you can easily find someone in the community who can inform you about them. At any rate, look after your trees because each year finds them more and more valuable, even tho to you they are held only as objects of ornamentation.

BILL BOOSTER SAYS

Utility Coats Pose as Smartly Simple

If a coat have straight and easy lines, a double breast and the simplest sort of adornment—or none at all—it fulfills the season's first requirements for utility garments. Here is pictured a model of suede-finished cloth with smart lines and a little efficient stitchery by way of finish.

Maybe it is a good thing the child labor amendment wasn't adopted. What would the New York team do without Babe Ruth?

But what are we going to do about the child labor of some grown men?

Speaking of weeks. Why not have a full week's work week?

It's a good thing U. S. Senators are paid by the year. They would starve to death on piece (or peace) work.

Let's not have another constitutional amendment until the federal courts catch up with this one.

A scientist says men are more open to conviction than women. They certainly are convicted more often.

Only half the voters vote—and generally the wrong half.

We cannot hope for much in the way of prison reform until we get to sending a better class of folks there.

$800 for a dog bite, says a newspaper headline. We will wait until they get a bit cheaper.

Copyright 1925, John D. Fursell.

Slats' Diary
By Ross Farquahr

Friday—I hadda laff at pa tonit. me and Ant Emmy thinks we got a good joak on him but we ain't told ma about it yet. but if I dont get a new athaletick swimmin suit shes libel to hear about it We was at a ice cream social and got pa to tawking to 1 of the yung ladies at was a waiting on the tables an he kep calling her Miss Brown an finely she sed to him she says I wisht you woodent call me Miss Brown and pa says. Why I thot mebby I better on acct. I have only knew you for a cupple days but why dont you like for me to call you Miss Brown and she replyed and anserred. Beous my name is Kelly.

Saterday—Went down to the meat shop today with Ant Emmy and when we went in Ant Emmy says to the clerk Where at cud I find the Head Cheese and he says to her. Why you will find him setting over in the offis thats where. Ant Emmy diddent say nothing a tall oney she walks out with a sneering nose

Sunday—Evry buddy feels sorry for Mr. Betson witch went bankrupp from the shoe bizness. Ma sed it nearly made a nervus retch outta him since he broke up. Pa sed. Yes he gess it did becuz he herd he was a going over to Yurope to recuperate up from his nervus brake down.

Monday—They diddent no I herd them tawking but I did. My teecher was a tawking to ma about me. She sed she diddent no what to do with me. Ma says He is a bad Egg and I think you better take a good stick to him. Teecher just laffed and sed. I am afrade it wood be a bad Policy to hit a bad agg with a stick I gess thats educated tawk

Teusday—Tom Frump has got a big lump on the sid of his hed. Pa sed he told him how he got it. he sed the other nite when he got home he seen 2 beds and jumped in the rong bed he gess.

Wensday—Pa says the trubble nowdays with the care less drives is that to menny of them turns the corner in the center of the Block.

Thirsday—Ma had me beeting on the rugs tonite. I will say this for ma. She beleaves in the old adverb that what is wirth doing a tall is wirth doing well. A speshully when she got me to do it for her.

Notice Administration

2939

NOTICE IS HEREBY GIVEN, that the undersigned has been appointed by the Clerk of the DeKalb Circuit Court, of the State of Indiana, Administratrix of the Estate of William P. Steward, deceased, late of said County.

Said Estate is supposed to be solvent.

HAZEL STEWARD,
Administratrix.

April 28, 1925.
Atkinson & Husselman Attorneys.

Peculiar Ice Block

A steam shovel, working on a new highway, near Reno, Nev., uncovered a huge block of ice under the ground, measuring 60 feet in length, 20 feet in width and 10 feet in thickness. It is believed that originally the ice, which is estimated to be about forty years old, was a field of snow on the mountain side above, and was compressed into its present form by an avalanche of earth, rocks and trees.

Everybody knows that if he had plenty of money he would know how to use it better than those who have.

HEARD AROUND THE CORNER

Save trouble by using receipts. Get a book at News office.

Hazel Storer was a Sunday dinner guest of Beatrice Woodcox.

Mrs. George Bartlett, of Fort Wayne, spent Tuesday at this place.

John Sechler has quit the B. & O. section and is now working in a Kendallville foundry.

Persons wanting ice delivered regularly make arrangements at St. Joe Meat Market.

Olen Dermott left Friday for Milwaukee, Wis., where he will do road construction work.

Ora Wilmot, wife and son and J. C. Hull and family were Sunday guests of Ye Editor and wife.

Experience makes some people sadder and wiser while with other people it only makes them sadder.

Earnest Baxter and wife of Butler, came Monday to spend the week in the home of Chas. Cochran and wife.

Mrs. Jennie Sechler attended Mother's Day exercises of the Culture Club at Auburn Saturday afternoon.

For Sale: Ford Ton Truck, first class condition. Phone or call on Floyd Coburn.

J. N. Scholes and F. L. Milliman are owners of new Maxwell Club Sedans, purchased through the St. Joe Garage.

C. C. Bassett, wife and son, Charles, spent the day Sunday as guests of Carl Bassett and wife at Fort Wayne.

Clayton Wyatt and wife and Wallace Miller and wife of Fort Wayne, spent the day Sunday in the Marshall Andress home.

Victor Brown and family left Friday for a visit of a few days in the home of Mr. and Mrs. Hersh Garton at Cold Water.

Mr. and Mrs. Vance Woodcox and little son of Detroit, were over Sunday guests of the former's parents, C. C Woodcox and wife.

F. M. Monroe and wife and Verne Monroe and family, spent Sunday with Wm. Miller and wife. Mrs. Ray Means was an afternoon caller.

Last Sunday in Concord township there were 416 persons in the Sunday School. Wonder if this record can be beaten any where in DeKalb?

A western poorhouse refused to admit a man because he owned an auto. That's about like a hospital refusing to take a man in because he is sick.

Cloth manufacturers must live. So what they take off the girl's skirts to make them shorter they put on the young men's trousers to make them larger.

Mrs. Harry Randall returned from Lima Saturday where she had been to help care for her mother, Mrs. Bertha Pence, who is now improving from her illness.

Francis Hickman and wife had as Sunday dinner guests, Frank Hickman and wife of Bryan, Ohio, E. A. Baylies and wife of Ney, O. Elmer Hickman and daughter and Mrs. Mel Snyder of Hicksville were evening guests.

Sam Keesler, wife and two children and Wilbur Yeiser, spent Sunday at South Whitley, guests of the latter's parents, Mr. and Mrs. L. W. Yeiser. Mrs Wilbur Yeiser and baby, who spent the past week at South Whitley returned home with them.

SPENCERVILLE

Mrs. Raymond Randall and baby of Muncie, are spending the week with her parents, Wm. Allen and wife.

Frank Rhoades, wife and daughter, Miss Doris, were Su day guests of Mr. and Mrs. F. Buchanan at St. Joe.

Gerry Wasson and wife were Sunday guests at the R. U. Bowser home. Paul Elinger and wife of Fort Wayne were afternoon guests.

Mrs. Matilda Oberholtzer and Miss Cosy Oberholtzer of Grabill, E. A. Roush of Fort Wayne and Margaret and William Lake, were Sunday guests in the B. F. Markle home.

A play will be given by the Epworth League of the Trinity Methodist church of Fort Wayne assisted by the Ladies Aid of this place, at the community hall on Saturday night. The play is entitled "The Mistery of Hadden Hall," was a great success when given at Fort Wayne recently.

Hurrah! No More Lice!

"Now I can set in peace. Even the poultry house, barn and stable are free from lice since we used

DR. LEGEAR'S LICE POWDER"

Makes hens feel better and lay better when dusted into the open feathers of the fowl and around coops, roosts and other places where lice and vermin are likely to be found. Easily applied from either top can. Also good for repelling lice on horses, cattle and hogs.

Satisfaction Guaranteed or Money Back

FOR SALE BY

B. S. SHEFFER Drug Store

Wm. Erick and wife spent Sunday with friends at Hamilton, Ind.

For a fire proof guaranteed roof see Bowser & Reed.

Mrs. Minta Rhodes, who has been confined to her bed for several weeks, is able to be up a part of the time.

Hermon Reasoner and wife spent Saturday and Sunday at the home of Ray Gawthrop's of Burroak, Michigan.

Don Shook, who has been a patient at the Irene Byron Hospital, near Huntertown, was able to be brought home recently.

For good glasses see Griest at American Building Hicksville, Ohio.

Rethel Drew, Evadue Showalter, Wynetta Finley and Grace Ricketts of Muncie, were entertained from Friday until Monday at the home of Florence Beams and Doris Shull.

The baccalaureate sermon was delivered on Sunday evening by Rev. Roy S. Brown at the Methodist church. The members of the senior class are Ivan Butler, Garnet Beams, Kermit Steffey, Lelia Houghton, Mary Smith, Charles Furnish, Doris Beams, Lynn Howey, Ila Agler and Mabel Rhoades. The commencement will be held Thursday evening at the Lutheran church.

Charles Scott, aged 59 years, a barber, died on Sunday evening at his home. Mr. Scott was in his usual health, working in his barber shop on Saturday evening. Sunday afternoon he took sick, and passed away at 10:00 o'clock. The body was taken Monday morning to the home of his sister, Mrs Jennie Chaney. Mr. Scott leaves to mourn his departure, a little son, Maurice age five years, three sisters Mrs. Belle Cope of near Angola, Mrs. Nancy Chaney and Mrs. Jennie Chaney of this place, two brothers William and John of Auburn. His wife died about eight months ago. The funeral was held Tuesday afternoon at 2:00 o'clock from the Methodist church, Rev. Roy S. Brown officiating assisted by Rev. S. D. Steffey. Interment at the White City cemetery.

See Furnish for Batteries.

Receipt books on sale at News office.

Otis Koch and wife of Wayne, were entertained Sunday at the home of James Reed and wife.

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co., Otsego, Mich.

James vallieu and wife called at the home of Mrs. Miller at Harlan Sunday. Mrs Miller has been very ill and passed away Sunday.

NEWVILLE

Mother's Day was observed at the U. B. church Sunday.

Dr. Brunson has moved the old meat market to his farm north of town to be made into a dwelling.

Bessie Shaffer and children moved last week into John Gillingham's house, the latter moving to his wife's home on the east side.

John Miller accompanied Guy Smith to Fort Wayne Thursday on business.

Another child of Mack Richmond and wife has taken typhoid fever. A trained nurse is in attendance.

Belle Crum, who has been visiting in Chicago, returned home last week.

Mack Hatch and wife have moved into the house recently vacated by Mrs. Bessie Shaffer.

Paul and Dewey Miller with their wives, were Newville visitors Sunday.

Eighteen farmers with their teams went into Mack Richmond's cornfield one day last week and prepared the field for planting corn. We did not learn the names of all who so kindly assisted in the good work but feel sure that Mack appreciates the favor. Mr. Richmond has been confined to his home on account of illness in his family. The first one to have the fever is convalescent.

BILL BOOSTER SAYS

New Over-Blouses of Bordered Materials

Designers of blouses are experimenting with the new bordered materials and have used them with fine success in both overblouses and tunic blouses. The model pictured shows a very obvious placing of the figured border with a novel collar and laced front fastening.

Sturdy Cottons for the Small Boy

Just about the best outfit for the romping little boy of three or the kindergarten youngster are little pants-and-blouse suits. They are made of sturdy cottons or coarse linens, usually in tan, natural, brown, blue or green, and sometimes have white collars and sleevebands. Cotton cord and tassels make a practical front fastening.

New Matched Lingerie Is Rich and Dainty

Matched sets in lingerie have returned to favor, in which combinations or drawers and chemise are made with a nightdress to match. This set pictured, of pink crepe de chine, has sprays of embroidery lace insertion and frills of fine net, to make it rich and dainty.

The Smart Thing in Beaded Gowns

Crepe de chine finds fitting adornment when gleaming beads in rich colors are used to embroider it. Styles may come and styles may go, but here is a combination that remains and the smart thing in this season's afternoon frocks or evening gowns has its embroidery in graceful borders and bands.

Overblouse Adapted to Many Materials

Day by day, in every way, the overblouse grows more simple but not less smart. Here is one which bears this spring's signature, being minus a hipband but possessed of the new slashed collar, laced fastening and satin bindings.

One More Deposit Will Make the First Thousand--

Are you one of the many happy families of this community who are nearing or have passed their **First Thousand Dollars** in their Savings Account? If you have never experienced this worth-while thrill, now is a good time to start toward it. We have never had as many depositors as now and they are your friends and neighbors. Think about it and then act wisely.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Freak Fish Obtained by Chemical Compound

Why does a child resemble either or both of its parents? Obviously because it starts with the same kind of material as that with which its parents started, and is exposed to a similar series of influences or stimuli throughout its development. If the stimuli be varied the resulting organism will vary accordingly.

Mr. Arthur Bendy, in "The Biological Foundations of Society," retells the story of Stockard's classical experiments with the eggs of the fish Fundulus. If chloride of magnesia be added to the water in which these eggs are developing a most remarkable result follows. The young fish, or at any rate, a large proportion of them, appear with a single eye in the middle of the head instead of a pair of eyes, one on each side, while the mouth is displaced downward. I know now why I always objected to drinking magnesia as a child.—John O'London's Weekly.

More Ways Than One

Bobby was helping mother serve at her afternoon bridge club. He brought in two glasses for the lemonade that were not as clean as they might have been.

"Why, dear, those aren't the glasses mother wanted. Those aren't clean. Don't you see?"

"Mother, I should have filled them with lemonade before I brought them in, shouldn't I?" replied Bobby, in an innocent tone, and then wondered why everyone smiled.

Sweetmeats of Spain

Spain is no country for the dyspeptic traveler, especially if he have a sweet tooth. Every village seems to have its own brand of sweetmeat, one better than the last, which it makes according to a secret formula unknown elsewhere on earth. Yet these wonderful concoctions are made from the simplest ingredients. Honey and crushed almonds make the world-famous turrones of Valencia and Andalusia. The yolk of a fresh egg mixed with sugar goes to make the delicious yemas of Segovia, next to impossible to imitate. Many of the recipes are the jealously guarded secrets of wise old nuns. Oh! the little green oranges picked in a very special manner in a convent in Galicia, and the delicious butter-breads (mantecadas) of Asturias! Spaniards are noted for their good white teeth which is somewhat remarkable in a nation that loves sweets. The explanation perhaps is that they eat them as dessert, not between meals.

HERE AND THERE

Good Christians should never avenge injuries.—Cervantes.

The fewer acquaintances a man has the less he is bored.

It is better to discover where an enemy is than where he was.

Many people get their own way by elusion; that is, on the quiet.

It is not work that kills, but the worry caused by having no work.

Lay up 10 per cent for a rainy day and 10 per cent more for expense "you hadn't counted on."

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(©, 1925, Western Newspaper Union.)

Lesson for May 17

SAUL BECOMES A CHRISTIAN

LESSON—TEXT—Acts 9:1-19.
GOLDEN TEXT—"If any man be in Christ Jesus, he is a new creature."—II Cor. 5:17.
PRIMARY TOPIC—A Man Who Helped Another.
JUNIOR TOPIC—How Saul Became a Christian.
INTERMEDIATE AND SENIOR TOPIC—How Saul Was Converted.
YOUNG PEOPLE AND ADULT TOPIC—A Study of Conversion.

I. Saul's Violent Hatred of the Lord's Disciples (vv. 1-2).

Saul knew full well that unless the movement set on foot by Jesus was stopped, it would supersede Judaism. He was ignorant of the genius of christianity. He did not know that the "blood of martyrs is the seed of the church." The noble display of faith by Stephen in sealing his testimony with his blood did not soften Saul's spirit, but rather intensified his hatred for Jesus and His disciples. It made him more determined than ever to stamp out the Nazarene heresy. The intensity of his madness, and the extent of its operations are best set forth in his own words, "And I persecuted this way unto the death, binding and delivering into prisons both men and women" (Acts 22:4). "I both shut up many of the saints in prisons having received authority from the chief priests, and when they were put to death, I gave my voice against them, and punishing them oft in all synagogues I strove to make them blaspheme, and being exceedingly mad against them, I persecuted them even unto foreign cities" (Acts 26:10-12 R. V.).

II. Saul Kicking Against the Pricks (vv. 3-9).

The figure here is that of the Eastern ox driver following the ox with a sharp iron fixed to the end of a pole. The animal is prodded on with this instrument and if it is refractory it kicks against the sharp iron and injures itself. This is a picture of Saul as he was madly fighting against Jesus.

1. A Light From Heaven (vv. 3-4a).

The time had come for the Lord to interfere. Saul was stricken with blindness and fell to the earth. This physical demonstration accentuated the workings of his conscience which doubtless were going on quickened by the Holy Spirit as He used Stephen's testimony.

2. A Voice From Heaven (vv. 4b-5).

This was the Lord's voice calling Saul by name and asking, "Why persecutest thou Me?" This moved Saul to inquire, "Who art thou, Lord?" The answer came, "I am Jesus, whom thou persecutest." He is so closely identified with believers that He feels their sufferings and regards treatment of them as treatment of Himself.

3. Saul's Inquiry (v. 6), "What Wilt Thou Have Me to Do?"

The Lord told him to go into the city where information would be given him as to what he must do.

4. Saul Entering Damascus (vv. 7-9).

The haughty persecutor went quite humbly into Damascus, led by his attendants. For the space of three days he remained blind and fasted. What went on in his soul in those days no mortal can know, but we may be assured that he, like the Lord in the wilderness, was too deep in meditation and prayer to desire food.

III. Ananias Ministers to Saul (vv. 10-19).

1. Ananias' Vision (vv. 10-12).

In this vision the Lord appeared and instructed him to go to Saul. He gave him the name of the street and Saul's host, and informed him that Saul was now a praying man, and that He had prepared Saul by a vision for the coming of Ananias.

2. Ananias' Fear and Hesitancy (vv. 13-16).

He knew of Saul's ministry and the authority by which he came. The Lord encouraged him to go, assuring him that Saul is no longer an enemy but a chosen vessel to bear His name before the Gentiles, kings, and the children of Israel.

3. Ananias' Obedience (v. 17).

His fears being removed, Ananias went to the house where Saul was staying, put his hand on him and affectionately addressed him as "brother." Ananias told Saul that the Lord had sent him with a two-fold mission:

(1) "That thou mightest receive thy sight"

(2) "Be filled with the Holy Spirit"

4. Saul Baptized (vv. 18-19).

After Saul received his sight Ananias baptized him. The Lord bestows the gift of the Spirit upon whomsoever He will, and may designate anyone whether occupying an official position or not, to lay hands upon individuals.

Prayer

Prayer is the peace of our spirit. The stillness of our thoughts; the rest of our cares; the calm of our tempest.

The Angels

Angels served God and ministered to men when they proclaimed Christ's birth.—Presbyterian of the South.

Strength

Strength is born in the deep silence of long-suffering hearts, not amidst joy.—Mrs. Hemans.

ROAD BUILDING

FRIENDS ARE MADE BY USE OF ROADS

There are now in the United States 455,000 miles of surfaced highways. Every ten years the total, including country roads, will be around 800,000 miles, which will constitute a marvelous basic system excelling that of any nation in the world.

We are making rapid progress not only in road building, but also in our understanding of highway financing, taxation and use. It is worth while to realize the fundamental significance of all this activity which in the final analysis is simply an investment in neighborliness.

On the political and social side, neighborliness means mutual understanding and the ability to live together in harmony. It means that the West knows the South and appreciates its problems, and vice versa, writes Roy D. Chapin, chairman of the highway committee of the National Automobile Chamber of Commerce.

On the commercial side, neighborliness means ready facilities for distribution, ease of travel. In short, that the distant point can be reached as well as the nearby point.

We are in a highly fortunate position in that this country has a gridiron of rail lines. This gridiron should be maintained, operated, encouraged on a sound basis. Given this long-haul transportation equipment, the highway system becomes doubly serviceable because it means that every community of 5,000 population is linked not only with a motor-travel system, but is likewise within rapid transit reach of the long-distance railroad service.

It is recognized that the motor-car user gets a more immediate and more definite return from improved highways than any other class of the community.

The burden of federal expenditure for highways has not, however, fallen on the general taxpayer at all as yet. The reason for the federal government entering into highway construction, moreover, is given in President Coolidge's message to congress of December 6, 1923, in which he said:

"No expenditure of public money contributes so much to the national wealth as for building good roads."

In view of the enormous extent of this country, totaling 3,000,000 square miles, there is no other public work which is more deserving of our attention.

New California Road Is Now Open to All Traffic

Easterners motoring to California by the southern route can now save considerable time through use of the newly improved highway between Yuma and the Imperial valley, which is now open.

The trip of 65 miles over the sand dunes between Yuma and El Centro, instead of requiring 12 hours to two days to negotiate, and at times even longer, now can be made reasonably in a couple of hours. The new artery, including 15 miles of graveled road and 21 miles of asphalt, is a decided improvement over the old desert road that stretched across the sand hills.

This work has been consistently urged by the Automobile Club of Southern California, which leading motor organization is highly gratified at being able to tell tourists that this southern route to the state line at last has been placed on a par with the trunk lines of the state.

It is felt that this improvement is one that will uphold the statement that the saving in cost of operation to motor vehicle users who travel over an improved highway is more than enough to maintain the highway. This conclusion was announced by the National Automobile Chamber of Commerce following investigations made in North Carolina and other states in connection with the argument that the motor vehicle should pay for all highway maintenance.

Tax in Many States

Thirty-seven of the forty-eight states and the District of Columbia start 1925 with a gasoline tax in force. In several states the tax is 1 cent, in 18 states and the District of Columbia it is 2 cents, in two it is 2½ cents, in nine it is 3 cents and in one state it is 4 cents. Of the remaining 11 states, Wisconsin, Minnesota, Illinois, Iowa and New Jersey, as well as Kansas, all have gasoline tax measures under consideration. It is probable that most of these measures will be enacted into laws. Massachusetts is the only state that has definitely turned down a gas tax measure by popular vote and it is generally believed that the reason for this defeat is to be found in the apportionment of funds proposed rather than in the fact that it was a gasoline tax.

To Relieve Traffic Jam

The first step toward dual highways to lessen traffic congestion, partially due to heavy movement of trucks, may be taken by Massachusetts, for the state department of public works is planning a $2,000,000 highway paralleling the state highway from Boston to Worcester. The new highway is to follow closely the present Worcester turnpike. A legislative appropriation will be necessary before work on this much needed improvement can be inaugurated.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Anger and Apologies

BRYANT brought me a letter a few days ago from his father—a very hot, ill-advised letter, written in the heat of the moment and saying things which the older man would later wish unsaid.

The cause of the outburst was irritating, no doubt, but the letter remedied nothing. Young Bryant had not done well in his studies; he had, in fact, failed pretty completely, and a notice to that effect had gone from the dean's office. Bryant, senior, coming into his place of business in the morning, found the offending letter lying blatantly on the top of a pile of mail. He had been out late the night before, he had not slept well, the letter angered him, and he rang for the stenographer at once and dictated a hot one to his delinquent son.

He said a number of things that were not kind, and some that were not true, and after the letter had gone out and he had had time to think things over he was sorry and ashamed of himself, though he did not have the courage to say so, but, instead, sent his son an extra allowance and by that means helped to increase his delinquency rather than to remedy it.

A great many people who would not think of saying angry, insulting things to one's face, will not hesitate to do so in a letter, just as many people employ a manner when speaking over the telephone that they would hesitate a long time before using in a personal conversation. There is a cowardice in such a procedure that does not make a strong appeal. The written word is far more objectionable, and hurts longer than the spoken one, because it is permanent; if one forgets it he can go back to the written page and refresh his memory.

Every one has a tendency to write letters when he is angry, and perhaps it is a good exercise in composition; but, after having written the letter, it is well to lay it aside before mailing it, until it cools, as it were, or at least until your own anger cools, and nine times out of ten, when you come back to it the next morning and read it over, if you are a sensible man, you will throw it into the waste basket and write another. I have followed this practice for a good many years and I can commend it strongly.

Nothing shows weakness and a lack of self-confidence more than anger. The angry man is off his guard, he has lost control, like a man driving a car with the steering gear out of commission. When a man gets angry in a letter he is pretty far along the road toward defeat. Self-possession, poise, quiet self-control and a determination not to be thrown off your balance by what any one else may say or do, are the strongest qualities you can exhibit. Never let yourself get angry, or at least never let it be shown.

An angry letter almost always calls for an apology, and a letter of apology is one of the hardest to write.

It takes a generous spirit to present a good apology. Most of such letters as I have seen or received are lame, half-hearted, make matters worse, or help them very little.

I had been working in the garden and Barbara, the little daughter of one of our neighbors, had been playing around and, in experimenting with my tools, had inadvertently uprooted a plant upon which I set some value. A lecture followed from her mother, who insisted that, as a part of the penalty to be paid for her misdemeanor, she was to present her apologies to me. She walked across the garden toward me shamefacedly.

"Mother says you're sorry for what I did," she stammered out, and that's the sort of apology which we frequently make in letters for our more mature misdemeanors. We write such letters because we should, or we must, or because some one older or wiser than we are advises us to do so.

There should be no reservations in a letter of apology. If we have been wrong we should say so directly, and not try to mitigate the fault by infinite excuses and involved explanations. There is no weakness in such an admission, but rather the opposite. People will always think more of you if, having been wrong or made an ass of yourself, you are generous and frank enough to admit it.

"I was angry when I wrote last week," a man wrote me not long ago, "and really without excuse, and I am sorry. Had I read the letter a second time I should never have sent it. I wish you would destroy it or send it back to me and try to forget the whole occurrence."

His was a generous apology and one which could only win my warmest respect.

Ancient Circus Feats

Many of the circus and vaudeville feats which are performed today were performed in the circuses and amphitheaters which drew large audiences 5,000 years ago. Frescoes were recently uncovered in Crete by an eminent archeologist, which represent a charging bull about to toss a girl poised on its horns, while another girl is standing behind apparently waiting to catch her. A man is represented turning somersaults on the bull's back. All of these performers are dressed in costumes which very much resemble those worn by modern bare back riders.—Philadelphia Inquirer.

Is Your Work Hard?

Is your work wearing you out? Are you tortured with throbbing backache—feel tired, weak and worn out? Then look to your kidneys! Many occupations tend to weaken the kidneys. Constant backache, headaches, dizziness and rheumatic pains result. One suffers annoying kidney irregularities; feels nervous, irritable and worn out. Don't wait! Use *Doan's Pills*—a stimulant diuretic to the kidneys. Workers everywhere recommend *Doan's*. They should help you, too. *Ask your neighbor!*

An Ohio Case

D. Terrel, Bogg Street, DeGraff, Ohio, says: "My back was sore and stiff and if I bent over, sharp pains shot through it. I felt tired and all worn out. My kidneys at times acted too frequently, and then again not enough. After using Doan's Pills, the backache gradually left and my kidneys were regulated."

SINNERS IN HEAVEN

BY CLIVE ARDEN

COPYRIGHT BY THE BOBBS-MERRILL COMPANY

HUGH'S PHOTOGRAPH

SYNOPSIS.—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Stockley, daughter of a widowed mother, is seen to celebrate her marriage to Hugh Rosedale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word in a few days comes to Darbury that the plane is missing and its occupants believed lost. Croft and Barbara, after the wreck of the airplane in a furious storm, reach an apparently uninhabited island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a cannibal. Croft rescues her. Croft discovers a party of blacks, apparently reconnoitering. Croft fixes up an electrical guard which scares off an attacking party. Secure from immediate danger, Croft and Barbara settle down to make the best of things. Croft, who has traveled much among savages, makes friends with the blacks. Croft and Barbara fall in love. The man betrays his passion but restrains it. The girl desperately tries to remain loyal to Hugh. The man demands "marriage" and a husband's rights. The girl sets duty before inclination.

PART TWO—Continued.

—10—

"It's a d—d lonely position for you!" he exclaimed. Then he rose, with such precipitancy that she nearly fell. He began walking up and down outside the hut.

Instead of hurrying away, she hesitated, watching him in bewilderment—conscious of a strange longing to remain near him, to saunter together on the shore, as was sometimes their habit at night.

But when, at last, he paused near her, he made no such suggestion.

"Go to bed," he said rather curtly; "it's late. And, Barbara, don't lie awake all night, or cut off the rest of your hair! It's all—useless."

With that he turned away, and went off alone to the beach, leaving her staring after him.

Strangely enough, she did not lie awake this time. Those few passionate moments had embodied hours of emotional strain. The force which had seemed to be sweeping her from all moorings had caused her to struggle violently, both mentally and physically, to retain her own individuality, to prevent it from being submerged in his. His lips on hers would have been sheer physical pain, unbearable, overpowering. . . . Afterward, a numbness fell upon her mind. She felt too desperately tired to attempt coherent thought. This volcano upon which, nowadays, they lived, must take its course! Since the moment when she had seen the shark, a lifetime of tumultuous emotions had whirled her mind and heart round like thistledown. Confused, yet subtly, gloriously elated, she slept till dawn. . . .

A fusillade of sticks and stones roused her, but she did not see Alan. And a sudden overwhelming shyness restrained her from calling to him.

But there was no trace of last night's passion about this man of a hundred moods when they met; and her self-confidence revived. While she was packing the old tin box with food, he arrived, fresh and damp from the river. He gaily deposited a large bundle at her feet, and wished her a merry Christmas.

With surprise, she uncovered a cunningly contrived hammock made from tree fiber, airplane canvas, and aerial! As this was exactly what she had often wanted upon hot afternoons, her pleasure was unbounded.

"I have nothing for you, Alan!" she regretted, with compunction.

"Oh? Well—we'll see about that!" he replied enigmatically; then hurried their departure.

They walked quickly, saying little, over the rough ground which, covered with low scrub, sloped upward on the east of their bay.

They paused to rest and eat, in the eastern wood, meaning to remain there during the midday heat. The shady branches stretched out over the beach were welcome to eyes dazzled by the glare without. The intoxication of the morning's beauties, their own radiant health and spirits, the strains of the wild sweet orchestra rising all around, lent enchantment to that little picnic.

Barbara had, as it were, caught at reeds during the last few weeks, but they had broken in her grasp. Onward she was madly whirling. She knew it; could not save herself; could not quench that light in his eyes, and her own foolish weakness in his proximity.

Abruptly, he went to her and took her by the shoulders, saying nothing, but gazing into her face as if searching for something he wished to learn there.

Suddenly, apprehension in her eyes deepened to horror; a cry burst from her lips; she became rigid in his hands.

With such precipitate haste did the whole incident occur that she could never afterward clearly remember how it happened that, in a flash, the face of the whole world changed. . . . She was conscious of a dark bulk, a savage face she knew well, looming suddenly up amid the trees—of a spear-arm uplifted, preparatory to hurling the weapon into the back of an unsuspecting enemy. . . .

Her man was in danger! That was her only coherent thought. Instantly she had whipped out the revolver, and, with deadly calm, raised it. . . .

A sharp report and a puff of smoke; a wild howl of pain and fear; then a stream of blood oozing from the black shoulder in front of her, as the smoke cleared away. Those were the outward impressions of which her mind was dimly aware; but they seemed unreal, of no account. She heard the spear fly wide into the tree at her side; then Babooma's running footsteps and retreating cries. . . . Croft, astounded, had barely caught a glimpse of the dark face which he had often seen covertly watching him, before it was momentarily blotted out in smoke. He started forward in hot pursuit; then, arrested by a choking cry, halted abruptly, and looked at the girl. . . .

She stood motionless; her eyes, luminous as stars, fixed upon him, her mouth a little open, the still smoking weapon lying at her feet. It had been no mild idea of causing Babooma fear which had impelled her action, but a furious, savage desire to kill! She had hurled herself to the rescue, regardless of all else.

Afterward, all power or desire to move seemed to leave her. A veil fell from before her eyes; and a brilliance streamed in, illuminating, scorching—full of such ecstasy that she stood as though transfixed, paralyzed with the wonder of it all, gazing upon him whom this brilliance had newly revealed. . . .

The breath caught in the man's throat; the blood raced madly through his veins; his eyes blazed, answering the glory of her own.

Like the Wagnerian lovers after drinking of the love potion, they stood a few feet apart, under the sun-flecked foliage of the trees, awed for a moment by the miracle. She raised her hand at last, as if inviting. . . . The spell broke.

Instantly his arms were around her. With an inarticulate cry, she was swept off her feet, clasped to his throbbing heart, his burning lips pressed hers, her hands clinging round his neck. . . . all her individuality merged irrevocably into his, as a stream, falling through arms of rock, merges into the resistless waves of the ocean.

* * * * * * *

The sun was sinking, a fiery ball in an almost violet sky, its last rays shimmering golden-red across the water, when at last the two returned to the hut on what wonderful Christmas day! A new world greeted their eyes at every turn. Never had reef or sea or sky appeared so splendid. The superb, absolute egotism of newly found lovers enveloped them both: no thought save of each other disturbed the shining hours. Like one still walking in a dream-world, Barbara entered the central hut, gay with its decorations. The line of golden light entering with her pierced the dusk within; and, falling upon the opposite wall, drew her eyes unconsciously that way. . . . She stopped.

Hugh's face smiled down at her, with all its old confidence!

Violently the dream-world crashed around her as she met the faithful, dog-like look she knew so well. Had he been there in flesh and blood, she could hardly have been more disconcerted. She felt as a traitor might, when meeting the unsuspicious eyes of the sovereign he has betrayed. For, however faithful she might remain in word and deed to her bond, her heart would ever be traitorous. His ring was still on her finger: it seemed to burn there, an outward sign of the world of fact with its prosaic realities, its duties, its sense of honor, its materialism, its sacrifices. . . . A cold foreboding swept over her. It was as if in the midst of glorious sunshine, a thunderclap had sent its warning of storms not far away. . . . She sat down, propping her face upon her hands, in self-abasement—fearful, yet, behind all, exultant. . . .

Thus Alan—after going to fetch water and remaining to bathe—found her, upon his return. He set down the basins, then bent over her.

"What is the matter?"

She half drew away from his touch. Bending closer, he removed the hands from her head, and raised it back against his breast.

"What's troubling my dearest, on this day of days?"

She looked up into the ardent gray depths so close above her; then at the photograph upon the wall. His look followed hers, and quick comprehension dawned.

"Ah!" he ejaculated. "Well?"

"Don't you see?" she asked. "All this is—impossible!"

His eyes hardened a little; and he loosed her.

"You and I have gone too far, now, to draw back because of scruples, Barbara!"

"They are not scruples! It is a matter of honor." She half raised her left hand, showing the little band of diamonds.

With one swift movement he had seized the hand and ripped off the ring.

"Honor be d—d, then!"

She sprang up, alarmed at his violence. He towered over her, his face blazing.

"Do shed the remnants of the parson's daughter, my dear girl! Face things squarely! You drifted into this engagement when a mere child, not realizing all it meant. As you developed, it ceased to fill your life. His nature did not satisfy yours. I saw that at once. But until I knew your heart was free, I could do nothing—save keep away!" He laughed bitterly. "I have wanted you and craved for your love, day after day, night after night, all these desolate months here together like—like two icebergs in the Garden of Eden! Do you think now, when I have got it, I am going to lose it again? Would he or any sane man wish it—or expect it—after all this? Don't you realize what—the world would—think—now?"

She looked puzzled over this sentence, not having been acquainted with a malicious-minded world beyond her old horizon. But she knew the truth of every other word he uttered. Her

She Stopped. Hugh's Face Smiled Down at Her.

awakened heart understood now the affectionate comradeship alone aroused by Hugh. Her whole nature yearned toward this man who had mastered it; her heart fluttered—wavered. The conscience warring against it made another dying attempt.

"I—I can't shatter a man's lifelong faith. It would be murderous—"

"Do you love me?" he interrupted, taking her firmly by the shoulders.

"Ah! you—know it," she breathed.

"Yet you would put—this—between us, with no hope of rescue?"

Loosing her abruptly, he turned and looked long at the pictured face. Then, with a stifled exclamation, he pulled it from the bamboo. Before she realized his motive, he had torn the photograph into shreds, and scattered them upon the ground.

"Alan!" she gasped, almost frightened by his vehemence. He wheeled, facing her with burning eyes.

"I'm not a lap-dog! If we get rescued, we shall, of course, go straight to Hugh and tell him the truth. But—if not—" He suddenly threw his arms around her, straining her to him. "Have you realized that probability—now, Barbara? We may be here forever—just you and I—where the muses of civilization give way to Truth—where no laws exist save those of nature—no conventions!" He swept her off her feet, and his kisses burned upon her lips, her neck, her short hair. . . . Once more her life seemed to sink from her own keeping into his. . . .

He set her down at last, still clasping her to him.

"Doesn't—that—decide it all?" he murmured unsteadily. "Don't you understand that we have bigger issues to face—here—than useless scruples?"

She turned in his arms, looking into his eyes through the gathering darkness. The distant thundering surf was the only sound; and it seemed to suggest approaching storms more terrible than any she had faced before. Freeing herself a little, she pressed him from her.

"You have won your way—as usual, Alan. But—ah! Be merciful!" As she had appealed before, so the cry came again from her unprotected heart.

That pitiful entreaty and her surrender reached where resistance might have failed. The passion in his face faded a little; and, seeing this, she pressed her advantage.

"Isn't the present joy—sufficient! You are mine and I am yours. Don't let us spoil the glory of it all!"

For a long moment there was silence in the darkening hut. . . .

Then this man, who had ever been wont to sweep aside all obstacles to his will, bent his head slowly, and kissed in turn the small hands clasped upon his breast.

"We must keep our faith in each other—whatever the future brings," he whispered. And tenderly, almost reverently, he kissed her lips.

PART THREE

Deep Chords

I

A ring of stakes, lolling drunkenly to one side, encircled the hut, at a distance of about twenty yards. With a small rock for hammer, Alan was pounding them into the ground, during the hour before sunset. He had conceived the idea of building a palisade.

Occupation! It was what they craved. Though neither confessed the fact to the other, both tacitly acknowledged the need. They seized on any excuse that would supply food for their thoughts, toil for their limbs fatigue for body and mind. For, deep in the heart of each, below all the ecstasy of their joy together, lurked grim fear—not fear of each other, but fear of themselves; above all, fear of nature, of her smiling face and irrevocable laws. Resolutely, each buried the skeleton out of sight, covering it with a hundred pretty-colored reeds. But sometimes, unexpectedly, it stirred below the thick layers stretched out its skinny arms. . . .

"I'll bring the river down here some day," the inventor of modern aircraft observed, thumping in a stake with his stone-age hammer. "Why are you smiling in that vacant manner?"

"Alan," she murmured, "you have been a revelation. I thought you a bully, only intent upon getting your own way, regardless of everybody."

"Well?" He laughed gently. "Haven't I got it?"

"Ah, but not until it proved to be my way too."

"Merely because I realized it would be worthless otherwise. I learned that first of all the many things you taught me."

"I?"

"Yes, you." He raised her chin possessively. "Don't you think you have been a revelation, too? And hasn't the 'spirit' of the island you spoke about been a revelation to us both? It seems to me," he laughed, "the only thing to save the world from being choked by materialism is to wreck it on a desert island! Make everybody begin life afresh, back in prehistoric days."

Barbara caught at this idea. "But," she said, following the train of thought it engendered, "if all discontented people had the chance to come, wouldn't every tree be crowded?"

"Not at all. Only a handful would arrive. The majority are too peace fully asleep to realize they are being choked. Commercialism is the god they worship. Although, when there is nothing better to do, they go to church—in their best clothes."

"You are very bitter!" she exclaimed in surprise.

To Barbara, this man had ever been full of surprises; but she had spoken the truth when she had called him a revelation. For, during the two months since Christmas, he had been so at every turn. Not until love opened her own eyes; until she knew the meaning of passion herself, and understood the tempestuous force of his, did she realize the strain under which he had been living. Since Christmas night the nature she had thought arrogant had revealed a thousand wonderful mysteries. As a tree, cold and hidden in the snows and frosts of winter, responds to the glory of spring, so he had opened in the glory of their love.

She drew away from him, and clasped her arms round her raised knees. Mountains, dark and threatening to those whose way lies across them, are little heeded when shrouded in mist, below which the sun shines. But now and then a jagged peak thrusts through; and, with the journey's progress, more appear behind. . . . Generally, these frequent peaks were instinctively shunned; but today Alan went on recklessly.

"After all, marriage was made for man, like all other conventions. We are not their slaves. What do forms and ceremonies matter—here? They are often tosh. A pauper marries an heiress, and vows to endow her with all his worldly goods! If he did, he would have to take the clothes off his back and go stark naked. You and I would vow to forsake all others, when there is nobody here to forsake. You would hardly want to elope with Babooma? If you did, I should soon catch you. That's another point: we couldn't separate if we wanted to! So what would be the good of a wedding? Of vows we couldn't possibly break?"

"Bigger issues to face than useless scruples." It is the old, old conflict. Has it the usual end?

(TO BE CONTINUED.)

Ancient Roman Temple

The Maison Carree, or Square house, at Nimes, France, is perhaps the most perfect of extant specimens of ancient Roman temples. It is thought to have been built in the Second century of the present era.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

ADIPOSIS DOLOROSA

THIS Latin term which sounds so mysterious means painful fat. It is the name given to a peculiar condition, first described by Dercum in 1888, in which there are deposits of fat, either all over the body, or in limited masses, which are painful. The fatty masses have a peculiarly "wormy" feeling. The flesh is soft and bruises easily. It is so tender that the patient cannot lie long in one position but is forced to change his position frequently to relieve the soreness.

While most victims of the disease are over normal weight, they are not necessarily so. Also one may be many pounds overweight, without the peculiar soreness found in Dercum's disease. So this is evidently something different and distinct from ordinary fattiness.

In a recent issue of the Journal of the American Medical Association, Doctor Price and Doctor Bird of Spokane, Wash., describe a case of this rare and strange disease. The patient, a woman of nineteen, weighed 192 pounds. But this weight was not evenly distributed. All over her body and limbs were bunches of fat. These masses were painful and tender. They felt like bunches of worms. Her flesh bruised easily, she could not lie down in comfort. She had to change her position constantly. She was dull and complained of a constant feeling of weakness.

Careful examination failed to show anything wrong with any of her body functions. Here was a woman with strange, painful, fatty lumps, general weakness and mental dullness. Something was wrong. What was it?

In the few cases of this strange disease where a post-mortem was possible, it was found that the victim had a shrinkage of the thyroid glands in the neck and of the pituitary, a small gland at the base of the brain. From this, it has been suspected that this disease was caused by defective action of these two glands. Both of these glands are what are called "endocrine" that is, they manufacture some substance which goes directly into the blood and which is necessary for the proper working of the body.

No one knows how to make a defective gland work like a sound one. But the glands of animals, especially the glands of the sheep and the cow, are very similar to our own.

So this patient was given small doses of the dried thyroid of a sheep, later on of the dried pituitary. In a few weeks, she was free from pain, able to do her housework and mentally bright. The fat had disappeared.

We know that dried sheep thyroids will change a cretin idiot into a normal healthy, happy person. Now if dried pituitary will cure victims of such a strange and painful condition as adiposis dolorosa, one more human affliction can be written off.

THE VALUE OF RAIN WATER

DO YOU use hard water out of a well or town water supply for washing or do you use the soft rain water, distilled by the sun and clouds? I can remember as a boy the rain barrel that stood at the end of the porch under the spout and how in the spring and summer the water streamed down over the porch roof, along the gutters and down the rain pipe into the hogshead. I remember, too, the cistern back of the house with rain pipes from all the four corners of the roof and a pipe leading up to the pump at the kitchen sink. We drank the water out of the well, but we used rain water for our hands and faces, our skins and our clothes.

In these days of tube wells, wind and gasoline pumps and city water works, few households use anything else but hard water for all purposes. The cistern and rain barrel are by no means as common as they should be.

Yet hard water is not only disagreeable for household uses, but it is also expensive. Instead of forming a smooth, creamy suds with soap, as does soft water, it makes a slimy, curdled mess which not only does not clean as well but uses much more soap than does soft water.

If you have boilers, heating tanks or water-heating systems, the hard water forms a scale, which chokes up the pipes and increases the expense. Used in factories, it is much more expensive, as the scale wears out the boiler parts, causes loss of heat efficiency and greatly increases the cost of keeping up and running any heating, lighting or power plant.

Estimating the expense of hard water, Mr. E. F. Eldridge of the Michigan state health laboratory, says the hardness of water is due to two elements in solution. These are calcium and magnesium. The calcium is dissolved in the water by carbonic acid gas. A family of five with hard water will use about ninety pounds more soap a year than with soft water. A household having a water heater or boiler would use more fuel, as the scale-choked boiler and pipes would require more heat than a soft-water system.

Hard water can be softened by boiling to drive off the carbonic acid gas when the lime settles to the bottom. It can also be softened by any one of a number of chemical agents. But the best way to get soft water is from the clouds when it can be had merely by catching it and keeping it.

and 3 Coupons

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons—the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

Dictionary Coupon

Clip three 3 coupons and bring to office of the

B. E Widney and wife and Miss Susan Sechler, were Sunday evening guests of Ed Storer and wife.

Miss Mary Foltz of Defiance, spent the weekend in the homes of J. P. Buckingham and wife and J. E. Foltz and wife.

Dan Myers, wife and two daughters of Hicksville, were Saturday guests of Sam Kees and wife who returned home with them to visit until Sunday. George Kees and family were also Sunday guests in the Myers home.

Children's Week Program Successful

The observance of children's week in St Joe was a wonderful success in spite of the epidemic of mumps and the inclement weather.

This work was sponsored by the township superintendent of the children's department, Mrs. C R. Price and she was ably assisted by the children's superintendents of each of the four Sunday Schools

The mothers of the township cooperated by sending their children promptly at two o'clock each afternoon. There was an average attendance of twenty boys and twenty-one girls each day. The largest attendance was on Wednesday when there were twenty-three boys and twenty four girls present. The smallest attendance was on Saturday when there were seventeen boys and sixteen girls present.

The stories were well presented and the children listened very attentively. They all entered heartily in the singing and were reverent during the prayer period. All the ladies in charge reported that it was a real inspiration to face the eager children. The ladies who took charge were the same as reported last week except that Mrs. Ralph Sechler and Miss Martha Miser took charge on Wednesday, Miss Dorother Scholes assisted Mrs. Craig Sheffer on Thursday and Mrs. Thornton was assisted on Friday by Mrs. Floyd Reasoner and Mrs. Meade Baker.

The committee in charge is very grateful to these women for their interest and help and they wish to thank the mothers for their hearty cooperation.

They also appreciate the use of the Lutheran church and the thoughtfulness of the janitor in having a fire each day.

About twenty-six children attended the two prayermeetings and they expressed great enthusiasm that the prayermeeting hour was thus given over to them.

Changes in Harvesting the Wool Crop

Wool with a long, fine fibre brings the highest price. LEFT—Doing a smooth job with a machine shear.

There have been many changes in the operations of securing the wool crop. It is not fifty many years since it was considered necessary to clean the wool before it was taken from the sheep. This used to be done by driving the flock to a lake or stream where each animal was thoroughly washed. Modern methods of wool scouring have made sheep-washing unnecessary, although even today, a very dirty fleece is discriminated against by the buyer.

There are certain precautions observed by successful sheep owners at shearing time which have been found to increase the value of the clip. For example, bright days are selected on which to shear, as this will avoid obtaining fleeces wet with dew or rain. Do not shear sheep on the ground, but rather use a clean platform upon which to do the shearing operation. Keep the fleece in one piece, and [illegible]

Changes have taken place in the method of removing the fleece from the sheep's body. Shearing sheep now is easy and simple compared with the old days of hand blades. Mechanics has done wonders towards solving many of the farm labor problems. Today, the automatic shearer, either hand or power operated, provides a quick and emcient method of harvesting the wool crop on the average farm as well as on the large sheep ranches. Machine shearing leaves no ridges and secures the maximum amount of fleece which is very important with wool at present prices.

For tying up each fleece, use, if possible, a paper twine. If binder twine is used, experience has shown that the fibres of the twine get into the wool, and as they cannot be removed, they are a damage to the resulting manufactured woolen goods. In preparing wool for shipment, large sacks which will hold several fleeces are used.

The program of sheep owners should include plans for most effectively harvesting a quality wool. The wool crop will be a large source of income this year, as it will be for years to come. High prices are being offered for the 1925 clip, and extremely satisfactory returns are assured. The changes that have taken place in the methods of harvesting wool are of great value to the sheep industry.

Inspired to Great Deeds

Many brave young minds have oftentimes, through hearing the praises and famous eulogies of worthy men, been stirred up to affect the like commendations, and so strive to the like deserts.—Exchange.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY MAY 21, 1925 | NO. 21

In Honor Of The Old People

Class No. 4 of the Lutheran Sunday School, taught by Dr. Minnick ever awake to the best interests of the church and Sunday School, invited classes Nos. 1 and 2 of the school to a dinner and afternoon entertainment last Sunday after Sunday School at the home of Mr. and Mrs. Hollis Dilley, north east of town.

At the close of the Sunday School persons in autos called for members of the honored classes and they were told that they were to be taken out in the country for a ride After considerable driving and even stopping at vacant houses they were finally driven to the Dilley home where they were taken in charge by the committee on entertainment.

Fortunately, nearly every member of each one of the three classes was present and the well planned dinner was one of the best ever. After the blessing by the Pastor all of classes 1 and 2 were seated at two tables and class No 4 did themselves proudly in the splendid service and fine fellowship rendered their guests. After the meal at which sixty persons were served all were taken in autos to the home of Mr. and Mrs. Charles Reasoner, both of whom have been shut in by sickness, the husband all of the past winter and the wife for many years. Here a splendid program was rendered consisting of the singing of hymns, prayers, speeches, etc.

Mrs John Woodcox presided at this meeting and after singing "Praise God from whom all blessings flow," an appropriate reading was given by Martha Miser Aft singing "Blest be the tie that binds" a short address to the honored guests was given by Rev. Steffey, followed by short but very excellent addresses by the following persons:—J. R. Shilling, teacher of class No. 1; Mrs Jennie Sechler, in behalf of class No. 2; also Mrs. Kate Leighty, Mrs. F. M. Thornton, Mrs. Clemens, Dr. Minnick, for No 4, John Sechler, Ed Miser and Martin Engle. After a prayer and singing of "What a friend we have in Jesus," the company was dismissed.

Much honor is ever due the younger people who are thoughtful of the interests and happiness of those who are now living in the glorious sunset of the evening of life, "And one day it shall come to pass that at evening time it shall be light" Reporter.

Parent-Teacher Association

E. R. KINSEY, - - - Reporter

The Parent-Teacher Association held the last meeting for this school year on last Friday night. The program was carried out as advertised with a few additional numbers The numbers were all good and the audience was especially pleased with the high school girls' feature song "A Big Wax Doll."

Judge D M. Link, of Auburn, gave a masterly address on the equal responsibility of parents and teachers to prevent juvenile delinquicy. A rising vote of thanks was given Judge Link for the splendid instruction and wider vision of Parent-Teacher work.

The new president, Mrs. Havens then took charge of the meeting and appointed committees for next year's work. This was followed by adjournment.

Co-operated in the Clean-Up Campaign

St. Joe depot and H K Tower have recently had a couple coats of paint which adds greatly to their appearance, B. & O being prompt to observe Clean up and Paint up week in this locality.

The carpenter gang has made wonderful improvements in the local appearances, during their stay in St. Joe the past month. The car house has been made double its former size, to accomodate the two gangs and the grounds have been graded. The curbing about the depot has been raised ready for stone which will make a decided improvement.

Memorial Day Plans Announced

Wm. Curie, president of Memorial Association makes public today full arrangements for observance of Memorial Day in St Joe and surrounding cemeteries, on May 30th.

The services of the Community Welfare Band have been secured for the day. At 8 o'clock the band accompanied by the old soldiers and delegation of citizens, will leave for Bear Creek, where services will be held at 8:30; at Morr's cemetery, west of Concord, 9:15; Jenkins cemetery at 9:45; at Coburn's Corners church at 10:30 and at Alton cemetery following this service.

At St. Joe Lntheran church the service will be held at 2 o'clock with special music by Choral Society. All the children of the community are asked to participate, also the K. of P. and I. O. O. F. lodges and the American Legion.

While the old veterans are scarce yet all who can are asked to come in from the communities and participate. Rev. Havens will talk.

HIS DECORATION

By Gertrude West

The whole little village far and wide
was gleaning bloom for its honored dead,
With tears for those who had bled and
died, but I—had only held
The scent of the roses so wind-blown
sweet went billowing by like
God's caress,
And I saw a son and a mother meet—
and ached with loneliness.
So my eyes were blurred till I could
not see the wreath-bright
crowd's advance,
Until one little flower girl ran to me—
"Oh, buy a poppy for France," said
she;
"For Flanders Field and France."

For France—and my face stung sharply hot,
This May day sweet with its blossom strewn
To be a soldier and be forgot—a few
short years—so soon!
She looked up sweetly and said, "Don't
grieve.
Perhaps you've your own cross Over
There?"
I smiled and showed her my empty
sleeve and said, "My cross I
bear!"
And, "Alone?" she murmured. "Beneath the flag your blood was
spilled to lift?"
Then she tore out the bloom from her
hair at that
And thrust it into my ragged hat—
All day I wore her gift.
—Youth's Companion.

A full house greeted the Senior class at the baccalaureate services at the Christian church, Sunday evening. Rev Shape of Bryan, O., delivered the address. Subject, "The Value of a Purpose" The scripture was fitting for the occasion taken from Daniel in which it said: "And Daniel purposed in his heart that he would not defile himself" The discourse was very appropriate and many fine spiritual applications were made for the benefit of the young graduates The class is composed of Evalyn Knight, Harcourt Miser, Freda Martin, Lloyd Curie, Bessie Lavman, Verba Haner and Paul Hadsell.

Girls Club Work Is Starting

During the summer months the Home Bureau Clubs of DeKalb county, will sponsor Girl's Sewing, Baking and Canning Clubs. Miss Marguerite Millman has again been employed by the county as Leader in Girls club work, for this year. Miss Hilda Koch has been selected to be the local leader in Concord township. At a meeting held recently the girls elected the following officers:—Marjorie Shearer, president; Ruth Schrader, vice president; Della Huffman, secretary and Inez Kinsey, treasurer.

The first lesson in sewing will be given Thursday afternoon of this week in the Domestic Science room of the St. Joe High School building Any girl between the age 10 and 18 may become a member.

Entertainment

The Lowman Quartette of Waterloo, assisted by a Cartoonist, will give an evenings program at Newville U. B. church, Friday, May 22. A free will offering to be taken. Ice cream social in basement after the program.

Plain or stripe Berne Overall $1.50, Coolidge Store.

F. D. Tope and wife were called to Bryston, Ohio, for funeral Wednesday. A cousin, John Tope, 16, a high school boy was killed Sunday by Nickle Plate train, in company with three of his boy chums who were returning from a ball game. Three of the boys were instantly killed.

RADIO

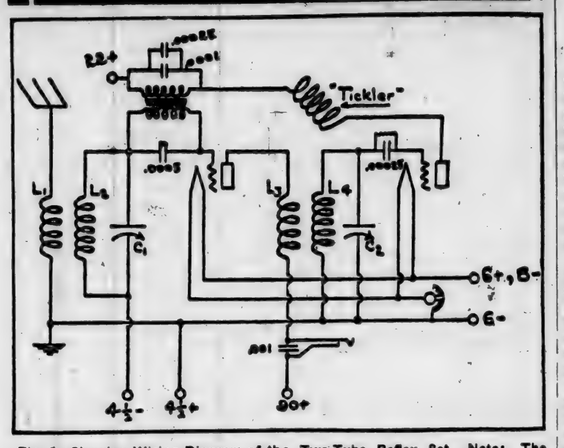

Fig. 2—Showing Wiring Diagram of the Two-Tube Reflex Set. Note: The 22+ Post Is at the Top of the Diagram.

By H. C. HITCHCOCK

With this two-tube set stations 200 miles away can be heard consistently on the loud speaker.

Selectivity is particularly good, and the two main controls make the operation as simple as is consistent with fine tuning.

A panel about 7 by 24 inches would be suitable, and if a cabinet is wanted, it may be 7 or more inches deep.

The circuit is a reflex, with a few unusual features. The first tube acts as a radio-frequency amplifier, the second as a regenerative detector, and the detector output is fed back through the first tube, which then acts as an audio-frequency amplifier. With these two tubes stations are heard clearly on the loud speaker with sufficient volume for all but the largest rooms. A third tube with its audio-transformer may easily be added if one desires to operate a loud speaker at its maximum power on distant stations.

The first tube will do most of the work, as it acts as a powerful audio-frequency amplifier, and also as a radio amplifier. However, this does not overload the tube, as the radio-frequency energy is small. In view of the fact that this tube is working at its limit of capacity, it is necessary to give it the very best possible conditions. For this reason a B battery of the correct value is absolutely essential. A 90-volt B battery and a 4½-volt C battery will prove suitable for a 201A tube, and if a 110-volt B battery is used a 6-volt C battery will be the proper size.

Regenerative Detector.

A regenerative detector is generally conceded to be one of the most economical detectors, and it has in this set the added advantage of coming after a radio-frequency amplifying tube, so local radiation is prevented. This is a great advantage when several sets are close together. A small coil in the

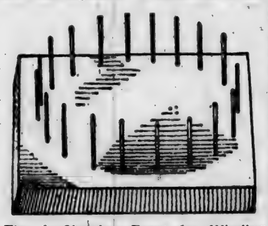

Fig. 1—Showing Form for Winding Basket-Weave Coils.

plate circuit serves to feed back energy into the grid circuit for regeneration. The placing of the instruments is not critical. A type 200 tube was used for a detector, and if a different type is used the value of the condenser shunted across the primary of the audio transformer may need to be a slightly different value.

Sockets of insulating material proved much more satisfactory than those constructed of metal. General wiring hints are the same as for any other set. Keep grid and plate wires as short and as far apart from each other as possible, and, if they must cross, let it be at right angles. All joints should be soldered with resin as flux.

The low-loss coils were homemade and gave splendid results. The winding form should have 11 spikes put through holes drilled evenly spaced around a 3¼-inch circle in a wooden board. (See Fig. 1.) The wire should be woven around these spikes, and when the required number of turns has been wound the coil should then be tied with string and slipped off the spikes. There will be no difficulty in having these coils support themselves if a stiff enough wire is used; those here shown are of No. 20 DCC wire.

The wiring diagram is shown in Fig. 2. For this set two condensers, C-1 and C-2, of .00035 mfd. capacity were used, and the coils to go with them, L-2 and L-4, have fifty turns each. The other coils, L-1 and L-3, are fifteen turns each. The rotor for the tickler of the detector does not need to be of low-loss construction or have a very low distributed capacity, as it is not in a critical radio frequency circuit. A 2½-inch composition tube with forty or fifty turns of No. 28 DCC wire will be entirely suitable for this purpose. The manner of fastening the tube to the rod is shown in Fig. 3.

Small fixed mica condensers were used, and their values are given in the wiring diagram, Fig. 2.

Testing Set.

To test this set it may prove advisable to try it first as a regular two-tube set; that is, as a detector and one-step audio amplifier, without using the radio amplifier. The internal wiring is exactly the same as Fig. 2; the only change is to connect the antenna wire to the left side of the grid condenser, thus making a single circuit tuner with one control, that of the variable condenser, C-2. With this connection the first condenser C-1 has no effect on the tuning of the set, and the idea is simply to familiarize with the tuning of the detector tube circuit and the working of the tickler. With this connection it is probable only the longer wave stations will be heard, as the wave length of the antenna is added to that of the set. With this arrangement the output of the detector is reflexed; that is, put back through the other tube, so that it acts as an audio amplifier, though not acting as a radio amplifier at this time. By tuning the dial of the condenser C-2 stations should be heard. It may be better to use a headset for this part of the test, as only when the first tube is doing its double duty does the set give power enough for the loud speaker.

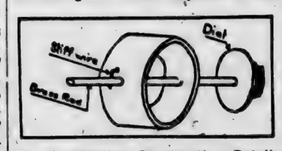

Fig. 3—Showing Construction Details of Tickler Coil Mounting.

If stations are heard satisfactorily, connect the set as the wiring diagram shows, with the antenna wire on the first fifteen-turn coil. This makes a two-circuit set out of the first tube, one of the circuits being tuned with C-1, and a three-circuit tuner out of the second tube, two of the circuits being tuned—one with the condenser C-2 and the other with the tickler. If you do not hear stations clearly with the antenna on the second tube's coil, try turning the tickler around, as it may be connected up wrong; simply rotate the tube 180 degrees. This will bring the tickler in the proper relation to the grid coil, if it was wrong at first.

Tuning.

With the antenna connection in place on the first coil, turn back condensers together to tune for a station. It is best to turn the condenser C-1 (at the left) slowly, and to sweep the second one back and forth until the familiar "chirp" of the carrier wave is heard; then tune in the station by reducing the feedback of the tickler. At all times the tickler should be turned so it has the smallest possible influence on the rest of the set. For short wave lengths it will be noticed that the best position of tickler is at nearly right angles to the grid coil, and for the longer wave lengths it is best when about parallel with the turns of the grid coil.—New York Herald-Tribune

When Audio-Frequency Transformer Burns Out

When an audio-frequency transformer is burned out there is usually an open circuit in either the primary or secondary. This may be tested by connecting a dry cell and a pair of phones in series with the winding. That is, connect one tip of the phones to the dry battery. The primary should first be tested, as that winding is usually the first to burn out. This is done by attaching a wire from one terminal of the primary to the vacant terminal of the dry cell and the other end of the phone cord to one terminal of the primary. If a click is heard when the circuit is completed there is a current flowing and the primary of the transformer is all right. This should be repeated in the same manner to test the secondary, only the secondary terminals should be used instead of the primary. If the click is again heard the transformer is not burned out.

Winding Coil

Before winding a coil dust your hands with talcum powder to keep the wire covering from getting soiled and to lessen chance of breaking the insulation.

To Take Place of Storage Battery

Charger Used Alone If Six Ohm Rheostat Is Shunted Across Terminals.

Since the dawn of radio, men have wasted many hours that should have been spent in sleeping, in trying to perfect some device that could be used to take the place of a storage battery for use in lighting the filaments of radio tubes. The step-down toy transformer has often been tried. The voltage can be reduced from 110 to 6 volts easily but the current still remains alternating in character and providing its 60-cycle hum.

It has been known for some time that it is possible to "float" an old storage battery across the line with a balkite electrolytic charger while the receiver is in operation. Slight trace of a hum remains, but as both sides of the wave are rectified, it is not objectionable for loud-speaker operation.

The storage battery can be eliminated entirely in many instances and the balkite charger used alone if a six-ohm rheostat is shunted across the charger terminals. Connect the positive terminal of the charger to the binding post of the rheostat that is connected to one end of the resistance wire, and then continue the wiring to

Showing Rheostat and Wire Connections to the Set.

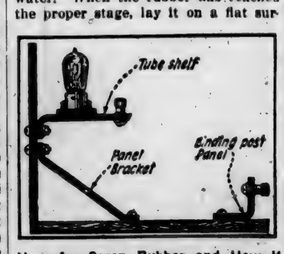
the positive A battery binding post of the receiver. Connect the negative terminal of the charger to the other end of the resistance wire. Unless a rheostat with three binding posts can be secured it will be necessary to solder this connection directly to the wire. The binding post of the rheostat that is connected to the contact arm of the rheostat is now wired to the negative A on the receiver.

The regular rheostats are used in the set the same as if a storage battery is used. The arm on the rheostat that is placed across the battery charger terminals is varied to control the voltage of the current going to the receiver, and once the proper location for the contact arm is found, it will not need to be varied.

The charger need only be in operation while the receiver is in use, and no storage battery will be necessary.

Easy to Work Rubber After Heating in Water

Hard rubber, when heated in boiling water becomes quite soft and pliable. The easiest way to cut a piece of this material is to place it in a utensil so that it may be totally covered with water and allow the water to boil just long enough for the rubber to soften so it may be bent with the fingers. If the rubber is allowed to remain in the water too long it will become so soft that the marks of the fingers will spoil the smoothness of the article. Heat a sharp knife to the same temperature as the rubber, by placing it in the same water. When the rubber has reached the proper stage, lay it on a flat surface and, with a ruler as a guide, cut along the desired line with the knife.



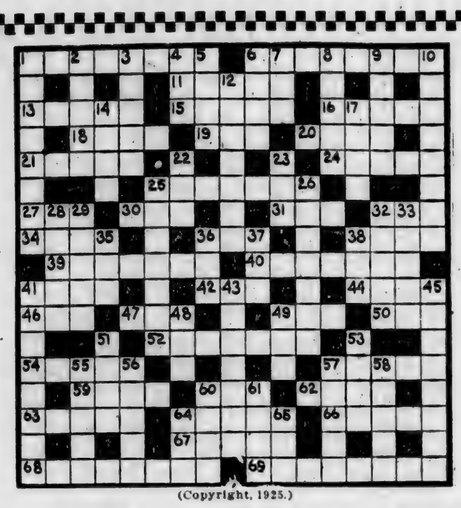
Uses for Scrap Rubber and How It Can Be Handled.

Hard rubber also may be easily bent to any desired shape if it is first heated. In the accompanying illustration are several brackets that are made by bending rubber when hot. After the rubber has been bent, dip it into cold water so that it will cool quickly and will not bend out of the shape wanted. Rubber after being treated in this manner will return to its usual hardness when cooled.—Radio News.

Care of Dry Batteries Belonging to Radio Set

A dry battery will not stand much abuse. If it is accidentally dropped its internal connections are liable to be broken, or the sealing compound on its top might become cracked, through which moisture can seep, causing a leakage between cells which acts as a continual drain on the battery. If dust accumulates on the top of the battery, wipe it off with a dry cloth, never with a wet rag, as this, too, will cause a drain or leakage between the terminals until such time as the moisture evaporates. Metal articles, such as trays, shears, metal pencils, etc., if placed on a battery, will cause a possible short circuit.

CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

1—Exiled
6—Subject to choice
11—A fruit
13—Bet
15—A Greek physician
16—Pertaining to a southern European peninsula
18—Level
19—A human
20—A head covering
21—Hiding places
24—An evergreen shrub
25—In a state resembling sleep
27—To recede
30—To begin to blossom
31—Small mark
32—Aeriform matter

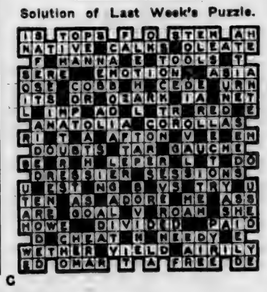
The solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

MEASURES EXACT DEPTH OF WATER

Quite recently there has been developed in the navy by Dr. H. C. Hayes, a most ingenious and extraordinary mechanism by which the depth of water underneath a ship is found by the emission of a sound wave which is echoed from the bottom, according to Science Service.

Not only does this method do away with the necessity of handling long lines and heavy weights, difficult in a rough sea, but it makes possible a record of scores of observations where only one was possible before, and in addition the observations are of greater accuracy.

Its practical value has received abundant confirmation on various Transatlantic lines, in the preparation of a detailed contour map of the bottom off southern California, in a survey for a new Alaskan cable route and in other operations.

Footprint Seems to Point to Giant Race

The natives of Africa, like the primitive people on other continents, have a tradition handed down from the dim past that Africa was once inhabited by giants. Now a dispatch comes from Johannesburg, South Africa, telling of the discovery of a footprint more than four feet long imbedded deep in fossilized granite. It is said that the person making this print must have beeen 25 or 30 feet tall. Whether the print is that of a human foot, or whether it is the work of the elements, remains to be determined by scientists. For the time being many seriously suggest that it may be the footprint of a prehistoric race of giants. Scientists who have casually examined the rock say the print is too lifelike and symmetrical to have been made by artificial means. —Pathfinder Magazine.

Legal Tangle

Twinship appears to be a handicap, as it has been maintained that no "similar" twins have acquired great intellectual distinction. The two Scotts of Newcastle, who afterward became Lord Stowell and Lord Eldon, were both "dissimilar" twins, as the former was born with a sister in 1745, and the latter with another sister in 1751. Jacob and Esau, the most ancient pair of twins on record, differed very much both physically and mentally.

No Promise to Breach

She—Do you know, sir, that I could sue you for breach of promise?

He—Oh, I think not.

She—Why, did you not ask me to marry you?

He—Yes.

She—And I consented?

He—Yes.

She—Well?

He—Well, I didn't promise, did I? You were the one that did that. I presume I have the right to ask you a civil question, have I not, without running the risk of being dragged into court?—Rehoboth Sunday Herald.

To Mend Umbrellas

If your umbrella gets torn, catch the edges together with a needle and thread. Open the umbrella so as to stretch the cloth and put a piece of mending tissue underneath, then press down with something warm enough to cause it to adhere, but not hot enough to destroy it. Over this put a piece of court plaster. This mending is waterproof.

"Caesar" Originally Title

Caesar is now frequently used as a Christian name. As applied to the Roman emperors it was a title. It was the cognomen of the Roman family Julia. In this sense it was used by seven rulers. It died out as a family name with the death of Nero, but was subsequently revived as the title of the reigning emperor.

Equable Temperature

The climate at the equator varies with the altitude above the sea level and nearness to the sea. At Quito, on the equator, 9,350 feet above sea level, the morning temperature is 47 degrees—the midday temperature is 66 degrees. This varies very little with the season.

Whist Developed in 1500's

Whist is thought to be of English origin and developed from a game of trump played about 1509 to 15...

NEARLY INSANE AT TIMES

Mrs. Saunders Tells how Lydia E. Pinkham's Vegetable Compound Relieved Troubles of Change of Life

Knoxville, Tenn.—"I took Lydia E. Pinkham's Vegetable Compound while going through the Change of Life. I was very nervous, could not sleep and had melancholy spells. In fact, I was nearly insane at times and my memory was almost a blank. I was so weak I could not do my housework half of the time and suffered dreadfully with my back. My doctor said I would have to worry it out and I went through this for three years before I began taking the Vegetable Compound which I saw advertised. I think it was eight bottles that I took. It has been two years since I took any and I haven't had a doctor since for that trouble. I do all my washing and ironing and I have gained from 116 to 138 pounds. I feel so well I think I do not need any medicine now, but I advise all women who suffer physically and mentally as I did to give the Vegetable Compound a fair trial. I hope it will do as much for them as it did for me."—Mrs. T. A. SAUNDERS, 711 E. Depot Street, Knoxville, Tenn.

A volcanic type of man resents public silence as much as he resents public persecution.

Important to All Women Readers of This Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine will do for them. By inclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.

There is nothing so powerful as truth—and often nothing so strange. —Daniel Webster.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Older you get, less often people will refer to it. That's how you know it's so obvious.

If you use Red Cross Ball Blue in your laundry, you will not be troubled by those tiny rust spots, often caused by inferior bluing. Try it and see. —Advertisement.

The electric light bill isn't always a light burden.

(©, 1925, Western Newspaper Union.)

Lesson for May 24

SAUL BEGINS HIS GREAT CAREER

LESSON TEXT—Acts 9:20-31.

GOLDEN TEXT—"I determined not to know anything among you, save Jesus Christ, and Him crucified."—I Cor. 2:2.

PRIMARY TOPIC—How God Saved Saul From Danger.

JUNIOR TOPIC—Saul Preaching in Damascus.

INTERMEDIATE AND SENIOR TOPIC—Saul a Bold Preacher.

YOUNG PEOPLE AND ADULT TOPIC—Courage in Witnessing for Christ.

I. Saul Preached Christ in Damascus (vv. 19-22).

1. Saul's Fellowship With the Disciples (v. 19).

After Saul was baptized he remained certain days with the believers in Damascus (v. 19). How beautiful to think of the transformation which took place—the one who was so passionately bent on their destruction was now enjoying fellowship with the disciples.

2. Straightway Preaching in the Synagogues (v. 20).

Saul, like every one who is really converted, begins to tell of the newly found Savior. As soon as he is saved he goes to save others. His message concerned the deity of Christ. His doctrinal belief is summed up in six words, "He is the Son of God."

3. The People Amazed (v. 21).

They knew that the very one who had been the ringleader in persecuting the Christians in Jerusalem, and had come to Damascus for the express purpose of bringing them bound to the chief priests, was now passionately advocating that which he had so vehemently sought to destroy. When a man is saved there ought to be such a change as to cause the people to notice it.

4. The Jews Confounded (v. 22).

Saul retired into Arabia for three years. During this time he was taught the full truths of his ministry (Gal. 1:17-18). Saul increased in spiritual strength and confounded the Jews, proving that Jesus was not only the Son of God, but their Messiah.

II. Saul Escapes From the Jews (vv. 23-25).

He used the Scriptures with such skill that the Jews could not answer him. Finding that the argument was against them, the Jews took counsel how they might destroy Saul. So intent were they upon killing him that they watched the gates of the city day and night that they might take him. When this became known to the disciples, they let him down at night in a basket by the wall.

III. Saul Visits Jerusalem (vv. 26-29).

This journey to Jerusalem was in strange contrast with the one from Jerusalem to Damascus. The one was as a leader of an important expedition under the authority of the Jewish officers with the prospect of a place of distinction in the council of the Jewish nation. Now he is an outcast, disowned by his countrymen, and fleeing for his life. These are the outward circumstances, but he knows the fellowship of the Lord Jesus whom he once hated.

1. Suspected by the Disciples (v. 26).

The believers at Jerusalem had not heard fully about Saul's conversion. They knew nothing of his sojourn in Arabia, and his preaching at Damascus after his return. Therefore they regarded him as a spy. "Part of the penalty of wrongdoing is the difficulty of restoration in the good opinion of honorable men."

2. Barnabas' Confidence in Saul (v. 27).

Barnabas was a man filled with the Holy Spirit (Acts 11:24) and therefore able to discern the reality of Saul's conversion. He was in reality a "son of consolation" and here showed his kind spirit.

3. Saul in Fellowship With the Disciples (v. 28).

He was not content merely to visit with the brethren. He spoke boldly in the name of the Lord Jesus Christ.

IV. Saul Sent to Tarsus (v. 30).

A conspiracy similar to that one at Damascus was formed against Saul. When the brethren knew of it they sent him to Tarsus. Saul's life was in danger everywhere except among the Gentiles. He now is back to the place of his birth. The first and best place for one's testimony is in his home. Saul's conversion was typical of the conversion of the Jewish nation. Their eyes will be opened by a personal revelation of Jesus Christ to them, and when they accept Him as their Savior and Messiah, they will go forth as witnesses to the Gentiles.

To Know All

"To know all is to forgive all"—and to forgive is to save.

Sense of Duty

A sense of duty may not be the highest motive, but the best men are moved by it.—Presbyterian Record.

Giving to the Poor

Give work rather than alms to the poor. The former drives out indolence, the latter industry.

Sin in Infancy

Be not familiar with the idea of wrong, for sin in infancy mothers many an ugly act.

Wit and Humor

NOT SO BAD

An old farmer sat on his back steps and moodily regarded the ravages of the flood. A neighbor pulled up in a rattling wagon.

"Whoa!" yelled the neighbor. "Say, Jed, your hogs was all washed down the creek an' they're all dead."

"How about Flaherty's hogs?" asked the farmer.

"They're gone, too."

"And Larsen's?"

"Washed away."

"Humph!" ejaculated the rustic, cheering up. "'Taint as bad as I thought."—American Legion Weekly.

CAUSE FOUND

Poet—My wife declares that last poem of mine you published almost stopped her heart.

Editor—Ha! So that's why our circulation was set back!

Out o' Danger

Thunder's such a growler
That, on a rainy day
When he goes to storming
Lightning runs away.

Too Near the Truth

"What caused the coolness between the De Golds and their country cousins?"

"Why, when Mrs. De Gold visited them she made a terrible blunder by asking if the family crest on the tablecloth was the laundry mark."

REASON FOR DANCING

She—Mother says the girls wouldn't have thought of dancing like this in her day.

He—That's probably why they didn't dance this way then.

Green Grass Widow

I've heard of a man that was "yellow,"
"Blue" persons I've actually seen,
But in all my travels I've never met yet
A grass widow I could call "green."

A Modern Failing

Business Man (interviewing applicant for secretarial post)—With these most excellent testimonials I am surprised at your previous employer parting with you!

Applicant—Quite; but the fact is I was of such very little assistance to him in cross-word puzzles."—London Humorist.

Hands Up!

She—I've heard that he's a holdup man. Is that really true?

He—Is he? Why, if that guy should step into a bank all the clocks would point to 12."

Even Safer

Fred—When Teddie first came out, all his worldly goods were tied up in a handkerchief.

Maud—And now they're tied up in his wife's name.—Sydney Bulletin.

Shocking

Frosh—Alpha, beta, damma, g lta.

Soph—Hey, if you can't learn that alphabet without swearing.—Washington Dirge.

In the Studio

Eminent post-neo-pre-Georgian Vorticist—This is my latest. I've called it "Evening."

Young Thing—(doing her best)—Really, how perfectly lovely! Which—er—which day of the week?

A Cool Meeting

Maud—I wasn't aware that you knew Mr. Glider. Where did you meet him?

Marie—Oh, I fell in with him while skating.

and in this $19.75 lot you will find many suits from the regular $35 range.

NOTICE

30 YEARS AGO we began the clothing business with the same buyer we have today. We began with a policy of selling fine clothing for LESS than it could be bought for elsewhere. We continued that policy all these years. That's why we did more than a MILLION-DOLLAR BUSINESS last year. That is why we've grown to be the institution we are today.

"30 YEARS"
—30 years of SERVICE
—30 years of VALUE-GIVING
—30 years of BUILDING
—30 years of EXPERIENCE
—30 years of COMPETITION

We're still here and we expect to stay on the job—continuing to serve the public in such a way that we will continue to grow and increase our volume and our great host of satisfied customers.

The Sale is to celebrate our 30 years in business in Fort Wayne—we appreciate the privileges that have been ours to serve the loyalty of friends and customers. In expression of our willingness to serve, we will give during the next two weeks, the greatest clothing values ever offered in Fort Wayne. We never sell **Cheap Clothing,** but we do sell GOOD **Clothing Cheap** and here's what we are doing—RIGHT NOW at the beginning of the clothing season, we give you the new styles, new fabrics, new models all in the finer made clothing that should retail at $30.00 to $65.00.

Notice Of Commissioners Sale Of Real Estate

State of Indiana
County of DeKalb
In the DeKalb Circuit Court
May Term 1925
In Partition
Cause No. 13364

Edward Pflaumer, Executor of the Last Will and Testament of E millus Case, deceased.

vs

William Hollabaugh et al.

Notice is hereby given, that the undersigned Commissioners, appointed in an action for partition in the DeKalb Circuit Court wherein Edward Pflaumer, Executor of the Last Will and Testament of E-millus Case, deceased, is plaintiff, and, William Hollabaugh et al are defendants for the partition of certain real estate therein described and for the sale of the said real estate described in the said complaint in said cause, that we, as such Commissioners, will on the 19th day of June, 1925, at the Law Office of Springer & Campbell at Butler, DeKalb County, Indiana, at 1 o'clock P. M. on said date, offer for sale at not less than the full appraised value and at private sale and in the tracts herein-after designated, the following described real estate in DeKalb County, State of Indiana, to-wit:

Tract No. One (1):

The east half (½) of the northeast quarter (¼) of section twenty-eight (28,) township thirty-three (33) north, range fourteen (14) east.

Tract No. Two (2):

The northeast quarter (¼) of the southeast quarter (¼) of section twenty-one (21), township thirty-three (33) north, range fourteen (14) east.

Also the southeast quarter (¼) of the northeast quarter (¼) of section twenty-one (21,) township thirty-three (33) north, range fourteen (14) east.

The said real estate to be sold pursuant to an order of the DeKalb Circuit Court and upon the following terms and conditions, to-wit: At least one third of the purchase price cash in hand, one third in six months and one third in twelve months, all deferred payments to be evidenced by notes of the purchasers, waiving relief from valuation and appraisement laws, with attorney fees and payable at a bank and in all respects fully negotiable, and, the said notes so given as and for such deferred payments to be secured by a first mortgage upon the said real estate, executed by the purchaser with his or her respective spouse joining therein; said notes to bear interest at six per cent per annum from date.

Said sale will be subject to the approval of the DeKalb Circuit Court and the said real estate will be offered for sale on the date above set out and from day to day thereafter until a suitable bid is received, the said Commissioners reserving the right to reject any and all bids; the purchaser to have the right to pay the entire purchase price in cash without discount.

Said sale will be made of said real estate subject to all rights of tenants having out crops and further subject to the current taxes for 1925 due in 1926, which the purchaser shall assume in the sale of the real estate.

Dated this the 18th day of May, 1925. Henry C. Springer and Charles S. Smith, Commissioners.

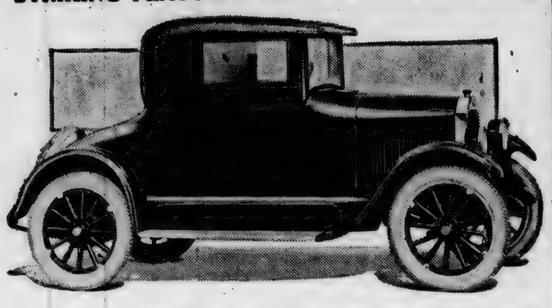
STRIKING FEATURES OF NEW STAR COUPSTER



Flexible door windows that may be lowered or raised like pullman car curtains and that disappear within the top of the body when raised are a striking feature of the new Star coupster.

In reality the coupster is a convertible car, affording all the comforts of closed car transportation, yet convertible into an open car by the simple expedient of raising two disappearing windows—a five-second operation. For all practical purposes it is two cars in one.

EFFICIENCY AND SAFETY OF CARS

Numerous Devices Add to Comfort and Satisfaction of Owner.

It is difficult to believe that the oil pressure gauges and, he ampere-meters which now appear on the instrument boards of virtually all makes of cars were once regarded by many as unnecessary frills. Today there are a number of accessories being offered which are similarly regarded, which is the same as saying that they would be appreciated if only their advantages were better known.

By equipping a car with some of these fitments, greater satisfaction, efficiency and safety will result. Add front and rear bumpers to the car, attach one of the many rear signaling devices, keep a set of anti-skid chains handy and the car will be enormously benefited in proportion to the cost of the protection. Frequently such safety devices add to the car's appearance and thus not only help protect the owner's original investment, but add to it. A spotlight attached to the windshield and played upon the road may prevent wrecking the car in a ditch.

Take efficiency as another instance. A car that is operated without proper regulation of the cooling system is at all times running inefficiently. This is especially true in winter when the engine is constantly operated at the wrong temperature, either boiling over because the radiator is covered with the lap-robe or running cold because there is no covering at all. The market now offers several radiator covers with openings which can be operated from the dash.

Along the efficiency line are other devices which are destined to filter the gasoline before it is admitted to the carburetor, thus preventing the entrance of dirty or watered gasoline to the carburetor or engine. A device of this character may pay for itself within a month after it is installed.

Then there are shock absorbers, which in addition to giving greater riding comfort, save the springs from breakage on the rebound and thus increase the usefulness of the car by preventing breakdowns. Even cut-outs which were at one time regarded as toys for the speed maniacs are now shown to have a very important use.

Regardless of the selling points of each accessory or all of them as a group, it is a fact that any one of them adds to the second-hand value of a car. So the motorist not only has the use of the accessories with which he equips his car and the savings on insurance, inconvenience, repair bills, etc., but he gets a return premium when he goes to sell the car.

Good Advice Is to Give Machine the Once-Over

There's economy, also satisfaction in giving your car the once-over in the spring, then if it needs replacements or anything else to bring it back to perfect form, have it done as quickly as possible.

Naturally the toll of a year's driving is most severe, and generally there is a reminder or two. Right here the old stitch in time principle works out. When the car is restored to its best shape, almost as good as the day it was bought, riding in it is far more enjoyable, also it will bring a much better price if you care to sell or expect to trade it in on a new car.

Letting your motor car run down is false economy. Eventually it costs you more and in the interim you are not happiest when riding along the highways.

Even little things which you may think are of no special consequence develop into big items in repair bills if allowed to run on without interruption.

Windshield Rattle

When the windshield glass becomes loose in its frame, it causes an annoying rattle. It is very difficult to close the frame so that it will grip the glass more securely without the possibility of breaking the latter. If the glass is not too loose the rattle can be eliminated by filling the space in the frame with shellac. This can be applied with a sharp pointed stick or a brush and should be applied slowly so that it will pack tightly in the opening.

WATER INJURY TO TIRES IS SMALL

Running Through Stream Is Not Injurious.

Now and then in the course of an automobile trip a car has to pass through a stream, and the question is sometimes discussed whether the action of the water is harmful to the tires. The same question arises when the car is out in a heavy rain.

Such a wetting is practically nothing at all, either for damage or improvement. At any rate, the effect on the tire is not harmful. Two chief constituents of a tire are rubber and cotton, both vegetable substances, and as a rule water does not injure vegetable matter. As illustrative of this point, there is the old but true story of the farmer who, when one of his rubber boots fell into a well, placed the other on a shelf in a closet. Twelve years later when the well was cleaned the lost boot was found to be in excellent condition, but the boot on the shelf had fallen into ruin.

If running through a brook resulted in cooling a tire the effect would be decidedly beneficial, but a quick dash through the water has little effect on the heated air within the tire and consequently the temperature change in the tire after its bath is negligible.

Water itself apparently does no harm to tires, but the combination of air and moisture commonly known as humidity is very destructive, especially on the cotton in ordinary fabric tires. The moist air works in between the layers of the fabric and rots them out, sometimes even before the tires leave the dealer's storeroom. Corc tires stand humidity better.

The harmful effect of moist air is the chief reason why, when tires are stored, they should be kept in a dry atmosphere. As sunlight is also harmful, the storage place should be darkened.

Shabby Tires Are Not Favored for Any Car

Shabby tires on a good-looking car! Yet stand on any street corner today and count the number of patched-up, dilapidated tires which are being used to the last mile. The cost of keeping these tires running for a few thousand miles would nearly pay for new ones. Mileage such as this comes high.

Tire conservation does not mean picking up a decrepit tire and putting it back into service at a big repair cost just to save a little rubber left in the tread. It means taking care of the tire from the first so that it will be able to deliver all the mileage built into it by the maker. When tires are so far worn that they are soon to blow, it is poor economy to repair them. Such a course means sacrifice of the inner tube as well.

Cheap, makeshift patches, boots and temporary repairs of all kinds are now being called into use as never before, but patching up an old casing in which separation of fabric plies has already begun, cannot give the freedom from tire trouble on which the pleasure in motoring so largely depends.

Tying in Spring Leaves Will Prevent Spreading

Since the leaves in a spring have a tendency to spread apart, it is often hard to replace the spring tie-bolt in autos or trucks.

The easy way is to grip the head of the tie-bolt in a vise, and put all but the last four leaves one on top of the other. The last four leaves are put on crosswise, or spread around like the ribs of an umbrella, which allows the nut to be easily started on the bolt.

With the nut on the bolt, swing the bottom cross leaf into place. Then each succeeding leaf will slide easily into position. Then tighten the tie-bolt nut. Of course, the clamps on each end will have to be removed until the spring is assembled.

Anything These Days

Running downhill recently a driver found to his utter surprise that a motor truck, supposedly at rest in the downhill position on the right side of the road, was actually going uphill backwards. The driver could not get it through his head for a moment and nearly lost control of his machine trying to dope it out, which showed that he was not prepared to expect most anything nowadays. The truck driver was utilizing the lower gear ratio of reverse in order to enable the engine to pull up an extra heavy load.

GOOD ROADS

PLAN ROAD SYSTEM FOR FUTURE USE

Kansas must be careful to avoid the mistake of building a state road system to fit present conditions, according to Prof. L. E. Conrad, head of the department of civil engineering, at the Kansas State Agricultural college.

It would be foolish, Professor Conrad feels, to plan the state system for a travel load including less than an increase of 50 per cent in the present number of cars and trucks within the next 10 years.

"Within the past 20 years the character of the traffic on our highways has been almost completely changed in regard to the vehicle and its convenient economical radius of operation," said Professor Conrad. "In other words, this generation had bequeathed to it a lot of roads which were developed over a period of some 300 years to serve an unchanging traffic, while traffic has, in the past 15 or 20 years, been entirely changed in character."

Professor Conrad predicted that there will be a traffic load of 2,000 cars per day over the 40-mile stretch of road between St. Marys and Camp Funston, within the next 2 years, and that less than half of this traffic will be local.

"This being the case, the improvement should be planned with the view to serving the through, rather than the local, traffic. This view," he thinks, "will seem less unreasonable to local road authorities when they recollect that on most such projects it is possible to obtain at least half of the funds required for the improvement from federal or state aid. This also leads up to the question of whether or not we wish to give up our federal aid in Kansas. Since we will have to handle the traffic, it would seem to me extremely foolish to give up the federal aid."

Many Advantages Follow Installation of Lights

Full return from the vast sums of money spent on highway construction will not be realized until night travel has been rendered more safe than it is at present, according to a number of close students of highways and road development. It is declared by engineers and others who are extending the work of illuminating county roads that much of the solution to the automobile lighting problem lies in the proper illumination of road surface.

Of chief importance among the advantages of highway lighting are the facts that such installations prevent accidents by showing up dangerous curves, reducing headlight glare and showing up obstacles; increase night traffic and thus relieve day traffic congestion; add comfort to night driving by relieving eyestrain; decrease running time, thereby increasing road capacity; help bring electricity to farms by providing pole lines, and increase real estate values by tending to extend cities along lines of highroads and bringing electrical conveniences to remote places.

There are several types of light equipment available for county, state and township officials, that have been worked out by illuminating engineers. The increased efficiency of illuminated roads has stimulated to a great extent the installation of new miles of lighted roads during the past season and an even greater increase is looked for during 1925.

When It Is Economical to Build Paved Highway

One of the most important phases of highway research has been a series of tests for the purpose of establishing how heavy the traffic must be to warrant the paving of a highway. In commenting recently on this subject, Mr. F. R. White, president of the American Association of State Highway Officials, issued the following statement:

"When the traffic on the dirt road reaches 320 tons per day average, then it becomes economical to pave it. In other words, when the dirt road is carrying a traffic equal to 320 cars per day it is economical to pave that road. The savings in the operating cost of a vehicle will pay the interest on the bonds, we will say, that are issued to pay for the roads, and will retire those bonds in a period of fifteen years, paying the whole bill. When the traffic on a gravel road becomes 470 tons per day, it then becomes economical to pave that road, as it will save money. That is the point which, up until the present time, we did not have data to determine. Now we can say with a considerable degree of certainty just when it becomes economical to build a higher type road."

Signs on Lincoln Highway

In view of the exceedingly heavy traffic over the Lincoln highway through De Kalb, Ill., Mayor Kingsley of De Kalb has suggested that signs be erected at every street intersection calling the attention of motorists to the fact that they are about to cross the Lincoln highway. Extreme congestion is expected in De Kalb on the Lincoln highway during the coming season. Practically all westbound traffic out of Chicago passes through De Kalb.

Hoosier State Happenings

Fort Wayne.—Under arrest for assault and battery on F. H. Reping, William Richter, age twenty-four, special deputy sheriff, was questioned by police in connection with the double murder of Miss Katherine Herber, age twenty-five, and her fiance, E. Howard Fisher, age twenty-seven, both of this city, who were found shot to death in Fisher's machine on the Hessen Cassel road. Richter denies any connection with the case. Richter is alleged o have had disputes over a garage bill with Fisher.

Indianapolis.—Motor trucks or commercial cars engaged in a public transfer business, and all other motor carriers except such as operate exclusively under contract or special agreement, or are specifically exempted by the new Indiana bus law, will be subject to the regulation of the public service commission, according to an announcement made by the commission after it had received an interpretation of the law from Attorney General Arthur L. Gilliom.

Connersville.—Funeral services for Benjamin F. Thiebaud, age seventy-one, veteran banker and educator, were held at the home. Death resulted from cancer of the stomach. Mr. Thiebaud was widely known in banking circles. He became president of the Fayette Bank and Trust company in 1910. He also was holding official positions in the Bentonville State bank, the Glenwood State bank and the Brownsville State bank at the time of his death.

Indianapolis.—Mayor Lew Shank will be a candidate for the Republican nomination for mayor in the primary of 1929, he said. Until then he said, he will not dabble in politics, but will center his efforts on the task of making his new warehouse pay a reasonable interest on the investment, he said. "I have thought about taking a whirl at the race for the senatorial nomination, but don't believe I will," he said.

Princeton.—More than 4,000 acres of farm land have been plowed for farmers in the relief area in Gibson county, according to the farm bureau tornado relief stations. The work was done by 36 tractors and plows and a small detachment of operators. The tractors and plows were turned over to the Indiana farm bureau federation by two large tractor companies for use in the stricken area.

Gary.—The Gary Methodist Episcopal church, costing $750,000, was dedicated by Bishop F. D. Leete of the Indianapolis area. The auditorium seats 1,000. In addition there is a community hall and a recreational and educational unit. Gifts from the United States Steel corporation aided in making possible the church, which is one of the finest church buildings in northern Indiana.

Indianapolis.—Otto F. Schlensker, automobile parts dealer, filed suit against the state of Indiana in Superior court, to recover $50,000 which he turned over to the state July 1, 1924, when the state board of accounts made a report charging that Schlensker received excessively high prices for materials sold to the state highway commission.

Terre Haute.—Told that her five-year-old son was trapped in a burning barn at their home four miles west of here on the National road Mrs. Bertha McGaughey collapsed and died within a few minutes from the effects of the shock. The child was found safe and sound in a wooded lot near the McGaughey home.

Bloomington.—At a special meeting of the city council, June 8 was set as the day for holding a special primary election to decide the Republican nominee for mayor of Bloomington. In the recent primary, James C. Wells and Dr. J. L. Hetherington, who received the highest number of Republican votes, were tied at 1,186 each.

Brazil.—Glenn Fitch and Joseph Hayes, of Cayuga, were severely injured when they lost control of the automobile in which they were driving, four miles west of Brazil on the National road. The automobile plunged over an embankment and landed in a creek.

Elkhart.—Funeral services were held for Mrs. Sarah Chaddock, of Nappanee, who died at the age of ninety-eight. She was one of the oldest persons in this part of the state. The body was taken to Magnolia, Ohio, where Mrs. Chaddock lived for 50 years. A daughter and two sons survive.

Kokomo.—Everett Bowman, thirteen, swallowed poison in Judge John Marshall's library after being committed to a boys' institution for theft of a bicycle. Physicians said his condition was serious.

Valparaiso.—Despondent from effects of typhoid fever, Fred Sheets, a farmer, killed himself with a shotgun.

Lafayette.—The experimental results of winter feeding trials, conducted by the Purdue university agricultural experiment station, were explained to more than 250 Indiana farmers and stockmen, who attended the annual spring meeting of the Indiana Cattle Feeders' association, held at Purdue university.

Bloomingdale.—The Bank of Bloomingdale was robbed of $600 by three bandits, who escaped in an automobile. One of the bandits, it is believed, was wounded by a bank employee, who fired on them.

Two Named to State Board of Education

Indianapolis.—Appointment of two new members of the state board of education and the reappointment of one of the present members was announced by Gov. Ed Jackson. Benjamin J. Burris, now president of the eastern division of the Indiana State Normal school at Muncie, formerly state superintendent of public instruction, whose term as a board member expired May 1, was reappointed. The two new members named by the governor were William D. Moss of Marion, former postmaster at Marion and now in the fence business, and Henry B. Longden of Greencastle, vice president of DePauw university and for many years a prominent figure in educational circles in the state. They will take the places of Mrs. Richard Edwards of Peru, whose term expired May 1, and of Elwood Haynes of Kokomo, pioneer automobile manufacturer, who died recently. All the appointments are for four years and all three men are Republicans.

Fort Wayne.—Mrs. Alice Caryl confessed that she bribed a nine-year-old girl to commit perjury recently in Circuit court in an attempt to "railroad" her husband, Squire Caryl, age sixty-five, to prison for an alleged attack, Samuel D. Jackson, prosecuting attorney, said. Mrs. Caryl is said to have told the prosecutor that she wished to get rid of her husband and since she was unable to get a divorce from him she decided to send him to prison on a trumped up charge.

Indianapolis.—Appointment of three members of the Indiana G. A. R. to compose the board of commissioners of the Indiana memorial to be built in the Vicksburg national cemetery was made by Governor Jackson. Those appointed were: Winfield T. Durbin, of Anderson, former governor of Indiana; F. M. Van Pelt, of Anderson, and Col. Oran Perry, of Indianapolis, superintendent of the Soldiers' and Sailors' monument.

Anderson.—A total of $1,700 in fines in addition to state farm sentences of from 60 to 120 days was imposed in City court on 13 of the 21 persons arrested by federal agents on various charges of violation of the prohibition law. Bert Morgan, prohibition enforcement officer for Indiana, was in court, and John E. Beeler, judge of the City urt, presided.

Lafayette.—A number of notable personages in state and national governmental circles will be guests of Lafayette at the joint centennial celebration of Lafayette and Tippecanoe county, which will commemorate the one hundredth anniversary of the city and county, and will be held from September 27 to 30.

Kokomo.—Harry Pierpont, on trial in the Howard Circuit court for banditry in the looting of the South Kokomo State bank March 27, was convicted by a jury after brief deliberation. The finding of guilty carried a sentence of imprisonment of 10 to 25 years.

Logansport.—After deliberating for 22 hours the jury in the Cass Circuit court in the B. F. Sharts embezzlement trial reported that it could not agree and requested that it be discharged. Raymond F. Springer, of Connersville, special judge in the case, dismissed the jury.

Marion.—Marion welcomed several hundred disabled ex-veterans of the World war who were the city's guests at the fourth annual state convention of the Indiana Disabled American Veterans. Lewis J. Murphy, of South Bend, state commander, spoke at the opening day's session.

Indianapolis.—A heavy frost, which had killing effect in the northern and central parts of Indiana, was reported by G. W. McDowell, assistant meteorologist in charge of the United States weather bureau. It is believed that field crops generally were not damaged to any extent.

Logansport.—Clarence E. Hart, twenty-three, and William E. Roy, twenty-four, were sentenced to the state reformatory for three to five years respectively in Circuit court when they entered pleas of guilty to charges of vehicle taking.

Laporte.—Frank Nodd, age twenty-tight, bled to death in a factory after his jugular vein was severed by a piece of metal that flew off a punch press he was operating. The widow survives.

Anderson.—Petitions of 71 prisoners for parole from the Indiana reformatory at Pendleton, were considered by the board of trustees acting as a parole board, and parols were granted 48 men, it was said by board members.

South Bend.—Arba L. Geyer, age fifty-eight, local business man, was killed when his automobile was struck by the Twentieth Century Limited of the New York Central railroad at a crossing here.

Anderson.—Dr. G. W. Surratt, eighty, optician, is dead of injuries sustained when he was struck by a car while walking across the street. He served four years in the Confederate army and in one engagement was badly wounded and, when he was thought dead, was thrown from an army ambulance and abandoned. Later he rallied and recovered.

Bloomington.—Her mind weakened by illness, Mrs. Abraham Voyles, fifty-eight, locked herself up in her bedroom after setting fire to her dress and was burned to death.

Serious operation avoided

Resinol healed stubborn sore

Elyria, Ohio, March 1:—"I feel it my duty and pleasure to thank you for the wonderful cure your Resinol salve has wrought for my husband, who suffered from an open sore on the back of his neck for four years. Several doctors said that it was a cancer and advised its removal, but it was so near the base of the brain that we feared an operation. I had found Resinol Ointment so effective for cuts, burns and similar things that I induced my husband to try that. After using only two jars of Resinol, the sore entirely healed—every trace of it has disappeared. Resinol certainly was a God-send to us!" (Signed) Mrs. E. E. Kennedy, 243 E. 8th St.

PART THREE—Continued.

—11—

She sprang to her feet, breathing quickly.

"Alan! What are you saying! Don't! Don't!"

"Why not?" he asked, getting up, too. "We can't remain blindfolded forever."

The mists fell from a huge mountain peak, and the color ebbed from the girl's face.

"Ah!" she murmured, clasping her hands. "Isn't the present—perfect? Don't precipitate—"

He took her by the shoulders, forcing her to face him. "We are only human," he said, in a low voice; "and, Barbara—I want my wife!"

She pressed her clenched hands against him, hiding her head upon them. "Oh, not yet! Don't think me obtuse, Alan. I have thought, too, and—and feared—"

"What have you feared?"

She did not reply for a moment; he waited, motionless.

When every accustomed bulwark of life has been demolished, the foundations of a fresh building are laid necessarily in a troubled soil composed of struggle, temptation, agonies of uncertainty. The undeveloped girl, blindly groping after the "hidden want" in a materialistic environment, had gone forever. As the ripened corn sprung from its buried seed, the woman, sublime in her love, glories in the growing courage of the inner self she had tried to stifle, had arisen.

"We have found the true keynote here," she murmured brokenly at last. "and we must keep it tuned aright. I wouldn't, for the world, spoil the beauty of everything."

"You couldn't—ever," he whispered into her hair. "But love is a terrific force which can't be turned on and off like hot water; or compressed into narrow preconceived channels."

He suddenly threw his arms round her and strained her to him. "Barbara! why should we be done out of our rights? We've been chucked out of the world; stripped of everything that made life worth living. But now we have discovered the greatest treasure of all. Are we to give that up because of—scruples? By G—d!" with sudden anger he loosed her, clenching his hands, "I won't! I'm d—d if I'll agree to that! It isn't fair. You say I always get my way. Well—some time—"

She met calmly the passion and threat in his eyes. These untamed forces no longer alarmed her, as they would have done six months ago.

"Alan!" she protested, holding out her hand. He ignored it, gazing still upon the peculiar radiance of her face. She went to him, lifting both hands to his shoulders, her lips tremulous. "There is more to be considered . . . not—not only ourselves. . . . My darling! don't you realize we are man and woman, and—" Her flushed face sank on his breast. "Don't you see?" she whispered. "Others! Not —'scruples.'"

A long silence succeeded her broken words. His arms closed around her again, and again he hid his face in her hair.

He raised his head at last; and as he pulled her hands down into his own his face looked strangely drawn.

"God help us both, Barbara!" he muttered huskily. "For we are in the very h—l of a position." There was a strange blending of fear and adoration in the eyes of both, while they looked upon each other. "But I—I swear I'll—I'll never force you to—anything. Always remember that. And, for heaven's sake, don't—let me forget! I'm so d—d human," he added, with naive pathos.

For the first time since she knew him, she heard a lack of confidence in his tone. Conscious of those forces of nature against which they were but puppets, all the woman in her rose to meet him.

"We can never lose faith in each other, Alan. That will help us. But—" she looked at the dearly loved figure. For one illuminating instant, all that marriage would mean between them flashed into her heart, awakening the mother dormant within her. "Ah! But it's going to be hard—hard—hard!"

The cry burst, involuntarily, from her lips. All the love and longing which inspired it shone in the gaze which seemed to envelop him as a glowing fire. . . . For a space he stood silent, lost with her in a world which neither had dreamed of before. Then he stepped forward with a muttered ejaculation, and they clung together as they had clung on thir first night on the island—two derelict beings swept over the world's edge. . . .

"Go in," he whispered tremulously at last. "I can't come to supper tonight. I must go away alone for a bit . . . and think. . . . You've opened a new world to me tonight."

He kissed her with lingering gentleness, and turned away toward the shore.

Barbara walked slowly into the hut. But to her, also, food seemed impossible just then. That moment's illumination had opened up a new world for her, too—a world which, it seemed she was never to enter! . . . With a little sobbing breath she went into the sleeping hut and threw herself face downward on her bed. . . .

For a long time neither alluded to this conversation. A new chord had been struck between them, too deep for idle talk. A subtler difference, a shade more of seriousness, came into their relations. The shadow cast by the mountain peaks enveloped them. Try as they would, they could never quite free themselves from it.

Distractions of any sort became urgent; but to find them, in this small island, was no easy matter. However, Alan, after mentally viewing the land, took what frail material there was and wove it into ropes of support. That the ropes might break he could not foresee.

He turned once more, in pathetic hope, to the natives.

During the months since their first visit to the settlement, he had come to occupy the unique position of a semi-divine Overlord. His orders, issued at first in the spirit of bluff, were obeyed. This at first surprised, then amused, him. After a time, it afforded him intense interest. His orders regarding cleanliness were receiving extraordinary consideration; irrigation work had been undertaken. Now, he plunged with new zest into this novel training of prehistoric minds. He ordered the cultivation of taro to be reinstituted; tapestry-weaving from reeds to be revived. All this originating from fear, not inclination, slowly awakened the natives' interest, which increasing, caused much of their lethargy to vanish.

Within a few weeks, the last signs of a threatening new epidemic of sickness vanished, and the settlement became more wholesome. This being attributed to the what man's magic, their fear blended into a crude awesome affection, which struck Alan as pathetic. Gradually his visits became hailed even with delight. For, in matters of dispute, Chimabahol appealed to him, relying more and more on his counsel. And, swayed by none of the opposing elements, he dealt with a severe justness, yet humaneness, which they found both novel and attractive. Withal, he braced them, stimulating their latent powers, much in the same way in which he had stimulated Barbara, by the mere force of his own vitality.

Her own interest in these people grew apace. From Alan she learned some of the dialect, very soon being able to speak a little herself. Sometimes she brought the children odd bits of ribbon or lace, which produced an excited uproar. Weeks later, she used to see these scraps adorning some woman's dark form, with ludicrous incongruity.

The Ruined Huts Were Strictly Tabu.

But, among these "children of nature," as among other children, not of nature but of civilized education, there existed under-currents of strife, ambition, ill-feeling. These were responsible for a division of which Croft soon became aware. The more savage factions waxed impatient for Babooma to be their chief. Only the superstitious awe in which a chief is held saved Chimabahol from being despatched unceremoniously to the spirits of his murdered sons. The result of that would have been civil war, and deadly peril for the two white people. For Babooma and his friends were not partial to these strange newcomers who forced them to work and frustrated their savage tendencies. Croft knew well the risky ground on which he trod. For reasons of strategy, therefore, he forbore, save for a drastic warning, to take any steps in retaliation for Christmas day's attempt upon his life. "Bail-devils" from the white woman, in swift retribution for what he had contemplated, had frightened Babooma enough for the present. His black face was seldom seen, nowadays, far from the settlement.

Roowa and Meamaa, since their child's recovery, had regarded the "white chief" with little less than worship. And this fact gave Alan the idea wherewith to cause distraction in the increasing difficulty of the life he and Barbara now led. It was, both knew, but catching at straws; yet, eagerly, such frail aids were welcomed.

After a short consultation with Chimabahol, Roowa was commanded to take up his residence in the north, to help the "white chief" in work upon the land, while Meamaa served his "wife."

The ruined huts were strictly tabu, haunted by the spirits of those slain there. Roowa, proudly radiant, began to build a new hut, to which Meamaa and his two children could be fetched.

Within a short time smoke arose from Meamaa's cooking; and two small black figures danced, like imps, among the palms.

II

"I wonder," suggested Barbara, when they strolled together one night, "if we ought to teach them Christianity."

Alan looked down, smiling at these lingering instincts of the parson's daughter; but shook his head.

"If they learn gentleness, kindness and cleanliness, don't you think they are acquiring the spirit of it?" he asked. "These will permeate, paving the way, if you think it necessary to teach them Christian creeds later. But don't upset their old faiths yet—they are not ready. It's always a dangerous thing. If it's hurried, it is fatal."

She thrust her arm through his. "You're awfully wise, Alan mine! You seem to know just how to manage the natives. Why is it, I wonder?"

"Because I care for them. You can usually understand those you love, if you try. See how well I manage you!"

She laughed; then felt his arm. "D'you know, you're getting thin Alan."

"Hard work."

"I have noticed it in your face, too. You mustn't work so incessantly—there's no need."

"Isn't there? Ah, Barbara! I think there is."

She looked up quickly; but he had turned his face seaward; only the grim set mouth was visible. The woman in her thrilled to him, for she understood. Clasping his arm tightly, she laid her face against it.

"Dear!" she murmured.

"We have been here nearly a year," was his only response.

"I know."

They walked on in silence a while, passing near Roowa's hut. Just outside the entrance the native and his wife sat close together, the youngest child asleep in the man's arms, both too much absorbed in low-toned conversation to notice their approach. The natives' love may be little above that of an animal for its mate; but it contents them.

Barbara's clasp tightened, as these two outcasts from all laws looked upon the group.

"They are very happy, Alan, I often watch them."

"So do I—my G—d!"

She glanced up in surprise at the passionate tone in his voice.

"I sometimes wish I had never brought them here," he continued. She was silent a moment; then drew his hand swiftly up to her face. With her lips against it, she whispered, so low that he had to bend down to catch her words:

"Do you ever look at—their little ones—and think—supposing—if—only?"

"Barbara! I do."

He turned and drew her into his arms. "I have thought of it all—over and over again! I think of nothing else."

The relief of speaking, for once, about the theme which lay heavy upon their hearts caused discretion to be thrown to the winds. "It haunts me!" she cried passionately, clinging to him. "It haunts me day and night. I can't bear to see them. I've tried—"

"And I, by heaven!"

Loosing her abruptly, he threw himself down upon the rock outside the hut and bowed his head in his hands. What was passing through his mind she could only surmise by the chaos of emotion which, now the barriers were down, surged through her own. All these weeks both had struggled to forget the problems menacing them. But the very straws at which they had caught proved to be, so to speak, serpents in disguise. For nature, crude and unattended, ruled this island. By her inexorable laws these primitive people were guided, unabashed, in all good faith. And among these subtle forces working around them, undermining the very ground beneath their feet, the two were flung together in a solitude, a familiarity, so maddening yet so entrancing, that their senses were inflamed at every turn. Escape was impossible. Wherever they moved they were confronted with their own rising passion. Regarded as man and wife they shrank now from visiting the settlement together. Throughout the days each constantly surprised the other's furtive, hungry, troubled regard. Conversation became often strained, demonstrativeness between them a danger. Throughout the night each lay listening to the other's movements and breathing, through the frail bamboo partition. No longer could they shout careless badinage, hold midnight talks. . . . But, since the building of the palisade, neither had dared put into words the fear rising ever higher in their hearts.

He uncovered his face at last, and looked up at her, a grim defiance in his eyes.

"We can't go on like this. It's damnable! Barbara—come here."

Hesitating a little, not understanding the unusual expression of his face, she went toward the hand he held out. He caught her roughly by the arm, pulling her down to her knees at his side, gazing into her eyes for several seconds without speaking—searching, proving her in some inexplicable manner.

"How much do you love me?" he demanded, at last.

She looked startled at his peremptory tone. "Why do you ask such questions?" But she collapsed against him. "With my very life," she whispered passionately. "I should die if I lost you now."

He strained her close, pressing hot lips to hers. "How far would you go with me? How far?" he muttered eagerly.

"To eternity!" she murmured, half faint with the sudden passion sweeping them both away. The arms holding her were trembling.

"If we never get rescued? How far then? How far, Barbara?"

Only a little stifled gasp answered him.

All the soft night odors of the forest were stealing down to the beach, blending with the pungent smell of hot earth, mingling with the languorous murmur of the tide. Close in his arms, a weak craving to surrender, to capitulate before the forces arrayed against them both, swept over her. It was easy to let all else go. . . . Twice she opened her own lips, but no words would come; only her eyes told him that which caused his senses to reel. His grip tightened, so that he hurt her; but the pain was an exquisite joy.

The animal in man, longing fiercely for its mate, had been let loose in Alan, stronger for all these months of temptation and repression. The future at this moment lay in his hands—and he knew it, exulted in the knowledge. . . .

Half unconsciously he rose to his feet, lifting her, unresisting, with him. Her warm young body lay acquiescent, at his mercy. He took a step toward the hut; cast one dazed look round the darkening beach—

From Roowa's dwelling the faint cry of a child came to them, wafted upon the soft night breeze down the bay. . . .

The girl heard it, and raised her head. The man heard it, and caught his breath. Their eyes met.

She slipped from his arms with a long quivering sigh. They stood facing each other, struggling with the turbulence of their emotion.

"'Reverberations'! Do you—remember?" she whispered, at last.

He made no reply, continuing to gaze upon her face, and she went on speaking, almost to herself, standing before him with the darkness closing around her.

"'The vast harmony in which each note has unlimited effect upon every other note.' You taught me that. Do you remember? Life's harmony, you said. We—we are forgetting."

He turned away and walked to the lagoon, standing there for several minutes, his back toward her, his hands covering his face. When he returned, he had, she could see, regained his self-control. Coming close, he laid his hands upon her shoulders.

"Are we perhaps troubling over what may never happen? Barbara—there might be no—no 'reverberations.' There are not, always."

She smiled at him, a smile that was almost maternal. "That's true. But—" She broke off, a little catch in her breath, her eyes dwelling dreamily upon the face above her own, as if picturing something far off and passing beautiful. . . . "But it wouldn't be fair," she muttered to herself.

A flush mounted to his cheek in meeting and interpreting the look which, momentarily, his own eyes reflected.

"The thought of you troubles me most," he owned. "The question of 'fairness' is an open one. This is a grand free life for anybody who—knows no other. The world might think it unfair. But the world doesn't count with us. We are savages now. But you—you! Oh, my darling. . . . Nature is so hard on women."

Her face was hidden on his breast. He went on diffidently, whispering into the dark hair.

"The question of 'reverberations' shall be yours entirely. Do you understand? If you decide not to face it all—"

"Ah! no, no, no!" She raised her head quickly. "Alan, I love you for that. But I won't shirk! Don't ever think I mean that." She turned her luminous eyes seaward. "Imagine a little home with just you and me and—a dear little nest all our own. . . . Oh! it's cruel, cruel!" Passionately she gripped his shoulders. "I long for it all—I ache inside. Sometimes I dream we have it together; and then—then I wake up—"

"But we can have it, here, now," he interrupted eagerly. "Only the forms would be absent; the spirit would be there. Surely, in these circumstances we can make our own laws?" He took her clinging hands in his. "Barbara have you thought over the matter? Faced it squarely?"

(TO BE CONTINUED.)

Best Way to Use Phone

Telephone companies for many years have reiterated the advice that users should talk directly into the transmitter, but recent tests have for the first time set forth in concrete terms the result of disobeying the injunction. It was found that to talk with the lips six inches from the transmitter was equivalent to inserting another 300 miles of line between the speaker and the listener. The best results were obtained, the tests disclosed, when the mouth was only one-half inch from the transmitter and facing directly into it, thus avoiding deflection of sound waves.—Popular Mechanics Magazine.

CONCERNING TAPEWORMS

MARK TWAIN said in one of his books that there were only three men who had any right to refer to themselves as "we," a king, an editor and a man with a tapeworm.

This title by an emperor or an editor is more honorary than real. But there is no question about the plurality of a man with a tapeworm.

Tapeworms are unwelcome and troublesome boarders. They are quite common. There are some 12 or 13 kinds known but only two are common in this country.

The commonest is the fat or beef tapeworm. It is found only in beef and is acquired by eating raw or rare beef. Generally there is only one worm at a time, though reinfection is common.

The egg, which is found in the flesh of the beef, hatches out in the body and develops into a worm with a round pin-head. The beef tapeworm has no hooks but has four suckers on its head, by which it holds fast to the inside of the small intestine. It begins to grow at once, forming white flat sections which look like a piece of tape. It grows to enormous length, 30 to 40 feet, and soon begins to throw off the end sections, which are found in the bowel movements, in the clothing or in the bed.

During this growth the tapeworm is devouring the food which should go to the unfortunate person who is entertaining him. As a result, a person with a tapeworm has a ferocious appetite, eats enormous meals, yet is always hungry and loses weight. These symptoms often arouse suspicion. Finding some of the segments is positive proof.

The beef tapeworm is unpleasant but comparatively harmless. It is expelled by any one of a half dozen remedies. Your doctor will tell you which one and how much to take.

The pork tapeworm is gotten through raw or underdone pork. It is like the beef tapeworm, but has hooks as well as suckers. It is also more dangerous. If any of the egg-bearing sections get in the mouth, through dirty hands, they hatch out into new worms, which bore through the stomach wall and may get into the muscles, the eyeball or the brain.

The broad tapeworm is found in fish. It is rare in this country but common in Europe and Japan.

A small tapeworm, unlike any of the three, has been found in Nebraska. Where it comes from, no one knows.

As beef, pork or fish may contain these tapeworm eggs, the only sure way to avoid tapeworm is never to eat raw meat, or raw fish and to have all meats well cooked.

YOUR SLEEPLESS STOMACH

ONE of our best-known "patent medicine" companies for years carried a slogan for a popular laxative, "They work while you sleep." The idea was that during sleep, the entire body was inactive.

Of course we know that isn't true. The heart works during sleep, not as forcibly but just as regularly and automatically as during our waking hours. The lungs go on rhythmically contracting and dilating. The kidneys work steadily. Practically all the unconscious and automatic functions of the body are carried on as regularly and effectively during the silent hours of the night as during the daytime.

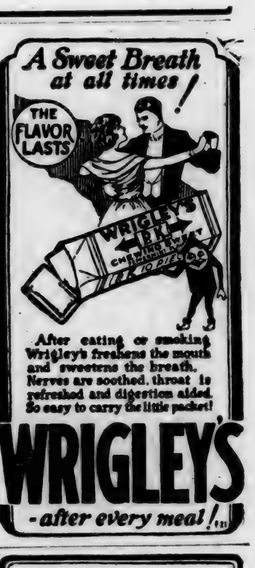
How much work does the stomach do during sleep? This has always been uncertain.

The automatic working of the human body has always been more or less of a mystery. What keeps the machinery going?

The increased knowledge of the so-called "endocrine glands" has partially explained some of these mysteries. Some of these glands make and release into the blood substances which stimulate different parts of the body and keep them working. Others secrete other substances which slow down the body machinery and keep it from running away. The stimulating glands are like the engine in an auto. The restraining glands are like the brakes. Both are necessary for regular, orderly living.

When we are asleep, some of the brakes are taken off. Then those parts of the body that are more or less restrained during working hours, speed up on the night shift and get in a little extra work.

Doctor Johnson and Doctor Washein, two students of physiology in the University of Georgia, have found that when we are asleep the stomach says: "There, thank goodness, that guy's safe for a few hours now. There's no danger of his firing any cabbage and pie and doughnuts and ice cream and popcorn and hot dogs down here for me to take care of. Now I can speed up and get a little ahead on tomorrow's job." So it goes to work and turns out more gastric juice than it had time to make during the working hours. The sounder you sleep, the faster it works. That's why, if you have a long sound night's sleep, you wake up in the morning all ready for your breakfast and able to digest it, while if you don't get enough sleep or sleep fitfully you don't want any breakfast and can't digest it even if you do eat it.



After eating or smoking Wrigley's freshens the mouth and sweetens the breath. Nerves are soothed, throat is refreshed and digestion aided. So easy to carry the little packet!

Slats' Diary
By Ross Farquahr

Friday—Rilly I am getting so I hate to see Co. come to are house enny more here of lately becus after they have went home why ma spens to much time balling I and pa out for the way we done thissen that an other things. Just to nite after sum cusens left here ma jumps on me becus I recht acrost the table for sum cake. She sed. When you want sum thing clean acrost the table why use yure tungue. Then she got sore when I sed mebby thats all rite but my tungue is sent Long enuff to do thataway.

Saterday—A ole fellow witch is 80 years of old age was here this afternoon and pa ast him how he had kep hisself looking so yung and helthy looking and the old fellow sed he thot mebby it was becus he Quit chewing Tobacka when he was seven years of old.

Sunday—Out riding the saiternoon and got a puncher in the ole front tar and then pa discovered he had come away without his pump and so he waited and waited for a otto to come along and try to borry there pump and finely a grate big one comes along and pa waved at them to stop but there horn just sneered at us and they went rite on. The nex one at come why pa yelled at them and ast if they had a cork screw and they shid there wheels to stop. & pa got the pump.

Monday—Jane has been bragging about her uncle how rich he is and all that but today when they ast him how much gas he had in his machine why he went and looked under the front seat for the tank so I gess he aint ben rich very long.

Tuesday—I gave Jane a h it one tonite. She ast me what kinda girl I wanted to marry if I done so I sed. Well I think it would be very foolish to marry a girl dum mern I am. I gess that got her. She sed. Not only foolish but it wood be impossibble.

Wensday—Wile pa was at the hospittle visiting a frend today he seen a burgular witch was there recovering. Come to find out sum woman made a mistake when she herd him in the house. She thot it was her husbend.

Thirsday—1 of the ladys on are St. went to a fortune teller and got told at her husband was in grate danger of dieing soon an now she dont no whether to get a doctor or a life ensurance policy for him.

PATTERSON-FLETCHER'S

Celebrate 30th Anniversary With Sale of Clothing

To celebrate their thirty years in business in Fort Wayne, Patterson-Fletcher Company are offering as a very special selling event 2100 Men's and Young Men's $30 to $65 Suits at four prices.

Thirty years ago, Mr. Harry P. Fletcher came to Fort Wayne as a clothing buyer. He is now President and General Manager of the firm and is still buyer of all clothing as well as Merchandise Manager of the entire store. One of the policies of the store has always been never to sell cheap clothing, but to sell GOOD CLOTHING for less than the same quality could be bought for elsewhere.

This Anniversary Sale if just an example of how well they carry out this policy. In an advertisement found elsewhere in this paper you'll note that they advertise clothing coming from the best manufacturers of the country—yet their prices are LESS than is asked by most stores for unknown and unrecognized lines of merchandise. It pays to buy merchandise that comes from reputable manufacturers. It pays to deal with a firm like Patternson-Fletcher's who do more than a million dollar business a year and by this big volume are able to merchandise in a large way for the benefit of their customers.

This paper extends to Patterson-Fletcher Company our congratulations for their 30 years of service and to their success.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY MAY 28, 1925 | NO. 22

Life of Mrs. Sam Fellers Ended

Nancy Evalena Fellers, wife of Samuel Fellers, and daughter of James W. and Harriet E. May was born December 27, 1868 and died May 23, 1925, being 56 years, 4 monts and 26 days old.

December 18, 1895, she was married to Samuel Fellers. One son was born to them, Austen B. who mourns the loss of his mother.

On January 5, 1890, she united with the Concord M. P. church, and on February 9 of the same year, she transferred her membership to Fairview, and on September 9, 1917, her membership was transferred to the St Joe M. P. church. She was unable to be a regular attendent at the St Joe church, owing to the care she was giving to an aged aunt and an aged uncle. She lived a good, wholesome life always mindful of others. Her tender care for her sister, Fidelis E., for many months, and the loving care for the aged people in her home is an excellent exemplification of what Jesus said, "Greater love hath no man than this, that he lay down his life for his friends." She performed these tasks adding to her gentleness and devoted disposition. Even a few evenings before her death she thought of the welfare of those she loved, planning for their comfort.

She leaves her aged father, a Civil War veteran, for whom she hoped to live so she could care for him, (her mother went home fourteen years ago,) her husband, son and Margaret, wife of Austin, who has been so much help and comfort to Mrs Fellers, two sisters, Fidelis E Fellers of Fort Wayne, Viola N. Coe of Sacramento, California, and two brothers, Franklin F May of near Auburn and Alva Curtis May of Canton, Ohio, to mourn her going away.

Those who have cared for her during her long illness will miss her most, as these lines may be on the lips of her husband and son in the days to come.

Funeral services were conducted from the St Joe M. P. church on Tuesday afternoon at 2 o'clock, Rev. Havens, officiating. E. R Kinsey, funeral director. Interment in White City cemetery.

L. W. Yeiser and family of South Whitley, were Saturday and Sunday guests at St Joe and Newville. Their daughter, Mrs. Lileth Cain, attended the Alumni Reception Saturday evening at St. Joe.

Memorial Day Plans Announced

The services of the Community Welfare Band have been secured for the day. At 8 o'clock the band accompanied by the old soldiers and delegation of citizens, will leave for Bear Creek, where services will be held at 8:30; at Morr's cemetery, west of Concord, 9:15; Jenkins cemetery at 9:45; at Coburn's Corners church at 10:30 and at Alton cemetery following this service Joe Scholes will be the speaker.

At St. Joe Lutheran church the service will be held at 2 o'clock with special music by Choral Society. All the children of the community are asked to participate, also the K of P. and I. O. O. F. lodges and the American Legion.

While the old veterans are scarce yet all who can are asked to come in from the communities and participate. Rev. Havens, pastor of the M. P. church will deliver the address.

All ex-service men of the World War are asked to meet Thursday evening at The News office at 7:00 o'clock, to make arrangements to decorate the graves of World War heroes in this vicinity.

The Stranger Knows

St. Joe citizens may not have noticed it, but a local paper is one of the first things a stranger calls for when he visits a town with a view to locating in it permanently. If the paper is filled with live ads, then he knows there is business in that town. If it is not, he knows that either it must be that the home merchants have little to sell or that they doubt their own ability to sell it. Then he concludes that the community is either dead or hard up—and he decides to locate elsewhere. This is not theory—it is statement based on many years contact with people who have expressed themselves along the above lines. The local newspaper is an accurate business barometer and no amount of billboard advertising or loud talk will offset that fact. Its columns are a faithful record of actual conditions in the town and community. You can "sell" your goods to your neighbors and "sell" your town to a stranger at one and the same time But you can't do it by ignoring the home town paper.

LOCAL ITEMS IN BRIEF.

Things have quieted down now that school is out. Anyway the youngsters sure need a rest and the parents will appreciate them being at home on time at night.

Mother had come in from the farm to visit her daughter in St. Joe. After the kiss of greeting, she noticed her daughter's bobbed hair. Her eyes opened wide in astonishment. "Well, fer pity's sake, Lizzie," she exclaimed, "you never writ me you had the typhoid."

We who now walk the shining streets of life
And quaff the wine of friendship's blessedness,
Who know the final glamor of success,
Who feel the bliss of resting after strife—
Shall we forget those troops of foolish-wise,
Love-passioned lads who purchased this, our joy,
With youth's fine gold? To whom life was a toy
With which, quick-spent, to gain time's prize?
O God of peace, let not this heart-wound heal;
Let still a reverent memory stir our soul
May we be not so brutal as to feel
No thought for those who from the heathen stole
The prize they lusted for—the round earth's weal!
May we remember those who, failing, reached their goal.

PART THREE—Continued.

—12—

"My brain has gone round and round like a whirlpool for months! I don't know what I think."

"Well, think this," he said gently: "Marriage laws and forms vary with every creed, and in every country, to suit temperament or—environment. And everywhere, certain conventions are necessary. For God's sake, don't imagine I'm an advocate of loose morality! But you and I are cast off from all rules save those of our own making. Have you considered that? These natives—or Indians, Turks, Christians—all have some ideal which they embody in certain marriage rites and laws."

She hung upon his words, clasping tightly the hands holding her own. "Yes?" she breathed, when he paused.

"Well—we are adrift from every one which applies to us. We can't obey them in the letter. We only have them in our hearts."

"You mean," she whispered, "you think it would be right to form our own—marriage rites?"

"I do. Before God Barbara, I do. To me, our wedding would be as sacred and lawful here, with the sea for music, the birds for witness, as in a crowded church. I want you always to remember that."

The waves echoed faintly upon the shore; the wind stirred the palm leaves in their enclosure; otherwise the whole world seemed waiting, in a stillness like death, for her reply.

"I believe you, Alan," she murmured at last. "I had not thought of it at all in this light. It would be the same to me, in my heart. But—should we be right? Suppose—afterward—we were rescued?"

"Well? Then we should at once obey the letter. Here we can obey the spirit. But isn't that the greater? In the world it is the reverse, often. The spirit is violated."

"Suppose," she began again, with a shudder, "only one of us were rescued?"

"Don't conjure up imaginary horrors."

She drew away, looking around the bay with the same pathetic helplessness that had struck him so poignantly on Christmas eve.

"Oh!" she muttered, "it is a terrible problem! If only there were somebody outside it all, to help! I am so afraid our very love may guide us—wrongly."

"No," he said quickly. "It won't, because it is love—not that other word beginning with the same letter. Besides, it is the motive of the heart which counts, in all problems."

She turned away, covering her face with her hands.

"What can we do? What can we do?" The words came brokenly, pathetically, to the other outcast from all laws. He was conscious tonight, more than ever before, of their growing dominant need of each other. Had he striven in his old arrogance she would not, he knew, have resisted his appeal. But the great keynote was tuning his nature as well as hers. All the chivalry latent in his being rose to his heart, casting out passion. With infinite delicacy he went to her and put his arms about her.

"We are down among the deep chords together, now," he whispered. "But together—always together."

With a choking cry she turned and flung herself upon his breast, clinging to him, the only bulwark of her life.

"I can't decide yet. Oh! I can't—decide; I can't decide—" And she burst into a passion of tears.

III

The man, with the divine instinct of understanding now awakened, realized acutely all that the girl was suffering. He held her quivering form close, saying nothing. There was nothing he could say. Her own soul must now fight out this battle between the old instincts of a lifetime and those of a world beyond reach of civilized rule.

Presently, when she grew calmer, he lifted her bodily and carried her into the hut. He placed her upon her bed; then knelt for a moment, and laid his cheek to hers.

"The decision lies in your hands," he whispered. "Come and tell me when you know."

Then he rose to his feet, lingering beside her for a time, a world of almost maternal tenderness in his steady regard. But she made no reply. With a little gesture of helplessness, he turned, and walked back to the lagoon.

Croft, in old days, could not have been called a strongly sexed man. All the vitality of his nature went into other channels. Now, when, for the first time, passion had come to him, it found him bereft of all those other outlets to his abundant energy. It shook him with fierce intensity. In the past, his whole concentration, every ounce of brain and strength, had been given to his work and inventions. Now the same splendid force, welling up and overflowing, was concentrated upon woman—a channel half closed against him. Being half closed caused more torture than if it had been entirely shut and barred.

Fate—God—whatever the Unseen Power was called—had hurled them, man and woman, together in this isolation [illegible] all that was sacred, should they resist the law underlying His creation? Must His primal laws be set aside because those made by man, now mere chimeras, were absent? It was absurd, quixotic, unnecessary.

But beneath the velvet glove of nature lies the iron hand; behind her smiling face sits grim severity. These, more than any scruples, caused him to pause. He who had ever scorned obstacles, now faced them appalled. He who had never known fear, was now afraid. . . .

He who had ever seized what he desired, now stood aside and waited.

Barbara must decide. To that, amid the turmoil of his spirit, he clung. There must never be coercion; she was no weakling. Not until she saw the path clear before her would she move an inch: that he knew well.

No sign came from the hut. Within its darkness, inert head buried in her outstretched arms, lay the arbiter of his fate and her own. In a great and awful loneliness of soul, such as she had never imagined possible, she faced the greatest question woman can be called upon to answer. The mountains were quite close now; but she approached them without shrinking, only desirous of finding the right path across to her Beloved. She did not blind herself. She had contemplated marriage before, aware of all it meant to a woman in civilization. Now she contemplated it shorn of all but nature's own sublimely terrible forces; contemplated the years ahead, with the possibility of other lives besides their own. . . . Reverberations! Truly, when one irrevocable chord is struck, the reverberations roll on and on, echoing all around, so that God's whole Harmony may be marred or perfected. Can one always tell which it will be?

Both met next day, heavy-eyed from a sleepless night, but each tacitly forbore to allude to the fact. They spoke

Lifted Her Bodily and Carried Her.

little, making but a pretense at breakfast. Afterward, Alan fetched his native bow and arrows.

"I may not be back until evening," he said. "You will be all right?"

"Quite."

There was a relief in her tone which he noticed and understood. He hesitated; but she did not look up. For the first time since Christmas they had omitted their morning kiss. And now something restrained him from taking the wistful little face in his hands, much as he longed to do so. He turned and strode off up the bay.

The omission was significant. They had struck a chord too deep ever to return to the delightful camaraderie of the past. Demonstrativeness held a hidden menace behind all its charm. A new wall, vastly different from the old one, yet no less baffling, formed again between them. Once more, each intuitively hid behind reserve yet hung upon the other's slightest action. Once more, only surface topics were allowed admittance. Once more, Alan spent long hours away. . . .

One day, before their second Christmas, Meaman fell sick. Barbara, who of late had shunned too much contact with that happy family, fetched Laalo and his sister to play in the enclosure. Children's merry laughter echoed around their home; and Alan, instead of going off as usual, stayed to play with them.

Barbara watched him, all her heart shining in her eyes. There was nobody to put the fear of tabu into Laalo's frizzy head. The "great white chief" told him marvelous stories of animals never seen upon their island. He became a wonderful horse galloping round the hut, with Laalo upon his back; then a roaring lion, that roared most terribly. There were swings in the hammock, and games of which the little natives had never heard.

And all the time, while joining in their play, Barbara watched her man. Often, too, she found him watching her. . . . How happy these little ones were in their life of freedom, knowing no other. . . . The conventions of previous years seemed very remote now, very unreal. . . . His point of view was, surely, mere common sense. . . . As the day wore on, she fell more and more silent, a terrible aching hunger in her heart. . . . Must their two natures age here in barren purposelessness? Never be fulfilled? Why? Because far-off rules of society, which could not reach them, would be broken? How trivial such things seemed here, where the world was still in its beginning. . . .

In the evening, the tiny girl, tired after excitement of the day, grew sleepy and fretful. Alan stopped an uproarious game, sat down upon a rock, and lifted her in his arms. She lay there contentedly, her little black head nestled in his shoulder.

A pain that, in its poignancy, was almost physical, gripped Barbara's heart. Great tears welled up suddenly and ran down her cheeks. Moved by an irresistible impulse she darted forward and snatched the child from him. "No, no, no! I can't bear—that! Let them go home. . . . It is time they went home. . . ."

For a moment he gazed at her, bereft of speech. Then he rose, and called Laalo.

"I will take them home," he said quietly.

When he returned, she had sunk upon the rock he had vacated. With eyes tragic in their intentness, she watched him approach. He came close to her. With one of his old swift movements he raised her chin with his hand, so that she met the penetration of his gaze.

"Barbara!" he muttered, "this will drive us mad. We are human, not gods."

She drew away, hiding her face in her hands. The very touch of his fingers sent an electric current racing through her veins. To continue like this was becoming daily more impossible.

Presently she rose, not daring to speak, and turned from him into the hut.

Blindly, bewildered, Barbara groped her way, step by step, through a maze of uncertainty. The day with the native children had been a revelation. Never before had she realized the passion of longing which possessed her. . . . And by her own self-revelation she judged the suffering of the man waiting for her decision. The claims of another's need grew insistent, dominating. . . . More and more did the life of previous years seem pale and unreal. . . . The fears for the future, the burden of its responsibilities, grew fainter, assumed new aspects. . . .

There came a night when Alan, after being away all day returned moody, irritable, impatient of all the trivial subjects with which she endeavored to make conversation.

"Have you been working in the plantation?" she asked, after several unsuccessful attempts during supper.

"No."

He ate a banana, and threw away the skin. "What's the good of it all?" he asked impatiently. "It will lead nowhere."

"It's occupation," she faltered.

"Occupation? Yes. Occupation for the sake of occupation! Is that all life is to be worth? My G—d! What an outlook!"

This was another of Barbara's fears. How long would the limited interests of the island, shorn of a deeper outlet, suffice for a man of his temperament?

"You are doing a lot of good among the natives," she suggested, feeble though she knew the remark to be.

"Good?" He gave an impatient laugh. "Lord! Don't credit me with the instincts of a missionary! That's only 'occupation.' One hour, if we left this place, and they would forget it all."

This bitterness, this dreary desolation of voice and mien, so unlike the old Alan of indomitable resource and optimism, cut Barbara to the heart. For she understood.

"Alan! Alan!" she cried, stretching out a hand.

But he shook his head. "No. I can't—I—daren't. I'm only fit for the devil tonight."

She rose, her lips trembling, and went toward him.

"Don't! Alan, don't shut me out! I—understand—"

"Understand? You can't, or—" Suddenly he seized her, almost viciously, dragging her up against him. With shaking hands he pressed back her head, and laid his hot lips upon her neck.

"I—I'll—force you to give in—one day—" he muttered thickly.

She did not struggle; but she trembled violently in his grasp. For a long moment his eyes burned into hers. But, among the answering passion they saw there, lay the purity which was the very essence of her being. . . .

As abruptly as he has seized her, he let her go again.

"I—I told you I was only fit for the devil tonight," he said huskily. "Let me be. . . . for God's sake, let me be. . . ."

She turned, quivering in every limb, and ran into the hut.

For hours she lay, deaf and blind to all around, alone with her God. . . .

And gradually a great peace stole over her spirit. Imperceptibly, the last mountain rolled slowly away. As one tired out after long, victorious warfare, she lay, motionless, the moonlight falling through the little window upon her white-robed figure. . . .

After a time she rose and looked once more upon the waves she loved so well, a wondrous shining in her eyes. And all the perfumed beauty of the night blended in the tender, passionate craving to be with him who, also, had striven, and suffered, and conquered.

Slipping on her old Japanese wrapper, she passed noiselessly out of her room. He had, she knew, not gone in to bed.

Moved by some instinct, she turned, stumbling over the rough ground, and ascended the eastern slopes, where they had watched the dawn on that Christmas day nearly a year ago.

IV

A group of rough bowlders, moss-covered, commanded a long view over the eastern shore of the island, while forming a shelter from the wind. The girl approached them; then, at a sudden soft sound, stood still, her heart beating rapidly. Noiselessly rounding them, she discovered the man she sought stretched upon the ground, his head thrown back upon clasped arms, his eyes dreaming far away over the softly outlined scene below.

For a moment she fingered the folds of her thin garment, watching him. Then the wind fluttered one of her loose sleeves; and his gaze flashed back from far distances. Turning his head he saw the figure standing, motionless, by his side.

She stood perfectly still, her hand pressed upon the garment at her breast, the wind waving her cloudy hair, her lips a little parted, her blue eyes darkly shining in the faint light.

Once—twice—she tried to speak, but the words would not come; she could only envelop him, as it were, in the radiant glory of her face. . . .

Suddenly a great wave of understanding broke over him, rendering him for a moment breathless, blinded, bewildered. . . . Then, instinctively, he raised his arms. With a little inarticulate cry the girl allowed him to take her, trembling in her capitulation, clinging to him, submitting, without resistance, to the storm of passion at last set free. His kisses burned into her soft flesh, his arms crushed her well-nigh breathless; she was carried away by the tide of his ardor, responsive, glorying. . . .

Barbara had crossed her Rubicon for all time.

Presently he sat down upon the rocks, still holding her to him.

"You—came to tell me?" he whispered, his face close to hers, his eyes piercing to her very soul.

"Yes," she whispered back. . . .

After a time she raised herself, still in his arms.

"Alan, I—couldn't tell you before; until I felt convinced that all—was right. You understand; don't you? It was because I loved you so, dear heart, not—fear, or coldness—"

"I understand," he murmured, laying his cheek against hers. "I always understood. It was the beastly brute in me that sometimes seemed not to. . . . When, Barbara?"

Her head fell back upon his breast; with a little throbbing sigh, she renounced her will to his.

"Whenever—you like, Alan."

"At dawn?" he whispered. "It will soon be here. When the sun rises over the water it shall witness our—marriage rites?"

The passion had died out of his voice, and a note almost of awe had crept in.

They remained, sometimes silent, sometimes discussing, in low tones their forthcoming bridal, while the moonlight waned, and the wonderful blue-black of the southern night softened and paled.

Presently Alan lowered the hand he held near his cheek and opened the fingers.

"What can we do about a wedding ring?" he asked.

"Oh! Does that matter?"

"I should like to see you wearing one—of mine. Wait!" he continued, searching in the pockets of his frayed breeches. He displayed a collection of keys, a pocket knife, and a pencil, suspended upon a small tin key ring.

"Will this fit? It's better than nothing."

"It looks about the right size, and will do beautifully. Oh, Alan! how shall love it!"

He smiled, a world of tenderness in his eyes. "Look," he said. "Dawn breaking."

Early birds began to chirp and whistle, away in the forest; the dancing waves turned a steely gray. The wind had dropped, leaving a great silence. It seemed as if nature were holding her breath, waiting for the dawn not far off. . . . When at last the sun's first long shaft of gold quivered across the water, the man rose and set the girl gently upon her feet. The hand in his trembled a little; but she met his eyes bravely and smilingly. . . .

(TO BE CONTINUED.)

Women and Courtship

Man views it as a great testimonial to his prowess at amour to yield up his liberty, his property and his soul to the first woman who, in despair of finding better game, turns her appraising eye upon him. But if you want to hear a mirthless laugh, just present this masculine theory to a bridesmaid at a wedding, particularly after alcohol and crocodile tears have done their disarming work upon her. That is to say, just hint to her that the best harbored no notion of marriage until stormed into acquiescence by a moonstruck and impetuous bridegroom.—H. L. Mencken, in "In Defense of Women."

ROAD BUILDING

NEW BULLETIN ON RURAL HIGHWAYS

(Prepared by the United States Department of Agriculture.)

There were 2,041,294 miles of rural public roads in the United States on January 1, 1922, according to a bulletin issued by the United States Department of Agriculture entitled "Rural Highway Mileage, Income, and Expenditures, 1921 and 1922." Of the total road mileage, 387,760 miles had been improved with some form of surfacing such as sand-clay, gravel, macadam, or pavement when the year 1922 began.

The total road mileage is sufficient to encircle the earth at the equator 118 times, while the surfaced mileage was sufficient to gridiron the United States with 75 east and west routes extending from ocean to ocean, and an equal number of north and south routes extending from border to border. Since 1921 surfaced mileage has been built at a rate of between thirty and forty thousand miles per year, of which an undetermined portion has been in the nature of resurfacing of roads previously surfaced.

The bulletin is the result of an investigation by the bureau of public roads, and contains the only complete report covering the entire road work of the country for any recent year, and will be valuable not only in studying the present highway situation, but for the future as a record of highway improvement progress.

Complete data are given for all rural highways by states with reference to types of roads existing in 1921, mileage constructed in the years reported on, sources of highway funds and how expended, and motor vehicle registration statistics. The statistics on highway income and expenditure show state funds and those of local units separately.

The publication, known as Department Bulletin 1279, may be obtained upon request as long as the free supply lasts.

Improved Roads Sign of Progress in Community

The material need and the economic value of improved highways can hardly be a matter of debate. It would be possible to chart the path of progress from barbarism to civilization in terms of transportation facilities, from labored pedestrianism to flights through the clouds. And as for actual roadways for vehicles it is probably correct to say that poor roads are the obvious advertisements of either a backward nation or a backward community, while good roads are everywhere and always the outward sign of advance and progress, says the Philadelphia Bulletin.

But there are other roads than those that are built of either mud or macadam. There are roads to health that are paved with wholesome food and restful sleep and a plentiful supply of fresh air. There are roads to wealth that are paved with ambition and industry and thrift and infinite patience. There are roads to success that are paved with high enterprise and long laborious days and the kind of desire and determination which will be satisfied with nothing less than real achievement. There are roads also to failure that are not paved at all, but that wind aimlessly along in deep-grooved ruts of indolence and ignorance and self-pity. There are also roads that lead to happiness, paved with loyalty to one's friends, devotion to one's ideals and the spirit of generous service. There are roads to pleasure, paved with personal indulgence, that lead to nowhere and nothing, except disillusionment, and in the end, despair.

Sixty Million Is Ready for Work in California

Fear that highway development in California will stop unless the gasoline tax is raised apparently is without foundation, according to figures coming from Sacramento.

These indicate that the state will have some $60,000,000 to $70,000,000 to spend on roads in the next biennial period without any increase in taxes.

The sums available include $45,000,000 that will be collected on motor vehicle taxes, $8,000,000 that is now in operating contracts, $12,000,000 in new construction work by counties and road districts, $2,000,000 to be spent by the forest service, and $1,000,000 on the national park highways, a total of approximately $68,000,000 on highways during the next two years.

If this is not enough, more should easily be available, as it is indicated that the state will have a surplus of $22,000,000 in the general fund, part of which could be diverted to highway construction purposes.

Highway Notes

The convention of American road builders predicts perfect roads within 25 years. A perfect road, according to our notion, will be at least twice as wide as the ones people think plenty good enough nowadays.

Improved highways make every part of Pennsylvania easily accessible. Modern thoroughfares connect the centers of production with the centers of consumption. It is possible to drive 2,000 miles in a straightaway without once leaving improved road.

(©, 1925, Western Newspaper Union.)

Lesson for May 31

PETER AT LYDDA AND JOPPA

LESSON TEXT—Acts 9:32-43.

GOLDEN TEXT—And they went forth and preached everywhere, the Lord working with them, and confirming the word with signs following.—Mark 16:20.

PRIMARY TOPIC—Two Wonderful Things That Peter Did.

JUNIOR TOPIC—The Story of Two Miracles.

INTERMEDIATE AND SENIOR TOPIC—Two Great Miracles.

YOUNG PEOPLE AND ADULT TOPIC—The Place of Miracles in the Spread of the Gospel.

In order to grasp the significance of this lesson, we should recall the condition which prevailed in the church as suggested in verse 31.

1. Freedom From Persecution.

Saul, the ringleader of the persecutors, had only recently been converted, thereby disorganizing their forces and causing the church to enjoy a breathing spell. This period of rest was not used for growing lazy, indifferent, worldly and forgetful of God, but for growth in grace and in the knowledge of the Lord Jesus Christ.

2. Spiritual Growth and Development.

Most blessed will be the results following the times of outward peace if the members of the church will but spend time in building it up. The real meaning of the word, "edified" is built up. This does not mean merely that the members were being instructed and comforted, but that strenuous efforts on the part of individual members, as well as the body as a whole, were being made for the advancement of the divine life. As suggested by another, this metaphor involves:

(1) A Foundation. This is Jesus Christ. No other must be laid (I Cor. 3:12-16).

(2) Continuous progress. This means that a Christian's activities are purposeful, and that the work he undertakes moves forward with the proper progression.

(3) Persistent effort. This means that the present day's work begins the foundation upon which tomorrow's work must be built. Thus day by day his life is being raised higher and higher as each separate round of material is being laid by strenuous efforts.

(4) Completion. Finally the work is done. The building is completed; the top stone is brought forth and placed.

3. Outward Growth.

Building up within the church causes the whole work to be admired and respected by those without, inducing them to come and identify themselves with it.

I. Peter's Tour Among the Saints (v. 32).

This resulted in securing new converts.

II. Two Stupendous Miracles (vv. 32-43).

These were the greatest signs wrought since the days of Christ. The dreadful malady of palsy is vanquished, and a corpse is retenanted by the departed soul. The Lord had promised these signs as they went forth with the gospel message. They were given as encouragements to the disciples to convince them that the gospel did not lose any of its power by being spread, but rather it increased in power.

1. The Healing of Aeneas (v. 32-35).

This man's needy condition appealed to Peter just as men today should appeal to us in their semi-dead state. Like his Master, Peter could not refuse the needed help. In this he does not direct attention to himself, but confidently appeals to the power in the name of Christ. He said, "Jesus Christ healeth thee." The man who had kept his bed for eight long years immediately arose and made his bed. Peter wisely kept this miracle from being the end by making it the means to the end—that end was the preaching of the gospel.

2. The Raising of Dorcas (vv. 36-43).

This woman was full of good works and almsdeeds which she "did," not what she talked of doing. She was a practical Christian woman. Her death was a real loss as was evidenced by the mourning of those who had been helped. If all professing Christian women would use their needles as Dorcas did there would be much less of that profitless fancywork done. When this good woman fell sick and died, the disciples sent for Peter. This shows their growth in faith in the Divine power. Peter again imitated the example of Jesus in putting them all forth. At his command her soul came back to live in her body. This again caused the people to believe on the Lord.

In God's Purpose

In no case does origin determine value. From the religious point of view, the dignity and worth of man lie in any case in God's purpose concerning him, and that purpose is not affected by the particular method of his working.—Henry Churchill King.

Much Difference

There is as much difference between self-reliance and self-conceit as there is between the North and South poles—all the difference in the world!

EXPERIENCE OF NERVOUS WOMAN

Weak, Blue, Discouraged—Relieved by Taking Lydia E. Pinkham's Medicine

Cincinnati, Ohio. — "I was nervous and could not sleep, had crying spells and the blues, and didn't care if I lived or died. My right side was very bad and I had backache and a weakness. I read about your medicines in the papers and wrote for further information. I took Lydia E. Pinkham's Vegetable Compound, Blood Medicine and Liver Pills, and used Lydia E. Pinkham's Sanitive Wash. I have had good results in every way and am able to do my work again and can eat anything that comes along. My friends tell me how well I am looking."—Mrs. F. K. CORIELL, 129 Peete Street, Cincinnati, Ohio.

Willing to Answer Letters

Philadelphia, Pa.—"I have used your medicines for nervousness and a run-down system with a severe weakness. After taking Lydia E. Pinkham's Vegetable Compound and using Lydia E. Pinkham's Sanitive Wash I feel like a different woman and have gained in every way. I am willing to answer letters asking about the medicines."—DORA HOLT, 2649 S. 11th St., Philadelphia, Pa.

Sold by druggists everywhere.

Holds Overshoes On

Those who traverse muddy roads will be interested in a recently patented device for preventing overshoes from being pulled off by deep mud. It is in the shape of two metal grippers that clamp the overshoe to the shoe itself. For a high shoe there is a hook that is attached to the top of the shoe and extends down to hold the gripping jaws. The jaws are movable so that too much wear will not be brought to bear on one spot.—Scientific American.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Left John Reflecting

They were sitting by the fire and John was reading his evening paper. "It's really time our daughter was getting married," interrupted Mary.

"Oh, pshaw!" responded John "there's no hurry. Let her wait till the right man comes along."

"Why, John," said Mary, "how you do talk. I didn't."

The occasional use of Roman Eye Balsam at night will prevent and relieve tired eyes and eye strain. 372 Pearl St., N. Y. Adv

Government Runs Banks

Thirty banks, representing about 40 per cent of the total deposits of private banks in Norway, are being administered by the government.

How Robert M. Koenig Found Remedy for Pimply Skin

For years my skin would break out every once in a while—and ointments did very little to help me.

I read a doctor's article stating that pimply skin usually comes from the stomach—and bowels not getting rid of the poisons.

I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I tell my friends the right way of getting rid of a broken out skin—and also of steering clear of upset stomach and sick headache. Carter's are all you claim for them.

Hoosier News Briefly Told

Indianapolis.—Appointment of members of the new Indiana library and historical board in accordance with provisions of an act of the recent legislature, placing the control of the state library, historical commission and legislative references bureau under a single body, was announced by Gov. Ed Jackson. The appointees are: William M. Taylor, Indianapolis; Mrs. Elizabeth Claypool Earl, Muncie; Dr. William P. Dearing, president of Oakland City college; Charles N. Thompson, Indianapolis; Mrs. Frank J. Sheehan, Gary.

Evansville.—Life triumphant is in evidence where two months ago death and destruction reigned. Five hundred farmer folks gathered on the farm of A. J. Nesler, less than two miles from Griffin, to commemorate the turning of the last furrow in the vast rehabilitation program undertaken by the Indiana farm bureau and in which 415 farms were plowed. The farm of Mr. Nesler, with its 160 acres, was the last of thousands of acres to be plowed in Gibson and Posey counties and great ceremonies attended the turning of the last furrow.

Hammond.—Contracts for the pavement of Indianapolis boulevard, the bottleneck which leads from Indiana into Chicago, will be awarded during the week, it was announced by the state highway commission. The road for years has been in poor condition and full of traps for motorists. The specifications provide that the widening and paving must be completed by October 1.

Hammond.—On a tip furnished by an unknown informant, the home of Ed Beverly, gunman, who is said to have shot and fatally wounded Elijah King, in an East Chicago soft-drink parlor, was surrounded by police, and Beverly captured while hiding under the bed. He made no resistance. King was shot in the back five times and is paralyzed. He cannot live.

Indianapolis.—The Indiana Supreme court issued a writ of prohibition against Everett O. Danson of Brazil as special judge of the Clay Circuit court, prohibiting Danson, as judge, from taking steps to oust William B. McQuirk from the office of trustee of Harrison township, Vigo county, or from punishing McQuirk for failure to leave the office.

New Albany.—Harry A. Buerk, superintendent of the New Albany public schools and president of the Floyd county board of children's guardians, has directed that William E. Gar n, age fourteen, be placed under supervision of representatives of the Indiana Boys' school following the boy's marriage to Edith Orr, age twenty-three, of New Albany.

Indianapolis.—The thirty-first annual conference of Indiana health officers, held in the Hotel Lincoln, closed following the adoption of a resolution favoring a full-time health unit for towns, instead of a part-time health officer, and a resolution of condolence to the family of Dr. John N. Hurty, who died since the meeting last year.

Chicago.—The marriage of Miss Margaret McCulloch and John B. Reynolds, both of Indianapolis, was celebrated in the early morning ceremony at the Second Presbyterian church. Mrs. Reynolds is a member of an old Indianapolis family. Mr. Reynolds is secretary of the Indianapolis Chamber of Commerce.

Elkhart.—The Elkhart police department made the largest liquor haul in its history at the residence of Frank Calladrase. One hundred and sixty-five gallons of wine were found and destroyed. Calladrase was arrested on a charge of maintaining a liquor nuisance.

Madison.—Mrs. Wesley Reidel, age forty-six, was killed and Mrs. Gladys Shipman, Miss Nina Reidel and Mrs. Clarence Grebe were seriously injured when a car being driven by Mrs. Reidel plunged over Dugan Hollow hill, near this city.

Anderson.—John (Jack) Carmody, thirty-three years old, is dead and Detective James McFarland is in a hospital with a broken jaw as a result of a street battle which occurred here when McFarland attempted to arrest Carmody on an old warrant.

Evansville.—Fort Wayne will be the next annual convention city of the King's Daughters and Sons of Indiana, which closed a three-day session here. Miss Blanche L. Maine, Indianapolis, was elected president.

Logansport.—Fire destroyed the Good general store, the post office and the Pennsylvania station at Lake Cicott. The damage will reach $25,000.

Indianapolis.—The appointment of Russell B. Rothrock of Mount Vernon as a member of the state board of pharmacy was announced at the office of Gov. Ed Jackson.

Goshen.—Herman Smith, age twenty, of this city, was killed at Peoria, Ill., when run over by a motor truck.

South Bend.—Rev. Timothy Mahar, C. S. C., is dead at Notre Dame university after a career at that institution covering 60 years. He was ninety-five years old. He was for 20 years secretary and treasurer of the university, and also served at postmaster of Notre Dame for 27 years.

Muncie.—Col. Alvin Mansfield Owsley of Dallas, Texas, former national commander of the American Legion, was wed to Miss Luck Ball, daughter of Frank C. Ball, millionaire glass manufacturer, here. The couple will live in Dallas, Texas.

U. S. REPORT SHOWS STATE CROPS GOOD

Indianapolis.—A report on the condition of Indiana crops on May 1 was issued by Miner Justin, agricultural statistician of the United States Department of Agriculture, co-operating with Purdue university. The report in part follows:

The condition of winter wheat in Indiana was reported as 74 per cent of normal on the 1,941,000 acres remaining for harvest, indicating a production of 26,284,000 bushels. The quantity harvested last year was 31,305,000 bushels.

In some of the east central counties fully half the wheat has been put into other crops. In the more important wheat districts winter damage was much less severe, so that for the state as a whole only 14 per cent of the area sown last fall has been abandoned.

There are 278,000 acres of rye left for harvest with a condition of 86 per cent. The indicated production is 3,682,000 bushels.

Not since 1915 has spring plowing been so far advanced. It is 85 per cent completed compared with 57 per cent last year and an average of 61. Sowing and planting are correspondingly well advanced, being 62 per cent completed. Last year the figure was 47 and the ten-year average is 45.

The condition of live stock is reported slightly below the average but above last year.

The supply of farm labor is reported 98 per cent normal as against 75 per cent last year. The demand is also higher, being 91 per cent now compared with 86 per cent last year. The ratio of supply to demand is now 102 per cent. In 1924 it was 87 per cent.

Kokomo.—Asserting that no more beautiful and fitting thing could be done than the commemoration of the 100th anniversity of the visit of the Marquis de Lafayette to Indiana by planting a tree, Gov. Ed Jackson paid a tribute to the memory of the French nobleman in an address in connection with exercises held in Foster park when the local chapter of the Daughters of the American Revolution planted a tree and inscribed an Indiana boulder to commemorate the visit of Lafayette to Indiana in May, 1825.

Michigan City.—Flying an English flag, the steamship Agga steamed into Michigan City with her second cargo consigned to Indiana's seaport. Loaded with English clay consigned to the paper mills of the Kalamazoo Valley, she left Fowey, England, April 9 and due to ice floes in the St. Lawrence gulf, was delayed a full week, thereby losing the prize of a gold headed cane offered by the mayor of Montreal to the captain of the first vessel opening transatlantic spring navigation.

Lafayette.—Prof. H. E. Enders, head of the general biology department of the Purdue university, will leave Lafayette in a few weeks to join a party of scientists which will pass the summer in the jungles of southern British Guiana, South America, studying jungle maladies. The party expects to sail from New York on June 9.

Brookville.—Word was received by Jacob W. Joliff, sheriff, that Jesse Dielks and Geneva Debeck, fourteen years old, had been apprehended and were being held at Mt. Vernon. Dielks is charged with kidnaping the Debeck girl, and at the same time an automobile belonging to Weber & Zipp disappeared.

Gary.—There was need for a cashier instead of a bailiff in Gary City court as Judge C. M. Greenlee doled out fines totaling $1,530 to a group of forty defendants who faced him. The docket, the longest in months, was crowded with violators of the new state liquor law, who received $40 fines for their waywardness.

Bicknell.—All of the mines in the vicinity of Bicknell which have been operated on a co-operative basis were closed despite a temporary order issued at Indianapolis in United States District court restraining United Mine Workers' officials from carrying out their ultimatum to union members against working in such mines.

Indianapolis.—The state board of tax commissioners disapproved bond issues totaling $344,000 for construction of four hard-surface roads in Marion county.

Warsaw.—Winona hotel, at Winona Lake, which was partly destroyed by fire will be rebuilt immediately, it was announced. The damage is estimated at about $25,000.

Hammond.—While on his way to work at the Buffington cement plant, Walter Karasinski, Indiana Harbor, was killed when run down by a cement truck.

Plainfield.—Hadley Hornaday, age eighty-three, died unexpectedly at his home here. Death was thought to be due to paralysis. Mr. Hornaday was a Civil war veteran, having been a member of the Thirteenth regiment, Indiana volunteers, and served for three years. He knew Abraham Lincoln personally.

Fort Wayne.—Kokomo was named as the place for the 1926 meeting of the Indiana conference of the Congregational church at its session being held at the Plymouth Congregational church here

Scraps of Humor

NEW SLANG

The young salesman placed his sample case on the porch and began genially:

"How do you do? I should like to introduce to you our new corn razor."

"You needn't waste your time," replied the farmer sharply, "an' what's more, young fellow, that smart city slang won't get you ner far in these parts. The next farm you stop at you'd better call a scythe a scythe."—Forbes Magazine.

PROOF OF PERVERSITY

"Reports say the rye crop is the best ever."

"Well, doesn't that just show the perversity of nature—when it can only be used for bread?"

Passing Contract

Position in affairs of state
May oft prove brief though breezy.
The salary isn't overgreat
And the resignation's easy.

Dangling for Some Time

Mr. Langley—Ah, they have just dropped their anchor!

Mrs. Langley—Dear me! I was afraid they would. It's been dangling outside for some time!

Embarrassing

"Why did you give up pipe-organ lessons?"

"I felt so blooming childish, playing with my feet."—From the Stanford Chaparral.

ONE TRUE MAN

She—I don't believe there was ever a man true to a woman.

He—How about Adam?

May Die of Joy

"If ignorance is bliss," said Black To White, "well, then, my boy, You'd better get your life insured; Since you may die of joy."

A Natural Inquiry

"Do you sell motor cars, hams, snow shovels, church bells and the like?" asked J. Fuller Gloom, the human hyena.

"No, sir, we fill prescriptions, and —" replied the salesman.

"Then, why in the name of the bird with the broad and sweeping wings do you call this a drug store?"

Both Thick

A clerk in London, whose strong points were malingering and stupidity, thought he could use the fog as an excuse for his absence. So he sent a note to the office: "Too thick; can't come today."

Promptly the reply came from the boss: "Too dense; don't come at all."

For Her Head

Dumb Dora—Last week he sent me a box of candy with a card reading, "Sweets to the Sweet."

Active Agnes—That was a pretty sentiment.

Dumb Dora—Yes, but this week he sent me an ivory hair brush.—Times of Cuba.

The Proper Procedure

Fred—A philosopher once said the only way to cure yourself of a love affair is to run away. Do you believe it?

Flora—Certainly, if you run away with the girl.

It Depended

Hewitt—What is that new structure you have put up there?

Doolit—Well, if I get a tenant for it, it's a bungalow. If I don't, it's a [illegible]

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© by Western Newspaper Union.)

MAKING MILK SAFE

MILK is a perfect food, especially for the young. Unfortunately, the very qualities which make it so also make it a perfect medium on which to grow disease germs. The cow, either through natural susceptibility or centuries of domestication and breeding, is unusually susceptible to a number of human diseases, especially tuberculosis; also diarrhea, sore throat, diphtheria, typhoid and scarlet fever. So the same qualities which make milk an unequaled food when it is pure, also make it a serious danger when it is not pure.

The whole problem in the milk question is how to produce and deliver safe milk to the consumer. This can no longer be left to the individual producer. If the dairyman himself wants to take a chance on the purity of his milk, that may be his own affair, but when he sells it to others, then the authorities, either city, county or state, demand that he must sell only milk that will not cause disease among his customers.

There are two kinds of milk sold—raw milk and pasteurized milk. If raw milk is to be pure, it must be taken from healthy cows, in clean barns, by clean milkmen, put into clean bottles or cans and delivered to the consumer without any danger of becoming contaminated on the way. This means that the cows must be tuberculin tested, that the surroundings must be clean, that the milkers must be tested to rule out human carriers and that the manner of handling the milk at every stage must be free from any danger of infection. Such milk is called certified milk, because its purity is certified to by some responsible body, usually the local health authorities or milk commission.

Milk which is not produced under such conditions as to insure its purity is made safe by pasteurization. This means that it is heated to a temperature of not less than 145 degrees F. or more than 148 degrees F. for not less than thirty minutes. This is enough to destroy all the disease germs present, without actually cooking the milk. While pasteurizing milk in quantities in dairies requires special apparatus, it can easily be done at home by using a double boiler and regulating the temperature.

Although these conditions are now enforced in most large cities, in the smaller towns and country districts milk is still generally used raw and with few precautions. This accounts for the fact that tubercular glands, especially of the neck, are about as common among country children as ever, although this condition has practically disappeared among city children, even in the slums.

Raw milk is dangerous, unless given by tuberculin-tested cows under carefully supervised conditions. All milk especially for children, should be pasteurized before using.

VENTILATION

EVERY one must have air to breathe in order to live. We can live without food for from twenty to forty days, without water from seven to eight days, but we cannot live three minutes without air.

In order to be well, we must not only have air but it must be reasonably pure, sufficiently moist and cool. Under ordinary conditions, we get all these things outdoors and don't have to bother about them. It's when we go indoors that the trouble begins.

So long as primitive man lived outdoors he had no ventilation problem. As soon as he built his first house, he had to think about ventilation. Although the first houses were probably so loosely and imperfectly built that it wasn't much of a problem.

But we live today in weather-tight, water-tight and almost air-tight houses. As soon as we go into a house, be it residence, store, office or workshop, we find ourselves in a limited supply of air, which we at once begin to pollute by our own breathing. With each breath we are taking oxygen out of the air and putting carbon dioxide into it. The smaller the space and the more people, the faster the process goes on.

Oxygen is one-fifth of the air. With each breath we draw into our lungs we absorb one-half the oxygen in each lung full and breathe out the other half.

A man weighing 100 pounds needs 2,400 cubic feet of fresh air every hour if he is resting, 3,200 an hour if he is doing light work and 6,100 an hour if doing heavy work. A woman weighing 120 pounds needs five-sixths as much and a child weighing 80 pounds needs seven-twelfths as much.

Although many costly and elaborate ventilating devices have been made, the easiest, simplest and best way to get fresh air into a room is to open a window. A screen or a glass or wooden strip in front of the opening will prevent direct draft and throw the cold air up to the ceiling.

Have plenty of fresh air in your workrooms and living rooms. It doesn't cost anything and it's the best tonic you can take.

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

Slats' Diary
By Ross Farquahr

Friday—well we all had a good laff in skool today. The teecher had went and put up the windows so we cud have plenty of fresh air. and then wile she went out of the room for a few minits why Blisters went and put them all down a en and when she cums back she wanted to no who put them down and Blisters sed he done it and she sed why we gotta have fresh air and Blisters sed. Well the wind was a blowing so hard at it blowed all the fresh air outta the window.

Saterday—Me and ma went a shopping up to the city today and we had are dinner in a reglar resterant where they have waiters and everything. and the yung lady whom waited on are table ast what was we haveing and I ast her did they serve hard boiled eggs there And she sed, Aw don't get so stuck on yure self.

Sunday—They was a yung lady here witch has a country home out in the country and she was a saying she all ways bathed in the spring. Pa was wandering after she had went wether she was tawking about WHERE she took her bath or WHEN she took it.

Monday—We got are papers on rithmetick today and I got a Zero I new that mite cause hard feelings at home so I went to the teecher and sed. I dont think I disserved a Zero on this Test. And she replyed and sed. Well I dont hardly think so neither, but that is the Lowest mark I am suppose to give out.

Tuesday—Ant Emmy sed Mrs. Hives family must be very musicle She says her sister is a pianoist & her son is a sosialist and her husbend is a Pessomist.

Wensday—I gess the boss down at the noosepaper where pa wirks is very absent minded. His wife calls up today and sed there little girl had swallered the ink and what shud she ought to do. and he sed Why I gess yule half to rite with a led pencil I spose.

Thirsday—went to a wedding with ma and pa tonite and Ant Emmy. Ant Emmy kep tawking afterwords about the Blushing bride. And pa sed. She wassent Blushing. She was just all Xcited becuz she had win out at last.

LOCAL ITEMS.

Earl Coburn visited his parents, Mr. and Mrs. Calvin Coburn at Hicksville, Tuesday forenoon.

A change of 53 degrees i tem perature from Saturday afternoon to Sunday, was really noticeable. Fruit and vegetables show signs of being ruined. Ice a half inch thick was frozen Monday morning.

Sunday School Report.

The following is a true and correct report of the various Sunday Schools in this neighborhood for last Sunday.

M. P	39	2 48
Christian	112	6 81
M. E. Spencer	67	3 95
Lutheran	58	3 17
Concord	46	2 55
Coburntown	47	.

Fred Hart is remodeling the barn on his farm east of here and is putting on a new hip roof

Sherman Wolff and wife spent Tuesday with the former's sister, Mrs. Mitch Hanes and husband.

Will Olds and wife of near Lagrange, were Friday visitors in the Bishop home and doing some work at the cemete y.

S. S. Widney visited from Saturday until Wednesday with Marion Smith and family at Auburn.

In organizing a Boy Scout troop in the Auburn M E Sunday School Arthur Hardy and Wm. Quance have been chosen as Scout Masters

Wayne Mounts and friend and the Misses Chorpening and Harris of Garrett, spent Sunday evening with Sherman Wolff and wife.

Mr. and Mrs. George Christie of Evansport, Ohio, Will Blaker and wife of Butler, Everett Mavis and family of Auburn and Mrs. Jennie Sechler, were Sunday dinner guests of Merritt Sechler.

Correct Styles in Summer Hats at Warner's Hat Shop Friday and Saturday for one dollar.

A. C. Wolff, editor of Ashley News, left his family and business last week without serving notice to either, and according to a note he sent his wife, he will not return to either. He has a family of four children. Why he left is not known. This is an unusual happening among the craft.

Nixie! Nixie! What is a Nixie? It is a piece of mail so incorrectly or incompletely addressed, or so improperly prepared that it can not be delivered or returned without special treatment and it goes to —— The post office hospital for an operation. It differs from a dead letter in that a dead letter, parcel, or circular can neither be delivered nor returned, and goes to the post office morgue for burial.

Mrs. Alice Hart will entertain the Coburn's Corners Ladies Aid Thursday afternoon.

The R. H. C. held a May Day meeting at the home of Mrs. Winifred Hart, Thursday afternoon, at which time nine members besides Lizzie Hart, Mrs. Alice Hart and Mrs. Elmer Volkert were present. The following girls dressed as woodland fairies served a delicious lunch, Vivian Mason, Lenore Laub, Alice Virginia Hart and Betty Jane McClellan. The favors were tiny May baskets trimmed with sweet peas. Each member came dressed as a little girl and at response to roll call each spoke a recitation remembered from childhood. Mrs. Gladys Hart will be the hostess in two weeks at which time election of officers will be held to serve the coming six months.

Congressman David Hogg maintains offices both in Washington and Fort Wayne. At Washington the office of the twelfth district is suite 152, House Office building, the capitol. He occupies this suite with Congressman Albert Vestal, the whip and an outstanding leader of the house of representatives. At Fort Wayne, Mr. Hogg continues to maintain his office with attornev George H. Leonard, republican county chairman, at suite 317-320 Tri State building.

Two secretaries are assisting Mr. Hogg in looking after the miscellaneous duties of his office. Many requests are taken care of every day. These requests have to do with all departments of government at Washington.

Congressman Hogg is making an intensive study of the work of the officers and agents of the federal government with the view of limiting duplications and unnecessary expense. He is also collecting all available facts concerning non-taxable bonds and co-operative marketing.

One $ Hats in all colors on Friday and Saturday. Warners Hat Shop.

Mrs. Rose Meese left this week for Davenport, Iowa, where she will visit for some time with her son, Don Johnson and family.

Merritt Hull is in Grand Rapids Burleson sanitarium where he had a minor operation, Tuesday. He will be there two or three weeks. J. C. Hull returned home Tuesday.

Mrs. Wilmot Coburn and son, Kenneth, drove to Pierceton Sunday. The latter returning the same day while Mrs. Coburn remained to visit until Thursday with her daughter, Mrs Glen Shafer and family.

The drinking fountain is a great disappointment to the traveling public. Hardly a day passes but what several strangers are fooled. This ought to be fixed right and kept in repair or change the style of the thing.

John Barger and Harvey Kimes left Monday morning, driving to Waynesboro, Pa. Mr. Kimes will make an extended visit with his daughter, Mrs. Pluma Houser and family. John will return by Sunday.

Lutheran Notes

Sunday School 9:30.

Prayermeeting Thursday evening.

Sermon by the pastor in the evening at 7:30. Subject: "Be sure your sins will find you out."

S. D. Steffey, Pastor.

Christian Church Notes

Mrs. Cora Steward and daughter Mrs. Roscoe Walter and children of Spencerville and Sadie Conroy of Fort Wayne, were Monday visitors of Minnie Thompson

$ Day at Warner's Hat Shop Friday and Saturday.

Food Depends on Monsoons

In India, the greater part of the Bombay presidency, including Sinds, depends for its food supply upon the southwest monsoons that happily invade that part of the country at regular intervals. In years of defective or irregular monsoons these areas are liable to the dreaded recurrence of the "India famine," when the shortage of food supply is felt by animals as well as human beings.

SPORTING GOSSIP

Circumnavigating the globe by areoplane and doing two miles a minute via auto are all modern happenings, but when the high school base ball team wins a ball game, its a mishap. However, the inevitable happened when they trounced the age-old Alumni to the tune of 25-2 on the high school battle-ground.

Many an Alumnus catered for the "booby" prize but was hard to discern who won this coveted price. "Doc" Havens and Maxwell should thank us for enduring the full period of this onslaught. We also wish to extend our sympathy to Mr. Sechler, (the only rival of the famed Heins) for entertaining with his slippery descents. He wins a can of Dill Pickles, all warts included. And a good time was had by all.

One who was there. P. E. C.

To Those Who Died

"The Dawn of Glory," by Pietro Montana, a monument at Highland park, as a tribute to those who served in the World war. This beautiful creation, full of virility, is the third monument to be erected in Brooklyn by the same sculptor.

How swiftly we forget the bitter past—
The past of other men—that past we swore
We would revere and honor evermore!

A little dust of years has blown between
Our smug, safe lives and all that din of war—
And we forget already, as stocks soar . . .

Forget the price they paid, those gallant boys
Who left their shining youth on sodden fields;
Drab men, now, scattered through the rank and file
Of common drudgeries; plain men, who earn
Their daily bread by dull prosaic tasks
As though they'd never heard the screaming shell,
Or known the feel of filth, the foul trench smell . . .

Such silent men they are today, yet kind,
Who listen absently while babblers like myself
Discourse on beauty, poetry—or pain;
The place it holds in art all unaware
That in the chair across the hearth there broods
Not merely what one sees, a grave young man,
But still, incarnate, deathless Memory!

The memory of ugliness, of filth,
Of biting cold, and ruthless naked Fear—
That Fear which crouches, grinning, by one's bed,
And poises, waiting, through the long dull day
Like some foul, taloned, patient bird of prey.

We have forgotten, we who did not go,
What War must mean—not merely death, for death
All men must face each day, not unafraid
But callous: death is not the worst, though we
Prefer our tidy life, cream in our tea!

The ill they fear is just remembering . . .
The way foul recollection shifts and drifts
Not only from gray ash of old despairs
But from gay gardens in the summer dusk,
From glowing flames upon the winter hearth,
Or in the arms of love . . . They never know
What moment the d—d Thing may coil and spring!
So War endures to mean remembering . . .

—New York Times.

All Worthy of Tribute

As we lay our tributes of gratitude and devotion upon the graves of those who gave their all, let there be no distinction made between them. Let us honor equally those who, as President Coolidge so aptly and so beautifully phrased it at a Confederate memorial service, "those who made their sacrifice in one way, and those who made their sacrifice in another way."

It is sufficient to know that all were Americans and believed in America, and that "America claims them all; her flag floats above them and they all rest in the same divine peace."—Houston Post.

Obituary

Charles Alfred Scott, the sixth and youngest child of Alfred and Rhoda Scott, was born in Spencerville, Indiana, March 31, 1866, and departed this life May 10, 1925, aged 59 years, 1 month and 10 days.

Charlie has lived his entire life in this community and was well known by all. He never was strong and has suffered a great deal more than others ever knew for he patiently plodded on and bore his sufferings in silence.

He was married to Dellie Ruppert in May 1905 and to them were born two children: Nellie Fern, who died March 31, 1917 at the age of 11 years; and Maurice Glenn age 5 in June, is now the only surviving member of the family.

Mrs. Scott died on the 12th day of last September and since then Charlie has lived and planned only for Maurice.

Besides the son, there remain two brothers: William and John of Auburn, Indiana and three sisters: Mrs. Nancy Chaney and Mrs. Jennie Chaney both of Spencerville, Indiana and Mrs. Mattie Cope of Angola, Indiana.

In 1909 under the ministry of Rev. D. A. J. Brown, Charlie was converted to Jesus Christ and lived and died in the faith He was also a member of the Knights of Pythias of Spencerville.

When the heart is full of pleasure,
And the soul is full of peace.
We may taste life's sweetest treasure
And may bid all sorrow cease.

When our lives are full of gladness.
And our minds are full of love,
Grief seems like a kind of madness,
That our hearts could never move.

But how quick a change comes o'er us
When we meet a real grief!
How life's beauties fade before us,
As we vainly seek relief!

How our hearts fill up with sadness,
And our souls are filled with woe,
When our minds are full of madness
And our reason totters so!

See the widow, in her sorrow,
When she finds herself alone,
While today but paints to-morrow—
Reaping grief where joy was sown.

See the orphan, lone and dreary,
None to comfort or improve,
While the days drag by so dreary,
With no one to kiss and love.

We should strive to give some pleasure
To each sadly stricken one.
While our happiness we treasure
And our joy remains our own.

We should strive to make some gladness
For these lonesome ones of grief,
Hoping thus to cheer their sadness,
And to give their heart relief.

Card Of Thanks

Our thanks is hereby expressed for the kindness of friends and neighbors shown in the death of our brother.

Mr. and Mrs. Milton Chaney
Mr. and Mrs. Reson Chaney.

NEWS OF THE TOWN

Congressman Hogg, of Fort Wayne, and Miss Mildred Sellers, of Steuben county, were married last Wednesday afternoon at the residence of Rev. John R Gunn pastor of the First Baptist church of Fort Wayne. The bride is well known in this vicinity, her father being a prominent farmer living north of Angola. She is a graduate of the Angola high school and Ohio Northern university at Ada, Ohio, and is a young woman of unusual attainments and a charming personality Congressman Hogg represents the Twelfth district of Indiana in the lower house of congress and is a practicing attorney by profession.

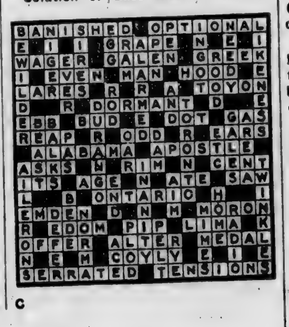
The solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Salt Used by Mankind From Earliest Times

Salt has been used in all ages and all civilizations. Some of the oldest of trade routes came into use for the traffic in salt. It was probably first used as an ailment when man was in transition from the nomadic stage to the settled, agricultural life.

The Indians, though no such salt users as the civilized races, felt the need for it as all animals do and obtained it, like the wild beasts, at the licks and salt springs found in many places. In the coastal regions they usually got it from the sinks and ponds of the tide lands.

The first salt works of the white settlers of Ohio was established in 1798 at an Indian source of salt, the springs on the banks of Salt creek, a tributary of the Scioto river, in Jackson county. The settlers, to increase the supply, sank wells to a depth of 50 feet, and for many years the fires burned beneath the salt kettles at this location. These salt springs had been indicated on maps as early as 1755, and before the settlement of the region the Indians used to come from long distances to make salt there. Daniel Boone, as an Indian prisoner, spent some time at the salt works.

Youngster Set Value on His First Ticket

It was Paul's first ride on the railroad with a ticket of his own. True, it was only a half-fare ticket, but it was an honest-to-goodness ticket nevertheless.

Mother wanted to put it in her pocketbook along with hers, but Paul would not hear of it. He clutched it tightly in his hand and sat up very straight, as becoming one of so much importance.

The conductor came along soon.

"Ticket," he said, holding out his hand toward Paul.

Paul just looked at him in pained surprise.

"Ticket, there, sonny," the conductor insisted.

"No, sir," Paul spoke up. "If you want a ticket go buy you one where I got this. This one's my very own!"

Rembrandt's "Model"

Rembrandt used his father's mill as a studio, and the light came down from a little window in the mill falling on the easel in just such a golden shaft as often is seen in his pictures.

Word for the Cyclone

About the only good thing that can be said about a cyclone is that it doesn't cost the taxpayers anything for an investigation as to who was to blame.—Des Moines Register.

Story of Mary's Lamb Brought Up to Date

Mary was the proprietress of a diminutive incipient sheep,

Whose outer covering was as devoid of coloring as congealed atmospheric vapor,

And to all localities to which Mary perambulated,

The young Southdown was sure to follow.

It tagged to the dispensary of learning,

One diurnal section of time—

Which was contrary to all precedent— And excited the cacchination of the seminary attendants,

When they perceived the juvenile mutton at the establishment of learning.

Consequently, the perceptor expelled him from the interior,

Which precipitated Mary into a lachrymose condition,

But he continued to remain in the immediate vicinity without fretfulness

Until Mary once more became visible.—Judge.

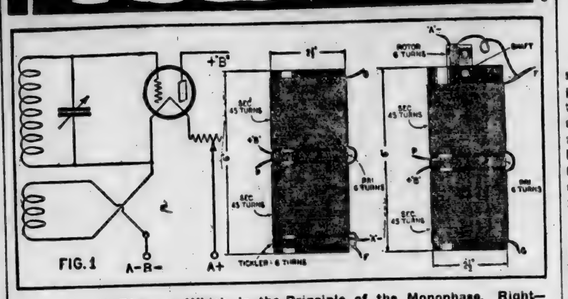
Rush for Home Sites

When Oklahoma was thrown open to white settlers after the federal government had purchased it from the Creek Indians in 1889, it is estimated that 100,000 persons took part in the rush for claims.

Those Balloon-Tired Glims

Negro Cook (asked by his mistress if she thought Bobby's spectacles becoming)—Yes'm, I think they becomes him all right. 'Course I does think they makes his face look kinda crowded.

RADIO



Left—Circuit Diagram Which Is the Principle of the Monophase. Right—Details of Radio Frequency Coupling Transformers.

All things considered, ease of control, simplicity of construction, selectivity and range of reception the five-tube tuned radio frequency set is the most efficient hook-up that has been developed. The one stumbling block has been the proper means of controlling the oscillating characteristics of the tube. Several means of doing this have been devised, most of them effective, but all had their drawbacks. The monophase, recently described in the Radio News and tested out in that publication's laboratories, seems to be one of the best circuits yet offered.

The following description of this set is taken from the Radio News:

It is well known that when several stages of radio frequency amplification are employed in radio receivers there is a tendency for self-oscillation to occur in the circuits. This is due to the feeding back of radio frequency energy from the plate circuit of a tube to the grid circuit of any other tube, or to its own grid circuit.

The Feed-Back.

There are, in general, three ways of preventing this feed-back; viz., the introduction of resistance into the oscillatory circuits, neutralization of the tube capacity or magnetic coupling, introduction into the circuits of electromotive forces which have a polarity (or phase) opposed to that of the incoming signals.

The last method is that employed in the superdyne receiver and is also the method which has been employed in this receiver. There is a difference, however, in the way in which the circuit stability is accomplished, for in the superdyne this so-called "negative feed-back" is accomplished by coupling a coil in the plate circuit of a stage to a coil in the grid circuit, whereas, in the monophase system the coupling is between a coil in the filament circuit and the one in the grid circuit.

The fundamental circuit diagram is shown in Fig. 1. Here the common terminal (the negative filament connection) is broken and the feed-back coil connected across the break. The polarity of the feed-back coil is to be made such that it will prevent self-oscillation.

Fig. 2 shows the complete wiring diagram of the set. Three such feed-back coils are used, one for each stage of radio frequency amplification and one for the detector circuit. One might think that by using so many adjustable parts, the operation of the set would become very complicated. Such is not the case, however, for it will be found that two of the feed-back coils can be left untouched once they are adjusted, so that the number of tuning controls in the set is reduced to the three condenser dials and one dial for adjusting the first feed-back coil or compensator.

The idea is that the second stage of R.F. amplification is adjusted on the long waves, so that, as the feed increases with the short waves, there will be less tendency for oscillations. That is, the set is tuned in on the longest wave it is desired to receive, say 600 meters, and the second and third compensating coils adjusted carefully to the point at which howling just ceases. After this, they can be left alone, for on all wave-lengths shorter than this there will be less tendency for self-oscillation to occur, on account of the increased negative feed-back on the shorter wave-lengths.

The Amplification.

The amplification in these stages will always be high, however; in fact, it will be very close to the amplification obtainable at the critical point, for exceedingly small adjustment of the compensators is necessary to start or stop oscillations. After the second and third compensators are properly adjusted they are to be left alone and the circuits can be brought up to the critical point by manipulating the first compensator alone.

There is an interesting point in connection with the placing of the feed-back coils which deals with their position with respect to the secondaries of the tuning units. It will be noted in this circuit that the compensator is placed at that end of the secondary coil which is connected to the filament. There is a very good reason for this, it being that the controlling is done at the low potential end of the coil, and the adjustment of the compensators will not be so critical.

This is contrary to the general practice of placing ticklers at the grid end of the coil, but this latter is done in cases where it is desired to increase the regeneration by tightening the coupling. Again, it must be remembered that the third winding is not similar to the reversed tickler in the superdyne, but it does create a bucking E.M.F., which acts against the oscillating circuit and produces a tendency toward damping. It will be remembered, too, that the coupling must be loosened in this circuit to increase the regeneration. It is at once evident that we are not trying to increase regeneration. The only regeneration that will exist in the receiver is that which it inherently possesses due to the natural tendencies of radio-frequency amplifiers.

Constructional.

The first step in assembling this receiver is to procure the best of the necessary materials. A 25-by 26-inch panel and a 7 by 24-inch baseboard are fastened together in the customary manner, after the panel is drilled with the necessary holes.

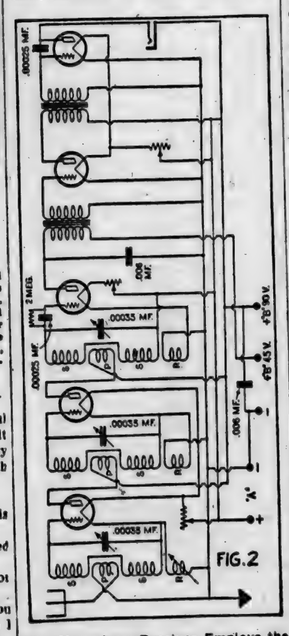
The construction of the radio frequency transformers is not a difficult one. Three bakelite or hard rubber tubes 2½ inches in diameter and 6 inches long are required. There are wound 45 turns of No. 22 D.C.C. wire. A 6-turn winding of the same size wire composes a primary winding ⅛ of an inch from the first winding. The secondary winding is then continued for another 45 turns. The compensating coil is next placed on the tubing and consists of six turns of wire wound in the opposite direction to that of the other windings. Two small brackets are used to fasten the radio-frequency transformers to the baseboard.

The above description pertains to two of the transformers, the third being slightly different in that the compensating coil, instead of being wound on the tube itself, is placed on a small rotor at one end of the tube. This rotor is a piece of bakelite tubing two inches in diameter and one inch long, at one end of which is placed the six-turn winding. It is not necessary that the wire be wound in any specific direction, since the coil can be readily turned through 180 degrees and thus change its polarity.

The wiring of the receiver is not very difficult, since there are no set rules, except that careful work brings good results. In case trouble is experienced from the beginning, the connections to the compensating coils should be reversed one at a time until the undesirable oscillations are eliminated. It will be found advisable to place two by-pass condensers across the "B" battery and also to use a .00025 mfd. condenser between the grid and plate terminals of the last audio-frequency amplifier tube.

As regards the selectivity of the set, it is safe to say that it surpasses the majority of those on the market today. In sensitivity, too, due to the exacting values of the apparatus used and the correct engineering principles involved, the receiver stands as a big step in the development of tuned radio frequency sets.

As will be noted, the coils are fully 6½ inches apart, reducing to a minimum the tendency towards inter-stage coupling with resultant oscillations. Two stages of audio-frequency amplification will be found to give more than sufficient volume, it being necessary to incorporate a by-pass condenser across the grid and plate terminals of the last tube.



The Monophase Receiver Employs the Above Wiring Diagram.

Condensers Have Ohmic Resistance

Important to Minimize Opposing Forces as Much as Possible.

Page after page has been written about variable condensers and their good and bad points. As this article by William J. Schnell, radio research department, the Reichmann company deals with selectivity and its causes, it has to include the resistance encountered in condensers, which like that encountered in inductances, also affect the selectivity of the circuits.

Condensers can have ohmic resistance of sufficient value to seriously affect their reactance resistance ratio. This ohmic resistance is often caused by imperfect or high resistance contact between the movable member of the condenser and its terminals. This resistance being in series with the condenser, it is important to minimize it as much as possible. This is done by insuring perfect wiping contact, or by pigtailing this connection. The latter in some designs of variable condensers, and particularly at the lower wave lengths, is not always desirable, as this pigtail usually is of a sufficient length to introduce a small amount of inductance. When the pigtail is moved it sometimes short circuits its own inductance, producing detuning and disturbing effects in the receiver operation.

Next is the most important resistance or loss encountered in condensers, and that is that equivalent series resistance caused by dielectric loss. This is governed by the dielectric inductivity of the dielectric, voltage gradient through the dielectric, if branched, and the amount of dielectric material between the condenser terminals. The resistance can be minimized by using as good a dielectric as possible; reducing the voltage across the dielectric to a minimum by having the dielectric in branches, or in a series with each other at the point of separation; and reducing the amount of dielectric and making the space between terminals as great as possible so as to have a long narrow insulator in the condenser field.

There is also resistance added to condensers by having them coupled to other capacities or to the static fields of inductances. Both of these will cause an absorption of energy, which increases the resistance.

Fundamentally this covers the causes and factors controlling the resistance in inductances and capacities. It ought not to be necessary to state here, that inductances for radio purposes, whether transformers, couplers, or any other form of combination of radio inductances having a low resistance ratio, or as is commonly stated low loss, are not to be had in the five and ten cent store. The same applies to good condensers, of course.

So far, we have considered those factors which contribute to the selectivity or lack of selectivity in the elements of the circuit or circuit constants. Let us now consider how various conditions in the circuit will affect the circuit reactance resistance ratio and therefore the selectivity. The principal contributions to circuit resistance are due to design. Many circuits are actually used where extremely high resistance is inserted in the grid circuit of the tube to control oscillation. These sometimes vary from small inductive devices having an ohmic resistance of several hundred ohms to improper location of grid resistance for biasing detector tubes.

Some so called "super" or "dyne" circuits show high resistance in tuning parts of the circuit. These reduce the selectivity. It is, therefore, advisable to question circuits showing high resistance in the resonant or radio frequency circuits. Regardless of how low loss the tuning units of a circuit may be, if circuits like the foregoing are used the benefit of the low reactance resistance ratio of these units will be offset, and loss of selectivity encountered.

Generally, selectivity increases directly with the number of tuned branches in a circuit. It also increases with looseness of coupling in the coupling of the circuit branches up to a certain point. In radio frequency amplifiers, for instance, the selectivity increases with the number of stages tuned and also with the looseness of coupling in these circuits.

When Soldering Iron Is Too Large to Reach

Have you ever, while wiring a set, found that your soldering iron was 1-16 of an inch too large to get into some corner? Instead of tearing the set apart next time, just allow the soldering iron to cool off and wrap a piece of bus bar around it. It will do the trick very nicely. If there are a number of such places in your set, procure a large cork and insert about three inches of bus bar in it. This will serve as a soldering iron, the only disadvantage being that it will not stay hot very long.—Radio News.

Easy Way to Solder Hard-to-Reach Joints, Using Bus-Wire.

GET FEELING WELL AGAIN

From Mother Nature's storehouse we have gathered the roots, barks and herbs which are compounded, under the famous Tanlac formula, to make Tanlac. This great tonic and builder has brought health and strength to millions.

If your body is weak and undernourished, if you can't sleep or eat, have stomach trouble or burning rheumatism, just you see how quickly Tanlac can help you back to health and strength.

Most people notice a big change for the better after the very first bottle. They have better appetites and more pep. The sparkle comes back to their dull eyes and color to their faded cheeks.

Don't delay taking Tanlac another precious day. Stop at your druggist's now and get a bottle of this, the greatest of all tonics.

Take Tanlac Vegetable Pills for Constipation

TANLAC
FOR YOUR HEALTH

Rookie Willing to Admit Fault

It was during the first month of the first officers' camp at Fort Harrison, when the rigor of discipline was being drilled into the embryo officers, that a local boy, trying with all his soul to "make good," found, much to his dismay, that he was standing for inspection with a button missing on his blouse, which all militarists know is a grave offense. The general was coming down the line, and as he came closer the young man determined to speak out, if questioned, and admit the fault.

With the certainty of long training, the stern general's eagle eye fell on the unbuttoned blouse, as is inevitable in such circumstances.

"Have you no button there?" he asked.

"No," quickly answered the ready neophyte.

"No what?" sharply corrected the officer.

"No button," almost shouted the young man in his eagerness and excitement of the moment.—Indianapolis News.

Red Cross Ball Blue should be used in every home. It makes clothes white as snow and never injures the fabric. All good grocers.—Advertisement.

Movie Attendance

It has been estimated that about one-fifth of the population of the United States attends the movies each day. The amount of admissions in a single year totaled $900,000,000.—Washington Star.

LESSON FOR BOYS

THE boy or girl in school can honor Memorial Day by a quiet resolution to prove a patriot of peace. It is no mere figure of speech to assure the high school boy that peace can offer him as true a challenge as war offered to the doughboy going over the top. To see to it that a spirit of chivalry from boys toward girls marks our schoolhouse and our town; to keep the graduating class clean from jealous bickering politics; to insist on fair work in class and fair play everywhere—will not those opportunities for right dealing call out the soldier tone? Indeed they will! If every family caught the spirit of valiant living that marks Memorial Day, should not America witness a new generation of fearless patriots of peace?—Youth's Companion.

Memorial Day Observance

WHAT does "memorial" signify? The answer is, in memory of our dead or a day to decorate the graves of those we love and friends we respected, not forgetting our unknown soldier.

All nationalities and different religious denominations in churches and out in the open pay religious tribute to those who have departed to meet their Maker through the most fervent prayers, and the laying of flowers and flags on the graves of our dead is a most solemn duty accompanied by joy and tears—a joy on that day if we are in close proximity to those we loved and tears when our recollections of the past are so vividly fresh in our minds.

Memorial day is the one day in the year when the good and bad, the rich and poor, the haughty and humble, through their grief at the resting place of their beloved forget the difference of their stations in life, because here is the time and the place where only through the name on the tombstones is there any distinction.

Little children assist in decorating the graves of those they love—perhaps a schoolmate, sister or brother, mother or father. Of all times in their lives this is the most solemn, their faces plainly indicating their seriousness, proving that the heartaches of all vary but little.

All these most human labors of love for the departed ones take place in nearly every hamlet of this great nation. Also, the meaning of Memorial day reaches wherever our people may be—around the world from the most prosperous individual to the most willful whose liberty is curtailed to the confines of their place of incarceration, because the most hardened men and women have sincere recollections when thinking of their dead.

This is the day set aside by most states of our Union to forcibly bring to our minds that those whom we loved in life and our country's heroes should not be forgotten in their lonely surroundings.

A single flower of little value placed on a grave denotes thoughtfulness or a possible sacrifice by a humble sufferer. However, value does not count, but remembrance does. This is the real meaning of the word "memorial."

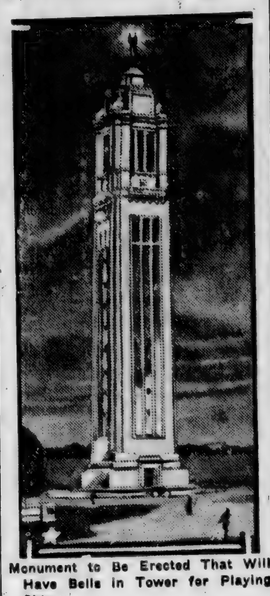
May 30 is a day when in the morning at least we should refrain from doing things that create too much jollification, as this is the time when many in an official capacity and otherwise are visiting the homes of our dead, performing a most sacred duty. A little serious thought on what the day represents would mean more reverence for our dead.—J. P. Brophy, in the Cleveland Plain Dealer.

Impressive Tribute

One of the most striking pieces of statuary on the famous battlefield of Gettysburg. It surmounts the monument erected to the One Hundred and Twenty-third New York Regiment on Culp's hill.

Chimes in Tower of World War Memorial

Beauty to eye and ear is embodied in a carillon tower designed as a memorial to the sacrifices and ideals of the American people during the World war. Containing 54 bells said to be able to produce 270 tones, the monument is to be erected in Washington by the National Carillon association at



Monument to Be Erected That Will Have Bells in Tower for Playing Chimes.

a cost of $3,000,000. Columns near the top of the tower will provide openings so that the chimes may be heard at a considerable distance. It is planned to have masters in carillon performance give concerts on the set at appropriate occasions.—Popular Mechanics Magazine.

Memorials Worthy of America's Great

Strikingly in contrast are the two memorials by the banks of the Potomac to two great American Presidents. The tall shaft which expresses the nation's tribute to George Washington is wholly different from the lower, square, temple-like memorial to Abraham Lincoln a short distance to the west. Each is a perfect example of its style. Each is a complete expression of the nation's thought.

The Washington obelisk rises high above all other structures in the capital. It is simple, pure and stately. It dominates the landscape. For many miles it is visible, the first mark of Washington, the city. It is of a form that in the ancient days was adopted to perpetuate the fame of the rulers of Egypt, a classic type, geometrically perfect, architecturally complete.

The Lincoln memorial could not have been effective if similar to its loftier neighbor. There could be no second tall shaft without lessening the significance of each.

Between Lincoln and Washington stretched a space of 64 years, from the end of the former's term to the beginning of the latter's, a little less than the space that has elapsed since Lincoln's death to this day. Thus in a way the Lincoln memorial marks the midpoint of the national career to the present from the first administration under the Constitution.

Other memorials will doubtless arise to the great men of the nation who have rendered valuable services, but none will be more eloquent than these two.

Day of Peace

On Memorial day the republic honors the memory of its heroes of three wars. Yet the day is distinctly a day of peace. We are grateful for peace, and we are grateful to the men who died to assure us peace with liberty and honor.

HIS DECORATION

By Gertrude West

The whole little village far and wide
was gleaning bloom for its honored dead,
With tears for those who had bled and died, but I—had only held.
The scent of the roses so wind-blown sweet went billowing by like God's caress,
And I saw a son and a mother meet—and ached with loneliness.
So my eyes were blurred till I could not see the wreath-bright crowd's advance,
Until one little flower girl ran to me—"Oh, buy a poppy for France," said she;
"For Flanders Field and France."
For France—and my face stung sharply hot,
This May day sweet with its blossom strewn
To be a soldier and be forgot—a few short years—so soon!
She looked up sweetly and said, "Don't grieve.
Perhaps you've your own cross Over There?"
I smiled and showed her my empty sleeve and said, "My cross I bear!"
And, "Alone!" she murmured. "Beneath the flag your blood was spilled to lift?"
Then she tore out the bloom from her hair at that
And thrust it into my ragged hat—
All day I wore her gift.
—Youth's Companion.

Hog Raiser Has Ups and Downs

Farmers Rarely Hit the Market Right With Their Supply of Porkers.

(Prepared by the United States Department of Agriculture.)

It is not news to the American farmer that the hog industry in this country, as far back as its history runs, has been of a cylindrical character. Every hog raiser knows that his business is plagued by violent ups and downs that mean loss to him, and extra expense to everyone that sells, buys, handles, stores or consumes pork products. So periodic are the movements of the hog cycle that economists can forecast them with something of the same confidence with which astronomers calculate the orbit of a comet or predict an eclipse.

What the farmer wants to know about the hog cycle is not so much how it works; he knows that to his cost. He wants to know what can be done about it. That is not such an idle question now as it might have seemed a few years ago. Studies made recently by the United States Department of Agriculture into the nature of hog cycles have brought out the positive declaration not only that the cycle can be eliminated, but that it can be eliminated by the American hog producer, without the co-operation of producers in any other part of the world.

Worth Studying.

On the face of it a proposition like that should be worth studying. With hog production swinging in a fairly regular alternation from over to underproduction, farmers practically never hit the market just right with their hogs. At one stage they have many hogs to sell and make but small profit or perhaps suffer a loss on them. At another stage they have but few hogs to sell, and this is always when hogs are bringing the highest prices. Any practical method of gauging hog production and marketing in such a way as to level out the peaks and depressions of the market would be as good as a gold mine to the American farmer.

The possibility of regulating the hog cycle, according to economists in the Department of Agriculture, lies in the fact that this country dominates the world's hog market. The United States has as many hogs as all Europe. American hog production contributes nearly two-thirds of the supply of hog products entering into international trade. It therefore dominates hog prices even though the market in which those prices are made is world-wide. Steadier production in this country, besides eliminating the wastes inseparable from uneven production, would tend to establish the hog industry on a stable basis in every country where it is functioning on a commercial scale.

Make Industry More Stable.

Economists in the Department of Agriculture believe that the hog industry could be made more stable if producers would drop their present method of gauging their production plans on the basis of current corn and hog prices, and instead base their breeding operations upon the official outlook statement issued periodically by the Department of Agriculture. That may look like an invitation to speculate. It is really a proposal that the speculative element, which is large in the hog business anyway, should be eliminated as far as possible.

The present alternation of overproduction and underproduction in the hog industry results from the farmer's practice of looking at the current market prices for corn and hogs when he has to decide how many sows to breed. This plan fails to allow for the time that must pass before the results of breeding decisions thus made will be felt in a larger or smaller movement of hogs to market. The number of hogs on the market at any given time is not adjusted to the price conditions then existing, because the amount of the supply was determined months previously on the conditions prevailing at that time. Here is where the hog cycle starts. Boosting production when prices are at their peak and cutting it down heavily when they are low means a hog supply nearly always too large of too small, since price conditions almost invariably change before changes in breeding policies have their effect in an increased or lessened supply of hogs.

If the farmer could know what prices will rule when the hogs from the sows they are breeding will be ready for market, they could better adjust the supply of hogs to the demand. They could diminish the ups and downs of production that are the bane of the hog industry. Economists in the Department of Agriculture have worked out a method of forecasting hog prices which has been thoroughly tested, and which makes it possible for the trend of the hog market to be foreseen far enough ahead and with enough general accuracy to give the farmers a better and safer basis for gauging production than they can ever get from watching the current markets.

Deep Soil for Orchard

Plant an orchard in deep soil on a high site. Avoid slopes too steep to get over easily with a spraying outfit. Plant clean healthy trees; you would not buy a diseased fruit tree? Choose a few varieties adapted to your section, then cultivate low-growing crops among them until they are of bearing age. Protect the trees from insects and from disease by spraying.

Spraying Potatoes Is Most Profitable

Bordeaux Mixture Properly Applied Is Best Plan.

Tests made each year on a series of from four to twenty plots of Irish potatoes during the past ten years show that it pays to spray this crop for most profitable yields.

During the years from 1916 to 1920, a series of six tests was conducted at various places in eastern Carolina on the early crop by Dr. R. W. Leiby, of the North Carolina experiment station staff. In this section the potatoes are hurried to maturity, being planted early and heavily fertilized. Here the most important factor is the potato beetle, though early blight occasionally attacks the vines and hills before the potatoes are ready to harvest. In each of the tests, certain rows were sprayed, some were dusted and others were left untreated as a check.

In checking his results, Doctor Leiby found that where the vines were sprayed with the poisoned bordeaux mixture the yield was at the rate of 144 bushels per acre. Where the vines were not so treated, the yield was only 70 bushels per acre. This is a gain from spraying of 74 bushels per acre. In dry seasons, Doctor Leiby also secured good results with dusting, using one part of lead arsenate to six parts of finishing lime.

Doctor Leiby says, "As a rule it is safest to use the poisoned bordeaux mixture at least in the last two applications, though the first application may be a dust. Our experience shows the grower should not spray sparingly, but must use enough material to cover all parts of the vine thoroughly. This will require from 100 to 125 gallons of liquid per acre. Any grower can secure the good results that we did if he will use a good bordeaux mixture and efficient spraying machinery."

Increased Consumption Seen in Milk and Cream

Consumption of milk and cream has been steadily increasing in the United States for a number of years, reports the Department of Agriculture, which estimates consumption at 52,772,000,000 pounds in 1924 compared with 50,440,000 pounds in 1923.

The larger part of the increase was in consumption of cream, and all of the increase was in cities inasmuch as consumption on farms was assumed to be the same as in 1923.

The increase, says the department, is due to improvement in quality of product, delivery in sanitary containers, and a general increase in knowledge of the value of milk in the diet, the result of milk campaigns and special advertising.

The average per capita consumption for the country as a whole last year was 54.75 gallons compared with 52 gallons in 1923. Daily average per capita consumption is estimated at 1.2 pints, being .951 of a pint in cities, and 1.47 pints on farms.

The figures are based upon reports from boards of health of 354 cities having an aggregate population of 35,303,398 people. The quantities of cream reported were converted into milk equivalent and added to the milk in securing the total used for household purposes.

Wheat Hay Not Favored for Feeding Dairy Cows

Wheat hay contains a little more digestible nutrients than oat hay. It contains more carbohydrates, hence is not quite so desirable for dairy cows and growing stock. A mixture of oat and wheat should make very fair horse hay. It would have about the same feeding value as timothy.

Any green crop should be cut for hay when the kernels are in the milk stage. It is not difficult to cure in good weather, but it is difficult to get such a crop put up without getting more or less dirt in it from the field, as these crops do not form a sod as do the permanent grasses, like timothy and bromus. Cure as you would timothy. A little more time is required.

Farm Hints

Every thistle cut this year means a lot less next year.

• • •

Uncle Ab says when dollars begin to get scarce is a good time to save 'em.

• • •

There are 33 times as many dairy cattle as beef cattle in New York state.

• • •

You like salt with your meals; try it on Tom and Nellie out in the horse stable.

• • •

A grease coating on plowshares and mold board comes off a great deal easier than a rust coating.

• • •

Put a spring-bottom can full of good machine oil on every wheeled implement that has a place to carry one.

• • •

Young chicks are killed by kindness when they are fed before 48 hours after hatching. Nature has provided that they live on the yolk of the egg during this time.

• • •

Perennial vegetables and small fruits may be profitably fertilized with a good dressing of stable manure. Be liberal with the application and cultivate it into the soil early in the spring.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

What to Write About

I HAD a letter from Walton this morning that seemed to me a good one. He is young, while I am past middle age, and yet, he assumes the liveliest interest in me and my affairs. Am I working hard, he asks. I usually do work too hard he thinks. Am I writing anything, and what is it about? When do I go on my vacation, and what part of the globe do I intend to visit during the summer? It is a sympathetic letter, which leaves me with the feeling that he is really giving me and my affairs more than ordinary consideration, and I am pleased.

Then he elicits my interest by telling me of his work, his love affairs, his plans for next year, and flatters me again by asking my advice relative to the difficulties in which he finds himself. His letter is natural, humorous, genuine. It is like talking to him to read it.

When people of approximately the same age and position in life write each other in friendly correspondence, their interests are likely to be similar, if not identical, but if the work in which they are engaged is different, procedure is more difficult. When I write to Henley, whom I knew as a boy on a farm, I cannot dwell much on educational matters. Henley has never even been to high school, though he writes a clever letter. He has been on a farm all his life, and he has not traveled far. But he has an interesting family, and he hunts, and enjoys sports of various sorts, and politics, and there is always the weather, and the state of his health, and the condition of the crops, to fall back upon. And I, too, if I am to interest him, must keep away from books and college administration, and the things about which he knows little. I must find a ground of mutual interest, as it is not difficult to do, if I am to write an interesting letter to him. His own particular business interests appeal to him most, and so I try to confine my remarks largely to these.

Children are interested most in adventure, in that which involves danger, and tests of courage. If I write to my young nephews during the summer, I know they will like to hear of my experience when I climbed Long's peak, or visited Hallett's glacier, or caught fish in Lost lake, or slept on the ground with only the sky and an army blanket for covering. They will listen with interest to my adventures in Devil's gulch, and thrill when I tell how we were caught in a storm, and were for a time lost on Specimen mountain. Dogs, bears, bear-cats, and wild animals of all sorts, and escapes from danger, interest them immensely. A child never tires of hearing what has happened. Events must be the stock in trade of letters to him.

Young people like romance, and the accounts of social activity. Boat rides by moonlight, dances, automobile journeys, the gossip of summer resorts make a great appeal to them. Sentimental things are pleasing to young girls. What he said to me, and how I answered back, can make up the major part of the correspondence between young people. Youth is the time of romance, and the friendly letter of youth should be full of it. Love affairs, engagements made or broken, marriages, house parties—these are the things which we should expect to hear about in the letters of the high school, or college student.

Women are fondest of personal gossip; they are concerned mostly with things in the home—children, the neighbors, housekeeping affairs, dress, and books, sometimes. Intimate things are of most interest to them.

People who are past their youth are fondest of reminiscences—the people with whom they associated, the roads they used to travel, the adventures they were a part of. They live over again old memories, and old experiences.

"Do you ever go out to Carmel Center?" Ellsworth Dawson writes me. We were boys together, and I have not seen him for many years. "I suppose the old church is gone, and everyone whom we used to know is dead, or has moved away. Are any of the old boys still living there? What a high old time we used to have chasing around!" And so he goes on, filling the pages with one reminiscence after another.

It is best, before beginning to write the friendly letter, to visualize the individual to whom we are to write, and his surroundings. We are starting a conversation with him, as it were, and we should give some consideration to what his interests are, what he likes and dislikes. We should not write what is most pleasing to us, but what is most likely to be interesting to him.

Why That Bad Back?

Is backache keeping you upset? Feel all tired out—so nervous and dispirited you can hardly keep going? Then look to your kidneys! Your kidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziness, and other annoying kidney irregularities. If your kidneys are sluggish, help them with a diuretic. Use *Doan's Pills*. They are praised the world over. *Ask your neighbor!*

An Ohio Case

Mrs. M. A. Boyer, W. Wayne St., Dunkirk, Ohio, says: "I had knife-like pains in my back that cut so bad at times I thought one of my ribs was fractured. If I tried to stand up after sitting, sharp twinges cut across my kidneys. I felt tired and worn out, too. Doan's Pills drove all signs of kidney trouble away."

Peru Fosters Industries

The government of Peru is considering the issuance of several "patentes de introduccion," which constitute a recent innovation in Peru. Under these grants a company or individual undertaking the establishment of a new industry in Peru, that is, the manufacture of some article not previously manufactured in the country, is assured by the government that no one else may start a competing industry within a term of years, although importation of the article may continue. The purpose, of course, is to foster the development of new industries.

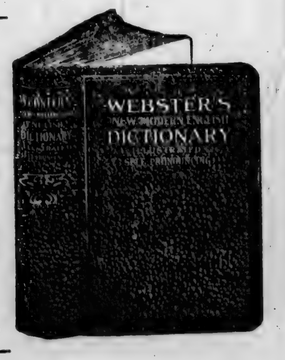
which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.



LESSON FOR BOYS

THE boy or girl in school can honor Memorial Day by a quiet resolution to prove a patriot of peace. It is no mere figure of speech to assure the high school boy that peace can offer him as true a challenge as war offered to the doughboy going over the top. To see to it that a spirit of chivalry from boys toward girls marks our schoolhouse and our town; to keep the graduating class clean from jealous bickering politics; to insist on fair work in class and fair play everywhere—will not those opportunities for right dealing call out the soldier tone? Indeed they will! If every family caught the spirit of valiant living that marks Memorial Day, should not America witness a new generation of fearless patriots of peace?—Youth's Companion.

Memorial Day Observance

WHAT does "memorial" signify? The answer is, in memory of our dead or a day to decorate the graves of those we love and friends we respected, not forgetting our unknown soldier.

All nationalities and different religious denominations in churches and out in the open pay religious tribute to those who have departed to meet their Maker through the most fervent prayers, and the laying of flowers and flags on the graves of our dead is a most solemn duty accompanied by joy and tears—a joy on that day if we are in close proximity to those we loved and tears when our recollections of the past are so vividly fresh in our minds.

Memorial day is the one day in the year when the good and bad, the rich and poor, the haughty and humble, through their grief at the resting place of their beloved forget the difference of their stations in life, because here is the time and the place where only through the name on the tombstones is there any distinction.

Little children assist in decorating the graves of those they love—perhaps a schoolmate, sister or brother, mother or father. Of all times in their lives this is the most solemn, their faces plainly indicating their seriousness, proving that the heartaches of all vary but little.

All these most human labors of love for the departed ones take place in nearly every hamlet of this great nation. Also, the meaning of Memorial day reaches wherever our people may be—around the world from the most prosperous individual to the most willful whose liberty is curtailed to the confines of their place of incarceration, because the most hardened men and women have sincere recollections when thinking of their dead.

This is the day set aside by most states of our Union to forcibly bring to our minds that those whom we loved in life and our country's heroes should not be forgotten in their lonely surroundings.

A single flower of little value placed on a grave denotes thoughtfulness or a possible sacrifice by a humble sufferer. However, value does not count, but remembrance does. This is the real meaning of the word "memorial."

May 30 is a day when in the morning at least we should refrain from doing things that create too much jollification, as this is the time when many in an official capacity and otherwise are visiting the homes of our dead, performing a most sacred duty. A little serious thought on what the day represents would mean more reverence for our dead.—J. P. Brophy, in the Cleveland Plain Dealer.

Impressive Tribute

One of the most striking pieces of statuary on the famous battlefield of Gettysburg. It surmounts the monument erected to the Ohio Hundred and Twenty-third New York Regiment on Culp's hill.

Club Work News

From Concord Boys and Girls

The club work is progressing fine in corn, pig and potato classes for boys and sewing for girls.

Now boys and girls the final date for entering the pig and potato club is June 8 and all must be in by that time.

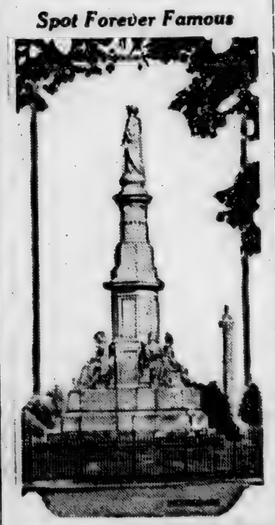
It seems that with the premiums offered at the Fall Home Coming, the county prize offered as an extra inducement, that all boys and girls between the ages of 10 and 18 should be in some club.

Club camp, August 17 to 21 will be a real time for all boys and girls who are in the work.

Meetings every month where some thing special will be offered. To date there are 29 boys and 20 girls with 4 or 5 more prospects in the sewing class.

Miss Margaret Milliman and A. J. Smith are at Ft Tecumseh attending a meeting of club workers and Vocational teachers, held under auspices of Purdue University.

Spot Forever Famous



On November 19, 1863, President Abraham Lincoln stood on the battlefield of Gettysburg, just where the shaft of this national monument rises. On this spot the "Great Emancipator" made his immortal speech.

Lesson of Memorial

"Dulce et decorum est pro patria mori"— a sweet and proper thing it is to die for one's country; thus reads the eternal epitaph of the hero dead, in Arlington's great bivouac as elsewhere. But the sweetest and best time to die for one's country is when life has been fulfilled and the fruits of the task are ripe for the enrichment of that granary of ideal and achievement we call the nation.

Memorial day is a day of experience; it is a good thing to be thoughtful of the past; better still to learn from it.—Detroit News.

Local Briefs

Miss Evalyn Knight spent a couple of days last week with relatives at Hicksville.

Lehr Wilder spent the weekend at Angola with Mrs. Wilder, who is attending Summer Normal there.

Will Summers returned home Saturday from Akron, Ohio, where he had been called three weeks ago by the illness of his mother.

Patronize the advertisers.

Mrs. Belle Ridgway returned home Thursday from a visit with relatives at South Bend, LaPaz and Hobart.

Mrs. Ada Langwell of Bloomington, is here visiting her mother, Mrs. Virginia Lawson, and other relatives.

Miss Sadie Haner and cousin, James Bloir, of Bryan, Ohio, were Saturday night and Sunday guests of A. Haner and daughters.

Stanley Monroe, wife and daughter, Martha, of West Unity, were Thursday guests of Mr. and Mrs. F. M. Monroe.

F. M. Monroe and wife, Vern Monroe and family and Mrs. Alice Copp, spent Sunday with Jesse Copp and family at New Haven.

Sam Kees and wife spent from Sunday until Tuesday guests in the John Hart home in Ft. Wayne.

O. R. Cook of Fort Wayne and Eugene Cook of Cedarville, were recent guests of their aunt, Mrs. Mary Timmerman.

Dan Myers and family of Hicksville, were Saturday guests in the Sam Kees home.

Mrs. Beulah Coburn attended the Spirella School held at Fort Wayne Tuesday and Wednesday.

Mrs. Will Harman and little son Lewis, spent from Friday until Sunday visiting relatives at Angola. Mr. Harman went Sunday.

Brooms 50c, and Pork and Beans 10c at Coolidge, Spencerville.

Mrs. Wm. Randall recently received a letter from Mrs. J. L. Steward of Estherville, Iowa, stating that she had been very ill with influenza but that she is now recovering.

Relatives here received news of the death of Marcellus Gee, aged 67, who passed away at the Irene Byron Sanitorium Friday night. He was a former resident of this vicinity but for about twenty years has been living at Kendallville. The funeral was held there Monday afternoon from the residence. A number of relatives from here attended.

Mrs. Anna Franks of Auburn, spent over the weekend at the bedside of her father, O J. Baker, who is quite serious. Other elderly people in the community who are ill are Mrs. J. S. Kain, Mrs. Arthur Wilmot, Mrs. Miller Dermott and Mrs. Cordelia Dermott. The latter two are improving.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JUNE 4, 1925 | NO. 23

Pleased Over Junior High Commission

Trustee, F. L. Milliman is more than pleased with the action of State Board of Education in granting him a Junior High School Commission for the St. Joe School.

From now on the High School will be a six year course, the Junior High comprising the 7 8 9 year and the Senior High the 10 11-12 year.

From now on the school will have two commencements instead of affiliating with the county. There will no doubt be additional scholars coming in to take advantage of the new added facilities.

St. Joe is indeed proud of the efforts of Mr. Milliman and County Superintendent Green, in being able to get the board to pass this high honor to our school. In the entire state there is but 13 other schools holding a similar commission, and in DeKalb county, Auburn and St. Joe share honors.

CASH For Dental, Gold, Platinum, Silver, Diamonds, magneto points, false teeth, jewelry, any valuables. Mail it today. Cash by return mail.
Hoke S. & R. Co., Otsego, Mic.

Building A Modern Service Station

St. Joe is to have a modern public service station.

Sam Keesler has completed negotiations fo the lot owned by Kinsey & Bowman, or better known as the opera house corner, and the lot is being prepared for the construction of a new station.

The station will be brick, plans of which are now being made in the offices of the Standard Oil Co., and from which station their products will be sold exclusively.

The building will be designed with a neatness which will be necessary for sush a prominent location, with a double drive, two pumps, air compresser, water, crank case service pit and battery service. Other features will be added as the demands are made.

Plain or stripe Berne Overall $1.50, Coolidge Store.

The Hadsell bridge is closed for repairs but will be opened this week. A new 4 inch floor has been laid, tarred and graveled. The Hoisington bridge will receive similar treatment next week.

Memorial Day at St. Joe, for the past few years, has taken on a real spirit of devotion and folks who were at one time residents of the community, plan for a visit. The cemetery was beautifully decorated with plants and cut flowers.

Worth Trying

The mere fact that one cannot please everybody is no excuse for not trying to please somebody.

At our bank we honestly TRY to please everybody. No, we didn't say that we succeeded in doing it, but we TRY, by being courteous, friendly cheerful, accomodating. And it is worth the effort, too. It has helped make our bank a strong, reliable, helpful institution. Our services are at YOUR command.

The St. Joe Valley Bank, A STATE BANK

Deaths of the Community

Jacob Baker, son of John and Rebecca Baker, was born in Fulton, county, Ohio, March 25, 1849.

When but a child of three years the family removed to Pennsylvania, near Chambersburg, and at the age of twelve, removed to DeKalb county, near Spencerville, Indiana, where he grew to young manhood.

At the age of twenty-four he was united in marriage to Miss Sarah Jane Coburn, September 27, 1873, and the remaining years of his broad span of life were spent in and near St. Joe, Indiana.

The wife preceded him in death January 24, 1904. To the marriage union was born five children, all of whom survive. John R Baker, of Allen county; Mrs Matie Gee and Meade Baker, of St. Joe; Mrs. Anna Frank, of Auburn and Mrs. Harry Urmson, of Akron, O.

He leaves two brothers–Theodore Baker, of Hicksville, Ohio and Alvin H. Baker, of Wabash, Indiana, also ten grandchildren and one great grandchild.

In early married life he united with the Christian church at Coburn's Corners, to which he remained faithful until the close of life.

Until two years ago, he was a most active and busy man; then came the breakdown, and the final illness of about two months duration, resulting in death, Friday afternoon, at 2:15, May 29, 1925.

His simplicity of character was manifest in his dislike of sham and pretense. He was always ready to deny himself for the comfort and benefit of his family He was thoughtful of others, upright, honorable and absolutely honest.

These, with other rugged, sterling qualities endeared him to the hearts of his children and a legion of friends, neighbors and relatives.

And, so, after life's fitful struggle, he sleeps well.

The funeral services held Monday P. M. at Coburn's Corners were largely attended. Rev. Shaw of Auburn, had charge of the ceremony. Music was furnished by the church choir and Little Martha Frank, of Auburn. Burial at Alton cemetery.

CARD OF THANKS

The family is desirous of extending thanks to the kind friends and relatives for their generous deeds and offers during the illness and death of our father. Also for the tribute expressed by the beautiful floral offerings.

The Children.

Ellen Josephine Wilmot, wife of Arthur Wilmot, and daughter of William and Betsy E. Allen, was born April 20, 1856, and died May 26, 1925, being 69 years, 1 month and 6 days old.

June 20, 1880, she was married to Arthur Wilmot, to which marriage four children have been born: Ora, of Spencerville, Lee, of Garrett; Anna, of Detroit, Michigan, and Fay, of Fort Wayne. All of these are living to share with their father the loss of their beloved mother.

About thirty-three years ago, under the ministry of the Rev. O. Q. Oviatt, Mrs. Wilmot united with the Church of Christ at Coburn's Corners

She leaves her husband, three sons and a daughter and their families, one brother–Alonzo Allen, of Coburn's Corners; three sisters–Wyhone Allen, of Coburn's Corners, Jane Coburn, of near St. Joe, and Mary Warner, of Hicksville, Ohio, and six grandchildren to mourn her departure. Her parents, two brothers and three grandchildren preceded her in death.

Her burial was in the Alton cemetery, the Rev. J. N. Scholes officiating at the services.

Card of Thanks

We express our thanks to our friends and neighbors for expressions of sympathy and kindness in the illness and death of our wife and mother. Arthur Wilmot.
The Children.

Georgia Weirs, daughter of W. R Weirs and wife, was born at Coletown, Indiana, October 26, 1876, and departed this life May 19, 1925, at the St Joseph hospital, Fort Wayne, of complications It was her fourth operation which caused her death. When she was twelve years old she was baptized and united, with the Christian church at Coburntown. A few years later she with her parents moved to St. Joe, and there she united with the Lutheran church. About twenty years ago she went to Fort Wayne and was married to Albert Schaaf who survives her together with her mother, Mrs. Ellen Weirs; two sisters, Mrs Bert Bachtel of Waterloo and Mrs. Grace Peters of Jackson Center; one brother, Rolla Weirs, of St. Joe, three neices, three nephews and a host of other relatives to mourn her departure

Georgia always was of a cheerful disposition and spread sunshine where ever she was, always looking to the comforts of others who were smitten with sickness, always reaching out her hand to the needy to comfort them as much as she possibly could. She always was looking for the silver lining in all things. She bore her suffering with christian fortitude which endeared her to many people

The funeral was held at the home of William Schaaf (brother of Albert Schaaf) The floral tributes were many and beautiful. Rev. Folsom of the Plymouth Congregational church, officiated. Burial in Lindenwood cemetery.

IN MEMORY OF GEORGIA

Dearest Georgia you have left us;
And our grief is hard to bear.
But we know we will meet you
With the angels over there.

Your home circle now is broken
And your form no more we see.
During sickness how you suffered
But you bore it patiently.

God in His wisdom has recalled
The boon his love had given.
And though the body smoulders here,
The soul is safe in heaven.

Camp Tecumseh

G. C. Bormuth, Butler, L. H Bull, Ashley and A. J. Smith of Spencerville, Vocational Agriculture teachers and Marguerite Milliman, County Girls Club leader of St. Joe, returned Saturday from a five day conference at Camp Tecumseh. This camp belongs to the state Y. M. C. A. and is situated eight miles south of Monticello on the Tippecanoe river.

The purpose of the camp was that each leader might get not only ideas in regard to leading boys and girls in club and community activities, but also practice in these activities under conditions similar to those in communities where these leaders are working.

The conference was in charge of Purdue Extension and Y. M. C. A. workers. Men of national reputation from Illinois and N[illegible] gave inspirational talks and demonstrations on Community Leadership

Director G. I. Christie of Purdue Experiment Station gave the key note speech on Wednesday evening in which he defined community and community leader

According to Prof. Christie, ideal community should contain a school a church and a town. It must have a common purpose and be unified by some common project that is worth while he said

Many other specialists, instructors and demonstrators gave inspirational talks and demonstrations. All present spent a pleasant and profitable week and voted to make this training school an annual affair.

Coder Burial Here Thursday Afternoon

The body of E. J. Coder of Cleveland, father of Mrs J. R Lowry, will be brought to St. Joe for burial Thursday at 4:30, with services at the grave. The body is being shipped to Butler where E. R. Kinsey will meet the funeral party

SINNERS IN HEAVEN

By CLIVE ARDEN

Copyright by The Bobbs-Merrill Co.

PART THREE—Continued.

—13—

With only the birds for witness, the sound of the surf for choir, the radiance of the eastern sky for altar, simply and from their hearts' depths these two plighted their troth. The few chief sentences from the marriage service were chosen by Barbara for their only rites.

There would be many, away in the world, to scoff, many to condemn. But no outward consecration of ground, no army of ordained priests, could have rendered more sacred that moment when the hush was broken by their low-voiced avowals. Perchance the "Destiny that shapes our ends," seeing all things, reading all hearts, who had flung these two together upon this far garden of His own creation, and given them there the one supreme gift which is part of Himself, would understand and accept their vows:

"'To love and to cherish till death us do part. . . . And therete I plight thee my troth. . . .'"

Their voices did not falter. The small tin ring encircled the girl's finger: they stood silent a while, with locked hands. Then he drew her toward him, and very gently their lips met.

"My wife!" he breathed.

* * * * * * *

Barbara bathed, dressed, and got breakfast, with no thought of fatigue after a sleepless night. Her heart seemed almost unbearably full. As she watched the smoke curl up from her own fire, and that rising from Meamaa's hut, she resembled the primitive woman glorying in this life shorn of all false trappings. Was not Meamaa likewise cooking food for her man? In the south, too, the native women were so employed. Man and his mate—in palace or hovel, in mansion or hut! All the artificiality hiding the big realities faded away with the worlds beyond the blue horizon.

It was the same with Alan. Like some fine, strong, wild thing, he dived, swam and splashed in the river; then returned for breakfast, ravenously hungry, singing as he swung down the bay.

"I have a great surprise!" Barbara announced. "Here is a tin of 'bully beef.' I saved it for any emergency. Shall we have it for our wedding feast, as a special treat?"

He shouted with laughter. "Lord! To think of 'bully' becoming a special treat for a wedding feast! Bring it along, O wise and thrifty woman."

They ate their "wedding feast" in a mossy shady dell; and even the memory of Aunt Dolly, who unconsciously had provided it, failed to cast more than a momentary shadow across their joy.

Alan lay along the bottom of the boat, his head pillowed in Barbara's lap, as the sun began to sink.

"Well?" he asked. "Have you found a desert island honeymoon very irksome? What about the big cities where you expected to 'feel life'? What about your heart's desire?"

She laughed low, passing caressing fingers through his hair. "I have no

The Sound of the Surf for Choir.

other heart's desire. You are life itself to me now, Alan. That's why—"

"You came to me last night?" he suggested softly, as she stopped.

She nodded. The boat drifted idly, caressed by the soft breeze, rocking gently with the tide.

"Thank God you did," he murmured, after a pause. "Everything was becoming—unbearable."

She trailed her fingers in the water, lost in thought.

"It was strange," she observed presently, "that the day on which I first began to feel—what you had become to me—should have been my wedding day!"

"Those first months here nearly drove me mad—until I was sure the field was clear," he replied. "Then I meant to win!"

"Oh, Alan!" With sudden passion she drew his head back against her breast. "If I lost you—my husband—I should die."

He turned in her arms, and pressed his lips to her soft neck.

"Barbara! It means—all that—to you, at last?"

They stayed in the boat until darkness [illegible] Then [illegible] took the oars he had fashioned, and paddled back to land.

Silence fell upon them as they neared the shore. It was the hour when exterior things diminished to nothingness, and the Big Things were too vast for conversation. He beached the boat, then slipped his arm around the girl and drew her toward the hut.

"Our wedding night, Barbara," he whispered.

Her feet lingered a little, and she paused now and then to admire beauties of scent or sound; the rising moon showed her face tremulous. Outside the dark hut, she drew herself free, turning toward the sea as though loath to leave it. It seemed as though she were silently bidding farewell to some part of her life; and the man behind her stood motionless, his eyes on her averted head, silently waiting, making no attempt to touch her. . . .

At last, slowly, she turned and held out her hands. He took them close in his.

"Come, my dearest," he said.

V

Six months, when you live in an earthly paradise, are but a flash of vivid light in a sky which is always blue. These two had crossed their looming mountains and arrived at the valley upon the other side; and they found it fair and shining, full of the songs of birds.

The days sped by, each seeming to exceed in beauty its predecessor. There was no need now to fill each moment with arduous, thankless toil. All walls and divisions were down. When Alan, with a few slashing cuts, severed the bamboo partition in their sleeping hut, it had been symbolic.

"There!" he exclaimed, his foot upon the canes strewing the floor. "No more twos. Everything's one."

"One!" she breathed, renouncing, with the outward surrender of her only privacy, all the private strongholds of her nature. But the look she gave him was no longer elusive. It was steadfast, shining, exultant. . . .

In the wilderness Barbara had found the "hidden want"; the love which, with all its many far-reaching subkeys, can alone tune the extraordinary cosmology, called life into any semblance of a harmonious whole. . . .

Sometimes they played ridiculous games upon the sand, gambling with the money lying useless in their luggage.

They hunted, fished, worked, bathed together. And, during these months, each learned much, which was accumulated and stored within their hearts.

Their clothes were in rags, but they made fun of the matter. Alan clung to his old razor, and Barbara to her scissors.

"After all," she said, "we can cover ourselves in reed matting. Provided you don't grow a beard, I can face anything."

Six months of perfect happiness! It was against all the rules of fate; but even fate seemed to have cast off these two for a time. For some reason the world was made passing beautiful, and human beings placed in it without any choice. But the attainment, much less the possession, of permanent bliss therein has not been decreed.

At the end of six months, the first ominous cloud appeared. Chimabahol the native chief, fell ill and died. Babooma became head of the tribe.

No care or pity for his fellows permeated the hide of brutality encasing Babooma. All the worst instincts of the savage, held in check by the old chief under Croft's influence, now rose to the surface. His own adherents, impatient of restraints, hailed him with joy. The division in the settlement became at once more evident: murmuring dissatisfaction upon one side, threats and tortures upon the other.

The white man's popularity had increased with the increase of health, cleanliness and industry among the natives. Now he took full advantage of it, and only his continuous intervention maintained order. The position, however, was fraught with danger. To continue to inspire a semi-superstitious fear after more than eighteen months was in itself a precarious task, only achieved by the weight of his own personality. Furthermore, he was confronted by Babooma's personal hatred. From Roowa he had learned of the chief's mania for women, and women were scarce in the tribe. White women no longer offended the black men's instincts. . . .

At present vivid memories of a wounded shoulder, blue devils hissing from round Croft's hut, the supposition of a hidden white tribe ever at hand, restrained Babooma from defiance of a man tabu. But familiarity and the scraps of education imparted by the white people were gaining upon superstition. . . . It was only a matter of time.

Barbara had quickly perceived that her man was seriously troubled concerning the tribe. Dimly aware herself of the first faint clouds in the brightness of their sky, heralding a possible storm, she sought to hide them, to keep their happiness undisturbed.

During the following months the cloud grew ever more menacing. Those natives who, fundamentally brutal and idle, had not appreciated their enforced [illegible] industry, quickly deteriorated under Babooma's leadership. His adherents increased in number, as did his cruelties. There being insufficient grown women, he seized young girls, almost children, made them the toys of his lusts, and afterward they disappeared—sometimes, under cloak of religious fanaticism, upon the sacrificial altar to Balhuaka; sometimes to satiate his own appetite for human flesh.

Many times Croft was on the point of utilizing that last bullet. But with it his influence would have vanished. Natives regard their own chief with extraordinary superstition. To them he is permanently tabu. The next in rank was one of Babooma's followers. Only more danger would have resulted for Barbara and himself, and probably civil war in the settlement. These people were insisting on making their own hell, and nobody could save them short of exterminating half their number.

After a time Alan refused to allow Barbara near the settlement. She said little. She passed long hours with Meamaa and her children, banishing the mental torture during his absence in the radiance of her welcome upon his return.

One night he returned, after a stormy day's battling in the south, with his own optimism gravely shaken. It was, he knew, but a question of days before the threatening mine should burst. The division had widened to an extent which only blood and explosion would, eventually, bridge; it needed but a match to the fuse, and that explosion would come.

Barbara did not meet him as usual. He wondered a little, making his way quickly down to their hut. Supper was ready, but she was not there. He looked into the sleeping hut, but that also was empty. Anxiously he turned his steps toward Roowa's abode. Meamaa sat outside, suckling a new addition to her family, crooning softly over the little dark form.

She waved an arm toward the east. "The great chief's wife went up to the heights long, long ago! Meamaa still watching for her," she said.

He strode off up the slope, and the native woman continued her crooning song.

Barbara was seated upon the rocks where, nearly a year before, the dawn had witnessed their simple marriage ceremony. Her elbows were propped on her knees, her chin was sunk in her hands.

Alan approached noiselessly, but she became instinctively aware of his presence. He noticed a strange expression in her eyes as she turned to greet him: a far-seeing wonder blended with a tenderness which seemed reflected in the smiling, tremulous lines of her mouth.

She silently stretched out her hands, and he took them in his, mystified.

"I wondered what had become of you—" he began.

"I felt I must come here. This always seems a kind of sacred temple, our own. . . . Oh, Alan!"

She gazed into his face half-smiling, yet with a suspicion of tears dimming the soft light in her eyes.

"What, dear?" he asked, more puzzled.

She made no reply; but the glory in her face seemed to deepen, radiating toward him. . . . Loosing his hands, her arms crept up to his shoulders, round his neck, drawing his head down to her own.

A sudden, vague realization of some stupendous happening caused him to draw her close. "What is it, Barbara?" he murmured. "What are you trying to tell me?"

She tilted her head back a little, and saw the dawning comprehension in his face. A faint smile flickered again across her own.

"Can't you guess—my husband?"

Instantly he was conscious of the same inimitable tenderness in her regard which he had just seen in the eyes of the woman suckling her child. The same mysterious essence of motherhood seemed to emanate from both. With a muttered cry, his lips sought hers; he caught her close, pressing her to his heart as if daring all the forces of nature, all the venom of savage humanity, to take her from him now.

Suddenly, impulsively, she looked up into his eyes.

"Shall you love—It?" she whispered.

A reflection of her own tenderness showed in the smile which answered her. The glory of the sinking sun illuminated his face.

"Shall I?" he breathed. "My dearest—what a question!"

VI

Hand in hand they descended the hill, full of this fresh wonder. After supper they sat on the shore in the moonlight, talking in low tones of the future, making wonderful plans. . . .

Both possessed that curious sensitiveness to nature which compels one, in any crisis, to make for open spaces, limitless horizons of ocean. . . . It was after midnight when at last they went to bed. The night breeze had died down, and a peculiar sense of airlessness pervaded the island; the water became calm to oiliness.

Barbara was restless, and lay long awake. The strange stillness, with its sensation of false calm heralding approaching tempest, revived her premonitions of disaster. When at last she fell asleep, it was only to be tortured with the same premonitions magnified into nightmare realities. She awoke gasping and sobbing, in Alan's arms, and clung to him feverishly.

"I dreamed you had disappeared," she cried, in bewildered explanation.

"How could that happen?" He soothed her. "How could my bulk disappear? Don't talk nonsense!"

They breakfasted later than usual, and had barely finished when the noise of many agitated voices reached their ears.

Glancing apprehensively at each other, they hurried out of the hut.

The sky was leaden, hues of angry orange suffusing the horizon, the air oppressive. From the direction of the palm grove streamed a hurrying, chattering crowd of black figures—men, women and children.

Croft's brow contracted, and his lips set. The mine had evidently exploded even sooner than he expected.

Seeing him, a wailing cry arose from the advancing crowd. Weary and terrified, they stumbled forward to the palisade, where the women fell upon the ground, moaning, weeping, waving wild arms, sometimes adding their voices to the unintelligible babble of the men. To comprehend their meaning was at present impossible.

Presently their talk grew more coherent: he was able to make out its drift.

"We will serve thee, O Great White Chief! . . . Thou art merciful! Thou art wise beyond the wisdom of our men! . . . We will work for thee, O Chief! Thou carest not to torture and kill. . . . A-aa! A-aa! . . . Thou hast done much for our tribe. Under thee it will become strong, if thou wilt be our chief. The fruits

A Wailing Cry Arose.

of the earth will grow, the fish leap up from the water! . . . We love thee, O, Mighty Friend of the Gods! We will serve thee! . . ." Thus and much more with a similar burden, did they babble in their eagerness.

Commanding silence, he bade one of them explain the cause of this visitation.

Babooma, it transpired, soon after Croft's departure the previous evening had worked himself into a passion. Expressing contempt for the white man and his gods, he raised the tabu. Encouraged by his own adherents, he then declared war upon the white chief with instant death to all who thwarted his designs. This set the fuse alight. An outburst of murmuring disloyalty to Babooma warred with the usual superstitious fear of him as their god-ordained chief; while their genuine affection for Croft flared up to white heat. To prove his words, maddened by opposition, Babooma seized and strangled one of the men who dared openly to rebel.

This was too much for the peaceful faction. Secretly and swiftly, they conspired together, under cover of night. While the rest of the tribe slept, they stole out—some eighty-odd, including women and children—and sped through the woods to the north.

This drastic move meant a tremendous decision, bound around as they were with age-old superstitions. It was a forlorn, terror-stricken little band which Croft presently addressed. He spoke kindly, trying to allay their fear, feeling a certain relief that the anticipated trouble had occurred so soon. Most of the men, he noticed, were fully armed: therefore it should not be impossible to overthrow Babooma and, once for all, quell the savage element.

"Whether I can be your chief or not is in the hands of my gods," he concluded with prudent piety; "but rest assured of my protection. Your women and children are tired from the long walk through the forest. Let them come inside our garden for safety and food."

He opened the entrance in the pali, made. Awestruck into silence, they filed through, their minds full of the "little blue devils," experienced here by their menfolk. Might these not spring up and burn them even now at the great white chief's command? They squatted in one close group, hungry and grateful for all they received, following Barbara's movements with adoring, wondering eyes, as she distributed food. Their faith in Croft equaled their faith in their god, Balhuaka; once within the palisade, their fears of Babooma sank. Then men, resting outside, kept a sharp watch for any daylight attack. Poowa was sent to feed them. Alan went indoors to attend to his store of native weapons. . . . Presently the excited visitors in the garden, tired and [illegible], fell asleep. . . .

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© by Western Newspaper Union.)

ULTRA-VIOLET SUNLIGHT

IT HAS always been known that sunlight is necessary for health, just as it has been known that food is necessary for life. But one can have all the food he can eat and unless it is the right kind of food and properly proportioned, his health will suffer. So one can have sunshine and unless it is the right kind of sunshine it will not be beneficial. Light, like food, is a matter of quality as well as quantity.

The so-called ultra-violet rays of the sun are less than one per cent of the total light given out by the sun yet they are probably more important to the body welfare than all the other ninety-nine per cent.

These rays are called ultra-violet because they are found in the color band of the spectrum beyond the violet rays. They are therefore invisible to the human eye. Yet, strange to say, the part of the sunlight which we cannot see is the part that has the most marked effect on our bodies.

Sounds like a fairy story, doesn't it? But when learned men begin to write articles about it for scientific journals, it really looks as though there might be something in it.

Twenty years ago, Hertel found that ultra-violet rays would kill disease germs in sixty seconds. That beats boiling them twenty minutes, doesn't it? Then Finsen invented his electric lamp, which produced artificial ultra-violet rays and by which he cured skin tuberculosis. Then Rollier in Switzerland and Lo Grasso in this country found that sunlight would cure bone and gland tuberculosis.

Now Dr. Alfred Hess of New York, well known authority on children's diseases, says that these wonderful rays will cure rickets. He says: "These rays are essential to the well being of men. The young, rapidly-growing infant thrives better when deprived of the visible rays than when deprived of the invisible ultra-violet rays. Those rays which are furnished in the smallest amount and the least intensity are the most indispensable."

These rays have little power of penetration. Dust or moisture in the air stops them and prevents them from reaching the ground. Ordinary window glass strains them out. So children should be kept outdoors and in the direct sunlight, as much as possible. Even then, in cities where the air is thick with smoke, fog and dust, the lack of ultra-violet rays must be made up by foods containing these rays, such as cod liver oil, or by ultra violet light from artificial sources.

HEALTH VALUE OF CANNED FOODS

MANY housekeepers have a prejudice against canned foods of any kind, largely on account of reports of cases of poisoning from canned goods, which have appeared in the newspapers.

Canned foods are a comparative recent development. Up to the time of Napoleon, the only ways the human race had found to preserve food was by drying and by pickling. These two methods in various forms had been worked out by practically all races. Even primitive people had learned that meat, fruits, and grains, if dried in the sun, would keep indefinitely.

But there were many practical difficulties using either of these methods on a large scale. In 1794, after the French revolution, France began organizing great armies to protect her territory. The problem of feeding these armies was a serious one. So Napoleon's commissary general offered a prize for the best method of preserving food. A Frenchman, Nicholas Appert, worked on this problem for sixteen years, and in 1810 patented a process for sealing food in cans.

But it was not until 1875 that Pasteur proved putrefaction was due to a microscopic germ in the air, that it was killed by cooking, and that meat, vegetables, fruits and other food, once sterilized by heat, could be kept indefinitely if sealed in air-tight cans.

The growth of the canning business in the last fifty years has been phenomenal. In 1923 over 3,000,000,000 cans of food were put up in the United States alone.

In the development of this business many mistakes were made. Time was necessary to work out the best methods.

Today canned foods are among the cleanest, safest and most nutritious foods that can be secured.

Spoiled cans are rare, and these cans always can be detected by the swelled or bulged ends, the bad odor and the soft mushy appearance of the contents.

Any canned food which looks, smells or tastes suspicious should be thrown away. If in doubt, boil the contents of the can before using it. Even botulism poisoning, the most dangerous poison found in canned foods, is rendered harmless by boiling for twenty minutes.

Canned foods have added enormously to the world's food supply. If selected and used with good judgment they are of great value in furnishing an all-year-round supply [illegible] food.

What Attracted Crowd

There was a large crowd in front of the millinery window of a San Antonio (Texas) department store when it opened for business. The manager of the department rubbed his hands and smiled in pleasure. When the crowd increased and none came inside, he decided to investigate. There, comfortably ensconced in the crown of a stylish hat, was a cat and with her a litter of kittens. They had been born in the hat in the night.

"O Happy Day" sang the laundress as she hung the snowy wash on the line. It was a "happy day" because she used Red Cross Ball Blue.—Advertisement.

Good Use for Cross Words

"Cross-words, my dear?" said Mrs. Brown to her neighbor; "I think they're the finest invention in the world. Do you know, since my husband started them he has none left for me, and we are delightfully happy in consequence."

JUNE

THIS WOMAN'S REMARKABLE RECOVERY

Entirely Due To Lydia E. Pinkham's Vegetable Compound

Forest City, Iowa. — "My first child lived only a short time and I was sick for a year after. When I bent over and raised myself up again I could almost scream with pain in my back. One day I was so bad that I had to leave my washing and get ready to go to the doctor. He gave me medicine but it did no more good than if I drank just water. Once when we had been in town a little book telling about Lydia E. Pinkham's Vegetable Compound was left in our car. I have taken five bottles of the Vegetable Compound now and I do all my housework and help with the milking and taking care of chickens and garden. Besides I have a fine baby girl eight months old, just the picture of health and I am feeling fine myself. You may use this letter as a testimonial and I will answer any letters asking about the Vegetable Compound." —Mrs. OSCAR F. BORGELIN, Route No. 5, Forest City, Iowa.

Lydia E. Pinkham's Vegetable Compound is for sale by all druggists.

Indispensable

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

What to Say and Not to Say

THERE are certain things I should like to tell Duncan—things which would interest him, and things which he would like to know, but they are not things which many other people could safely hear, or would quite understand if they did know. They involve too many people; they would embarrass some of our friends, if they should become public property. It is better, therefore, not to write them, but to wait until I can see Duncan face to face, before I tell him, or else never tell him at all.

Extremely private matters, or secrets of any sort, or questionable statements, either of fact or of phrasing, had better not be written. All letters, even though intended for but one individual, no matter what care may be exercised to keep them out of other peoples' hands, are likely to become public property. Your roommate, or the landlady, or the stenographer, or the office boy, or some member of your family, stumbles onto them, and then the world soon knows the contents. It is very much better never to write anything that would be difficult to explain, if it became public, or that would embarrass you if the public should know. This advice applies equally to lovers, and to politicians.

If you ever write a letter, the contents of which would compromise you, should they become public property, throw it into the waste basket before you send it—write another. I have seen too many letters—vulgar, oversentimental, full of dangerous gossip and exaggerated fact—which have turned up to trouble the writers, not to be wary of such matters in letter writing.

The purpose of friendly letters is to keep us in touch with our friends, to keep alive a friendship which may have begun years ago. To do this we must tell them what they most want to know, and what they want most to know is what we ourselves have been thinking, and doing, and what we propose doing.

"It doesn't seem modest," a lady said to me not long ago, when we were discussing this subject, "for one constantly to be using the personal pronoun 'I' throughout a letter."

"It may not seem modest," I had to say, "but you are likely to have a pretty dull letter if you do not make your letter personal."

I get letters at intervals from a young fellow of my acquaintance—mechanical letters, without a touch of personal experience in them. I do not learn from them what he is doing, or what he is studying, who his friends are, or where he goes, or what he does, or thinks. They are rather stupid letters which I glance over with as mechanical point of view as that in which they were written, and toss them into the discard.

There is the letter from the old friend—we all get this sort—who never writes unless he wants something. Can I give him Brown's address, or write him a letter of recommendation, or find a boarding house for his oldest son who is coming to college in the fall. This sort would be all right, if he paid me with a little gossip about himself, and his family, a little detail about how and where things have been going with him since he last asked me to look up something for him.

Nothing is more exasperating in a correspondence between friends than to have the feeling, when your last letter is finally acknowledged, that it has not been read or, at best, it has been read hastily, and then mislaid or destroyed.

"Have you been writing anything recently?" I inquire of Cornish, who makes occasional excursions into the field of literature. I'm really interested in what he is doing and ask, not to fill space, but with a genuine desire to follow his latest literary adventure.

When I hear from him, he says nothing about writing; he ignores this question and all others which I have propounded, and makes no reference to anything I have told him in my last letter about myself, or any one else. It is as if he had never heard from me, or had never read my last communication.

To ignore a question, or a reference in a friendly letter, is as rude as to ignore one in a conversation, and to go on talking as if the other members of the company were not present, or had said nothing.

A friendly letter should be kept at least until it is answered, even if that is months or a year. It should be read carefully and all the questions answered, all the subtle suggestions referred to, all the references to personal matters mentioned. Your friend will, in such a case, get the impression that you read his letter with understanding, and enjoyment, and will be likely to write again.

Electricity Grows Grass

Electric lights have been used successfully at the Jumping Brook Golf club in New Jersey to grow grass on the greens at night and thus shorten the delay in putting the course into service, says Popular Mechanics Magazine. Grass lighted at night grew four inches in three weeks, while grass on the unlighted portion of the green grew but one inch in the same period.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)

(©, 1925, Western Newspaper Union.)

Lesson for June 7

PETER'S BROADENING VISION

LESSON TEXT—Acts 10:1-11:18.

GOLDEN TEXT—Of a truth I perceive that God is no respecter of persons.—Acts 10:34.

PRIMARY TOPIC—A Strange Sight Which Peter Saw.

JUNIOR TOPIC—Why Peter Went to Caesarea.

INTERMEDIATE AND SENIOR TOPIC—Peter's Broadening Vision.

YOUNG PEOPLE AND ADULT TOPIC—The Gospel Intended for All Men.

Through the conversion of Cornelius, the "middle wall of partition" was broken down (Eph. 2:4).

I. Cornelius (10:1-2).

1. His Official Position (v. 1).

He was a Roman officer over a company of 100 soldiers.

2. His Character (v. 2).

(1) A devout, pious man.

(2) He was a praying man.

(3) He was charitable.

(4) He was respected by his family.

The Lord chose Cornelius for the transition of the gospel to the Gentiles because of his character and position.

II. The Supernatural Preparation for the Transition of the Gospel to the Gentiles (10:3-33).

In order to bring this about:

1. Two Visions Were Given.

(1) The vision of Cornelius (v. 3-8).

While engaged in prayer, an angel of God announced that his prayer and alms had come before God as a memorial, and instructed him to send to Joppa for Peter who would tell him what to do.

(2) The vision of Peter (v. 9-16).

He saw a certain vessel containing clean and unclean animals let down from heaven. This vessel let down from heaven and taken back indicated that both Jews and Gentiles were accepted on high.

2. A Messenger Sent From Cornelius (vv. 17-22).

Peter was greatly perplexed over what he had seen, but not for long, for messengers from Cornelius made inquiry at the gate for him. The Spirit informed Peter of the matter, and bade him go, nothing doubting. Thus we see that both had been prepared for each other by God.

3. The Meeting of Cornelius and Peter (vv. 23-33).

(1) Peter took six witnesses along (v. 23).

He had the good judgment to know that on a matter of so great importance, he must have witnesses.

(2) Cornelius waiting for Peter (v. 24).

He called together his kinsmen and friends.

(3) Cornelius about to worship Peter (v. 25-26).

Peter repudiated his act and protested that he was but a man alongside of Cornelius.

(4) The reciprocal explanation (vv. 27-33).

Peter explained to him how God had taken from him his Jewish prejudice, and asked that Cornelius state the purpose of his having sent for him. Cornelius explains how God had appeared unto him and instructed him to send for Peter.

III. Peter's Sermon (vv. 34-43).

1. The Introduction (vv. 34-35).

He showed that God is no respecter of persons, but that in every nation those who fear God and work righteousness are accepted of Him.

2. His Discourse (vv. 36-43).

In the discourse he touches briefly upon the mission of Jesus showing that by means of His baptism and anointing with the Holy Spirit, He was qualified for His work as mediator. He then exhibited the work of Christ:

(1) In His life (vv. 36-39).

He went about doing good, even casting out demons as a proof that God was with Him (v. 38).

(2) In His death (v. 39).

The just suffered for the unjust that He might bring us to God, being put to death in the flesh (I Pet. 3:18).

(3) In His resurrection (vv. 40-41).

God raised Him up the third day showing openly that Christ was His Son (Rom. 1:4), and that His sacrificial work was satisfactory (Rom. 4:25).

IV. The Holy Spirit Poured Out (vv. 44-48).

As the gospel was entering upon its widest embrace, the Spirit came in new power.

V. Peter Vindicates His Ministry to the Gentiles (11:1-18).

Being called to account for visiting and eating with Gentiles, Peter rehearsed the whole story in such a way that his narrative took the form of logical argument, and showed how that God had set His seal upon the work by the miraculous gift of the Spirit.

The Best Key

One's own self is the best key one has to the understanding of the universe.—American Friend.

Judgment

Judgment follows sin as the echo follows the voice.—Prophetic News.

Overcoming Evil

By bravely enduring it, an evil which cannot be avoided *is* overcome.—American Friend.

Current Wit and Humor

BLAME THE FLORIST

A town was dedicating a new concert hall with appropriate ceremony. The floral decorations were lavish. A visitor remarked to one of the town fathers at a lull in the program: "The acoustics are very good, don't you think?"

"They ought to be," replied his host. "The florist's bill was enough to run up the taxes for every one of us."

Making It Clear

Two elderly men, both extremely deaf, met on a country road. Dave had a fishing pole in his wagon. When he saw his friend Jim he stopped the horse.

"Goin' fishin'?" shouted Jim.

"No," Dave replied, "I'm goin' fishin'."

"Oh," said Jim. "I thought mebbe you was goin' fishin'."—Country Gentleman.

More of Nature

Mr. Bacon—Did you hear those measley roosters crowing this morning early?

Mrs. Bacon—Yes, dear.

Mr. Bacon—I wonder what on earth they want to do that for?

Mrs. Bacon—Why, don't you remember, dear, you got up one morning early and you crowed about it for a week.—Watchword.

DEFENDED A WEAK MAN

"So ye got that mug on ye defending a weak man?"

"Sure I did!"

"Who's the man?"

"Meself."

Show Business

This world's a fleeting show, they say,
Which simple was of yore.
It is, today, a grand display
With three big rings, or more!

She Meant Well

A student brought his mother to the university and was showing her about. The dear old lady was anxious to make her boy think that she understood everything.

"Over there, mother," said the son, "are our wonderful polo fields."

"Oh," sighed the old lady, "what is there that is nicer than fields of waving polo?"

Just Medium

Mother—Is my daughter well behaved?

Friend of Family—Generally.

Mother—What do you mean by "generally"?

F. O. F.—Not particularly.—Princeton Tiger.

POOR DAD

Kid—Just one more question, dad: who's going to bury the last man?

Recipe

If you would lead the throng,
First seek to know
In what direction it
Desires to go.

Mistaken in Him

Edith—Is it true that you are going to marry Jack?

Ethel—Yes; why?

Edith—I didn't think he was of the marrying kind. Why, I am engaged to him myself.

That Was That

"What is your desire?" asked the good jin.

"To shoot a game of golf in par."

"I'm not that good myself," said the good jin.

Famous Religious Order

The Franciscans were a religious order founded by St. Francis d'Assissi about 1209. In England they were called Gray Friars, in allusion to the gray mantles worn by them. They appeared in Great Britain in 1220, and at the time of their suppression by Henry VIII in 1536, they had more than sixty abbeys. The Franciscans were vowed to chastity, poverty, and obedience, and lived an austere and ascetic life. Among their number may be mentioned Duns Scotus, Roger Bacon, St. Bonaventure, Cardinal Ximenes, Alexander of Hales, and Eilliam of Okham. St. Francis was canonized by Pope Gregory IX in 1228.—Kansas City Star.

Fresh, sweet, white, dainty clothes for baby, if you use Red Cross Ball Blue. Never streaks or injures them. All good grocers sell it.—Advertisement.

Getting Them Up

"Do you s'pose you'll be able to get our city kinfolks up on time to take the morning train?" asked Mrs. Fumplegate.

"I guess so," replied Farmer Fumplegate. "I've set the alarm clock for six—"

"But, good gracious, there are seven of 'em!"—Kansas City Star.

Eye infection and inflammation are healed overnight by using Roman Eye Balsam. Ask your druggist for 25-cent jar or send to 372 Pearl St., N. Y. Adv.

No wonder political platforms view with alarm. It is a common habit of everybody.

Strange Death Pact

A strange death pact of lovers was revealed at a coroner's inquiry at Johannesburg. A nurse was found stabbed with a pair of scissors. Before she died, the coroner said, she stabbed her lover with a hatpin, which penetrated his heart.

Let Tanlac restore your health

IF your body is all fagged-out and run-down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into the nearest drug store and get a bottle of this world-famed tonic. That's the first important step back to health and vigor.

Tanlac Restored Her Health

"Typhoid fever reduced me to 95 lbs. and left me weak as a rag. Failing to get relief from other sources I tried Tanlac and after 6 bottles had gained 20 lbs. Now I enjoy a fine appetite and feel like a new woman. As a nurse I give Tanlac to all my patients."

Mrs. J. B. Terry,
1101 Park St., Ft. Worth, Tex.

St. Augustine Boasts Many "Oldest" Houses

In the oldest town in the United States, St. Augustine, Fla., "oldest" houses are very numerous.

As the tourist stands in the middle of Treasury street and, stretching his arms, almost touches the walls on both sides at once, he is readily convinced that the seven-foot thoroughfare is the narrowest street in the United States, but the city's own dissension as to the oldest house leaves the visitor in doubt.

There is an "oldest house in America" on the quaint and antiquated St. Georges street, where men and beasts mingle on the highway and balconies droop low overhead. It has plaster walls and dormer windows and red shingles on its roof. It calls itself Old Curiosity Shop and carries a crest over its door.

On the bay front is another "oldest" house, post-card proclaimed. It is a two-story structure, with the plaster peeling off of its brick. It has a gallery above and outdoor stairs at the side. Still harder to find is an Elizabethan mansion on St. Francis street. It is half timber and half stone, with wide shingled hoods where it opens on the street. It was once a Spanish mission, erected by the monks of St. Francis who came to St. Augustine with Menendez. They used it for a chapel until 1590. It is now a museum of old furniture, antique china and glass.

Of course this is the oldest, the keeper insists. What matter? Each is interesting to visit, with a charm of its own, and all are ancient enough.

Retain Curiosity, and Keep Up With World

There is perhaps only about one childish quality that should stay with us all our years, and that is our curiosity. If we keep on asking questions and wondering about things life will keep on being interesting and fresh and stimulating and growing bigger and better every day. But if we allow the routine of things, or a too great sense of satisfaction, to wear down and destroy our curiosity the zest will largely go out of living, and with that the possibility of progress, and we will stand cumbered with our prejudices and all the hampering lumber of life.

And strange as it may seem, there will probably be many more questions to ask when one is eighty than there were when he was eight. Indeed, it is only when one has lived long and thought deeply that he begins to understand how to ask questions, and to see how big is the world that he does not know.—Family Herald.

Blessed Cheerfulness

Blessed be cheerfulness! It is promise at the dawn. It is preparative of rest when we lie down to sleep at night. It is coin current in all social experiences. It is like a breath of wholesome outdoor air in stuffy rooms It is a claim on attention and remembrance. It is even an element in the divine satisfaction when we are told that, "God loveth a cheerful giver." When the cynic and the grumbler come into the room we are glad of an excuse to leave. When some cheerful soul comes breezing in we sit up and pay attention and forget our grudges against life and fate. And in our most discontented hours, even when we take pains to conceal our own disheartenments, are we not inclined to be intolerant of other people's gloom?

Children's Sight

Children with normal eyesight or with moderate defects see better as they grow older. Sueller's eye test, given to 9,245 children, showed that the percentage of children with normal vision increased as the children grew older and the percentages of those with minor defects decreased, the New York World says. The number of children with markedly defective vision increased, however, with age.

Of all the children tested 63 per cent were found to be normal, 27 per cent moderately defective and only 10 per cent had poor sight. The percentage of boys with normal sight was slightly higher than the girls, but the average for those with very poor vision was the same.

Whales

The sperm whale could swallow a man. It grows to a length of 60 feet and has an enormous head, which amounts to about half its bulk and a third of its length. Its throat is broad enough to allow it to swallow a man. The sperm whale is found chiefly in southern waters, and in considerable numbers in the vicinity of New Zealand. Occasionally, though, it is met with as far north as the Arctic. One of a number of important points that distinguish it from other whales is that it had teeth. The throat of most varieties of whales are comparatively small—not more than four or five inches across.

Colored Electric Wires

The color employed in the electrical wiring of a house is utilized to identify the wires and thus distinguish the polarity. If one wire is grounded the wiring rules require that it be the white wire. In a three-wire installation this is the neutral wire, so that the black wire may be either positive or negative. The white wire is taken to the screw shell of all sockets. Single-pole switches are inserted in the black wire. In cities where single fusing of branch circuits is permitted the fuse is inserted in the black or underground wire.

Swiss Observatory to Be Largest in World

Four thousand feet up in the Swiss Alps, on the crest of Mount Saleve, near Geneva, the construction of what is claimed will be the world's largest observatory has begun.

To fulfill such a lofty aim is not a simple task, and four years will be needed to complete the giant structure at a cost of £400,000.

Besides being the world's largest observatory, it will possess the largest telescope in the world, even surpassing the famous reflector telescope of Mount Wilson observatory, which weighs over 100 tons, and has brought into view 3,000,000,000 stars that were hitherto invisible. A meteorological and earthquake-recording observatory, as well as an extensive research laboratory, will be included. A powerful wireless station, permitting communication with nearly all parts of the world, will be installed.

QUESTION OF TIRES

Hubby—When a tired business man has to wait this long for his dinner it's enough to make him go up in the air!

Wife (sweetly)—Well, that would depend, of course, dear, on whether he was tired with balloon tires.

Big Game Increasing

Caribou are coming back to New Brunswick, says the chief game warden of that province of Canada. This is regarded as a testimony to the protective methods employed by the guides, who are more and more coming to be regarded as ex-officio wardens, and who are well aware that the best means of protecting their livelihood is to see that hunting of big game is not carried to excess. A further indication of the development of hunting in the province is given in the figures of moose and deer shot in 1924. Five hundred more moose and 1,500 more deer were killed in 1924 than in 1923, the record being 1,511 moose and 3,898 deer in 1924.

Jungle Investigation

Courses in the natural science of the tropics are to be carried on in the jungles themselves during the coming summer by the University of Pittsburgh. The tropical research station of the New York Zoological society, located at Kartabo, British Guiana, has been turned over to the university for several years. The main work will be carried on during the summer months, but a permanent custodian has been stationed at the laboratory, so that it will be available at any time. A group of fifteen students, under Prof. S. H. Williams of the department of zoology, plans to leave Pittsburgh in June.

Will Care for Pigeons

Thousands of pigeons that for years have made their home on top of Madison Square garden, in New York, will soon have to look for new quarters, for the historic building is to be torn down. They are as free as the air; neither the garden management nor the city owns them. The Society for the Prevention of Cruelty to Animals, which is housed in a building opposite the main entrance to the garden, announces that it will feed the pigeons and may erect a shelter and a drinking fountain for them.—Youth's Companion.

Shrewd Stenographers

Stenographers out of jobs in Munich, Germany, have found a source of revenue in the local cemeteries. It is their custom to attend all funerals and take down the words of the officiating clergyman. These they transcribe neatly on mourning paper with a black border, and then offer their work to the relatives of the person buried. In almost every case the relatives buy not only the first transcript, but often order a considerable number of carbon copies.

Many Ailments Cured by Diet of Grapes

A diet of grapes has taken its place among the treatments recommended for various ailments. The grape treatment is recommended for obesity, various stomach troubles, chronic bronchitis and some chest affections. There are several places in Europe to which patients go during the grape season for treatment. At first sight the treatment would appear to be an exceedingly attractive one, since it consists merely in living largely on these luscious fruits. In practice, however, most people find the reverse the case, for after a time a constant diet of grapes palls on the appetite, and people taking the cure are frequently heard to say that they come to hate the very sight of them.

The patients generally begin with a few large, luscious grapes by way of dessert at the end of their meal. But during the four to six weeks which is the general length of the cure, the weight of the grapes is gradually increased until the individual may be eating as much as eight pounds a day, with little or no other food.

In the more ordinary cases, however, when in full swing, the treatment is generally a pound or a little more of grapes three times a day, from half to one hour before meals.

Brigand of Balkans Modern Robin Hood

Brigandage is still a profitable profession in the Balkans, but its practice presents pitfalls to the novice. Not only has the brigand of the Near East to face the dangers inseparable from armed lawlessness, but he has to observe a rigid code of professional etiquette.

This was shown when a Greek ex-cabinet minister was captured by brigands near Saloniki. He offered all the money in his possession to the chief of the robber band. But the latter indignantly refused to accept it.

"We are brigands, not thieves!" he exclaimed.

When the ransom arrived, part of it was returned to the ex-minister to drink the health of his captors. This, it was explained, was the invariable custom of the "best brigands."

The robber chief in this episode claims to be a sort of Robin Hood. He told his prisoner that part of the proceeds of his brigandage was set aside to give money to the poor and provide dowries for penniless girls. He also seemed to be of a religious bent—like the brigands who captured the late Lord Muncaster and his party in 1870, and took them to church on Sunday.

The Best Judge

The trust and dependence which characterized Rev. Doctor Smith's attitude towards his wife's judgment in all practical affairs were sometimes touching, but occasionally they were amusing.

"I am sorry you have been troubled with the toothache," said the family dentist, when Doctor Smith appeared in his office one day. "I gave you the first minute I had free after receiving your wife's telephone message. Let's see, which tooth is it that's troubling you?"

"It's not aching just at present," said Doctor Smith after a moment's hesitation, during which he made a cautious investigation with his tongue. "Didn't Mrs. Smith mention to you which tooth it was? I always rely on her in such matters."

His Language

In a little town in Tennessee Brother Mac is trustee of the school, director of the local bank and a pillar in the church. He is especially noted for his avaricious tendencies.

On the night when the congregation were to hear the annual report of the officers of the church, Brother Mac had dropped off to sleep during the sermon. His wife noticed him asleep while the secretary and treasurer was reading his report. She touched him just as the officer was saying, "Leaving a cash balance in the treasury of $126.30."

Upon hearing this, Brother Mac arose and said: "Mr. Chairman, I make a motion we declare a dividend of 6 per cent."—Forbes Magazine.

For the Poor

A party of minstrels went to a country town and advertised a performance for "the benefit of the poor, tickets being reduced to sixpence." The hall was crammed full.

The next morning a committee for the poor called upon the treasurer of the concern for the amount the company had netted. The treasurer expressed great astonishment at the demand.

"I thought," said the chairman of the committee, "you advertised this concert for the benefit of the poor?"

The treasurer replied: "Didn't we put the tickets down to sixpence so that the poor could all come?"—Royal Magazine.

Superstitious Fancies

Like the southern colored doughboy, who, during the World war, wore a special make of garters, because the manufacturer guaranteed that "no metal can touch you," many people carry good luck charms, sometimes with real conviction, sometimes with excuses to avert the arrows of destiny. Popular opinion may even change as to the good or bad omen of some charm. Opal, for instance, was a good-luck charm for many years, until Walter Scott, in one of his novels, attributed bad luck to the opal.

Receipt books on sale at News office.

Childrens exercises will be given Sunday evening at Coburntown church.

Eugene Harmon, of Angola, is spending his vacation here in the meat market.

Lee Burgette and family at New Haven, were Sunday guests of Wm. Miller and wife.

Ralph Sechler and family visited the past few days with Mrs. Sechler's parents, Mr. and Mrs. J. K. P. Martindale at Greenfield

Sunday School 9:30.

Morning sermon by the pastor.

Prayermeeting Thursday evening.

S. D. Steffey, Pastor.

Christian Church Notes

Bible School at 9:30, communion service immediately following.

The Poet's Conditions

Wherever snow falls or water flows or birds fly, wherever day and night meet in twilight, wherever the blue heaven is hung by clouds or sown with stars, wherever are forms with transparent boundaries, wherever are outlets into celestial space. . . . there is beauty, plenteous as rain, shed for thee, and though thou shouldst walk the world over, thou shalt not be able to find a condition inopportune or ignoble.—Emerson.

In Glory

A school of whales was disporting in mid-Atlantic when a Zeppelin flew low overhead. The widowed whale mother looked aloft and then exclaimed, with deep emotion: "Look, children, look! There goes your sainted father."

Fruit to Be Avoided

The fruit of the choke cherry is generally inedible, although now and then a large-fruited variety is found that is fit for eating. The leaves of the common choke cherry contain prussic acid and both fresh and wilted leaves are poisonous.

Fish's Scales Unchanged

The number of scales on any fish is the same throughout its existence. As the fish grows so do the scales in proportion.—New York Herald-Tribune.

Free Demonstration! Wednesday, June 10

Seven persons out of every ten have some form of foot trouble. It may be weak or broken-down arches, weak ankles, corns, callouses or bunions or probably a case of tired, aching, painful feet. Regardless of what may be the nature of your suffering, you will find quick and permanent relief, this week, at our Foot Comfort Department.

Foot Comfort Expert to Serve You

For the benefit of all foot sufferers, this store has arranged with The Scholl Mfg. Co., for the services of one of Dr. Scholl's most skilled demonstrators, who will be at our store to give free foot comfort demonstrations on above date. Every foot sufferer should take advantage of this exceptional opportunity.

Free Pedo-graph Picture Made of Your Feet

In a few seconds' time, without removing the hose, he can make a photographic print of your foot that positively shows if you do have foot troubles and to what stage the trouble has progressed. This service is absolutely free and places you under no obligation whatever

FREE SAMPLES

Do you want to know how to stop corns hurting instantly? Come in and get a sample of Dr. Scholl's Zino-pads. They remove the cause of corns, friction and pressure. Thin, antiseptic, healing.

Bring your foot troubles to this store during this demonstration and learn the true meaning of foot comfort.

Legion Picnic On July Fourth

At the meeting of the Legion, Monday evening at Auburn, plans were started for a county celebration on July 4th., at the Dills grove, one mile south of St. Joe. John Crothers was made local chairman. The day will be a real celebration with sports, speeches, boating, fishing, bathing and a basket dinner at the noon hour. More definite announcements will be made later as the committee desires. Leon Kees is the advertising man.

The ladies joined in a potluck supper Monday evening. All members of local legion will meet Friday evening at the Town Hall at 7:30, to attend to matters of importance.

Dr. Price and wife were Fort Wayne visitors, Monday.

Mrs. Vina Fish went to Hicksville Tuesday morning for a few days visit with her sister, Mrs. Calvin Coburn.

Ed Miser and wife attended Memorial services at Waterloo Saturday afternoon and Dr Price and wife and Mrs. Arline Koch attended the services at Scipio Sunday afternoon.

Charley Koch and wife entertained at supper Saturday evening, Stanley Koch and wife and Mrs Fannie Beams of Fort Wayne, Jerry Klopfenstine and wife of Grabill, F. L Beams and family, La Verne Rhoades and Joseph Koch of Spencerville. C. R. Price and wife were Sunday supper guests.

The Blue Bird Says

No man's land. Any barber shop nowadays.

American women spend 70 million dollars a year on cosmetics. What a few scents here and there will amount to!

The girls are now going to rouge their ears. Well, that's about the only way they can make them red nowadays.

Whipping posts are suggested for careless motorists. Why not sentence them to 30 days as pedestrians?

Nowadays a young lady must pretend not to know anything. Some of 'em don't have to pretend.

Most backsliders don't have far to slide.

It's no sign just because a girl is engaged to a man that she has to marry him—he may back out.

Many breweries are now making ice. But they are not cutting very much nowadays.

Why adopt English as the universal language? Very few of us now speak it, anyway.

One reason why lightning doesn't strike twice in the same place: It don't have to.

and to meet your Plumbing demands. In starting this enterprise, we ask for a share of your patronage.

Ridgway & Freeburn

Phone 64-B ST. JOE, IND.

Mr. and Mrs. F. H. Langley are spending the week in Chicago.

Vera Adams, of near Grabill, is in the Tope home for a few days.

Lester Pugsley and family spent Saturday visiting Butler relatives.

Mrs. Belle Harmon of Ft. Wayne is visiting her daughter, Mrs. Chas. Rice.

Real money saving prices prevail at Coolidge store. See our local ads in this issue.

The Misses Ida Kinsey and Freda Martin, began work Monday morning at the Auburn Auto.

Homer Woodcox of Fort Wayne spent Saturday and Sunday here with his parents, Chas. Woodcox and wife.

Master Dicky Jordan came Saturday morning from Gartett to visit his grandparents, G. M. Barney and wife.

Abe Mason and wife, Ross Morr and wife and Mr and Mrs. Lewis of Auburn, Grover Curie and family and Durwood Ridgway and family, were among the visitors during the day Sunday at the Floyd Ridgway home.

Clyde Maurer of Fort Wayne, spent Friday night a guest of his aunt, Mrs. Anna Dilley. Saturday morning early, they in company with Mrs. Hollis Dilley left for a visit with relatives at Jolietville and Elkhart.

Mr. and Mrs. Frank Myrtle of Chicago and William Miller and family of Ligonier, were Saturday afternoon callers, and Mrs. Mary Richmondt of Pittsburgh, Pa Clyde Beard, wife and baby of Auburn, were Sunday morning callers of Wm. Randall and wife.

Verlin Saltsgaber, his mother and family of South Bend and J. E. Thorpe and wife of Toledo, were weekend guests in the Roy Koch home. Miss Hilda Koch returned to Toledo with her uncle and wife for the week.

Farrow Chix after June 15th 100 lots postpaid, Barred Rocks, S. C. Reds, Anconas, $9.50; White Rocks, Rose Reds, $10.50; Wyandottes, Buff Orp., Minorcas, $11.50; White or Brown Leghorns, $8.50. Free catalog. D. T. Farrow, Chickeries, Indianapolis, Indiana. 23t4p

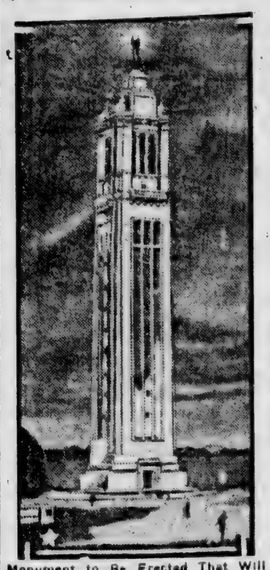
Maxwell Touring Car, 1923, new paint, in A-1 condition, can make attractrive price for quick sale. St. Joe Garage.

Chimes in Tower of World War Memorial

Beauty to eye and ear is embodied in a carillon tower designed as a memorial to the sacrifices and ideals of the American people during the World war. Containing 54 bells said to be able to produce 270 tones, the monument is to be erected in Washington by the National Carillon association at



Monument to Be Erected That Will Have Bells in Tower for Playing Chimes.

a cost of $3,000,000. Columns near the top of the tower will provide openings so that the chimes may be heard at a considerable distance. It is planned to have masters in carillon performance give concerts on the set at appropriate occasions.—Popular Mechanics Magazine.

Memorials Worthy of America's Great

Strikingly in contrast are the two memorials by the banks of the Potomac to two great American Presidents. The tall shaft which expresses the nation's tribute to George Washington is wholly different from the lower, square, temple-like memorial to Abraham Lincoln a short distance to the west. Each is a perfect example of its style. Each is a complete expression of the nation's thought.

The Washington obelisk rises high above all other structures in the capital. It is simple, pure and stately. It dominates the landscape. For many miles it is visible, the first mark of Washington, the city. It is of a form that in the ancient days was adopted to perpetuate the fame of the rulers of Egypt, a classic type, geometrically perfect, architecturally complete.

The Lincoln memorial could not have been effective if similar to its loftier neighbor. There could be no second tall shaft without lessening the significance of each.

Between Lincoln and Washington stretched a space of 64 years, from the end of the former's term to the beginning of the latter's, a little less than the space that has elapsed since Lincoln's death to this day. Thus in a way the Lincoln memorial marks the midpoint of the national career to the present from the first administration under the Constitution.

Other memorials will doubtless arise to the great men of the nation who have rendered valuable services, but none will be more eloquent than these two.

Day of Peace

On Memorial day the republic honors the memory of its heroes of three wars. Yet the day is distinctly a day of peace. We are grateful for peace, and we are grateful to the men who died to assure us peace with liberty and honor.

Patriotic Lesson

As long as the graves of our soldier dead are so cherished by the nation as to claim a day set apart for their decoration in a spirit of proper gratitude and reverence, there need be little fear that a life spent for the country is spent in vain.

"The Spirit of '61"

Charles S. Stone, fifer, and George R. Merrill, drummer, members of the same fife and drum corps in the Civil war, still whooping it up on the same instruments. They both live in Boston, and are seventy-nine years of age.

Slats' Diary
By Ross Farquahr

Friday—I'm offa Jane for life this time after the way she went an treeted me last nite. I just happened to aksidently pass by her house on my way home frum the grocery and I stops and tawked to her for a minit & she sed. Wood you like to take a nice long walk and I sed You bet I wood. An she replyed and sed. Well dont let me keep you from doing it

Sat.—Up to the city today pa and ma and Ant Emmy includeing me went to the Art Musyeum. And when we cum to the Statchew of Venus the Milo they had a sine on it witch sed. Hands off Ant Emmy sed they must think fokes is dum and that enny body with a eye in there hed cud see that.

Sunday—A lady witch cum to call this afternoon was a tawking about her brother whom she sed has got a falsetto voice. Ant Emmy sed Well she had a falsetto upper teeth. I gess pa thot it was a joke for he pipes in and says. I gotta by my wife a Fall setto furs.

Monday—Jake and me tryed to bum out to Unkel Hens farm today and they was a fellow drove up in a big tooren car and he slowed up & sed Is you fellows tired of walking and we sed yes you bet we are and he laffed and sed Well why dont you set down and rest a wile. And drove on.

Tuesday—Teacher is very ongrateful. Today she give me a grade of forty in langwidge. Even after I had loned her my nife to sharpen her pensill.

Wensday—I was danceing with Elsy this evning and she told me if I was tired danceing I mite get on her other ft. for a wile. Done with her to.

Thirsday—went down town with pa and ma and they got to quarling and pa sed Well dont less fuss here on the st. Ats what I say. What a they got a nice home for.

NEWVILLE

George Strong and wife are the parents of twins, a boy and a girl We understand that Mrs. Strong is quite poorly, we wish her a successful recovery.

C. O. Berry and family, including two married daughters, all of near Auburn, were Sunday guests of Samuel Stafford and wife.

Mrs. Bessie Shaffer and two sons were Butler visitors, Thursday.

Mack Hatch, who has been employed at Lansing, Michigan, spent Saturday at home. Mrs. Hatch has been ill but is improved.

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co., Otsego, Mich.

Dr. Brunson is making an ideal farm home just north of Newville, which helps the looks of the Newville road in that locality.

Memorial Day was observed in an appropriate way. The Rev. Clickner, pastor of the U. B. church, gave the address. The children decorated the graves in a beautiful manner. A large crowd was in attendance, but only two veterans of the Civil War were present, Elijah Inhofe, of Butler and John Miller, of Newville.

STOUT PERSONS incline to full feeling after eating, gassy pains, constipation *Relieved and digestion improved by* **CHAMBERLAIN'S TABLETS** Cleansing and comforting - only 25c

You'r not safe with any amount of money or valuable papers about the home.

Put it in our bank where it's insured against loss.

Come in and let us talk it over with you.

Farmers' & Merchants' State Bank

Spencerville, Ind.

See Furnish for Batteries.

Frank Brown and wife are now occupying the George Rex property they recently purchased.

Mrs Hugh Traxler and daughter, spent a few days last week at Millburn, Ohio, with the former's sister, Mrs. A. C. Koeppe.

FOR SALE: Chevrolet 1922, driven less than 5,000 miles, in fine condition, cheap for quick sale. St. Joe Garage.

Mack Richmond and wife went to Hicksville Friday evening to get their little daughter who has been cared for by Mrs. Snyder, the nurse who cared for them during the fever epidemic, and they found the little Miss making herself at home, quite well and happy.

Notice of Feed!

Will have supply of Chicken feed, Dairy feed, Hog feed, Bran Middlings, Hominy, Oil Meal, Laying Mash. Now have shelled corn, cracked corn, cracked wheat, corn and oat chop, oyster shells and tankage.

Farmers Co-operative Mg. Co.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

HALL'S CATARRH MEDICINE consists of an Ointment, which Quickly Relieves the catarrhal inflammation, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces, thus restoring normal conditions.

Sold by druggists for over 40 Years.
F. J. Cheney & Co., Toledo, Ohio.

Corn Time!

The new McCormick-Deering Corn plows and planters are the thing just now. Our sales have been large the past two weeks which is evident of the Quality and Price of these Corn Machines. Come in and look over the list of those who have already purchased.

A sensational price on Heavy Galvanized Iron Chicken Coops at ..... **$1.50 each**

Chicken Feeders and Waterers, most any kind and size at right prices.

Bulk Garden Seeds, Arsenate of Lead are all timely needs now. Hand Sprayers, many different kinds, low priced but high quality.

What do you think? For 5 days we were clear out of Florence Oil Stoves, but now have a new shipment in, and we are maintaining the old price despite the recent advance. Get our Florence price, you will be convinced then.

A real Time Payment Plan on the Horton Electric.

Screen doors, wire and all accessories.

Acme Quality Paint, Turpentine, Oil, Varnish Etc. The name explains all.

A large quantity of Eclipse and Van Camp ball-bearing Lawn Mowers, priced right—see them.

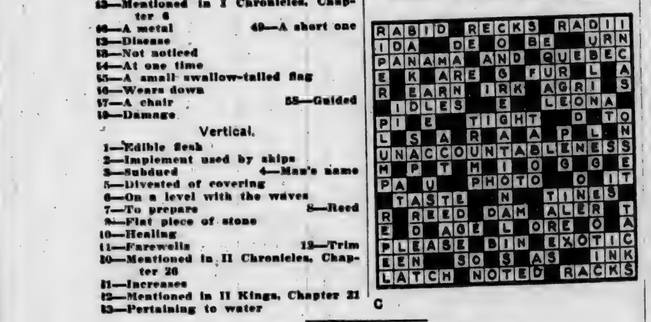
The solution will appear in next issue.

Solution of Last Week's Puzzle.



C

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

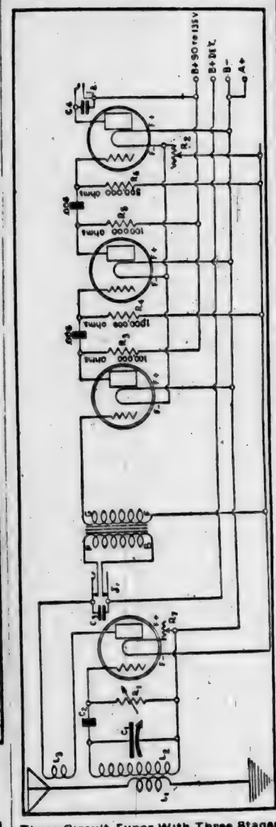
RADIO

By BREWSTER LEE,
in Radio World.

One of the favorite combinations of audio-frequency amplification with fans who are strong for volume and quality embodies one stage of transformer coupling and two stages of resistance coupling. The advantage of this type of audio-amplification is that there is an all-sufficient voltage step-up in the first stage, and when the signal is further amplified this is accompanied without sacrifice of quality.

The volume is all that anyone could ask. Especially when a type of loud-speaker is used that reveals the slightest trace of distortion, this audio hookup will function without offending the speaker's sensibilities.

Used with the popular 3-circuit tuner this combination of audio-amplification is eminently satisfactory. The resistances used in the audio stages are designated in ohms in the wiring diagram. R4 and R6 are grid leaks, and you may have the 1 megohm leak R4 around the house, also the .5 megohm grid leak R6. R3 and R5 are .1 megohm.



Three-Circuit Tuner With Three Stages Audio-Frequency Amplification.

Coils for the Set.

The vario-coupler L1L2L3 may be a standard 3-circuit coupler, tuned by C1, a .005 mfd. variable condenser, normally 23 plates. Use vernier for the condenser dial. A coupler may be constructed at home by winding L1L2 on a 3½" diameter tubing 4" high, using No. 20 double silk covered wire. The primary L1 consists of 10 turns. Right next to it, as close as possible, wind 43 turns for the secondary. The tickler, L3, may be spider-web, Lorenz or any other form of winding, consisting of 28 turns of No. 26 single silk covered wire on a 2¾" diameter form 2½" high. Lorenz (basket weave) winding may be used throughout, with the same mean diameters preserved, with larger wire used only for L1 and L2. No. 18 double cotton covered wire is good for this purpose. The tickler should have finer wire, as previously described. But when the larger wire is used for L1L2, add four more turns than those specified. I used a solenoid, the Ara Tri-Tuner.

Other Parts in Set.

The grid condenser C2 is of the fixed type, .00025 mfd. capacity. R1 is a variable grid leak, connected from the grid post of the detector tube socket to the filament plus post of that socket, which means, in this case, to "A" battery positive. C3 is a fixed condenser, .001 mfd., used as a by-pass. J1 is a double-circuit jack. J2 is a single-circuit jack. The wiring diagram may be used for employing this system of audio-amplification on any set, either the detector tube or crystal.

R7 is a 15-ohm rheostat for UV201A or C301A tubes, or 20 ohms for the Sodion tube. If the Sodion is used the grid return of this tube should be to the negative and the detector tube rheostat be placed in the negative lead, instead of the positive. This holds true also for the UV200 and C300 tubes. The audio tubes should be UV201A or C301A, although WD11 or WD12 tubes, as well as UV199 and C299, may be used throughout with somewhat less volume.

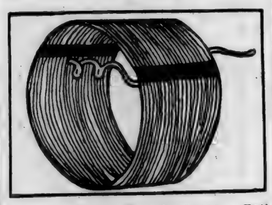
Rheostats to Use.

In the audio part of the circuit C4, .001 mfd. fixed condenser, is optional. The coupling condensers are .006 mfd., as designated. One rheostat, 6 ohms, designated R2, controls all three audio tubes. Thus when one desires to listen on ear-phones only the three audio tubes may be turned off by means of the rheostat R2.

Low Loss Space-Wound Coil Gives Results

The following is a description of a coil having very low electrical losses and sufficient mechanical strength to enable it to be used under the most rigid conditions. This coil eliminates two undesirable features found in other popular low loss coils, viz., the danger of short-circuiting turns as in the "basket-weave" type and the high distributed capacity as found in the "pickle-bottle" type.

Any size wire between No. 12 and 20 will be satisfactory for winding the coil. However, it is recommended that No. 16 or 18 be used if possible. Obtain a bottle whose diameter is equal to that of the coil to be constructed. From a piece of gum paper tape cut out three strips 5-16 inch wide and approximately three times as long as the finished coil is to be. Several rubber bands will come in handy here to hold the tape strips on the bottle while the wire is being wound on.



Efficient Form of Inductance. Coil Space-Wound, Self-Supporting.

The turns should be spaced by a string which is wound on along with the wire. Ordinary wrapping twine will be satisfactory for the smaller wire, but something bigger should be used for the larger sizes. When the correct number of turns have been wound on, fasten the end of the wire by another rubber band and remove the string. Apply a thick coat of collodion on the wire over the tape strip. Allow this to dry and put on a second thin coat. Moisten the tape not covered by the wire and collodion and press down while it is still sticky. When this dries, break the bottle and remove the completed coil.—Radio News.

Allow Liberal Spacing When Laying Out a Set

When laying out a radio set liberal spacing should be allowed between the units. There should be at least 1½ inches between tubes and amplifying transformers. This will leave about a six-inch separation between the tubes, center to center. All wires should be as short and direct as possible, especially those leading to the grid and to the plates. The return leads in the grid circuit of each amplifier tube should run from the transformer secondary to the negative terminal of the "A" battery. This method of connection places a negative bias on the grid, due to a drop in voltage in the resistance of the rheostat. This permits the use of higher plate voltage, which results in better amplification without the use of "C" batteries. Connecting the cores of the audio-amplifying transformers to the ground binding post or negative terminal of the "A" battery will help to minimize howls and increase signal strength. The effectiveness of this scheme depends upon the type of transformers. The circuit generally gives more satisfactory results if the first amplifying transformer has a higher ratio than that of the second amplifying transformer. Jacks can be used in an audio amplifier circuit so that the detector can be used alone or the detector and one stage. It is not a good plan to employ jacks in a radio frequency circuit.

When Wiring May Be Cause of Distortion

Distortion in audio-frequency amplifiers is frequently the result of undesirable coupling between the input and output leads of the transformers and tubes. This condition may be manifest by a high pitched whistle or squeal, or may even be present in an oscillation that is above the limit of audible vibration.

When the audio-frequency side of the set oscillates in this manner, full amplification cannot be obtained, and what does occur is badly distorted. The trouble may be overcome by several methods, one of which will be successful in nearly all cases. The filament side of the set may be grounded, which will have the effect sometimes of stopping the oscillation. Another method is to reverse the leads to the primary of the first transformer.

These remedies will be unnecessary if the transformers are well separated and kept out of magnetic relation. The wire connections should be shortened to an absolute minimum.

Causes of Noises

Noises that continue in the set after the aerial has been disconnected may be caused by imperfect contact in the phone cord which becomes frayed with use, imperfect connections to the storage battery, worn-out dry-cells, and dirty contacts.

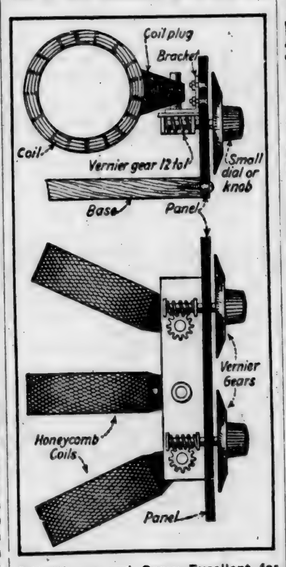
Mounting That Is Very Easily Made

Three-Coil Variable Any Experimenter Can Build; It Is Satisfactory.

One of the most difficult instruments to construct so that it will operate smoothly and have a fine control is a three-coil variable mounting. In the sketch is shown a mounting that any experimenter may make, which should be satisfactory.

The vernier gears shown are taken from a discarded mandolin or may be purchased at a hardware store. The sub-panel that the gears are mounted upon is of bakelite or hard rubber and should be about four inches in length. The two brackets that hold this sub-panel to the panel of the set are made of brass strips ¼ inch wide and 1-16 inch thick.

The first operation in the construction of this mounting is to drill the



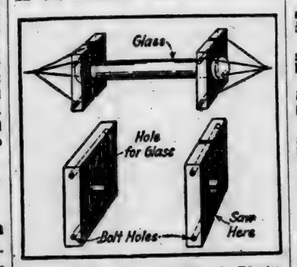
Odd Worms and Gears Excellent for Coil Mounting.

sub-panel as shown. Dimensions will not be given here as they depend upon the type of gears used and also the type of coils. However, a precaution might be mentioned. Be careful in drilling the sub-panel to keep the drill at right angles to the sub-panel so that the shafts of the gears will run true. As may be seen in the sketches, the worm parts of the gearing system are attached to the dials of the set.

Attaching the coils to the gears may be done in any number of ways. The simplest is to drill a hole in the standard mounting that comes with the coils of such a size that they may be fastened securely to the vertical shafts of the gears. It will be found that this system of mounting honeycomb or spider-web coils is one of the best that has yet been tried.—Radio News.

Glass Antenna Can Be Made of Towel Rods

A cheap and efficient antenna insulator can be easily made as shown in the sketch. Procure glass towel rods, which may be purchased at any plumbing establishment, about 15 inches in length. Two blocks of wood for each insulator 5 inches square and ¾ inch thick are drilled as follows: In the middle of the block a hole



Antenna Insulator Made of Blocks of Wood and Glass Rod.

slightly smaller than the rod and through the block perpendicular to the large hole two holes large enough to take a ¼-inch bolt ¾ inch from the top and bottom of the block. The blocks are then sawed in half through the three holes. The glass rod is placed between the two halves of a block and fastened there by tightening the bolts through the small holes. The supporting wires of the antenna may be fastened to the bolts.—Radio News.

When and How to Add Water to "A" Battery

If water is added to the storage "A" battery when it is nearly discharged, it is likely to run out of the vents in the filler caps when the battery reaches full charge. This is due to the quantity of bubbles which form in the solution and greatly increase its bulk.

In most batteries, the separators between the plates extend up above the level of the top edge of the plates so that it is only necessary to keep the acid solution just above the separators. Water can be added after the battery is fully charged.

Just Wanted to Keep Promise to the Bairn

Judge Joseph Sabath, of Chicago, said recently that the increase in divorce is not necessarily a bad sign, but may be, on the contrary, a sign that woman, more emancipated now, insists more on a square deal.

"I have presided over 10,000 divorce cases," Judge Sabath said at a luncheon, "and I have seen more than one husband who was as impossible as Wully Dugan.

"Wully, just before Christmas, attended a performance given by an illusionist. The illusionist put a woman in a cabinet, shut the doors, then opened them again—and behold, the woman had disappeared, and in her place was a green parrot.

"Wully buttonholed the illusionist after the performance and said to him:

" 'Mon, could ye do that trick if ma wife was put in yer box?'

" 'Aha,' the illusionist laughed, 'so you want to get rid of your wife, do you?'

" 'Weel,' said Wully, 'it's not so much that, ye ken, but I promised the bairn a green parrot for Christmas.' "
—Detroit Free Press.

Old Clock That Has History of Interest

The achievement of an officer of the British admiralty hydrographic department in restarting an ancient clock which had been unused for nearly 200 years sheds light on a long-forgotten romance.

The clock was the invention of John Harrison, the self-taught son of a Yorkshire carpenter, and it gained for him the government prize of $100,000 offered for a ship's chronometer which would accurately indicate longitude.

Comprising more than 500 parts, this remarkable clock weighs more than 100 pounds, and took two years to construct. Accurately, it is a clock within a clock, the lesser clock keeping time for four minutes only, when it is automatically rewound by the bigger clock, which itself requires to be wound once daily.

Another clock by Harrison, an eight-day wooden timepiece, is still working in the Patent museum at South Kensington.

Die at Heine's Grave

Heine, famous German poet, lies buried in Montmartre cemetery. His tomb is the mecca of many love-sick French people. Police records show that every year at least twenty suicides are committed at his grave by unlucky lovers. This year, the number having exceeded the usual average, the police have decided to station a policeman at the grave to prevent young people from taking their lives there.

Luxurious Tourist Camp

One of the most unusual motor tourist camps in the country, known as "Campo Grande," is located near El Paso, Texas, and is constructed along Indian mission lines of architecture. The picturesque entrance is so constructed as to accommodate stores and shops, with a gas and oil station in the center. There is also a restaurant, drug store, bakery and curio shop. Inside the camp is a large recreation hall and office, a laundry, public shower baths, cooking places and ample park space for guests. The recreation hall is fitted with writing desks and cozy lounging corners, and the tourists hold dances there thrice weekly.

Cartier, the Pioneer

The first effort to cultivate the soil of Canada was made by the discoverer, Jacques Cartier, who, in 1541, had an acre of land cleared near where Quebec now stands, and had it planted with turnips, cabbage and lettuce seeds. The first public garden was Adiam's garden in Halifax, N. S., established in 1753. The present public gardens in Halifax are the pride of the city and the admiration of all visitors.

Mythological Goddess

In mythology, "Bellona" was the wife of Mars and the goddess of war. Her parents were called Bellonarii. On the 24th of March, Bellona's day, her votaries hacked themselves with knives and drank the blood of their sacrifices.

Burial "Rehearsal"

Charles V of Spain shortly before his death had the full burial service read over him. The death knell was tolled and monks chanted the requiem.

Genuine BAYER ASPIRIN

Say "Bayer Aspirin"

INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

How to build up your Weight

TO BE under weight often proves low fighting-power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood-cells, you begin to become plus. That's why S. S. S., since 1826, has meant to thousands of underweight men and women, a plus in their strength. Your body fills to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them.

Free Booklet
Send name and address to S. S. S. Co., 111 S. S. S. Bldg., Atlanta, Ga., for special booklet on the Blood.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

S.S.S. The World's Best Blood Medicine

Schools of Philosophy

The Academic School of Philosophy was a school of philosophy founded by Plato the Athenian (B. C. 429-347), and so named because his lectures were delivered in the "academy," or groves of Academus, near Athens. It comprised of the Old academy, which consisted of Plato and his immediate disciples; the Second or Middle academy, led by Arcesilaus; and the New academy, or sceptical school of Carneades. Platonic doctrines, as taught by Philo and Antiochus respectively, are often spoken of as the Fourth and Fifth academies.—Kansas City Star.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder medicine.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Expensive Cup of Coffee

The first cup of coffee made in France was drunk by Louis XIV about 280 years ago. The price then was about $25 a pound.

Vitamins Grown in Our Gardens

Advantages of Vegetables for Family Needs and Likes Are Many.

(Prepared by the United States Department of Agriculture.)

Closely associated in our minds with the vitamins they supply are the vegetables that can be grown in almost any home garden—spinach, cabbage, lettuce, carrots, string beans, peas, rutabagas, tomatoes, all the leafy vegetables known as "greens," and many others. We also obtain necessary minerals from these vegetables—iron, calcium, phosphorus—and depend on them for bulk, or "roughage." But our first thought is apt to be—vegetables for vitamins!

Advantages of Vitamins.

The advantages of growing vitamins in our gardens are many and obvious. To begin with, there is the matter of freshness. No matter how near the market may be to the home, it is usually a long way from the farmer who produced the vegetables. Garden products that have been carried over a dusty road, and perhaps exposed for hours before they were sold, cannot be compared in desirability of flavor or condition with those just off the vine or out of the earth. The vitamin content of vegetables is also dependent to some extent upon freshness.

Again, when the vegetables are actually at hand in the garden, waiting to be gathered, the chances are that they will be used oftener, and in larger quantities, than when some one has to go to a store to get them. The price often influences the quantity bought when the housekeeper goes to market, but when she steps into her garden she is apt to bring in as much as she believes her family will consume.

The convenience of having a garden frequently leads to a beneficial change in the proportions of the family diet. Vegetables are served more abundantly because they are available, and they satisfy the craving for bulk, lessening the desire for other foods which may lack the necessary vitamins. Almost automatically the garden tends to increase the use of vegetables.

The garden must, of course, be carefully planned so that it will yield an adequate supply of the kinds of vegetables the family likes and needs, both for table use and for canning or storing. If some sort of record is kept from one year to the next to show the quantity of each vegetable grown and the use made of it, a garden budget can be eventually worked out.

Fruits Are Important.

Fresh fruits are also important sources of vitamins, and should be considered in connection with the garden plan. Many orchard fruits and berries grow well in all sections of the country, and others are best suited to certain localities. While the citrus fruits—oranges, lemons, grapefruit—are among the best sources of vitamins, Tomatoes are comparable with citrus fruits as sources of vitamins, and when the latter are lacking, tomato juice, either fresh or canned, may be used instead. It goes without saying, therefore, that it is a good thing to include tomatoes in every garden plan.

Farm Hints

Successful farming is planned; it doesn't just happen.

• • •

Don't be afraid to try something new this year, but don't try it too hard.

• • •

Sow celery seed for winter celery, and sow cabbage seed for late crop.

• • •

Heavy feeding and no exercise on Sunday is equally bad for horses and men.

• • •

Farming may not be financially so profitable but there is a "heap o' living" in it.

• • •

Better seed and better machinery are not expenses; they are productive investments

• • •

Peat is far more valuable as a place for crops to grow than as a fertilizer for upland soils.

• • •

Long rows in gardens are best. Beds suffer more from drought and are harder to cultivate.

• • •

No vegetable is easier taken care of or returns more for the labor expended upon it than asparagus

• • •

Fertilizers are plant food, not merely stimulants, and should be given in properly balanced rations.

• • •

Well made soy bean hay has about the same feeding value as alfalfa hay and one or the other should be used whenever possible.

• • •

By scientific seed breeding and selection the returns of the farmer's investment and expense can be increased more than in any other way. Much has already been accomplished.

• • •

The crop season usually demands more time than is available. Farm labor can be utilized best when definite plans are made for its use. A definite plan should be in mind for the work to be done on rainy days or during wet weather.

Choice of Tractor Depends on Needs

Several Suggestions Made to Use as a Guide.

Before buying a tractor most farmers want to know what kind will meet the need of their farms. Because of frequent requests from farmers for help in this matter the engineering staff at the New Jersey State College of Agriculture, New Brunswick, has drawn up a group of suggestions which may be used as a guide to prospective buyers

1. Choose from the ranks of those which have been tried by years of use, from the manufacturer who has a local representative with a stock of repair parts near at hand.

2. A reasonable amount of service should go with a machine of this type. See if your agent is in the habit of following up his sales to see that he has satisfied customers.

3. A belt pulley controlled by a friction clutch is usually desired. Study the size and location of this pulley.

4. A mechanical governor is very desirable for belt work.

5. At the present price of gasoline it is economical to have a tractor that will operate successfully on kerosene at any load.

6. An air cleaner is essential to long life of the engine if used in dusty fields.

7. A magneto with an impulse starter provides as nearly as possible sure ignition and ease and safety in cranking.

8. It is very important to see that the tractor hitch and implement hitch are suited to each other in height and lateral adjustment.

9. Most working parts should be inclosed, and run in oil.

10. A tractor pulling a two-bottom plow would suit most New Jersey farms on which a tractor can be profitably used. Some might need a three-bottom outfit. Only a few would require a larger one.

"Flushing" Recommended for the Breeding Ewes

Preparation for breeding is the beginning of the direct work for the harvest of lambs hoped for the next spring. The period of gestation in sheep is 147 to 150 days. The mating, therefore, should begin practically five months before the first lambs are wanted. The ewes should be gaining in condition at the time of mating. Such a condition will cause more of the ewes to come in heat quickly and to settle at the first mating, as well as a larger number of twin lambs. Changing the ewes to especially good pasture or giving a little extra feed beginning ten days before the breeding season, will serve to bring about this desired condition. This extra feeding whether from extra pasture or additional feed given, is called "flushing." It has been recommended and followed by successful shepherds for generations and carefully controlled experiments have proved that good results do follow the practice. Trim off the excess wool around dock of all ewes. Neglecting to do this is often the cause of many ewes failing to get with lamb.

Rape on Sour Soils

When land is too sour to grow clover or alfalfa, one of the best forage crops for hogs that can be grown is rape. While rape will grow on poor sour soils, it will not grow as much forage as it will on good sweet rich land; but it will most likely pay to grow some of it for hogs. It would probably make more growth if you would plow the land first, and then work it down well with a disk before sowing the rape.

Clover Improves Soil

Sweet clover is a very good crop to improve the land. That is, where sweet clover grows well. It will not do well on acid or sour soil unless the soil is limed. Better crops of grain or corn can be expected after a good crop of sweet clover. It is not difficult to get rid of sweet clover. Buckwheat is a good crop to plow under to improve the soil, but not nearly so good as sweet clover because it is not a legume.

Pears Gaining in Favor

Pears are now a year-around fruit in the market and growing slowly in favor as a fresh fruit while their popularity as a canned fruit for use in various desserts is increasing steadily. The pear has an interesting history as it invaded the United States from the northeast and southwest corners of the country in the days of the early settlers.

Get Chicks on Ground

Get the chicks out on the ground as soon as you can. Even while the weather is cool, let them have access to the grass and ground, but provide a runway so they can hurry back to the brooder stove when they get cold. Chicks will come to the heat when necessary if the runway is opened for them.

Collecting Broomsticks

This is a good time to start collecting broomsticks from all your neighbors. They are ideal stakes for heavy growing plants. Grab anything that looks like a neat stake and store it for stakes never come amiss in the growing season and usually there is a dearth of them when they are most needed. Stout stakes for tomatoes will be needed.

INDIANA STATE NEWS

Greensburg. — Modern medical science has enabled Orel McIntyre, twenty-three years old, who a year ago was committed to the state hospital for the criminally insane, to start life anew. An order for the release of McIntyre has been given by Judge John W. Craig of the Decatur Circuit court on testimony of physicians that McIntyre's mental and physical condition again was normal. After McIntyre had made a confession a year ago of starting 13 fires, causing losses of thousands of dollars, he was tried in the Decatur circuit court and found to be insane.

East Chicago.—Information furnished East Chicago police by an eleven-year-old boy involving his own father may result in clearing up the brutal murder last November of Florence Guazes, fifteen years old, whose body, the head almost severed by a razor, was found in the rear of a foundry. The boy giving the information is Steven Yasovich. According to Steven, his father, Jack Yasovich, a fifty-two-year-old laborer, came home the morning after the murder with his shirt bespotted with blood.

Portland. — A counterfeiting ring which has baffled federal officials for a year or more is believed to have been broken up with the arrest of two farm youths. William Elzeroth, sixteen years old, son of Mr. and Mrs. Samuel Elzeroth, and Ernest Gegenheimer, son of Mr. and Mrs. George Gegenheimer, were arrested near the Jay-Randolph county line. The young men arrested are believed to have passed the bad money on merchants all over the state and perhaps in adjoining states.

Indianapolis.—Parts of important state roads were closed and will remain so practically all summer to permit paving, says the state highway commission's bulletin for the week issued from the office of John D. Williams, director. Where possible through traffic is being routed over parallel state highways in preference to detours on county roads, because as a rule the county roads are not wide enough to permit the heavy two-way traffic.

Richmond.—Dr. S. Edgar Bond, coroner of Wayne county, who has been investigating the death of Landy A. Jackson, an inmate of the Eastern Hospital for the Insane at Richmond, who is said to have been fatally burned as a result of being placed in a bath of overheated water, filed the official report of his inquiry. The coroner charges that Jackson died as a result of the criminal carelessness of an attendant, Claude Williams.

Indianapolis. — Punishment which ranged from fines in some cases to prison sentences in others, with a three-year term at the Leavenworth prison as the most severe penalty, was meted out by Judge Robert C. Baltzell in federal court at Indianapolis to 22 defendants who pleaded guilty when arraigned on indictments returned by the federal grand jury a week ago.

Indianapolis.—With the arrest of two men in West Frankfort, Ill., Harry Webster, of the Webster Detective Agency, and superintendent of the Indiana Bankers' Protective association, announced that the entire gang of six, who took part in the robbery of the Farmers National bank of Wadesville, May 11, have been captured. Two men and two women were arrested in the case last week.

Indianapolis.—Thirty-five indictments were returned in Federal court by the federal grand jury to Judge Robert C. Baltzell in the third partial report, bringing charges against 37 individuals and three corporations. Eleven Indianapolis defendants were named in indictments.

Indianapolis.—Dr. J. G. Royse is back at his post as director of the venereal disease division of the state board of health at Indianapolis, following the action of the board in disapproving discharge of Doctor Royse by Dr. William F. King, secretary of the board.

Kokomo.—Mrs. Hazel M. Haynes, the wife of March Haynes, died at her home in Kokoma. Mr. Haynes, a son of Elwood Haynes, automobile inventor, now dead, is in the East undergoing treatment for a nervous condition.

Princeton, N. J.—Indianapolis has been selected as the place where the sixth annual meeting of the American Classical league will be held July 1, according to an announcement by Andrew Fleming West, dean of the graduate college of Princeton university.

Logansport. — David Thorn, age ninety-five, Logansport's oldest citizen died at his home in Logansport. Mr. Thorn is survived by the widow, age eighty-nine, a son and a daughter.

Gary.—An attempted jail delivery of 27 prisoners in the Gary city jail was frustrated when one of the group informed the authorities of the jail-break plot.

Indianapolis.—Judge Robert C. Baltzell in the United States District court dissolved the temporary injunction granted to prevent interference by officials of the miners' unions with co-operative mining projects in Indiana. The ruling, it is said, will put an end to co-operative mining in the state unless an appeal from the decision is taken.

South Bend.—The Rev. Timothy Maher, age ninety-five, postmaster of Notre Dame and for more than twenty years secretary of Notre Dame university.

TO PURCHASE LAND FOR DUNES PARK

Indianapolis.—Gov. Ed Jackson, after an official tour of the dune country of northern Indiana, announced that $200,000 will be made available at once to start purchasing part of the 3,000 acres contemplated in the Dunes park.

Prominent Chicagoans have promised $1,000,000 for the work, and Indiana has voted a tax making $2,000,000 available within ten years.

Immediate action was decided upon by Governor Jackson because it has been pointed out that industries now developing Calumet harbor soon will be spreading into the dunes and spelling the opportunity for a state park.

Indianapolis.—For the third time in 72 years Indianapolis assumed the lead in transportation terminal development, when the first large passenger bus terminal in the United States was dedicated. In 1853 Indianapolis dedicated the world's first union railroad station and in 1904 the doors of the first, and still the largest, interurban railway terminal in the world were opened. Thirty-three bus lines, operating hundreds of conveyances of all types, will use the building, which is a spacious structure in the downtown district, built to anticipate terminal needs for years.

Evansville.—The $1,000,000 suit of Mrs. James Gray and her daughter, Mrs. Margaret Gray Patterson, against W. W. Gray for an accounting of the Gray estate, will be in the limelight here again October 15, when Judge R. C. Baltzell of the United States District court will hold a hearing on the report of Charles Martindale, Indianapolis, master in chancery. Martindale, in his report, recommended to the court that the defendant personally pay to the estate approximately $750,000.

Deadwood, S. D.—Former Governor Warren T. McCray of Indiana was awarded a judgment of $12,000 in federal court against the defunct Blackhills Trust and Savings company of Deadwood. The suit arose out of the sale of cattle from the McCray ranch near Bellefourche, S. D. Former Governor McCray is serving a sentence in the federal penitentiary at Atlanta, Ga., having been convicted on charges arising out of his financial difficulties.

Anderson.—Willis E. Ellis, judge of the Madison County Superior court, sitting as special judge in the Madison Circuit court, upheld the Indiana highway act of 1919 as it applies to the Indiana highway commission in the paving and relocating of parts of State Road No. 37 from Indianapolis to Muncie via Anderson. The objections of landowners to relocating the highway were overruled.

Wabash.—James Keyes Conner, age fifty-four, son of Mr. and Mrs. Ovid Conner of this city, and for many years a resident here, died at the Wabash County hospital. He was widely known in railroad circles. At the time of his death Mr. Conner was chief engineer of the Nickel Plate and Lake Erie and Western railroads.

Terre Haute.—All coal mines in Indiana which were operated by miners or miners' locals on a co-operative basis, prior to the ruling of Robert C. Baltzell, judge of the United States court at Indianapolis, which upheld the power of the officials of the United Mine Workers to revoke the charters of members who did not cease such ventures, have closed.

Elkhart.—The Elkhart police department made the largest liquor haul in its history at the residence of Frank Calladrase. One hundred and sixty-five gallons of wine were found and destroyed. Calladrase was arrested on a charge of maintaining a liquor nuisance.

South Bend.—Mrs. E. C. Carlstlieb of South Bend, who ended her life by drinking acid following a quarrel with her husband, had inquired if her insurance policy would be paid in case of suicide. The agent told her yes. Mr. Christlieb will receive the insurance.

Valparaiso.—A tentative program for the annual reunion of the Indiana State Elks' association to be held in this city August 18, 19 and 20, is being sent to all Indiana lodges by the executive committee of Valparaiso lodge, No. 500, of which Paul E. Marks is chairman.

Columbus. — Emmett Crippen, age forty-five, for fourteen years cashier of the Farmers and Merchants' bank at Elizabethtown, died after an illness of more than a year of creeping paralysis. He was a thirty-third degree Mason.

Brazil. — The Lyons Fireproofing company's No. 2 plant at Brazil, known as the Chicago sewer pipe factory, was badly damaged by fire when some of the buildings were destroyed with a loss of $35,000, which is partly covered by insurance.

Noblesville.—The three days' conference of workers and ministers of the Western Indiana Yearly Meeting of Friends, which adjourned in this city, elected Rev. Albert Huffman of Plainfield president, and Mrs. Leslie Bond secretary-treasurer for the ensuing year.

Boonville.—George McWilliams, age fifty-nine, farmer, who lived near Lynnville, Warwick county, was killed when a team of horses became frightened and ran away, throwing him to the ground. His neck was broken.

ROAD BUILDING

SYSTEM OF PAVED ROADS NECESSARY

One of the most pressing financial problems faced by small counties is the construction of a system of highways to take care of the increased traffic demands. There are more than 17,000,000 automobiles in this country and the number is constantly increasing. This means that hard-surface paving is necessary—the sort of paving that will stand the wear and tear of automobile and truck traffic.

A system of paved roads is necessary; paved roads connecting paved roads, to furnish an adequate transportation service that will fit the business and social needs of the country. The radius of motor traffic must be lengthened; highways must be provided which will enable the use of the automobile in all communities. More improved roads are needed to help stabilize the nation's prosperity.

While the necessity for paved roads is generally recognized, there arises another question, that of financing the building of an adequate road system. Officials of small counties often are confronted with serious highway problems. Increasing traffic wears out the roads, maintenance of roads is excessive, and the assessed valuation of the communities does not warrant expenditures for a complete system of paved highways.

Many such communities have adopted a policy of building only three or four miles of pavement each year. The consistent following of such a program results eventually in a well-developed system of improved highways. The permanent nature of these improvements lowers the maintenance expense each year, thus enabling a gradually increasing mileage. Some counties have found it advisable to build single-track pavements 9 or 10 feet wide, placing the pavement strip to one side of the road, so that when traffic demands it and funds justify the expenditure, the road can be widened to full width by paving the remaining one-half.

Successful road construction requires, first, proper preparation of a foundation or subgrade. This usually calls for compacting the soil where the pavement is to be laid, and draining the roadbed so that water will not remain under the slab. Sometimes reinforcement in the form of wire fabric or steel rods is embedded. This tends to prevent slabs from cracking and aids in keeping cracks which do form from opening to any appreciable extent.

Cracks are no detriment to a road if properly filled with tar and given attention from time to time in keeping such filling in place. The cracks act as expansion joints, opening slightly in cool and closing in warm weather. They have no effect upon the wearing qualities of the pavement service.

Estimated Annual Road Cost Is $10,500,000

"If we should spend $10,500,000 annually for the next ten years, we could maintain in Kansas 6,500 miles of state roads in an acceptable manner with first class bridges and culverts included," in the opinion of Prof. L. E. Conrad, of the civil engineering department of the Kansas State Agricultural College.

"Annual expenditures come under three headings—maintenance, new construction, and surfacing," Professor Conrad explained.

"The type of road, weather conditions, and character of traffic all affect the item of maintenance. Gravel roads have a big advantage over the dirt roads for they are 365 day travel ways. An average annual maintenance appropriation for dirt roads for the whole state is $300 per mile.

"The cost of the other two items will, of course, depend upon the amount of work done. This type of work varies widely in cost. It may be from $1,000 to thousands of dollars per mile."

New Highways This Year Enough to Circle Earth

About 24,000 miles of highway, nearly enough to circle the earth, are scheduled for construction this year by the various state highway departments, reports to the bureau of public roads show. Maintenance of 217,794 miles of road also is planned.

Approximately $405,000,000 was reported available for construction and $135,000,000 for maintenance by state departments, while it was estimated that counties would spend approximately $463,000,000 for road work.

Comparison of funds available this year with those for preceding years indicated, the bureau said, that road construction would be at about the same rate as in 1924.

Useful Portable Highways

Worse than snowdrifts for blocking roadways are the great clouds of sand that whirl over the famed sandhills of Imperial county in southern California. Always after such a storm tons of sand must be removed, or a new roadway laid. Engineers are meeting the difficulty with a portable highway 18 feet wide, says Popular Science Monthly. After a severe sandstorm a truck equipped with a crane lifts up a section of the roadway, shakes it clear of sand and replaces it.

Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth.

Refreshing and beneficial!

Dirt Cheap

The late Samuel Gompers, condemning the pardon of two notorious law breakers, said one day to a Washington correspondent:

"The short time these men have served, about a tenth of their actual sentences, reminds me of a story. It's a story about a bogus oil stock millionaire who motored a friend out to his new home on Long Island. The friend gazed in awe at the vast pile.

"'Holy smoke, George,' he said 'what did this cost you?'

"'Three months is all,' answered the millionaire."

Cuticura Soap for the Complexion. Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement

Cattle Herds Decrease

America's cattle herds are rapidly shrinking, the decrease in number of head being 1,000,000 in 1924 in comparison with 1923, and a government survey shows that the decrease this year will be even greater.

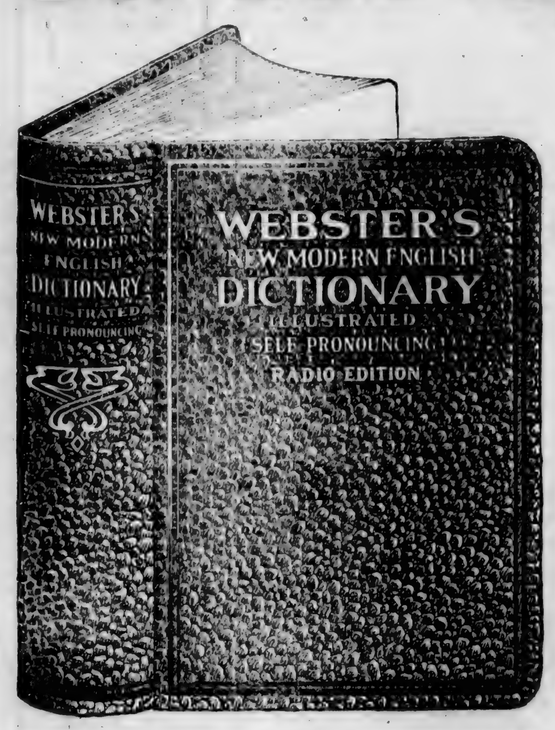
OUR EXCLUSIVE OFFER

WE HAVE made special arrangements with the publishers and have been given exclusive right for the distribution of the

WEBSTER'S New Modern English **DICTIONARY**

To the Readers of the

St. Joe News



A $4

Webster's New Modern English Dictionary for NOW ONLY

98c

and 3 Coupons

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons—the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

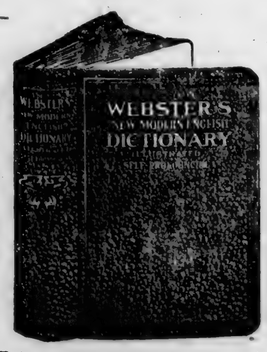
Dictionary Coupon

Clip three 3 coupons and bring to office of the

ST. JOE NEWS, St. Joe, Ind.

which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.



You can get transfer paper at News office in large or small sheets.

Civil War Fought by Boys

THE veterans of the Civil war are still fondly spoken of as "boys," "the boys in blue." Year after year for sixty years still "boys." It has become almost as specialized as a designation of the soldiers of the Civil war, as senator, as alderman. As age was supposed to mean wisdom, the highest legislative body of old was at first actually and later theoretically, at least, composed of old men. Senator, alderman, means simply, old man.

So the boys in blue, who were only boys when in that blue, have stayed boys in affectionate address ever since, says the Manchester Union. No succeeding war has carried that entitlement. In current conversation we hear the soldiers of the World war spoken of as "soldiers," "legionnaires," even as "veterans." But seldom indeed as "boys." Just why is this? How did the soldiers of the Civil war gain and keep the name "boys"?

Because they were boys, boys as the soldiers of none of our other wars were. That war was fought by boys. When the officer addressed them as "boys" he spoke a literal fact. When the general before a charge cried "boys" he addressed a body that might have been assembled from school and college yards, and were so assembled. There were majors and colonels under twenty. Charles Stoughton was colonel of a Vermont cavalry regiment at seventeen! Boys they were and boys they remained in name and spirit and are still.

There has always been a strange unaccountableness in the buoyancy of spirit of the soldier of the Civil war. It was the last great war that was also a great spectacle, fought over an immense territory, with imposing marches, immense rides, and it caught the imagination as modern wars do not. The dash of cavalry, the charge with the colors, has gone. The Civil war was a great sporting event, fought by boys with the high spirits that they would have fought a football game.

Animosity Forgotten

Still facing each other—but not in battle as they fought years ago in the Civil war—Maj. R. S. Anderson and Maj. James A. Abbott, doorkeepers at the senate, who have been faithful at their posts for more than a quarter of a century. Major Abbott, fighting for the Blue, and Major Anderson the Gray, faced each other at the Battle of Petersburg, Va. Now they are loyal friends and the old contention has been fogotten.

No Sectional Feeling in the Nation Today

There are days in America to celebrate and days to observe. One does not think of Memorial day as a time for celebration. Neither should it be given over to sadness because those for whom it has been set apart are the soldiers who have gone on to the greater adventure—to their final reward.

Memorial day in America came into being as a tribute to the men and the women who had made it possible for the Stars and Stripes to wave over all the land. It was a time for flowers to be strewn upon the graves of the fallen and in the waters that ran down into the sea, in memory of the sailors who lost their lives in the Civil war; it was a time for addresses and ceremonies, through which the memory might be kept green and the rising generation instructed in the debt owed those who had gone before. The time came when the old sectional bitterness passed, when the country reunited in spirit as well as in form. Then it was that the graves of the Confederate dead, whether in the North or the South, also received floral tokens. Across the years the sections joined hands, love in their hearts instead of hate; love of deeds of bravery and sacrifice, whether made in the cause that triumphed or the cause that failed.

Notice Of Sale Of Bonds

Notice is hereby given that the Trustee of Concord School Township DeKalb County, Indiana, will offer for sale to the highest bidder $30,000.00 par value of the bonds of the said Concord School Township, at the hour of ten o'clock A. M. on the 27th. day of June, 1925 at the school house in the town of St. Joe, said DeKalb County, Indiana. Said bonds to be for the aggregate sum of $30,000 00 and shall bear interest at the rate of four and one half per cent per annum, payable semi-annually to be issued in thirty series; each series shall consist of two bonds numbered one and two; each bond shall be for $500 00; series number one shall be due on the 1st. day of July, 1925; series numbered two shall be due on the 1st. day of January, 1927, and one series shall fall due each six months thereafter until all have been fully paid. Said bonds shall be sold for not less than par and accrued interest at the date of sale.

The said Trustee hereby reserves the right to reject any and all bids.

FRANK L. MILLIMAN,
Trustee of Concord Tp.

Notice Of Sale Of Contract

Notice is hereby given that the Trustee of Concord School Township will receive bids for the construction of a new school house in the town of St. Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A. M. on the 27th day of June 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St. J e, DeKalb county, Indiana, on the 27th day of June 1925, at 10 o'clock A. M. of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said Trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township Trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township Trustee reserved the right to reject any and all bids Dated this 29th. day of May 1925

FRANK L. MILLIMAN.

Notice Of Guardian's Sale Of Real Estate

In the Matter of the Guardianship of Emma J Bearss; Mildred Caw, Guardian.

By virtue of an order of the DeKalb Circuit Court, the undersigned, Guardian of Emma J. Bearss, a person of u sound mind, will at the Court House in the town of Auburn, DeKalb county, Indiana, on Monday the 15th. day of June, 1925, at the hour of ten o'clock A. M. (and from day to day thereafter until sold) offer at private sale, for not less than its full appraised value, certain real estate belonging to said Ward, described as follows, to-wit:—

The northwest quarter (¼) of the northeast quarter (¼) of section twenty-four (24,) township thirty-three (33,) range thirteen (13) east and containing forty (40) acres more or less.

Said sale will be made subject to the approval of said court and on the following terms and conditions, to-wit:—CASH and free and discharged from all liens.

MILDRED CAW,
Guardian

Jenkins & Jenkins,
Attorneys for Guardian.

George Wilson and family were Sunday guests of D. D. Burley.

Notice Of Commissioners Sale Of Real Estate

State of Indiana
County of DeKalb
In the DeKalb Circuit Court
May Term 1925
In Partition
Cause No. 13364

Edward Pflaumer, Executor of the Last Will and Testament of Emillus Case, deceased.
vs
William Hollabaugh et al.

Notice is hereby given, that the undersigned Commissioners, appointed in an action for partition in the DeKalb Circuit Court wherein Edward Pflaumer, Executor of the Last Will and Testament of Emillus Case, deceased, is plaintiff, and, William Hollabaugh et al are defendants for the partition of certain real estate therein described and for the sale of the said real estate described in the said complaint in said cause, that we, as such Commissioners, will on the 19th day of June, 1925, at the Law Office of Springer & Campbell at Butler, DeKalb County, Indiana, at 1 o'clock P. M. on said date, offer for sale at not less than the full appraised value and at private sale and in the tracts herein after designated, the following described real estate in DeKalb County, State of Indiana, to-wit:

Tract No. One (1):

The east half (½) of the northeast quarter (¼) of section twenty-eight (28,) township thirty-three (33) north, range fourteen (14) east.

Tract No. Two (2):

The northeast quarter (¼) of the southeast quarter (¼) of section twenty-one (21), township thirty-three (33) north, range fourteen (14) east.

Also the southeast quarter (¼) of the northeast quarter (¼) of section twenty-one (21,) township thirty-three (33) north, range fourteen (14) east.

The said real estate to be sold pursuant to an order of the DeKalb Circuit Court and upon the following terms and conditions to-wit: At least one third of the purchase price cash in hand, one third in six months and one third in twelve months, all deferred payments to be evidenced by notes of the purchasers, waiving relief from valuation and appraisement laws, with attorney fees and payable at a bank and in all respects fully negotiable, and, the said notes so given as and for such deferred payments to be secured by a first mortgage upon the said real estate, executed by the purchaser with his or her respective spouse joining therein said notes to bear interest at six per cent per annum from date.

Said sale will be subject to the approval of the DeKalb Circuit Court and the said real estate will be offered for sale on the date above set out and from day to day thereafter until a suitable bid is received, the said Commissioners reserving the right to reject any and all bids; the purchaser to have the right to pay the entire purchase price in cash without discount.

Said sale will be made of said real estate subject to all rights of tenants having out crops and further subject to the current taxes for 1925 due in 1926, which the purchaser shall assume in the sale of the real estate.

Dated this the 18th day of May, 1925. Henry C. Springer and Charles S. Smith, Commissioners.

M21-28J4

New Animal Snare

A rubber compound has been marketed by a firm in Singapore which when heated and spread on a board will ensnare any bird, insect or beast of reasonable size, once it steps on it, exactly as the modern fly paper catches the fly. The product has aroused the interest of inhabitants in those sections where it is necessary to fortify the home or camp against wild animals and insects which are pests.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JUNE 11, 1925 | NO. 24

Preparing For the State Convention

At a meeting of the executive board of the DeKalb County Council of Religious Education Thursday night, delegates to the coming State Convention, to be held at Winona Lake on June 16, 17 and 18, were allotted to each of the fifteen townships in the county. Allotments were made in proportion to Sunday School enrollment, interest in Sunday School work and ability to meet the allotment. They were made as follows: Union, 50; Keyser, 35; Richland, 35; Concord, 20; Grant, 20; Jackson, 20; Smithfield 20; Wilmington, 12; Spencer, 12; Butler, 12; Newville, 10; Troy, 6; Fairfield, 6; Franklin, 4 and Stafford, 2. These numbers are supposed to be the minimum sent from each township, and each township is allowed as many more as they can send

It is asked that only delegates be sent who will be of real help to their school on their return. Especially are the superintendents and pastors urged to go. The railroads are giving a fare and a half rates, to those delegates who have a certificate from the county. Either F. B Leighty of St. Joe, or Miss Sadie Coy of Auburn, can furnish these certificates The trip can be made over the Pennsylvania from Fort Wayne, leaving there at 11:50 A. M. and at 12:55 P. M. Also they can leave over the P. C. C. & St. L. from Auburn at 8:42. This route, however, entails a three hour lay over at Columbia City.

There is no question but what DeKalb county will have between two and three hundred delegates to this convention, and the county officers are bending every effort to get those who really should attend to the meeting

Home Coming Meeting

Citizens who are interested in the Home Coming for St. Joe this fall, are asked to meet at the Town Hall Friday night at 7:30 to assist in making plans for the annual event.

Ed Miser, President.

County Agent Repp To Become Florist

The selection of an agricultural agent for DeKalb county will in all probability be made (today) Thursday, June 11th. A meeting of the county board of education which is composed of the township trustees and the president of the school board in each town and city in the county has been called for that day. Mr Repp resigned this month and will move to Attica, Indiana, where he has purchased a greenhouse.

Spring Fever Epidemic

Place-Wetzel June Nuptial

The marriage of Miss Lucy Place daughter of Mr. and Mrs. George Place of east of Coburn's Corners to Harry Wetzel took place Saturday afternoon at 2:30 o'clock at the Baptist parsonage at Coldwater, Michigan, in a single ring ceremony performed by the Rev. E. A. Kelford of Coldwater.

Following their marriage Mr. and Mrs. Wetzel were guests of the former's sister and husband in Coldwater, returning to Auburn Sunday evening. Mr. Wetzel is a son of John Wetzel who resides near the Woodlawn cemetery, Auburn. The bride, until her marriage, was employed at the Globe-Superior Corporation in Auburn. The newlyweds will make their home with the groom's father.

Merchants Organize For Weekly Concert

There being no interference with the electric lights, next Saturday night the band concert will begin proper at 8 o'clock and last for one hour. At a meeting of the business men some week ago, Ed Leighty was chosen president and Wm. Curie, treasurer. The concerts will continue for sixteen nights The band has new recruits and are making a splendid showing for the summer. Besides the merchants standing the financial burden of the concerts, solicitors have been appointed as follows to get contributions from those living in the territory allotted.

Ed Miser from Lutheran church east including Widney avenue.

J. L Rhodenbaugh, Lutheran church west to Spencerville street.

M. H. Andress, west of Spencerville street and east on north side of Main street to Fourth street.

Wm. Randall, Fourth street east and Hamburg.

Piano Tuning and Repairing.

By experienced workman, with factory recommendations. Work satisfactory or no pay. Phone your order to News office. 23t2p

Farmers!

Those who take their Cream to the Swift Co. Cream Station once—Come again—Why? Service and Results. Dollars are what count. You are entitled to all there is in your cream.

Elmer Bachelor, Operator.
St. Joe, Indiana.

We will serve suppers or dinners for clubs and class meetings with a few hours notice. Cochran's Restaurant.

Northern Indiana C. E. Meeting

The seventh annual convention of the northeastern district of the Christian Endeavor Union, comprising the counties of DeKalb, Steuben, Noble and LaGrange opened it's sessions in the Auburn First Presbyterian church with a caucus meeting last Friday afternoon at 3 o'clock. The convention was in session until Sunday.

Officers for the year were placed in nomination at the afternoon meeting and in the evening they were elected. The officers named were as follows:

President, Lee Nelson, Shipshewanna.

First vice president, Waldo Hamman, Waterloo

Second vice president, Lucile Curie, St. Joe.

Secretary, Gladys Weaver, Shipshewanna.

Treasurer, Katherine Hursh, Spencerville.

Pastor-counselor, Rev. Howard Morgan, Auburn.

Departmental superintendent, Gladys Schermerhorn, Howe.

Missionary, Lillian Steffey, Spencerville.

Quiet Hour and Truth Legion, Harold Jones, Angola.

Social and Introduction, Dorothy Keller, Kendallville.

Citizenship, Rev. D. D. Corl, Pleasant Lake.

Efficiency, Gladys Stanner, Howe

In spite of the heat the evening meeting was well attended Friday A big delegation from Spencerville and a large number of Garrett young people were present and the meeting was enthusiastic.

The Misses Dorothy Ginther and Lucile Curie were St. Joe delegates.

News to Issue Early on Monday

The News will be published on Monday next week to allow the editor and wife to attend the State Sunday School Convention at Winona Lake. All news matter should be sent in this week to insure publication.

We bake special orders of any kind if order is phoned or sent to Cochran's Home Bakery.

Friends here will regret to hear of the death of Mrs. Emma Bearss which occurred at Logansport. Burial was made Sunday at Marion.

Herman Reasoner of Spencerville, has sold his retail radio interests to Merritt Barney and has accepted a position with Nussbaum Electric Co., of Fort Wayne as manager of their radio department. They are distributors for Kennedy receivers for the north half of the state. Merritt has taken the Kennedy agency and will carry the full line of receivers and accessories.

St. Joe To Get Some Gas-Tax Money

Lewis S. Bowman, auditor of state, under whose supervision collection of the gasoline tax is carried on, sent out letters Thursday to county auditors throughout the state asking for a list of incorporated cities and towns. This list is to enable this office to make an intelligent estimate of the amount of "gas" tax money to be distributed March 1, 1926, under the new 2-cent gasoline tax law. The new law provides that the proceeds from ½ cent will be distributed to the incorporated cities and towns on a per capita basis.

In answering the letter, County Auditor Frank Shook listed eight towns and cities, as follows: Auburn, Garrett, Butler, Waterloo, St. Joe, Corunna, Altona and Ashley.

Wolff Remonstrance Over-ruled

Early in the spring, Emanuel Ulm and others filed a petition for the change of highway. Viewers were appointed to investigate the petition The petition called for the road at the S. S Wolff Corners and south to the Wabash, be closed and that it be located on the east side of the Wabash. A remonstrance was filed by Mr. Wolff against the closing of the road, which delayed the action of the commissioners until Monday of this week, when they over-ruled and ordered the highway opened as petitioned for and kept in repair and also ordered the closing of a highway described in the petition

Mr. Wolff will still protest the action of the board and do all he can to stop the orders.

Curie-Jump Wedding Solemnized Saturday

Mr. and Mrs. Frank Curie announce the marriage of their eldest daughter, Kathryn to Perry Jump, which occurred Saturday afternoon at four o'clock at the Lutheran parsonage at Spencerville by the Rev. S. D Steffey. After a quiet wedding supper the young couple drove directly to their own furnished home on a farm four and a half miles southeast of Woodburn.

Catherine is a graduate of the St. Joe High School and for some years has been employed as telephone operator here and Auburn. Her many friends extend congratulations.

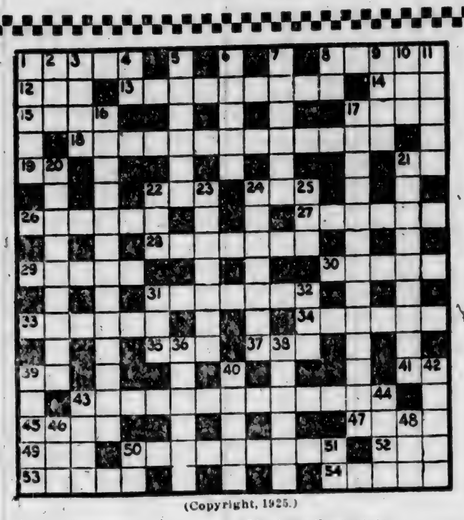
CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

1—Frequently
8—Sharp, shrill barks
12—An enemy
13—Pertaining to strata of the Tertiar) era
14—Not in
15—Man's name shortened
17—A unit of a book
18—Went to pieces
19—Prefix meaning "again"
21—Part of the verb "to be"
22—Skill 24—Fuss
26—A youth beloved by Venus
27—Dispensing
28—The highest prelate in a country
29—Residue after burning
30—To unite 31—Illness 33—Old
34—Followers of Arius
35—Bond 37—An insect
39—Part of the verb "to be"
41—Affix indicating doer
43—Rendered unable 45—Excited
47—Ovule from which plant grows
49—To convert into leather
50—Fiddling play
52—A beverage
53—To wipe out 54—Daggers

Vertical.

1—To tender 2—Preposition
3—Golf term 4—Negative
5—The victor 6—Presages
7—Was afraid
8—Plural personal pronoun
9—Burden 10—A small dog
11—Parts of plants
16—Depriving of heritage
17—Characteristics
20—The albumen of a seed
21—The state of not being informed
23—A variety of serpent
25—Desirous of a drink
24—A southern state
25—A poem 31—Dampness
32—To consume
36—To fill with dismay
38—Observing
39—A child's marble 40—Bitter
42—To travel on horseback
43—A central state
44—High-priced
46—A fish with spearlike mouth
48—A large deer
50—Prefix meaning "down"
51—Abbreviation for issue

The solution will appear in next issue.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Money Didn't Figure in This Transaction

Two old friends who had not seen each other for a long time met on Broadway. After they had exchanged greetings, one of them confided that things were breaking pretty well for him.

"I just sold my dog for $100,000," he added.

"You don't mean to tell me you got $100,000 for a dog?" protested the other.

"Absolutely," said the first one. "A rich oil man bought him and paid me on the spot."

His companion looked at him in amazement for a moment and then said: "You can do me a great favor. I need $2,000—my wife is in the hospital and an operation may save her life. If you got $100,000 for your dog, you can surely spare $2,000—especially to an old friend and for an operation."

"Sorry, old pal," said the other, "but I can't do it."

"But I thought you said the oil man paid you for your dog."

"He did, but I can't loan you $2,000. You see, he paid me with two $50,000 cats."—New York Evening World.

Experts at Work on New Potato Species

The homely Irish potato may soon lose its simplicity and adopt sophisticated foreign manners if experiments now being conducted by the United States Department of Agriculture succeed, according to a bulletin issued by the department.

Agricultural explorers have brought from the high Andes of Colombia and Peru rare varieties of potatoes that have a flesh as yellow as butter and a delicious nutty flavor. The tubers are a little smaller than the North American variety. Experts of the department now are engaged in crossing the new Andean potato with the common "spud." It is hoped that new forms will be developed that will combine the flavor and color of the Peruvian potato with the size and reliability of the North American tuber and one that will be readily adaptable to the climate of the United States.

Ariadne

Ariadne, the daughter of Leo I., was married to Zeno, who succeeded as emperor of the east in A. D. 474. She was so disgusted with the intemperance of her husband and so much in love with Anastasius, a man of obscure origin, that she shut Zeno, when intoxicated, into a sepulcher, where he was left to die, and her favorite, Anastasius, was placed on the throne. Her death took place in the year 515.—Chicago Journal.

Short Sessions Held by British Lawmakers

Parliaments come and parliaments go. Some are long and some are short, but the shortest parliament in English history was summoned to September 30, 1399, for the purpose of deposing Richard II, and was dissolved the same day after fulfilling this task. The parliament which Charles I summoned in 1625 failed to please the exacting monarch, and was dismissed after five months, whilst the Barebones parliament, named after one of its members, lasted a similar period. The parliament of 1701 lasted a month longer. The briefest parliament in recent times was the one elected under Gladstone's premiership in December, 1885, and which lasted only until July, 1886. The shortest since then was a parliament lately dissolved at the instance of Ramsay Macdonald.

Oil for Beauty

Attaining and keeping a beautiful complexion is simple enough, after all. Just take a dip in the surf every morning, and then massage your face with coconut oil.

That's what the dusky ladies of the Tongan islands in the South seas do, and they have complexions "unrivaled by any race in the world," according to W. C. McKern, anthropologist, who spoke recently at Milwaukee. Every woman carries a can of coconut oil with her just as the flapper here carries her vanity case, he said.

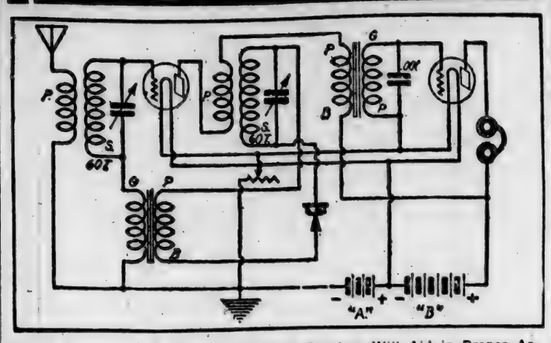
Vital Question

"I want a girl who will love me for myself alone." "What do you mean by that line of patter?" demanded the damsel addressed. "That you are never gonna spend any money on her?"—Louisville Courier-Journal.

Health in Lounging

The custom of oriental women of reclining on the floor on cushions or lying on couches, instead of sitting erect on chairs, often has a beneficial effect on the health, according to one eminent health specialist.

RADIO



Wiring Diagram of the Two-Tube Reflex Receiver Will Aid in Proper Arrangement of the Apparatus.

By JAMES E. CARTIER,
In New York Herald-Tribune.

The construction of seemingly difficult multi-tube radio receivers seems to have been the stumbling block of many amateur builders. For this reason the home constructor has been inclined to build sets along simpler lines. Although a two-tube receiver does not seem capable of receiving signals like one of its bigger brothers it is surprising just what results may be obtained with such a set if properly constructed.

The Air Service two-tube reflex receiver employing the well known Harkness circuit seems to be one of reasonably simple design. The list of parts for the construction of this receiver is as follows:

7 by 12-inch panel.
7 by 11-inch baseboard.
Two standard sockets.
Two audio-frequency transformers.
One rheostat (six ohm).
Battery switch.
Crystal detector.
Double circuit jack.
Single circuit jack.
Set of six binding posts.
Two .00037 mfd. condensers.
Two radio-frequency transformers.

Of the above-mentioned parts the two radio-frequency transformers may be easily constructed by the handy radio builder, or may be bought in kit form ready to assemble.

Coil-Winding Data.

For the benefit of those who desire to construct their own radio-frequency transformers the data will be given herein.

The secondary of both of the coupling transformers is the first to be wound on the tube form. The secondary of the transformer coupled to the antenna circuit should have 60 turns of No. 24 wire, wound on a 2¾-inch form, and over this should be wrapped a sheet of insulating cloth or waxed paper. This serves as an insulator between the primary and secondary coils. The primary should consist of ten turns of the same size wire wound over the insulation cloth and in the same direction as the secondary. It is absolutely necessary that both coils be wound in the same direction if best results are to be had.

The primary of the second coupling transformer is slightly different in size. This transformer is wound on the same diameter tube and assumes the same physical proportions as the transformer just described, the chief difference being that the primary consists of 32 turns instead of 10.

In order to make it possible for the set to be mounted in as small a space as possible the coupling coils may be mounted directly on the back of the condensers with the secondary wires connected to the two terminals. The primary wires should be left disconnected until the set is to be wired. Then they may be connected to the respective places in the circuit.

The two transformers should be mounted at right angles to each other in order to minimize coupling between the two.

The drilling of the panel and the wiring of the set is no more difficult than the ordinary simple regenerative receiver. The wiring diagram, as shown, will aid the constructor in the proper arrangement of the apparatus.

Will Not Oscillate.

A particular advantage of this receiver is that it will neither oscillate nor radiate an interfering wave on the air. One of the tubes employed in the receiver acts as a radio-frequency amplifier and is reflexed so as it acts as a radio and audio-frequency amplifier at the same time, or in other words, does double duty. The detecting is accomplished by means of a simple crystal detector.

Such a simple receiver, although seemingly small in size, ought to be capable of receiving many stations, both local and distant with sufficient volume to operate a loud speaker.

Either loop or outdoor antenna may be used on such a reflex receiver, although the latter will give better results on distant stations.

Mounting the Apparatus.

The two variable condensers are mounted on the extreme ends of the panel with the rheostat and crystal detector in the middle. This arrangement allows the operator to control the set with ease, all controls being within easy reach.

When wiring the amplifier best results will be obtained by having the audio-frequency transformers placed at right angles to each other. This does away with the possibility of howling.

Particular care should be exercised in wiring the system. Make sure the wires are as short and direct as possible. In no case should the grid wires come near a plate wire. If it is found necessary to cross grid and plate wires there should be at least an inch between them and in no case should they run parallel.

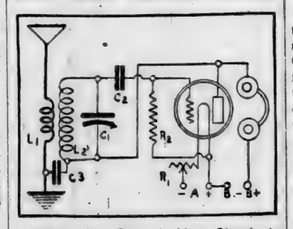
This circuit will operate equally well with any of the standard hard amplifying tubes now on the market. The 201A and 301A are particularly recommended. Best results should be obtained when using a plate voltage of about 90 volts.

The set has been found to have the quality of being quite selective. If a good grade of crystal detector is employed very little adjustment will be necessary.

Particular stress should be made on the point that the performance of the set depends largely on the wiring. Wires in the radio-frequency circuit, especially the plate and grid wires, should not be run parallel. If these points are observed the builder ought not to have any difficulty in making the set operate well under favorable conditions.

One-Tube Set That Will Give Surprising Volume

Here's a mighty efficient little one-tube set that will give surprising volume and will step out and get distance that will astonish you. It has but one dial, something that will appeal to the feminine portion of the household which sometimes has difficulty in fathoming the mysteries of the extra dials found on many sets. It is easily constructed and calls for parts that can be found in any radio store. Careful construction and good



Has But One Dial; Is Very Simple to Operate.

parts, of course, are essential to success.

The tuning coil can be made at home by anyone of average skill. It is wound on a 3½-inch tube, 4 inches long. The primary (L1) consists of 12 turns of No. 22 dcc. wire. Half an inch away from the primary wind a secondary (L2) of 47 turns of the same size wire. C1 is a variable condenser of .0005 capacity, preferably low-loss. C2 is a .00025 grid condenser and C3 is a .001 fixed condenser. Regeneration is controlled mainly by the rheostat. This hook-up could be used very nicely in a portable set, as it will work effectively with dry-cell tubes.

Important Things to Remember in Soldering

When soldering connecting wires to the terminals of jacks for making connections to the telephones, it is important to keep soldering flux from running down on the insulating segments which separate the different spring contacts. If the flux runs down into the insulating segments it causes leakage, and it is to this that many experimenters owe the trouble they have with their homemade sets. Use only enough flux for the solder to take hold. A thin film is enough. Another point to remember is to be sure that the contacts make and break properly when the wiring of the set is completed. Sometimes they get bent out of position slightly and do not touch properly; it may never be discovered and the new set may never work right.

Advice on Hook-Ups for Builders of Radio Sets

In attempting to try out some new hook-up the fan often makes connections rather hurriedly with any scraps of wire that may be left over from some previous experimental work. Frequently one or two connections in the circuit hooked up in this way are so poor that they affect the working of the circuit.

If you have much experimenting to do, it is wise to cut a number of pieces of wire, varying in length, and solder clips on the ends. Then when you want to make up a new circuit it is easy to clip the wires on where they belong with the assurance that all connections are tight.

To Heat Filament of Vacuum Tubes

Batteries Only Practical Method of Supplying Required Current.

Batteries have proven the only practical method of supplying the current to heat the filaments of vacuum tubes for radio receiving sets. Various attempts have been made from time to time to utilize ordinary commercial electric current for this purpose, but complicated and expensive apparatus was necessary to smooth out the fluctuations and pulsations, an essential requirement for quiet reception.

Some method must be used to replace the energy taken from the battery. Dry cell batteries are replaced by fresh ones. In storage batteries the energy can be replaced by sending a current through the battery in the opposite direction.

The ordinary source of household current available for this purpose is alternating current which consists of impulses alternately in one direction and then in the other, reversing in direction sixty times each second. To use this current to charge a battery the impulses that flow in the opposite direction must be checked or converted so that the current flowing through the battery is in one direction only.

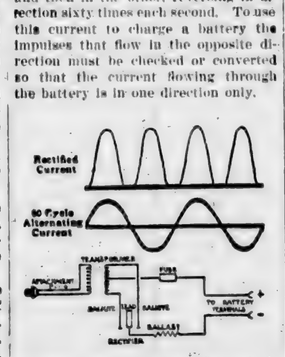


Diagram Showing How Current Is Rectified.

A common method is a vibrating device built to make contact that allows the current to pass sixty times a second in one direction and to break contact while the current flows in the opposite direction. The timing in chargers of this kind must be synchronized absolutely with the alternations or reversals in direction of current flow.

This type of charger requires attention from time to time to adjust the contacts and occasionally replace them when worn out. Many times trouble is experienced with sticking contacts which will cause the battery to discharge during the charging process.

Another method is the use of an evacuated bulb containing two elements. A filament is kept heated and and the other element is not heated. Current will flow from the hot element to the cold electrode but not in the reverse direction. This type of charger needs no attention save for the replacement of the bulb if the filament becomes worn out or broken.

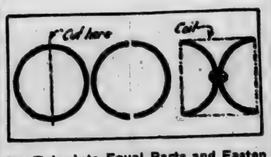
Both the vibrating type charger and the bulb type make a certain amount of noise, due to the vibrator in the first case, and to the movement of the transformer luminations in the second type of charger, which makes a hum while the charger is in operation.

The electrolytic type of charger makes use of the fact when certain pairs of dissimilar metals are immersed in electrolyte they allow current to flow in one direction only. Common examples use a lead and an aluminum rod immersed in a solution of borax and water for charging storage "B" batteries.

The diagram shows how the current is rectified. In the case of the vibrating and bulb type of chargers the lower half of the 60-cycle wave is cut off, thus allowing only the upper half to go through the battery. Obviously these chargers are only working half of the time. By using the electrolytic type of charger both sides of the wave are changed into pulsations that will produce a unidirectional current, suitable for charging. As there are no moving parts, the charger is noiseless in operation and requires no adjustments or replacements.

Information on Winding Form for Square Coils

The experimentally inclined radio fan can make ready use of the coil winding form illustrated herewith. The resultant coil will have a square form of perfect shape and offers another type of coil for measurement. The constructional details of the winding form are simple and the form itself is not difficult to construct. It is adaptable to all sizes and the material for its construction is readily obtained.



Cut Tube Into Equal Parts and Fasten as Shown.

To construct the form follow the directions. The sides of the square are equal to the diameter of the tube. The length of the coil is governed by the length of the tube before it is cut. Cut the tube into two equal parts and fasten as shown. The winding form is completed.

PART THREE—Continued.

—14—

Croft deemed it expedient to wait for Babooma to attack. To attempt a return with these tired men risked meeting the enemy in the interstices of the forest, where open fighting would be impossible. Given at last the excuse, he determined to take no avoidable chances in attempting the extermination of the growing menace to the prosperity of the tribe. He therefore inspected their weapons, arming those who had forgotten sword, spear or arrow; afterward, with Roowa as adjutant, he posted part of his little army round the tent, and issued directions. A few men were sent in search of fresh fruits along the north of the forest. Alan busying himself with the remainder in strengthening the hut and palisade. With the revolver, loaded with its one remaining bullet, in her belt, Barbara found her time fully occupied with the problem of preparing sufficient food for these uninvited guests. Suddenly she started from her peaceful employment, and her cheeks blanched. A shrill cry of fear had sounded beyond the garden. . . . Another arose, yet another. . . . She hurried out of the hut, meeting Alan running from the landward end of the palisade, where he had been working. Outside the seaward entrance, a group of natives clustered together, chattering excitedly, staring at some far point in the sky. At sight of Croft, their agitation increased.

"A-aa! a-aa! Great Chief, behold!" they cried, pointing upward. "See! A great bird approacheth. Hearken to the sound of his wings, the cry of his wrath! A-aa! A bird of ill omen, O Mighty Chief!" They began to wail and moan, striking their breasts. Others joined them, taking up the cry: "A bird of ill omen! A-aa! a-aa! A bird of ill omen, O Mighty Chief!"

He shaded his eyes with his hands, searching the dazzling blue.

Suddenly his arms fell to his sides, and he turned to the girl.

"By G—d! It's an airplane! Coming this way, too!".

He called to Roowa. "Go, Roowa! run! Take fire to the beacon upon the hill! Make it to blaze fast and high! Go—swift as the lightning flash—!"

Far off, the noise of her engines, but faintly audible, the unmistakable outline of an airplane showed at a great height, flying toward the island from the north.

The natives, forgetting all instructions, clustered together, full of superstitious terror. The women and children left the garden and huddled near their men; a few moaning, the rest silent from fear of this new Unknown.

Alan's fingers gripped Barbara's arm, and they ran down to the shore. With faces pale and tense, they stood there motionless, their hearts racing chaotically, their eyes fixed upon the speck growing ever larger, looming nearer and nearer. . . . The distant drone of the engines became louder. . . . From the hilltop a column of smoke rose into the clear air; soon a leaping flame mingled with it . . . another shot up higher . . . As the machine whirred, loudly and swiftly, to within a few hundred yards, still flying high, the pile of sticks and leaves, branches and undergrowth—quickly dried in the afternoon sun—burned, and roared, and leaped, the red tongues of fire and billowing smoke showing clear against the blue of sea and sky.

"Will they see it?" muttered Alan.

He waved wildly; but the airplane flew serenely on, skirting the island toward the west.

"D—n them!" he ejaculated. "They must see that fire!"

Barbara held her breath, every nerve taut. But as the strain seemed to reach breaking point, the machine slackened speed. With sudden cessation of noise, her engines were shut off, and she came swiftly down in large circles until low over the water; then she turned and flew slowly back outside the barrier reef. Turning again, she rose a little, flying up toward the beacon—then round again, and back to the reef.

Alan could recognize her now for a seaplane. Seeing two figures upon her, once more he waved, shouting vociferously. . . . With a graceful swoop down, again she turned, sinking lower and lower; until at last she rested upon the calm waters of the lagoon, and came skimming lightly toward the shore. . . .

A silence of horror had fallen upon the natives. Some dropped on their knees or flung themselves on their faces, not daring to look seaward; others stood still as death, their glittering eyes never wavering from the figure of their white chief, their hands grasping their weapons—ready at a word to dash forward, with their blood-curdling yells, to his aid. . . . Then one or two rubbed their eyes, as if unable to see aright. . . . The white chief was wading out, unarmed, into the rippling wavelets, to meet the awful bird of ill omen. . . . They looked fearfully at one another; then held their breath. . . . He had returned to land. . . . Two queer figures enveloped in much clothing, with fearsome goggle eyes protruding from their heads, were descending from between the vast wings. . . . The white chief and his wife were talking, laughing, wringing their hands again and again. . . . But lo! the huge eyes fell from those faces. . . . The natives lifted up their voices in a howl of fear. . . .

Down by the water, a babel of English and French voices, torrents of questions pouring forth in both languages, the replies unheeded in the mutual relief, surprise and excitement! The two Frenchmen mixed both tongues indiscriminately, shaking the Englishman's hands again and again, kissing those of the girl in their demonstrative exuberance.

They had, it transpired, been swept from their bearings in a thunder storm, having accepted a bet to fly from Anierica to Honolulu, thence to Australia, in their small seaplane. While endeavoring to recapture their route between the two latter places, faced with engine trouble, they had perceived the beacon flaring below. . . . They introduced themselves—Philippe and Louis de Borceau, thirsting for adventure to enliven the monotony of post-war existence.

Advancing a few steps Croft addressed the bewildered natives in words whose utter unintelligibility caused the two strangers to gaze at him, then at the girl, an uneasy suspicion rising in their minds that the Englishman's brain had softened. However, a relief was obvious among the group of blacks, and a murmur of voices broke forth. . . .

Croft returned, and further explanations were given. Bit by bit the excited Frenchmen grasped the main facts of this extraordinary situation.

"Votre nom?" cried the elder. "En route to l'Australie, you tell us? But I remember—dites-moi—quick—your name, M'sieu?"

Upon hearing it, the little Frenchman danced.

"Ciel! I remember!" cried Louis. "All de vorld was interested! It was thought you all perish. But you and —" He paused. He glanced at Barbara, at the hand which, instinctively, she had clasped round Alan's arm. . . .

And in that pause, something cold and clammy seemed to clutch the girl's heart, causing her to grip closer the arm she held.

Alan put his hand over hers.

"My wife," he said very clearly.

The world had thrown a shadow across the perfect blue.

Proud of their home, they led their guests thither for food, when the seaplane had been safely beached. There during the meal, they explained the native trouble. The idea of fighting anything or anybody thrilled both these adventurous young men:

"Vat guns have you?" they asked. "vat ammunitions?"

When informed of the lack of firearms, and shown the bows, arrows, spears and crossed wooden swords, they sat and gasped. The weapons, no less than the hut, with its many ingenious devices for use and comfort, aroused their keenest interest.

"Eh! But it is a leetle paradise!" cried Philippe. "Vat you call 'cosay?' All ze chairs! And a table! And ze flowers!" He turned to Barbara, when Alan went out to restore order among the natives. "You have turned ze wilderness into home, Madame! It is dat you vill not like to leave it! Oui?"

She looked around the familiar room she loved so well, out through the doorway to the black figures in the garden, which had been such a pride—and again she felt her heart contract.

The shadowy outside world had once more become a tangible reality.

VII

The engine trouble proved more serious than the Frenchmen had anticipated. Any idea of a dash to civilization for succor was abandoned. Until the sun had set and the moon risen the three men worked upon it, Croft with the delight of a child over the return of some long-lost toy. When a short trial trip was made, he took the pilot's seat.

Another sharp spasm of pain shot through Barbara's heart, as she looked round upon the faces she knew so well. Much as rescue would mean to them both, the thought of renouncing their free life here filled her with grief. The prospect of bowing again to all the little rules making a maze of civilization chilled her. The analogy presented itself to her mind of being slowly caught up into some huge net spreading over the universe, beyond which lay this little wilderness where she had dwelt and learned to love.

Croft's instinct was to send her away to immediate safety; but that proved impossible. He conferred lengthily with the two brothers, under cover of their work together. Afterward, leaving Louis to finish, he and Philippe went indoors to pore over charts, discuss routes and conclude arrangements. When, later, the two aviators, dead tired after their adventures, were rolled in their huge coats upon the floor, he drew Barbara into their bedroom and unfolded the plans.

Should Babooma attack in the night, the Frenchmen, however zealous, would obviously fail to distinguish friends from foe. Their responsibility, therefore, would be the safeguarding of the women and children in the hut—Barbara's welfare being their special consideration.

"Should things go badly, and Babooma manage to do me in," he continued hurriedly, "trust yourself entirely to them: they know what to do and where to go. If, after all, he doesn't attack, but waits for us to move, Philippe de Borceau will take you away at daybreak and send help. His brother will stay with me."

She demurred hotly to this, unwilling to leave him in danger, protesting against being compelled to desert her post among the frightened women. The argument waxed long and heated between them. But, when Croft's mind was finally and irrevocably made up, anger and tears proved unavailing. Only by reminding her of the debt owed to another; by prevailing upon all her rising motherhood, did he at last break down her resistance.

"But my mental agonies will be worse than physical ones!" she assured him, rebelliously. "I hope Babooma attacks tonight. Then we can face him together, and know the result."

The two Frenchmen being utterly worn out, he forbore to suggest their going at once by moonlight; over which forced delay she secretly exulted.

The stillness around was intense. Now and then it was broken by the cry of a child, quickly hushed again. Within the palisade, the black forms of the men lay close to the ground, with here and there a pair of eyes watching, sentinels, between the stakes. With the two Frenchmen to protect the girl from treachery, Croft felt pretty confident over the result of any night attack. Well aware of the black chief's desires for her, he had warned De Borceau of this danger.

"If things go against us and you see me bowled over, don't wait—don't risk

A Cloud of Smoke and Crackling Flame Arose.

a moment—go!" he had insisted, "even if it means physical force!"

And De Borceau, like many another, found himself following this man's behests, with a zeal and fealty inspired solely by personality. He swore obedience to the last letter.

Laying his cheek against hers, Alan became aware, in the moonlit darkness, of the tears upon it.

"Not crying?" he whispered.

She buried her face in his shoulder, saying nothing.

"It has been very beautiful," he murmured, stroking her hair.

Then they began to plan their future—picturing the journey together to England, the greetings, the meetings with those who thought them dead. . . . And ever the man's keen eyes watched the shadowy scene without, his ears alert to every sound, as they had been on that other night long ago. . . .

Presently, as before, he leaned quickly forward. For again the faint sound of breaking twigs had reached him. . . . Again, near the outskirts of the palm grove, he had caught sight of a shadowy form.

Barbara rose with him, aware without words that the moment of desperate action was upon them; glad of it, since now she could face the danger with her man.

"I must go," he murmured.

For a moment she clung to him. "Take care!" she whispered passionately. "Oh, my dearest, do take care!"

Gently he disengaged himself, and kissed her.

"I shall be all right. Go to the women, Barbara, and keep them indoors." He hurried to the entrance; then turned back again. "Don't forget, if—Trust yourself to De Borceau if—" Not finishing the sentence she dreaded to hear, he once more turned to go.

A tiny choked exclamation escaped her lips. He looked quickly round. Swiftly, with a sudden passionate movement, he seized her in his arms, straining her fiercely to him; then, as swiftly, he released her, and she found herself alone.

* * * * * * * *

The battle waged long and furious. For a time the men hidden on the hillside, after surprising the little army wriggling down the bay, kept it fiercely engaged, away from the hut. But gradually, to the girl's strained ears the wild struggle seemed to draw nearer. . . . Presently, as she could tell by the excited yells close by, those men guarding the hut itself were attacked. . . .

The fighting blood of the Frenchmen tingled within them; they fingered their extraordinary, clumsy weapons impatient to hurl themselves out into the fray—yet instinctively submitting to their orders, realizing the wisdom of the leader who had appointed each man his task with supreme insight into detail. . . .

Soon the uproar raged round the palisade. Every now and then a crashing, ripping sound was heard, proving portions to have been burst through and trampled down. The scuffling feet, snorting breath, muttered cries, blood curdling shouts and yells, were close. . . . Penetrating the bamboo wall, came venomous spear-points and short arrow-heads, sometimes piercing the shoulders of those standing near. . . .

The women grew demented. . . . Barbara tried, unsuccessfully, to keep as many as possible in the central hut, where only the two end walls were exposed to the weapons; these points the Frenchmen guarded, ready for any onslaught. . . .

Simultaneously, with dramatic suddenness, three things happened to end the terrible period of waiting.

With a startling crash, the outer wall of the sleeping hut gave way, and in surged a fighting medley of black figures. . . . From the other side, or kitchen, a cloud of smoke and crackling flame arose. . . . The hut was on fire!

All power of restraining the women was past. As the Frenchmen dashed forward to meet the intruders on one side, and the black smoke bellied in from the other, they turned with one accord, struggled madly in their stampede for the main entrance, then streamed out—wild with terror—into the cold gray of the early dawn. . . .

At the same time, from without amid the general hubbub, one long wailing cry arose, in a mixture of native and broken English tongues—a frightened, agonized cry: "The white chief; A-aa! a-aa! The white chief! . . . The white chief! . . . A-aa! a-aa! a-aa!"

It reached the ashen-faced girl within. . . and of that alone was she conscious. The roaring flames and blinding smoke, the struggling black men and shouting stream of women, faded from her eyes. Her work was finished here, and she never hesitated. Without a backward glance, she drew the revolver from her belt and dashed outside. . . .

As she ran, gasping, up the slope she paid no heed to her own danger, was unaware of both black and white men from the hut following in the pursuit. . . . Again the dense mass ley parted before her eyes. At the same instant a spear sped through the air. Whizzing angrily past her, straight at two struggling forms, it flew with unerring judgment and buried its hideous point in the white man's back. He reeled, loosed his antagonist, threw groping arms wide. With a demoniacal cry of triumph, Babooma made a spring. . . .

As twice before, a sharp report reverberated, and the seething mass was momentarily obscured by smoke. . . .

A pair of black hands grasped the girl's arms as she tottered backward, dropping her smoking weapon. For a brief instant she recognized Roowa's face, which seemed to merge into that of De Borceau; then her senses slipped from her, and everything faded into oblivion. . . .

Not knowing friend from foe, the struggle for her unconscious body was sharp and furious. But the two Frenchmen were fresh and uninjured, and Roowa's supporters had rushed on in wild distress, to that other seething heap. . . . Just one glimpse of two prostrate forms being hoisted amid a frenzy of fighting, wails and shouts—and the two white men devoted themselves to their oath. . . .

On trembling knees at last, bleeding, helpless, his cries drowned by the noise around and the roaring flames from the hut, Roowa watched the stranger seize the inert form of his white chief's wife, and disappear toward the coast. . . .

The thick fighting mass had dissolved into odd struggling groups of twos and threes; the prostrate forms had disappeared. Away near the palm grove could be seen a quickly vanishing crowd of dark figures. . . . The flames belched forth from the burning hut, overcoming the early day light. . . .

Presently the steady monotonous drone of retreating engines blended with the rising wind of the dawn.

(TO BE CONTINUED.)

Live in Present, and Live Long

"I read the news to keep young," Chauncey Depew told the reporters who interviewed him on his ninety-first birthday.

And that, in the terminology of a flippant generation, was not "applesauce" for the young men of the press. Chauncey Depew not only reads the news, but continues to be a part of the news. He is active and alert at ninety-one because he always has lived in the present, the Minneapolis Journal says.

In youth Depew did not sit around dreaming of an impossible utopia and neglecting the opportunities of the present. In age Depew does not sit around mourning the passing of the good old days and scorning the opportunities of 1925.

When the threatening infirmities of advancing years demanded certain changes in the diet and habits of this remarkable man he made the changes without a murmur, nor did he let fear betray him into a state of near-invalidism. He merely followed his life rule of accepting uncomplainingly whatever time might bring him.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Water for Morocco City

Melilla, Morocco, which has been in the hands of the Spaniards for more than 400 years, is about to be provided for the first time in its history with a public water supply. Gangs of workers are now engaged in laying cement pipes to bring the water from the Yasinen, and it is hoped that within a short time the municipal authorities will be able to furnish the inhabitants with sufficient water for drinking and hygienic purposes.

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap Ointment, Talcum).—Advertisement.

An Artist Diplomat

The Spanish painter, Zuloaga, has sailed for home with the remark that the beauty of American women grows with age. Obviously Mr. Zuloaga plans to call again.—New York Herald-Tribune.

Gentle Hint

Nervous Youth.—"Darling, you are the breath of my life!" Girl—"Well, why don't you hold your breath?"

Lots of men would willingly work for their board—if they find some one to work.

You never can know how superior is Dr. Peery's "Dead Shot" for Worms until you have tried it. 372 Pearl St., N. Y. Adv.

If you draw a pistol at a raffle there is no harm done.

No matter how bill collectors are treated they are invited to call again.

NOW DOES ALL HER WORK

Has No Backache, No Bad Feelings Because Lydia E. Pinkham's Vegetable Compound Drove Her Illness Away

Milwaukee, Wisconsin.—"I was in a badly run-down condition and I would get weak spells and terrible headaches. I felt so badly last year that I could not do any housecleaning. The minute I would lift or stoop it seemed as if I was going to fall to pieces. I told a neighbor how I felt and she said that Lydia E. Pinkham's VegetableCompound was surely the right thing for me. I took four bottles then and in the fall of the year I took three. I had been treated by a doctor but he gave me an iron tonic and that did not help me. It seemed that the tonic did not have in it what the Vegetable Compound did. That gave me the strength and ambition I needed and I have gained in weight. This year before I started to clean house I got four bottles of the Vegetable Compound and am taking it right along. I tell all my friends about it and how much good it does me. They can notice it because I have gained in weight. I weigh 118 now and do all my work myself again."—Mrs. Emil O. Brandenburg, 651 37th Street, Milwaukee, Wisconsin.

He Owes His 40 Years of Constant Good Health to Beecham's Pills

"I am 57 years old and commenced to be troubled with constipation when I was sixteen.

"In 1884 I started taking Beecham's Pills, other remedies having failed. I have not had a sick day in all the 40 years."

F. Louis Loeffler, Rochester, N. Y.

JUNE

Signal by Bonfires as in Days of Old

The little island of Ailsa Craig, off the coast of Scotland, near where the Clyde reaches salt water, and one of the loneliest places in the British isles, in the absence of radio inaugurated recently a series of signals for communication with Great Britain in case of emergency.

There are but 40 inhabitants—old-fashioned fishermen and light-house tenders—and no one has ever thought of installing a wireless outfit. Instead, arrangements have been made with a medical practitioner on the mainland and a system of signals by means of bonfires and carrier pigeons agreed to, so that the doctor may be summoned to visit the island in case of sickness.

The royal commission on national health insurance has agreed to pay for the boat hire for the physician whenever he is needed by the lonely island inhabitants. Ailsa Craig is a small island of columnar basalt at the entrance of the Firth of Clyde, rising to an elevation of 1,100 feet above sea level.

FAIR ENOUGH

He—Then I suppose you'll give me back my ring?

She—I suppose so—but diamonds have gone up since you gave it to me. Why can't we split the profit?

Honors for Swimming

A boy scout camp in Massachusetts used an interesting method last summer for teaching new members to swim. A boy who couldn't swim was known officially as a "sinker" and had to wear a red cap. When he showed that he could swim fifty yards he became a "turtle" and might wear a yellow cap. When he could swim one hundred yards he was a "water dog" and entitled to a green cap. Only after he had passed the junior or senior life-saving test might he wear the coveted blue cap that marked him as a good swimmer. A survey made about the middle of August showed that 85 per cent of the campers could swim one hundred yards or farther, and that there were no boys who could not swim at all—Youth's Companion.

Honor Luther Burbank

The name of Luther Burbank heads the list of the greatest scientists of the day as compiled by Henry Ford. His name is certainly a great one, especially in his own country. He is probably the only living non-royal personage to have his birthday celebrated as a state holiday. At his home at Santa Rosa, California, he has evolved many improved varieties of fruits and flowers—among others the thornless cactus and the stoneless plum—and in honor of his tireless labors California keeps holiday on the anniversary of his birth.

His Heart in the Work

Ten years ago a young man offered himself to the Baptist Missionary society for service as a missionary in the Congo, the New York World says.

The applicant was rejected by a doctor, and subsequently went into business with the determination to devote his profits to the cause he had hoped to serve in another way. It was announced recently that in the ten years since his rejection his gifts to the society have amounted to $125,000.

Ex-Slave's Good Work

George Carver, who was born into slavery sixty years ago, and was kidnaped by raiders and exchanged shortly afterward for a horse, has discovered many products from simple substances. From the peanut he has obtained 167 distinct products. He has produced 300 dyes from dandelions, various trees and shrubs, onion skins and wood ashes, as well as paints and stains from the red clay of Alabama.

Exhibition of Bibles of Unusual Interest

That the Bible is the world's "best seller" is illustrated in the collection in the library of the University of Pennsylvania, of Bibles, books and Testaments in more than two hundred tongues and dialects. The exhibition is in commemoration of the four hundredth anniversary of publication of the New Testament in English by William Tyndale. Facsimiles of the first page of the quarto and octavo volumes of Tyndale's work are in the collection.

An item of striking interest is a Hebrew manuscript of the Book of Esther, said to be more than a thousand years old. It is twenty feet long and written on cowskins sewed together.

The noted Breeches Bible of 1561, so called because of its reference to the dress made of fig leaves sewn together in the early ages, is represented by a handsome volume. Conditions of the time are eloquently if tersely expressed by the label accompanying the French Huguenot Bible published in 1553, which states that "no place of publication is known."

Not less than fifty Chinese tongues and dialects are represented in the group of Chinese Bibles and scripts shown.

Hungry Rodents Made Meal of Record Book

Some white rats, under observation for the effects of a newly discovered vitamine, recently tipped over their cages in search of food and, seeing nothing else handy, started in to devour the record book of their activities made in the household science department of the University of California, says an Associated Press dispatch from Berkeley.

When the class conducting the experiments gathered next day, the record book was found in bad shape. Several valuable pages had been chewed out. The rats were still milling around looking for something more edible.

Old Treasure Recovered

Lost 300 years ago, by the Bavarian Elector Maximilian I in 1648, when one of the boats in which his retinue was fleeing from the French and Swedes struck a snag and sank, portions of a gold and silver table service have been discovered in the bed of the Inn river near Muckldorf, in southern Bavaria, Germany. This winter's unusual spell of dry weather reduced the water to an unusually low level and disclosed the treasure. Old documents record the loss of the service as one of the regrettable incidents of the Thirty years' war. They fixed the number of pieces at 500. Dredges are sifting the sands.

Pocket Knives

One who speaks as an authority is quoted as saying it requires 14,000,000 pocket knives annually to supply the demand. While there is a proportion of purchases by those who have not hitherto carried one, replacements constitute the main portion of the business. The information is added that the average life of a pocket knife is two years. They disappear through loss or breakage. The annual sales considered in conjunction with the average life of a knife indicates that about 28,000,000 persons carry this useful article.

Photograph Air Currents

Air currents are being photographed by the French meteorological bureau for the purpose of facilitating the work of the weather bureau. A smoke-producing airplane has been utilized and the experiments are conducted near Cherbourg, where strong ascending winds have been discovered, due to the hilly topography of that country. The air currents act upon the smoke emitted by the airplane and photographers on the surrounding hills record the direction and peculiarities of the currents.

Goldfish Displaced

The professor in the University of Washington who raises sponges as pets has got it all over the goldfish fanciers. When the dear little things pass away they are more useful than ever.—Cleveland Plain Dealer.

Like American Machinery

The Netherlands is buying more of American and less of German machinery than formerly.

LOCAL ITEMS IN BRIEF.

Wanted:—Some pigs. J. R. Doll. 24t1p

Club Work News

From Concord Boys and Girls

The race is now on in Boys Club work under the supervision of H. J. Renner, Vocational teacher of the local High School. Out of the thirty-six members in the township twenty one of them met at the school house last Friday evening and talked over the summer work and perfected and organization, with the hope of meeting monthly and comparing notes on their records kept. County Agent Repp talked to the boys and encouraged them in their summer work Grape ice was served as refreshments. The members of the different clubs are as follows:

POTATO CLUB

First Year
Robert Morr
Leoral Hart
Jerry Douglas
Henry Engle
Byron Woodcox
Dale Trostel
Edward Kimes
John Meeks
Bernard Sechler
Frank Shull
Alden Engle
Harold Baker
Goebel Goodwin
Dale Walter.

Second Year
Joe Woodcox
Russel Tustison
Ivan Reasoner
Leroy Mann.

PIG CLUB

Jerry Douglas
Clifton Draggoo
Cecil Likes
Harry Loucks
Kenneth Wasson
Bruce Koch
Elsworth Morr
Wayne Douglas
Robert Coburn
Robert Johnson.

Every boy has his pig weighed into the contest and the race is on.

CORN CLUB

Horace Meek
Jerry Douglas
Robert Johnson
Harry White
Bruce Koch
George Simanton
Goebel Goodwin
Carl Tustison.

This contest ranges from one to five acres. Watch this department for detailed report of progress.

NEWS OF THE TOWN

See Furnish for Tires.

Save trouble by using receipts. Get a book at News office.

For good glasses see Griest at American Building Hicksville, Ohio.

O. E. Ginther commenced work as salesman for the Hosler Auto Sales at Spencerville, Monday morning.

Mrs. Nellie Perry will entertain the Coburn's Corners Ladies Aid in an all day meeting Thursday with potluck dinner.

If you wish salads of any kind for special occasions or home use let us know we will make them. Cochran's Bake Shop

J. B. Draggoo and wife of Auburn, made The News a friendly and substantial call Tuesday afternoon. The News will visit them for another year. They are enjoying a new Ford Sedan.

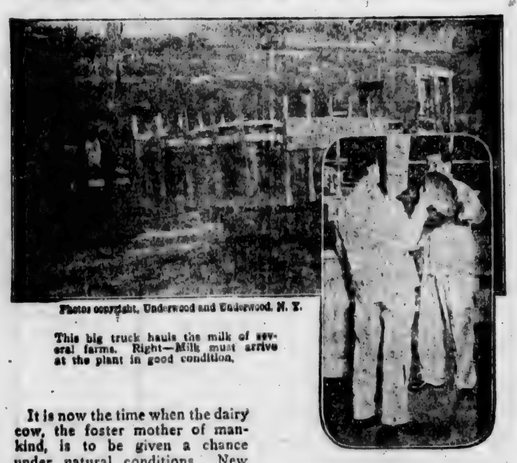
Mr. and Mrs. William Pepple entertained Saturday night and Sunday, Mr. and Mrs. C. A Towsley and daughter, Harriet, Mr and Mrs. E. E. Isbell and daughter, Betty Lou of Elkhart and Mr and Mrs. James Sherwood of east of Auburn.

A long handled shovel and a good sledge hammer was borrowed from Curie's Hardware and Implement store. The borrowers are asked to return same as they are badly needed.

Harry Randall, wife and daughter, Marion, went to Lima Sunday where they spent the day with Mrs Randall's mother. Marion remained to visit relatives while Miss Mildred Pence returned home with them to attend the commencement exercises at Auburn Thursday, she being one of the graduates.

Mr. and Mrs. Scott Scholes and baby of Maryanna, Pa., and Gertrude Lewis and Myrtle Roudebush of Johnstown, Pa., arrived Thursday. The former family to remai permanently, the latter two who are on their way to Ohio State University, to spend two weeks with Rev. and Mrs. J. N. Scholes.

PREPARING FOR SUMMER MILK



Photos copyright, Underwood and Underwood, N. Y.

This big truck hauls the milk of several farms. Right—Milk must arrive at the plant in good condition.

It is now the time when the dairy cow, the foster mother of mankind, is to be given a chance under natural conditions. New information which has recently been discovered at some of the state agricultural colleges indicates that green feed and sunlight combined make it possible for a cow to build up her system by storing minerals and other body reserves, provided she receives a sufficient supply of good feed.

A heavy milking cow, however, will need feed in addition to pasture if the milk flow is to be maintained. Milking heavily with pasture as the sole source of feed causes the cow to lose weight. This loss of weight should be watched and extra feed given to prevent the cow from becoming thin, which will result in reduced milk production later.

With the coming of the summer season, new and interesting problems present themselves which concern the care of milk. The first warm nights are apt to cause milk to sour unless summer care is practiced. It is important to take precautions which will keep down the number of bacteria and prevent their growth. To do this milk must be produced under clean conditions, be kept in thoroughly cleaned utensils, and be cooled as soon as possible after it comes from the cow.

Summer is one of the easiest seasons in which to produce clean milk. There will be times, however, when a considerable amount of mud and dirt will collect on the udder and flanks of cows, and if a portion of this material drops into the milk it will injure its keeping quality. The dirt which collects on the flanks and udder should be removed before milking time by wiping with a damp cloth. If the hair on the udder and underline is clipped short the cleaning can be done effectively and quickly. Incidentally, the practice of clipping the cow all over before turning to pasture not only makes it easier to keep her clean, but it relieves the itchy condition that develops during the stabling months.

Much of the milk produced in the country is hauled long distances in large trucks. In summer if the cans of milk are not protected from the sun before leaving the farm, and again enroute, it will be difficult to keep the milk sweet until it is used. Every time a day's milk is returned to the farm, for whatever reason, there is a distinct financial loss. Only by producing a sanitary milk and then taking care of it can satisfactory results be obtained to all concerned.

Would Have Added Weight

"The theory of evolution would have a lot more supporters," said Mr. Growcher, "if Great-great-great-grandpa Chimpansee had been in a position to make a will transferring real estate and personal property."

Gold Amply Made Up for Silver Threads

George Gloss, the national secretary of the Master Barbers' association, has recently attracted much public attention by announcing that barbers are hereafter to be called chirotonsors.

"Barbers have a dignified profession," he declares, "and they merit a dignified name. They will be known as chirotonsors from now on."

Mr. Gloss does not lack humor, and he said to a girl reporter in New York the other day:

"Speaking of hair, I'll tell you a hair story. It's a story about one of those rich old ladies who fall in love with boys and marry them—like Lady Randolph Churchill and the duchess of Sutherland and Mrs. Patrick Campbell and so on.

"Well, as this rich old lady reclined in her young husband's arms one evening she murmured:

"'Silver threads among the gold, darling. Darling, don't all these silver threads among the gold make you regret your marriage?'

"'Not all all, not at all,' said the young fellow, and then he added to himself:

"'I can put up with a lot of silver threads for the sake of the gold.'"

Old Tea Plants to Be Used in Landscaping

Hundreds of old tea plants, gathered from over the world during the time when tea growing in the United States was a profitable industry, have grown to the size of small trees and are now being transplanted here for landscape purposes, says an Associated Press dispatch from Summerville, S. C.

Before the Chinese tea growers discovered that they could produce the leaf and market it in the United States at a greater profit than the American growers, the cultivation of tea was done at a financial profit in this section.

Dr. Charles U. Shepard, once owner of one of the largest tea plantations, who died in 1915, became interested in the industry after his arrival here from Connecticut many years ago. He collected plants from China and Japan and began scientific experimentation with them.

Will Tattoo Pigs

Pigs in England are to be tattooed for identification purposes. The idea has not as yet been perfected and to further stimulate interest the scientific research committee of the Large Black Pig society has offered a reward for a satisfactory system of tattooing, writes a stockman to the New York World.

The present system of ear notches or numbered ribbons for registration of pigs is very unsatisfactory, says the society, which recently has been urging ink manufacturers to turn out a product which would make possible not only the tattooing of black pigs, but Berkshire, or blonde pigs, as well as different kinds of cattle.

Work to Save Cyclamen

Botanic experts at the University of Pennsylvania are seeking a method to destroy the mite which annually caused hundreds of thousands of dollars damage to the cyclamen, a widely used Christmas flower in America. At the government experiment station near Philadelphia, representatives of the United States Department of Agriculture have long investigated the destruction wrought by the mite. The mite, of the spider family, so small as to be virtually invisible, causes a streaking and distortion of the leaves and flowers on the cyclamen plant.

Victoria's Long Reign

Queen Victoria succeeded to the British throne on June 20, 1837. In the preceding March Van Buren became President of the United States. The other Presidents during her reign were: W. H. Harrison, Tyler, Polk, Taylor, Fillmore, Pierce, Buchanan, Lincoln, Johnson, Grant, Hayes, Garfield, Arthur, Cleveland, B. Harrison, Cleveland again, and McKinley. Queen Victoria died on January 22, 1901, and President McKinley died in office on September 4, 1901.

Pebbles Harm Rails

Tests at the United States bureau of standards show that pebbles placed on a street-car rail more than double the strain on the rail when cars run over it.—Science Servioe.

Slats' Diary

By Ross Farquahr

Frinay—Ant Emmy says they are no justice a girl in a breech of promise suit now of days. If she was president she says she wood make them fellows pay about 50 thousan dollars ($) and soke them good and hard. Then pa up an says. Yes an if that wassent punishmint enuf why you mite make them marry the girl or something.

Sat—ma was a braggen up her uncle Tom witch he is the one I was named after when I was yung and little but it never took. She sed he was suchy nice old fellow Pa sed. Yes he was nice but he was awfly close an stingey. He sed he was so tite he woodent take nothing but standing room when he was to a show becuz he saved the extra money & diddent ware the seat of his pants out and then he walked stiff legged to keep the creese in them.

Sunday—ma and Aut Emmy left us today for a cupple days visit in the country and pa and me is going to keep house all alone. Pa went in the cellar and found sum onyans and cooks them. They diddent taste like them at ma cooks when she is home. gess we will use paper plates so we wont have so monny dishes to warsh on the last day we are all alone together.

Monday—glad we dont half to go to skool enny more this summer till in the fall. Sum buddy got out a report that they are burgulars in the neiborhood and pa told me to see that we diddent leave enny thing valyuable outside so when I locks up tonite why I just left the lawn more and the hoe where they cud find them without brakeing in the house and scaring I an pa.

Tuesday—Ma and Ant Emmy is home agen. Cum to find out the onyans we cooked was sum bulbs ma had boughten to plant this wk

Wensday—A lady ast Ant Emmy did she like Shake Spears wirks & Ant Emmy sed she wassent very well acquainted in town and diddent no wether he was a plummer or a dentest.

Thirsday—Pug Stevens told a bunch of we kids he cud go with enny girl he pleases. Jane sed Yes but the trubble is you dont please very menuy of them.

EX-VICE PRESIDENT MARSHALL IS DEAD

Succumbs in Washington Hotel to Heart Disease After Short Illness.

Washington.—Just as he was resting easily and apparently was recovering from an illness of a week, Thomas Riley Marshall of Indiana, vice president of the United States during the war period under Wilson, died here of a heart malady.

Death came without any evidence of pain. He was sitting propped up in his bed, reading the Bible.

Interment will be made at Marion, Ind., in accordance with his request to lie beside a foster son who died a number of years ago.

Short services were held in Washington, with high government officials in attendance.

Coolidge Expresses Loss.

In a letter to Mrs. Marshall, President Coolidge, who succeeded Mr. Marshall as vice president, said:

"Just at this moment, the shocking intelligence has come to me of the death of your distinguished husband, and I hasten to express to you, not only my deep sympathy and condolences, but the real sense of personal loss.

"Mr. Marshall's long and notable public service, both in Indiana and as vice president for eight years, had won for him recognition for high character and exceptional abilities. Be-

Thomas R. Marshall.

yond this, and something that he would have prized even more dearly, he had drawn to himself a truly remarkable power of friends and friendships, extending to every part of the nation and beyond it.

"His delightful fund of humor illuminated a philosophy of life and affairs that has made for him a unique place among public men. He leaves a place that there is none to occupy.

"Mrs. Coolidge joins in my expression of sorrow and sympathy to you and yours in this time of your bereavement."

Was in Washington on Visit.

Mr. and Mrs. Marshall came to Washington a week ago. Mr. Marshall went directly to his hotel upon his arrival, complaining of acute exhaustion. Physicians were summoned and announced he had suffered a heart attack.

He had planned a ten-day stay in the capital, as has been his periodic custom since his retirement from the vice presidency in 1921.

Mr. Marshall was seventy-one years old, but despite his age he had responded rapidly to treatment.

Mr. Marshall was the first vice president since John C. Calhoun to succeed himself in office. While vice president, he was remembered chiefly for the fairness of his rulings and the bitterness of the rebukes he administered to senators who took themselves too seriously. The most celebrated of all these occasions was a certain day of high-flying oratory and bombastic cavil in the senate, when nearly every member was proposing panaceas for the post-war health of the country. The vice president broke in with:

"What the country really needs is a good five-cent cigar."

Was Governor of Indiana.

Mr. Marshall was graduated from Wabash college.

He was born in North Manchester, Ind., in 1854. Following graduation from Wabash he read law and was admitted to the bar in Columbia City, Ind., at the age of twenty-one years. In 1908 he was elected governor of Indiana and in 1912 and 1916 he was chosen vice president.

Doctor Marshall was a Presbyterian, an active thirty-third degree Mason, a member of Phi Gamma Delta and Phi Beta Kappa fraternities and held honorary degrees of doctor of laws from several colleges and universities.

Police Kill Score Who Attack Shanghai Station

London.—A dispatch to the Exchange Telegraph from Shanghai says the declaration of martial law culminated in further rioting. Mobs attacked the police station, and the police fired upon the demonstrators, killing 20 and wounding many others.

Hoosier News Briefly Told

Lafayette.—An estimated loss of more than $10,000,000 was suffered by Indiana farmers as a result of a freeze, according to an announcement by G. I. Christie, director of the Purdue university agricultural experiment station. "The situation as a result of the freeze has grown more serious," Director Christie said. "The hot sun revealed extensive damage. Benton county suffered a big loss, and farmers indicate that they will need at least 4,000 bushels of seed corn to replant crops destroyed. Tippecanoe county farmers suffered severe damage, and many cornfields near Lafayette will have to be replanted. This condition is found generally throughout the central part of the state, some in the western and southern parts escaping a large part.

Indianapolis.—In general orders just issued from the headquarters of the department of Indiana, Grand Army of the Republic, relative to the forty-sixth annual encampment at Princeton, June 9, 10, 11, commanders and adjutants throughout the department are instructed to make application as early as possible to A. B. Crampton, assistant adjutant general, statehouse, for identification certificates for their respective posts.

Indianapolis.—Indiana is proud of its history and there is more activity toward preserving famous landmarks now than at any other time, according to the state historical commission. Daughters of the American Revolution, civic, municipal and business organizations and clubs, with the co-operation of the commission, are marking famous places in all parts of the state. The last report showed at least one marker in 82 of the 92 counties.

Richmond.—Dr. S. Edgar Bond, coroner of Wayne county, who has been investigating the death of Landy A. Jackson, an inmate of the Eastern Hospital for the Insane at Richmond, who is said to have been fatally burned as a result of being placed in a bath of overheated water, filed the official report of his inquiry. The coroner charges that Jackson died as a result of the criminal carelessness of an attendant, Claude Williams.

New Albany.—J. B. Hundley, age fifty-six, was killed, and his son, Edgar, age eleven, seriously wounded by Enoch Barker, age fifty-one, near Bridgeport, Harrison county, ten miles west of New Albany, following an altercation over a fish line. Hundley is a mussel gatherer. Barker surrendered at the New Albany jail. Both men lived in shanty boats near Bridgeport.

Indianapolis.—A verdict for the defense in the $50,000 damage action of the Indiana university trustees against the Detroit Fidelity and Surety company, the outgrowth of a claim by the university of faulty construction of the stadium at the university a year ago by the Bedford Steel and Construction company, bonded by the Detroit company, was returned by a jury in the Federal court.

East Chicago.—Thomas E. Roberts, former chairman of the Indiana state industrial board and widely known over the state, died in Denver, Colo., where he had gone following an illness from abscess of the liver. Mr. Roberts was one of the most familiar figures in Republican political circles of the state.

Lafayette.—Formal unveiling services of the monument in memory of the veterans of the Civil war were observed at the State Soldiers' home north of West Lafayette. Winfield T. Durbin of Anderson, former governor of Indiana, gave the monument to the home.

Terre Haute.—Inheritance tax in the estate of Crawford Fairbanks, capitalist, was determined by Judge A. L. Miller in Probate court to be $174,698.46, the largest tax ever assessed an estate in the local court. The total was fixed on a net estate of $3,449,589.68.

Michigan City.—Mrs. Walter Zieske, twenty-seven, of 151 Faulkner street, despondent over domestic troubles, hanged herself in the attic of her home. The body was discovered by her son, five, and police cut the body down.

Laporte.—E. V. J. Morris of Chicago, E. D. Campbell of Port Huron, Mich., and W. E. Caddy of South Bend, officials of the Woodmen of the World, have selected Laporte for the 1925 encampment, to start July 20.

Chicago.—Chicago police were asked to watch for the occupants of two automobiles who robbed a bank of Brook of $2,500. Sheriff Dutcher of Newton county wired the Chicago police.

Princeton.—For the fourth time in as many years the safe at the office of the Sinclair Refining company was blown and $853 in money taken. The robbers left $546 in checks.

Logansport.—The Carr Cartage company building was burned here. The loss is placed at $30,000.

Logansport.—The ruins of an automobile containing a certificate of title issued to Theodore Smith, 924 Lafayette street, Indianapolis, was found three miles north of here on state road No. 15. Six five-gallon cans of moonshine whisky were alleged to have been found in the wreckage.

Martinsville.—Wilford Ogles, age fifty, a farmer living near Little Point in the west part of Morgan county, was killed when a horse he was driving became frightened at a tractor and ran away. He is survived by the widow and three children.

Gen. Aultman for Guard Campaign

Indianapolis.—Brig. Gen. Dwight E. Aultman, commanding officer of Fort Benjamin Harrison, has indorsed the membership campaign for the Indiana National Guard, just started by Adjt. Gen. William H. Kershner, in a statement in which he says that it is his belief that every young man in the state should consider it a privilege as well as a duty to serve in the National Guard.

General Kershner has ordered the campaign with the announcement that all men enlisting in the Guard within the next 90 days will be eligible for enrollment in the summer training camps at Camp Knox in August.

In his statement General Aultman said: "The National Guard is the backbone of our country's defense. When we have another war, and I firmly believe that human nature has not reached that point of development which would make war impossible, the country will have to fall back on the strength of the National Guard as a basis for its fighting force."

Hammond.—Hammond hailed as its savior Carl McFarland, a traffic policeman, who was credited with preventing a fire, which caused a loss estimated at $2,000,000, from reaching 700,000 cubic feet of gas and causing an explosion which probably would have wiped out the town. The fire started in the yards of the Paxton Lumber company. The lumber yards were virtually destroyed and the plant of the Hammond Brass works was badly damaged. Fire Chief Fred Nill estimated the total loss at $2,000,000. Damage to the brass works was estimated at $180,000, and the remaining loss was suffered by the lumber company.

Indianapolis.—A statue of Thomas Taggart, who, when mayor, started the park system of the city through the appointment of the first park board, and the purchase of the first park property—Riverside park—is to be carved in stone by Mrs. Myra Richards, Indianapolis sculptor, and set up in Riverside park, according to present plans of Mayor Lew Shank and Thomas D. Taggart, who will finance the project personally. It is planned to erect a statue of about $20,000 valuation, in a space to be set aside for the purpose by the park board.

Noblesville.—Eph Inman, Ira Holmes and Alfred Gowan went before Judge E. Hines and filed motion asking for the release of D. C. Stephenson, Earl Klinck and Earl Gentry on bond. The court fixed June 11 as the time he would hear arguments on the motion. The defendants are prisoners in the jail, charged with first degree murder growing out of the death of Miss Madge Oberholtzer of Indianapolis, their case having been venued to Noblesville from Marion county.

Indianapolis.—D. C. Stephenson, Earl Klinck and Earl Gentry, charged with the murder of Miss Madge Oberholtzer, now awaiting trial in the Hamilton county Circuit court at Noblesville, may be tried in the present term of court in that county, which ends August 1, it became known. Ira M. Holmes, co-counsel for the defense, indicated that an early trial would be desirable to the defense.

Elkhart.—The business and professional men's division of the Elkhart chamber of commerce decided to obtain a supply of riot guns and place them in stores and banks for ready access by policemen called in emergencies, such as bank robberies. The purpose is to avoid the necessity of police first going to headquarters for arms of that character.

Indianapolis.—A man thought to be Oliver P. Thomasson of Williams, Lawrence county, was killed instantly when a touring car he was driving was struck by an inbound Pennsylvania passenger train at the Harding street crossing. About thirty chickens were in the back part of the touring car and most of them were killed.

Jeffersonville.—Grant S. Swearingen, age sixty-two, retired railroad conductor, of New Albany, was found not guilty of the murder of his tenant, Jeff P. Kinney, by a jury that deliberated 50 minutes at the end of a four-day trial.

Anderson.—Fire destroyed a large dairy barn on the farm of Edward A. Smith, a Anderson merchant, near Pendleton. Smith estimated the loss at more than $10,000 with insurance probably 70 per cent of the loss.

Michigan City.—Harry M. Miles, former city civil engineer of Michigan City, dropped dead in front of a drug store. He was one of the organizers of the Ames Union band.

South Bend.—Miss Maria Studebaker, sister of the seven brothers who founded the Studebaker corporation and the last to bear the name, died on the eve of her eighty-fifth birthday.

Anderson.—Judgment for a total of $75,545 in favor of Lewis Burris and 81 other persons against Alpha Holaday and the Holaday Investment company of Muncie, was entered in the Madison Circuit court by Will M. Sparks, judge of the Rush Circuit court, as special judge.

Evansville.—Refusal of a wife to bob her hair cannot be considered sufficient grounds for divorce, according to a decision by Judge Charles P. Bock, judge of Circuit court in the case of Malcolmn White and his wife, Lois.

Lesson for June 14

THE CHURCH AT ANTIOCH

LESSON TEXT—Acts 11:19-30.

GOLDEN TEXT—The disciples were called Christians first in Antioch.—Acts 11:26.

PRIMARY TOPIC—Some People Who Received a New Name.

JUNIOR TOPIC—Barnabas in Antioch.

INTERMEDIATE AND SENIOR TOPIC—Lesson From the Church in Antioch.

YOUNG PEOPLE AND ADULT TOPIC—The Secret of a Growing Church.

Saul, the new missionary, who was to lead in the evangelization of the heathen, having been miraculously called to his work, it was necessary that a new religious center be established. Antioch became that center.

I. Preaching the Word of God at Antioch (vv. 19-21).

Persecution at Jerusalem scattered the disciples abroad. Some went among the Jews only with the gospel message, while those from Africa and Cyprus courageously crossed the line and preached to the Greeks also. The Lord blessed their work in granting many conversions. So great was the stir that the news reached Jerusalem, the mother church. Persecution worked for good in this case as well as in many since. These humble people with hearts touched with the Spirit went out with the glad message of life to others.

II. Barnabas Sent to Inspect the Work (vv. 22-26).

1. The Character of Barnabas (v. 24).

He was a good man. It is important in sending a man to follow up the work of the Spirit that his character be good. He must not only have an unblemished character, but his sympathy must be broad. He must be capable of entering in full appreciation of the things about him. Barnabas was full of the Holy Spirit. This is an essential qualification for pastoral work. Only a Spirit-filled man can discern the workings of the Spirit of God. He was likewise a man of great faith. Only a man of faith should instruct young Christians.

2. Work Done by Barnabas (vv. 23, 25, 26).

(a) He heartily endorsed the work and earnestly exhorted them to continue steadfastly in the faith, and to cleave unto the Lord. There are many allurements to tempt young Christians.

(b) He rejoiced over the work which had been done. This shows that Barnabas could rejoice over the successful work done by others.

(c) He brought Saul from Tarsus (v. 25).

He did more than merely inspect the work. Doubtless he preached also for many people were added unto the Lord. The work grew to such an extent that he brought Saul to help him. They labored together for a year with great success, and carefully taught the people. Believers, after they have confessed Christ, need careful teaching. Barnabas had the good judgment to seek Saul for this important work. It is the duty of church officials to seek out men and women who are qualified for the Lord's work, bringing them from their places of obscurity and setting them to work in the Lord's vineyard. Saul was a more important man than Barnabas. There are many men in obscurity who require a Barnabas to bring them forth.

III. The Disciples First Called Christians (v. 26).

They were not called by this name in derision as often asserted. Stifler well says, "What Luke intends to convey is that Saul and Barnabas taught in the church for a year and the disciples were first called Christians. The name was a consequence of the teaching." Green renders the passage thus: "And it came to pass with them that they were combined even for a whole year in the church, and taught much people, and that the disciples were first called Christians at Antioch." This distinctive title came through Divine guidance. It was owing to the teaching of Saul and Barnabas that this body called the church was given its unique standing and place. Let it be remembered that it was not given as a term of reproach but because of the close resemblance of the body to its head, Christ.

IV. Benevolence of the Church at Antioch (vv. 27-30).

They made up money for the poor saints at Jerusalem and sent it by the hands of Barnabas and Saul. The genuineness of the work at Antioch is proven by their good deeds. It was further emphasized in that there was no division between Jew and Gentile Christians. The Gentiles ministered to the Jews.

Treasures

Misfortune may whirl our material treasures from us; sorrow or sickness may canker them, turn them to ashes in the mouth. They are not ours; we hold them upon sufferance. But the treasures of the intellect, the gift of being upon nodding terms with truth, these are treasures that are our impregnable own.—A. S. M. Hutchinson.

New England's Great Poem

The one great poem of New England is her Sunday.—Henry Ward Beecher.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Timely and Unexpected Letters

THERE are notices in the daily paper this morning of Donald Mount's marriage, of John Gaston's election to a very important public office, and of the death of Gerald Jones' mother. I have known these young fellows well in past years, but they have lately drifted away from my immediate acquaintance. I owe them no particular obligations; we are not in any sense close friends, and yet these announcements of marriage and death and political preferment give me a chance, if I wish, to do a gracious and a courteous thing.

I know it would please Mount if I should write him a letter of congratulation and it would encourage Jones, who has been working hard for some time for public favor, and it would comfort Gaston to get from me a letter of sympathy, for I knew his mother very well and can realize what her loss will mean to him.

But if I do these things I must not delay. One cannot with propriety write a Christmas letter in July or a birthday congratulation when the year is half gone. Unless such a letter is written on time it were better usually not to write it at all.

I should have acknowledged the book that was sent me by Lois Simpson's publishers, for I knew very well at the time that it was by her direction that it was done, but I did not, and now that the time is past and she herself, perhaps, forgotten the whole incident, I may better forget it myself.

Mrs. Kirkpatrick's solo in church this morning was beautifully sung; I can say so to her or not as I choose, but if I write her at all it must be today. It would seem a joke to do it a week or a month later.

I had a letter from Charles Boyd last week—a most unexpected letter. I haven't seen him or heard from him since we were boys, more than thirty years ago. We went to school together; we paid attention to the same girls, and took them to dances and singing school and revival meetings. We were inseparable for a time, and then I went one way and he another, and the girls married neither of us.

He's a thousand miles away now and more, but he had seen my picture or something about me in a metropolitan paper that came to his hand, and he had decided to write me.

It was like going back to my youth again to get his message. He recounted many of the escapades of which we had been a part; he asked questions about the old friends with whom we used to scour the prairies, and he told me briefly about his family and what he had been doing during the years that had intervened since we were together.

It was a gracious thing for him to do to write me—the more so because writing letters is rather out of his line of business—and I appreciated it very much. It gives me pleasure still to reread his letter and to live over again in doing so the events of long ago.

At Christmas time Nancy and I get a bushel basket full of letters and cards from people we know and have known. They come to us from all over the world where the young men and the young women whom we have known are making a name and a home for themselves. We like them all and read their messages with interest and pleasure. Most of them we could anticipate, for the writers have been sending us pleasant messages for years. It is the unexpected ones that please us most, those which come from people who, we had supposed, had forgotten us years ago or who had no obligation to write us at all.

I was thinking about Williams a few weeks ago. I do not know why he came into my mind—telepathy possibly might explain it. I knew he was out in an unknown part of the world to him engaged in a new business. I'd been in just such a position myself thirty years ago, and I could recall just how discouraged I used to get and how much I felt like throwing up the sponge and going home. Perhaps he was discouraged, too, at this time; he is young and inexperienced.

I hunted up his address and wrote him a cheerful, newsy letter. I told him a little of my own experience years before and metaphorically slapped him on the back and told him to go ahead and win out as I was sure he would. He wrote me later that he was just on the point of quitting when my letter came, but it was just the impetus that he needed to stir him on. He was going at it, he said, and he was sure he would make a go of it. It was the timely and the unexpected letter that had saved him!

Interesting Facts

Old headstones in a cemetery in Vermont are being coated with cement to preserve them.

The latest business or profession to be opened to women in France is that of public auctioneer.

Minnesota has nine fish refuges either closed to fishing at all times or during specified seasons.

An odor has been added to the natural gas used at Little Rock, Ark., to render gas escape readily detectable.

Ten American states have among them more telephones than all foreign countries combined. These ten states are New York, Pennsylvania, Illinois, Massachusetts, Indiana, Ohio, Michigan, Iowa, Missouri and California.

Wit and Humor

OH, MAMIE!

He was a somewhat poetic young fellow and she was "beautiful but dumb." They met at a party and he was prompted to express his admiration.

"Do you know," he told her, "you look like a bit of rare old tapestry?"

"Indeed! Well, you're not so snappy looking yourself!" she angrily retorted.—Boston Transcript.

Home, Sweet Home

"I am satisfied on one thing at last. I found where my husband spends his evenings," remarked Mrs. Gadabout.

"You don't say so, dear; how did you find out?" questioned the excited Mrs. Gossip.

"I stayed at home one evening last week and found him there," answered the satisfied lady.—Arkansas Utility News.

True Eloquence

"Have you prepared your sermon for tomorrow?" asked our southern friend of his man-of-all-work, who was also preacher at the African Methodist church.

"No, suh," said he; "I doan' have to. Sometimes I preaches from a text. Then I got to study. Tomorrow, I jest preaches from the extemporaneum."—Public Opinion.

EXPECTED, AS USUAL

"Yesterday Smith pointed a revolver supposed not to be loaded at Jones and pulled the trigger."

"Such things are terrible! What was the result?"

"Nothing—it wasn't loaded."

The Wandering Waist

Mary had a little waist,
Most puzzling to her beau,
For everywhere the fashion went
Her waist was sure to go!

Glad to See Him

"Hello, old man!" exclaimed Dudley at the Literary circle reception. "It's a pleasant surprise to meet you here."

"Good of you to say so, old chap," replied Brown.

"Yes, I was afraid I wouldn't find anybody here but brainy and cultured people."

He Did

Policeman (to speeder)—How would you like to go riding in a patrol wagon?

Autoist—It might do in a pinch.

Cause of Quietness

Edward—I always say what I think, Evangeline (sweetly)—Is that why you've been so quiet all the evening?

GOING HIM ONE BETTER

"Son, I'll jis knock off six strokes from my score and I'll slip you 75 cents. Get me?"

"Sure! I'll make it an even dozen for a dollar."

Social Discrimination

Even misfortune draws the line
And caste is still admired.
The high and mighty may "resign,"
The small fry just "get fired."

The Pace

"Isn't it terrible how much it costs to live nowadays!"

"It isn't the mere living in my case; the expense arises from the dread my wife has that we will be eclipsed by our foolish neighbors."

Hen-Pecked

Blinks—How come that he has such a homely looking lot of girls working in his office?

Jinks—His wife insists on hiring all his help.

Marked Decrease of Work Animals

Acute Shortage Seems Certain Within Five Years, Says Department.

(Prepared by the United States Department of Agriculture.)

A marked decrease in the number of horses and mules of working age that may amount to an acute shortage seems certain within five years, says the United States Department of Agriculture. Unless more horse and mule colts are raised during each of the next five years than were raised in 1924, the number of horses on farms five years from now will be only 86 per cent of present numbers and of mules 74 per cent.

Larger Crops Expected.

While present replacements of colts and of young horses and mules are entirely inadequate to cover decreases in the present numbers of work animals, reports coming to the department from various sources indicate that increased breeding and larger colt crops are to be expected. Reports from state stallion registration boards especially emphasize this improved confidence of breeders. A rather marked advance in horse and mule prices during the last few months indicates that the shortage may already be making itself felt. This may be expected to increase further the interest in horse breeding.

In order to get a picture of the present situation the crop reporters of the department were asked to report the ages of all horses and mules on their own farms. Nearly 26,000 reports were tabulated. From these tabulations the percentages of animals of different age groups were computed for the United States by states and regions. The above is the situation if the conditions on the farms of these reporters are typical of all farms.

The study shows that the largest age group of horses is now the eight and nine-year-old group, this making up nearly one-fifth of the total; on the other hand colts under one year make up only 3 per cent and colts one year old only 2.3 per cent. If horse production were on a replacement basis colts under one year would be the largest group.

Of all horses only 11.4 per cent are under four years, 45.6 per cent are from four to nine years and 43 per cent are over ten years with the average age 9.8 years; of all mules 10.5 per cent are under four years, 51.9 per cent are from four to nine years and 31.6 per cent are over ten years with the average age of 8.4 years. Five years from now, for animals of the most useful age, four to nine years, there will be only 191 head of horses for every 450 head now on farms and only 278 mules for every 519 at present.

Pure Breds Increase.

While the reports of the stallion registration boards show fewer stallions registered in 1924 than in 1923, the percentage of pure breds in the total shows an increase. Registrations for 1925 are coming in earlier than in recent years, and these are accompanied by comments that show that owners are much more hopeful and that there is increased inquiry for good quality breeding animals.

While for some years the numbers of horses and mules have been more than adequate and prices last year were the lowest in over 20 years, such a reduction as here indicated seems much too great. Even with a substitution of other forms of power for work animals on farms, the prospective numbers are probably below future minimum requirements.

In planning breeding operations, the department says, farmers should study the present situation to determine regions where the shortage will probably be felt the soonest and where substitution of other forms of power will be the least practicable. Types of animals suited to these areas probably will be in greatest demand. Brood mares should be carefully selected and should be mated with good stallions and jacks of the types best suited to produce high quality colts of the kind desired.

Brown Rot of Peaches

Investigators who have been experimenting with brown rot of peaches in Georgia have reached the conclusion that the control of curculio means practically the control of brown rot also. Dr. H. W. Anderson, who has been working on brown rot in Illinois, has come to the same conclusion. It appears that the principal method of infection by the brown rot fungus is through wounds made by curculios.

No Protection for Farmer

It was found in a recent survey of dairy plants that many are making no effort to protect the farmer. Part of the infection of tuberculosis in hogs is caused by feeding skim milk, buttermilk or whey from dairy plants that do not pasteurize. Most of the hogs going to central markets from Wisconsin are raised in the southern half of the state, in counties that have not been area tested.

Stop Crows Pulling Up Corn

Coal tar is the best preventive against crows pulling up corn, a tablespoonful being enough to treat half a bushel of the seed. The corn is placed in a pail or tub and covered with warm water at about 100 degrees Fahrenheit. As soon as the corn is warm, drain the water and add the tar, stirring the corn until each kernel is covered with a thin film of the tar.

Airplane Dusting for Large Orchards

Peach Is Latest Crop to Receive Attention.

(Prepared by the United States Department of Agriculture.)

The commercial peach orchard is the latest crop to receive treatment by the airplane dusting method for controlling insect pests. According to a report received by the bureau of entomology of the United States Department of Agriculture from its field station at Fort Valley, Ga., this process was tried for the first time in March of this year. Airplane dusting for cotton fields has been a demonstrated success, and the outcome of this type of control for insects affecting peach trees will be awaited with interest.

It took an hour and fifty-five minutes to dust 10,000 peach trees with a mixture of arsenate of lead and hydrated lime. The time recorded included all trips to the landing field to refill the hopper. For several months the bureau representatives at the Fort Valley laboratory have been giving attention to the perfection of the technique for using airplanes in this way, with the co-operation of those who have had previous experience in the work at the boll weevil laboratory at Tallulah, La. It has been necessary to make adjustments of the feeding mechanism of the planes so that the heavy dust used for peach insect control work would be evenly distributed. A thousand acres of peach trees in Georgia will be treated by airplane during the season, under the supervision of the Fort Valley laboratory. It is expected that this work will yield valuable data on the results, cost of operation, and other points.

Activity in Live Stock Improvement Operations

(Prepared by the United States Department of Agriculture.)

In a report on live stock improvement under the better-sires plan, just issued by the United States Department of Agriculture, California receives mention among the states noticeably active in such work. The principal other states, mostly in the central west and east, are: Kentucky, Ohio, Nebraska, Vermont, South Carolina, Oklahoma, New York and Pennsylvania.

Live stock owners who place their breeding operations on a basis which includes the exclusive use of pure bred sires receive a suitable sign for their premises and helpful literature on animal breeding.

During the early part of the year live stock owners in the following California counties qualified for participation in the work: Los Angeles, Orange, Sonoma and Ventura.

The activity of the Golden State in this means of live stock improvement is due chiefly to the interest and energy of county extension agents in the counties mentioned. The work is of an educational nature and involves no expense aside from that incident to the purchase or use of pure bred sires, which the department urges in the interest of improved domestic live stock. Experience shows that good breeding results in numerous benefits and greatly increased financial returns.

Horse-Radish Thrives on Soil of Medium Texture

Horse-radish, like other root crops, will thrive on a soil of medium texture. Either a loam or a silty clay loam containing a good supply of organic matter and plant-food will give good yields. On a moist, but not wet, soil, the roots will develop to a good size and be of fine quality, while on a dry location they will be small and woody, and will lack to a large degree the characteristic sharpness. An ideal soil is one which is free from large stones, which can be easily cultivated, and which reaches to a depth of 10 to 15 inches, underlaid by a clay subsoil. These conditions make possible a check in the growth of the roots when they reach the subsoil, while on lighter soils the roots often grow to a depth of four to five feet, which is very undesirable.

FARM FACTS

Evergreens should be moved just before the buds start.

• • •

Most cream separators will do much better job of skimming the milk when it is warm.

• • •

As a soil provider sweet clover is excellent both on dry land and irrigated lands.

• • •

Dig out the barberries, roots and all. Dig them carefully and watch for sprouts for several years.

• • •

Curing of clover hay is more difficult at the full-bloom stage because of the higher natural moisture it then contains.

• • •

The production of good clean cream is the most important step in the manufacture of high-class country butter.

• • •

Spray the currant bushes early for plant lice. They are nurseries for them and the lettuce will be next on the list and then the green peas.

• • •

When it is desired to have the second crop of red clover for seed, then the better plan is to get the first crop off the land somewhat early, before the heads turn brown.

GOOD ROADS

LARGE MILEAGE OF ROADS BUILT IN 1924

Taxpayers in states where highway building has been brought under centralized control are this year reaping the benefits of the work completed during 1924. Never before in the history of highway construction has progress been as rapid as during the year just passed.

Illinois leads the list with 1,200 miles of paved road added to her highway system. All of this new work was made possible through the funds provided by the $60,000,000 bond issue which is being retired entirely by automobile license fees. So well sold are the people of Illinois on state trunk highway construction that they have approved an additional $100,000,000 bond issue for increasing the paved road mileage on the state highway system to a total of 9,800 miles.

North Carolina claims second place with 804 miles of paved road completed during 1924. In this state also, the funds for the improvement of a state system of highways were provided by a bond issue. Revenue derived from automobile registration fees and from a gasoline tax is used for maintaining the state highway system and for providing the operating expenses of the state highway commission.

Other states in the forefront of highway development are Pennsylvania, with 704 miles to its credit for 1924; Michigan with 607 miles; New York with 552 miles, and other states with mileages of between 100 and 400 miles. In all of these states some method of centralizing the control of all work done on a selected state highway system was effected. Each state has special funds provided expressly for the purpose of developing the state system. Such a method of highway development has been found to yield the greatest return to the taxpayer and the user of the highways.

Survey Shows Need for Improvement of Roads

Traffic surveys made by the state of South Carolina show that well over half the total traffic in the state was confined to about 6 per cent of the total mileage of public roads in the state outside of the larger cities and towns. It also showed that the average motor traffic on the improved roads of the state highway system was about 400 vehicles per day. On a number of the principal highways the traffic exceeded 1,000 vehicles per day and on a few short stretches this number was increased to 2,000.

Based on these traffic counts, made on various parts of the state highway system, it was estimated that the total distance traveled by motor vehicles on the improved part of the state highway system was around 425,000,000 miles.

From these figures it is evident that the total cost of operating motor vehicles on the highways of the state may be greatly decreased by concentrating road improvement on the highways bearing the greatest amount of traffic. If only a small change in the cost of motor vehicle operation is effected by improving the roads, and tests have definitely proved this fact, then the improvement of the heavy traffic roads will result in the greatest saving to the highway-using public. For example, a variation of only 1 cent per mile in the cost of operating over improved roads, when applied to the 425,000,000 miles traveled on the state system during the year, amounts to $4,250,000, a sum which will more than earn itself in the lower cost of operation and which is sufficient to make a vast difference in the condition of the roads if applied to highway improvement.

To Spend $405,000,000 in Constructing Roads

Approximately $405,000,000 will be spent for construction of 24,000 miles of highway and $135,000,000 for maintenance of 217,794 miles of road during 1925, according to information secured by the bureau of public roads of the Department of Agriculture.

The state highway departments, the bureau said, plan to construct 5,900 miles of asphalt, hard surfaced and brick pavements; 11,000 miles of sand-clay, gravel and macadam roads and 3,700 miles of improved earth road.

Comparing the funds available for 1925 with those for preceding years, the bureau said it appears certain that road construction will go forward at about the same rate as in the preceding years. Since 1921 the total mileage of surfaced roads built each year has been between 30,000 and 40,000 miles.

Danger on Straight Road

The straight road against the curved road, as a promoter of accidents, has been brought to the front again by a report of the North Shore Motor club of Wisconsin, which shows that of the 2,981 road accidents in that state last year, 2,044 occurred on straight roads, while curves, and other danger points were responsible for but 937 accidents. A straight road invites speeding, while curved roads invite caution and will check a reckless driver.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© by Western Newspaper Union.)

DIPHTHERIA IN CITY AND COUNTRY

IS DIPHTHERIA any more common in the country than in the city? Are country children any more liable to take the disease than city children? These questions are covered in a report recently issued by the United States public health service, based on a careful survey of over two thousand school children and teachers in New England, made by Dr. C. W. Kidder of the public health service.

As is now generally known, it is possible to tell, with practical certainty, whether any person is susceptible to diphtheria. A single drop of diphtheria antitoxin, injected just under the skin, is all that is necessary.

If the child has, in its own blood, enough natural antitoxin to protect it from diphtheria then the injection of this drop of artificial antitoxin produces no result. Children who, at the age of two years, show no reaction to this test will probably be immune to diphtheria all their lives.

In children who are not thus naturally protected and who are susceptible to diphtheria, the injection of the drop of antitoxin produces what is called a positive reaction. Inside of 24 to 48 hours, a faint red spot develops on the skin where the injection was made. This slowly fades away without any other effect on the child.

By this test, which is called the Schick test, it is possible to sort children into two groups, those who are and those who are not susceptible to diphtheria. This is just as easy, just as certain and just as harmless to the children as to sort them by height or by the color of their hair. Those children whom the Schick test show to be immune to diphtheria need no further attention, so far as this disease is concerned. They form from 20 to 30 per cent of all children and from 30 to 50 per cent of all adults. They are the ones who don't get sick during an epidemic. That leaves so much more money, time and care to be devoted to the other 70 per cent of children and 50 per cent of adults who are susceptible.

Dr. Kidder found that there were more susceptible persons in the country than in the city, more among the rich than the poor, more among the native born than the foreign born.

How many of your own family are susceptible to this disease and how many are immune? You can find out at very small expense and no danger.

DOES INSULIN CURE DIABETES?

SINCE the discovery of insulin by Dr. Banting, much has been written both in professional journals and in popular magazines and newspapers about the value of insulin in the treatment of diabetes.

It has been definitely proven that the use of the remedy will relieve to a large extent all the unpleasant and dangerous symptoms of diabetes. Whether it has any effect on the disease itself and whether its continued use will restore the patient to normal condition, still remains to be shown.

It has been found that in some cases, especially in the cases of young persons in whom the disease has been of short duration, the ability of the body to absorb sugar seems to be increased during treatment. This would indicate that the use of insulin might stimulate the pancreas to such an extent that, with the rest afforded by insulin, the diseased cells in the pancreas might regain their normal condition.

In a recent issue of the American Journal of Pathology, Dr. Boyd and Dr. Robinson of the University of Toronto report the case of a boy, aged nine years, who had had diabetes since he was two years old. He had been taking insulin since December, 1922. Under this treatment it was possible to give him a diet suitable for a boy of his age. His physical condition improved to such an extent that instead of being a chronic invalid he became a strong and husky boy. Unfortunately, he was killed by an accident while sleigh-riding.

In examining the pancreas after death, it was found, as far as could be detected, to be in a normal condition. In fact, there seemed to be signs of new growth, which would indicate that the cells of the pancreas which are diseased in diabetes had actually regenerated under the insulin treatment. This, of course, would be more likely to happen in the case of so young a patient than in a person of more mature years.

Naturally, there has been little opportunity since the use of insulin was begun to find out whether this remedy would actually restore the diseased pancreas to normal condition or whether it acted simply by supplying the body with the secretions which were lacking. If more thorough and long-continued study of insulin shows that it has a real regenerating effect on the pancreas and that its continued use will tend to restore this gland to normal condition, then this wonderful discovery will be of even greater value than was at first supposed.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

LITTLE MR. DOWNY

"It seems only yesterday that they were only five white eggs," said Mother Downy Woodpecker as she looked at her five little birdlings. She could hardly believe that they were growing so fast.

"Well," said little Mr. Downy, "in a way it is no wonder that they have grown, for they've had such huge appetites and have eaten all we've brought them.

"We've been kept busy bringing them good things to eat too."

"But they have grown very quickly," said Mother Downy. "Truly they will not be babies any more."

"They can't be babies always," said Mr. Downy, in a wise and manly fashion.

"True!" sighed Mother Downy, "but it seems only yesterday that they were!"

"My dear," said Mr. Downy, "I am invited to a banquet today of caterpillar eggs in the orchard. I was told to bring my friends, so you must help me tell the other Downy Woodpeckers about the feast.

"You know we must save the trees for the fruit growers and not let the caterpillars and wood beetles have a chance.

"Then as dessert they are going to have a pudding of weed seeds and a few pokeberries, I am given to understand.

"Of course it will be a most informal banquet. Self-service, you know. We'll all pound the trees ourselves so we can tell just where the meal is to be had.

"We should do that for the people who own this orchard. Think how they looked after us with suet when it was cold and food was scarce. They made life jolly and happy for us and for the Tufted Titmouse family and for the chickadees.

"Oh," said Mother Downy, "speaking of the chickadees reminds me that

Mr. Downy and Mrs. Downy.

they have one of our old nests in the bottom of the tree we had as our last home."

"Good," said Mr. Downy, "they will be safe there, the little dears. It's hard for them, with their weak bills, to build a nest where they can hatch out their little ones and be safely hidden away from old Blue Jay enemy.

"That is one of the nice things about having many homes—we can let others have them when we leave."

Mr. Downy and Mother Downy were two of the dearest woodpeckers you could hope to see. They were not very large and they did more good than any other woodpeckers and they never did any harm. Sometimes unkind things had been said about them gathering sap from trees, but it was nothing but idle gossip.

Mr. Downy wore a handsome black-and-white suit, beautifully decorated with white spots, and as a decoration for his head he had a touch of red on the back of his cap. Mrs. Downy didn't wear the red, as she was not fond of bright colors on herself.

"Leave that to the male birds," she said.

They had a cousin, Mr. Hairy Woodpecker, who was larger and who loved the quiet woods and was not so sociable as they were.

"People have said they thought it strange we didn't eat any fruit at all when we were so careful to look after the orchard," Mr. Downy remarked. "But we are satisfied with what we get protecting the fruit trees. We relish little insects.

"We don't need fruit."

"That is true," answered Mother Downy.

"Ah, what a beautiful time of the year is summer," Mr. Downy said. "There is so much that is good to eat, it is warm and pleasant, and now the babies are getting less helpless each day.

"But," he added, "the winter was fun. Often when it was cold I stayed rather late in my bed in the old hollow in the winter home tree, but there was nothing to rush about for then.

"You weren't such an early riser, either, in those days. But we couldn't hide ourselves completely away, even in the winter. We always have to be about and have a sociable, friendly time."

"Oh, yes," said Mother Downy, "life is so much more fun when one just enjoys every little thing. And it's so much more fun to be friendly with everyone. I must teach the children that happiness is not to be found after a great and mighty search, but it is right within each little feathered breast."

START THIS TREATMENT NOW!

There's nothing like Tanlac to purify the blood, put the stomach and liver in working order and build up a run-down body.

If you are nervous, suffer from indigestion,—have rheumatism, torpid liver, constant pain, don't delay taking Tanlac another precious day.

Millions of men and women have been benefited by this great tonic and builder that is compounded after the famous Tanlac formula from roots, barks and herbs.

Buy a bottle of Tanlac at your drug store today. See how you start to improve right from the first. Most likely two or three bottles will put you on your feet, make you feel like a brand new person.

ALL WORN OUT?

Are you lame and stiff; tired, nervous and depressed; miserable with backache? Have you suspected your kidneys? Good health depends upon good elimination. But sluggish kidneys allow impurities to accumulate and upset the whole system. Backache is apt to follow; stabbing pains, depressing headaches, dizziness, and other annoying kidney irregularities. Why experiment? If your kidneys are sluggish, why not use *Doan's Pills*. *Doan's* is a harmless stimulant diuretic. Used the world over. *Ask your neighbor!*

An Ohio Case

Chas. Drake, operates clay mine, Walnut Street, Roseville, Ohio, says: "My back was sore and lame mornings and often sharp pains darted through my back and I could hardly straighten. My kidneys were too active at times and then sluggish. Three boxes of Doan's Pills rid me of the backache and strengthened my kidneys."

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons—the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

Dictionary Coupon

Clip three 3 coupons and bring to office of the

ST. JOE NEWS, St. Joe, Ind.

which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.

Protection of Birds of Vital Importance

Birds, according to the biological survey of the United States Department of Agriculture, are one of nature's important agencies for keeping down the overwhelming hordes of insect life. Nest boxes should be put up and shrubbery planted to make up for the disappearance of the hollow trees and young wild growth in which birds once built their nests. Water for drinking and bathing should be supplied in summer and shelter and food provided in winter. Protection of birds from their natural and unnatural enemies is not the least important consideration, the biological survey says.

The boy with the air rifle, the native or the foreign-born adult with his gun, the red squirrel and other small animals, the rainstorm and the windstorm, and the house cat all take their toll of wild bird life. Years ago the depredations of the cat on the birds caused little concern, but now that probably 25,000,000 cats blanket the United States, people are waking up to the increasing necessity of protecting birds against them. It is not necessary that householders part with their pets, but these potential bird destroyers should be kept from unduly increasing, if the effort is to be made more effective to prevent them from killing the song birds.

Seal Originally Used in Lieu of Signature

The red seal used upon all legal documents is a survival of the days when people were not blessed with the educational advantages of today. The majority of the people could neither read nor write. In those days the seal was used instead of a signature. It was a disaster if the seal were stolen, for the thief had in his possession a perfect instrument of forgery. The seals belonging to a corporation or a company are still used to authenticate important documents. In this respect the seal acts as a safeguard against forgery. In the eye of the law a document issued by a company and merely sealed, not signed, would probably be accepted as authentic. The most important seal in the country is, of course, the Great Seal. It is kept in a metal case, and the color of the wax used is always yellow. At the death of the monarch the seal, after being "defaced," becomes the property of the lord chancellor. Only second in importance is the so-called Privy Seal. No document can be sealed with the Great Seal until it bears the authority of the Privy Seal.—London Times.

Costly Funerals

History shows the lavish expenditure of public funds when royal funerals were held in European countries. The most expensive funeral in modern times was that of old Emperor William. It cost the city of Berlin $430,000, and the imperial treasury expended in addition, the sum of $550,000.

The most expensive funeral in the history of England was given the duke of Wellington, the cost being one-half million dollars, while the funeral of Queen Victoria cost $175,000 and that of King Edward cost England $200,000. In comparison with these heavy costs the recent funeral for President Ebert of Germany gives a picture of thrift, the total cost being slightly less than $50,000.—Ohio State Journal.

Odd British Industry

"Drudging" is a recognized industry in English ports. The professional "drudger" with the aid of long and specially constructed poles called "hitchers," salves coal during the process of coaling ship. The "drudging" fleet, a collection of queer little broad-beamed boats, is to be seen at work at all waterside places where ships take in coal or discharge it. A certain amount of coal falls overboard into the river or harbor mud, from which it is retrieved by the "drudgers," who wash it, take it ashore, and sell it to householders at a low price. Coal "drudging" is a skilled occupation, and one that is handed down from father to son.

Origin of Slang

Originally, slang stood for the jargon deliberately adopted as a kind of secret language by certain classes.

The word, for instance, has been traced back to the "slang" or letters worn by convicts, and the words which they used to mislead their wardens became known as slang.

Whether this is the real explanation or not is uncertain—various other origins of the term have also been suggested—but the fact remains that slang started as a secret jargon known only to a certain number of people.

Today the meaning has considerably broadened, and we speak of slang as all words and expressions which are outside the "official" language of our own times.

Sitka Spruce

The Sitka or tideland spruce is a large tree occurring abundantly from northern California to Alaska, following the coast as far as the island of Kodiak. It is one of the largest trees of North America, attaining in low regions a height of more than 300 feet and a diameter of 7 or 8 feet at 100 feet from the base. Specimens upon the islands in southeastern Alaska measured more than 200 feet in height and 25 feet in circumference 4 feet from the ground. The timber is very valuable, entering into all kinds of building operations.

Notice Of Sale Of Bonds

Notice is hereby given that the Trustee of Concord School Township DeKalb County, Indiana, will offer for sale to the highest bidder $30,000.00 par value of the bonds of the said Concord School Township, at the hour of ten o'clock A. M. on the 27th. day of June, 1925 at the school house in the town of St. Joe, said DeKalb County, Indiana. Said bonds to be for the aggregate sum of $30,000.00 and shall bear interest at the rate of four and one half per cent per annum, payable semi-annually to be issued in thirty series, each series shall consist of two bonds numbered one and two; each bond shall be for $500.00; series number one shall be due on the 1st. day of July, 1925; series numbered two shall be due on the 1st. day of January, 1927, and one series shall fall due each six months thereafter until all have been fully paid. Said bonds shall be sold for not less than par and accrued interest at the date of sale. Date of issue of said Bonds July 1, 1925.

The said Trustee hereby reserves the right to reject any and all bids.

FRANK L. MILLIMAN
Trustee of Concord Tp

Notice Of Sale Of Contract

Notice is hereby given that the Trustee of Concord School Township will receive bids for the construction of a new school house in the town of St Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A. M. on the 27th. day of June 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St Joe DeKalb county, Indiana, on the 27th day of June 1925, at 10 o'clock A. M. of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said Trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township Trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township Trustee reserved the right to reject any and all bids. Dated this 29th day of May 1925

Fashion Smiles on Silk Alpaca

If you are not acquainted with silk alpaca, find an opportunity to meet it very soon and learn the dependability and beauty of an aristocratic fabric. The picture shows a two-piece dress of black alpaca finished with white crepe de chine and white buttons. The design and the fabrics are exactly suited to one another.

Notice Of Commissioners Sale Of Real Estate

State of Indiana
County of DeKalb
In the DeKalb Circuit Court
May Term 1925
In Partition
Cause No. 13364

Edward Pflaumer, Executor of the Last Will and Testament of Emillus Case, deceased.
vs
William Hollabaugh et al.

Notice is hereby given, that the undersigned Commissioners, appointed in an action for partition in the DeKalb Circuit Court wherein Edward Pflaumer, Executor of the Last Will and Testament of Emillus Case, deceased, is plaintiff, and, William Hollabaugh et al are defendants for the partition of certain real estate therein described and for the sale of the said real estate described in the said complaint in said cause, that we, as such Commissioners, will on the 19th day of June, 1925, at the Law Office of Springer & Campbell at Butler, DeKalb County, Indiana, at 1 o'clock P. M. on said date, offer for sale at not less than the full appraised value and at private sale and in the tracts herein-after designated, the following described real estate in DeKalb County, State of Indiana, to-wit:

Tract No One (1):

The east half (½) of the northeast quarter (¼) of section twenty-eight (28,) township thirty-three (33) north, range fourteen (14) east.

Tract No Two (2):

The northeast quarter (¼) of the southeast quarter (¼) of section twenty one (21), township thirty-three (33) north, range fourteen (14) east.

Also the southeast quarter (¼) of the northeast quarter (¼) of section twenty-one (21,) township thirty-three (33) north, range fourteen (14) east.

The said real estate to be sold pursuant to an order of the DeKalb Circuit Court and upon the following terms and conditions to-wit: At least one third of the purchase price cash in hand, one-third in six months and one third in twelve months, all deferred payments to be evidenced by notes of the purchasers, waiving relief from valuation and appraisement laws, with attorney fees and payable at a bank and in all respects fully negotiable, and, the said notes so given as and for such deferred payments to be secured by a first mortgage upon the said real estate, executed by the purchaser with his or her respective spouse joining therein said notes to bear interest at six per cent per annum from date.

Said sale will be subject to the approval of the DeKalb Circuit Court and the said real estate will be offered for sale on the date above set out and from day to day thereafter until a suitable bid is received, the said Commissioners reserving the right to reject any and all bids; the purchaser to have the right to pay the entire purchase price in cash without discount.

Said sale will be made of said real estate subject to all rights of tenants having out crops and further subject to the current taxes for 1925 due in 1926, which the purchaser shall assume in the sale of the real estate.

Dated this the 18th day of May, 1925. Henry C. Springer and Charles S. Smith, Commissioners.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JUNE 18, 1925 | NO. 25

Home Coming Saturday, Sept. 5th.

The arrangements for the second Annual Home-Coming of St. Joe and community, Saturday, September 5, 1925, were completed at the public meeting held Friday evening, when a good crowd of citizens were present. For the benefit of our readers we publish the officers and committees as follows:

President—Ed Miser.
Secretary—Vernon Woodcox.
Treasurer—F. M. Monroe.
Invitation—S. S Widney,
Reception—Mrs Mary Bowman
Program—Ed Leighty.
Advertising—F. B. Leighty.
Music—C A Woodcox
Club Display—H. J Renner.
Sports—Francis Hickman, Walter Baker and Roy Koch.
Street—Harcourt Miser, D. B. Ridgway and Leon Kees.
Concession—Wm Curie, F. M Monroe and John Wineland.
Parade—Ed Leighty, E R. Kinsey and Ray Reasoner.

How The News Can Help You

Ask any St Joe housewife what constitutes the greatest problem of cleaning and she will tell you it is finding a way to get rid of various articles that have accumulated about the house for which she has no use. Things that are still too good to destroy, but which have been replaced by something else to take up room that is badly needed. And yet the housewife knows that once they are put away they are there to stay, collecting dust and rust and cobwebs, and doing nobody any good. Right here is where we want to offer a suggestion that may help out. Surely there is someone in the community who would be glad to get the very things you want to be rid of. They would gladly pay a reasonable sum for them, too. So why not kill several birds with one stone—get rid of these articles for which you have no use, get a little money out of them and at the same time confer a favor on a neighbor who would be glad to get them. A small sum spent for a little reader or two in the columns of this paper will do the work—and thus will be removed one of the biggest problems of cleaning.

What they think about it

"It strikes me," said E R Kinsey yesterday, "that if a fellow wants his dreams to come true the best he can do is to wake up."

We happened to mention at the postoffice yesterday that old quotation about man being just a little lower than the angels and Harry Kees said then the angels must get pretty low sometimes.

"Contentment," says J. P. Buckingham, "is being able to enjoy yourself in your flivver while your neighbor is passing you in his twin-six."

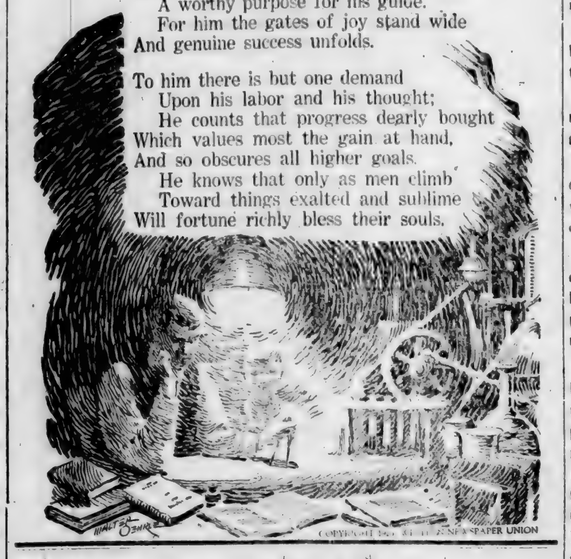
"Strikes me as being funny," says M. T. Bishop "that we had to drive whiskey out of politics and now we have to turn around and drive politics out of whiskey."

Onward and Upward

by O. Lawrence Hawthorne

I wish more men somehow would learn
The value of a great ideal.
I wish that all of us could feel
The earnestness and faith that burn
Within the heart of him who holds
A worthy purpose for his guide.
For him the gates of joy stand wide
And genuine success unfolds.

To him there is but one demand
Upon his labor and his thought;
He counts that progress dearly bought
Which values most the gain at hand,
And so obscures all higher goals.
He knows that only as men climb
Toward things exalted and sublime
Will fortune richly bless their souls.



Obituary

J. N. Keeler was born in May 1851 Birch county, Pa , and died June 9, 1925 in Kalamazoo, Mich.

In 1906 he came to his son's home, Wm. Keeler and made his home with the exception of four years, leaving his son,s two or more years ago to reside in Kalamazoo He was a member of the Railroad Trainmen Brotherhood having been a member for many years.

He leaves two sons, Wm Keeler Keeler of St. Joe and Harry Keeler Stutz of St. Louis, Mo.

Services were held in the Methodist church, conducted by Rev. Havens. E. R. Kinsey, director. Burial in Riverside cemetery.

CARD OF THANKS

We wish to express our appreciation for the assistance rendered in the burial of our father.

William Keeler
Harry Keeler Stutz.

HERE AND THERE

For Sale: Thorobed Davenport. Arthur Wilmot. 25t1p

Roy Maxwell has made the purchase of a Chevrolet at the St. Joe Garage.

The Indiana Power and Light Co., will extend their lines south from the Hadsell bridge to Harlan The right-of-way has been secured and the surveyors have the line staked ready for construction. Work will begin soon.

Scott Scholes, son of Rev. J. N. Scholes, of east of town, had a thriller Friday morning with their new Maxwell. He attempted to back out of the garage and instead went ahead and knocked the siding off. The car was not damaged much.

Real Mending Done By the Sun

The sunlight does more mending, than human beings as yet know. It is but recently (1903) that the first clinic for heliotherapy was opened over in the Swiss mountains. After all, when we put people out in the sunlight to heal them of some forms of tuberculosis, to aid in the relief of those cripples who have had infantile paralysis, and to counteract the effects of the rickets, we are imitating the age-long wisdom of certain spiders. The parent carries on her body numerous tiny baby spiders and places herself in the sunlight. Faber will tell you in one of his books how the babies frisk around under the influence of the light.

We use the ultra-violet rays, "infra-red," and other kinds of rays (not X-rays) as well as sunlight as a whole, and talk learnedly about "heliotherapy." All we mean is that we are getting Old Mother Sun to do our mending for us. She does it well too, if we give her a chance—that is we who can stand her powerful needles.

There are those who cannot endure exposure to sunlight. In their skins there is no "transformer" which catches the rays of light, which are powerful enough to burn out the cells of the body tissues, and turns them to heat which does no harm. You may have overheard the nurse or doctor say that "So-and-so cannot take the light treatment because he does not tan. The skin which shows tan usually possesses that "transformer" in the skin, protecting the body from injury. Those who merely redden may be found to run a more or less high temperature, and unless this can be avoided, heliotherapy must be discontinued.

Old King Tut was wise in that he was a sun worshipper before he began to worship beetles and cats and other creatures. And the Romans knew the value of sunlight for healing sores and maintaining health. Gradually we are learning what there in sunlight to serve us in sickness and in health.

All of those who are able to live outdoors have a fuller benefit from the sun. Glass of which our windows are constructed are said not to allow the violet and ultra-violet rays—the curative rays—to pass through. Quartz on the other hand will allow them to pass.

As for vitamines: Just go and soak up in the sun-light. It is easier to take than codliver oil.

NEWS OF THE TOWN

Mrs. Lloyd Draggoo has been on the sick list the past week.

Wilson Sanders is in a very critical condition, so that his son and relatives were notified.

D. R. Kosht has moved from Decatur to his father's farm, three miles north of St. Joe.

We bake special orders of any kind if order is phoned or sent to Cochran's Home Bakery.

Chas Jordan and family of Garrett, were Saturday and Sunday guests in the G. M Barney home.

Miss Frieda Lawson, of Auburn, came Thursday for a few days visit with her sister, Mrs. Vernon Woodcox and others.

C R Price has given his home a coat of paint and also screened in his front porch. Wm. Pepple is painting his home and H. J. Renner is preparing his house for paint.

The eighth grade commencement held at Auburn last Thursday and there were twenty honor graduates, pupils receiving grades of ninety or more. Among those of Spencer township were, Kenton McCrory, 96.4; Janice A. Wade, 95.7; Ercil Carl Steward, 92.4; Ralph H. Beams, 90.8 and Harold A. Furnish, 90.4.

A. Z. Arehart, former DeKalb county agricultural agent and his family will return to Auburn to make their future home. Mr. Arehart is county agent of Porter county of which Valparaiso is the county seat and he and Mrs. Arehart are homesick to return to Auburn where they have a host of friends. Mr. Arehart will probably resign as county agent in the near future and shortly afterward move to Auburn.

Fishing season is now open.

Plain or stripe Berne Overall $1.50, Coolidge Store.

Harry Keeler Stutz of St. Louis Missouri, is her the guest of his mother, Mrs. Ira Bone also his brother, Wm. Keeler.

We will serve suppers or dinners for clubs and class meetings with a few hours notice. Cochran's Restaurant.

Carl L Smith, 21, clerk, Hicksville, and Olive Lucile Killian, 17. St. Joe. The bride's father, Clarence S. Killian consented to the marriage.

The appointment of a county agricultural agent to succeed Benjamin H. Repp was postponed by the county board of education Thursday to July 6 in order to give further opportunity for the investigation of the application of R. E. Johnson, now acting agent at Huntington.

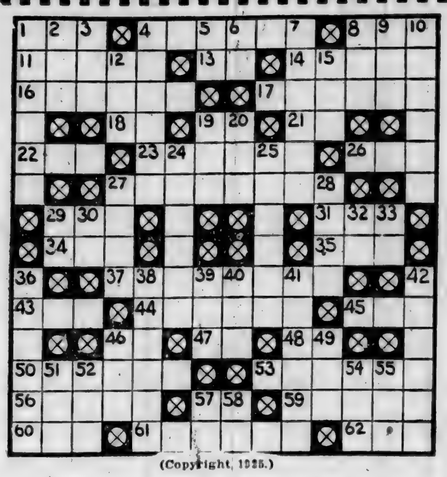
CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

1—An exclamation
4—Generous
8—Sick
11—Province
13—Preposition
14—Bleak
16—A combining form denoting a greenish color
17—A public way
18—Pronoun
19—Egyptian god
21—Pronoun
22—Not subject to any discount
23—Sour
26—Large nonpoisonous serpent
27—One who silvers fish
29—Insect
31—Tribe of Indians
34—Part of foot
35—Negative
37—The warden's pets
43—Newt or small lizard
44—A poisonous serpent
45—South African ostrich
46—Pronoun
47—You (pl.)
48—Preposition
50—Holy persons
53—Separated by leads
56—Term used in physics denoting analytic function that expresses the potential energy of a system
57—To finish
59—Having an irregularly notched margin
60—A Japanese coin
61—God
62—Small mound of earth

Vertical.

1—An incline
2—Exclamation
3—Quite
4—Pertaining to north wind
5—Negative
6—Conjunction
7—Information
8—Anger
9—Falsehood
10—Pertaining to death
12—To promise solemnly
15—Morsel left at a meal
18—Clergyman's title (abbr.)
20—Consumed
24—Pertaining to a sour fruit
25—Sarcastic
27—Let it stand
28—Moves rapidly
29—Preposition
30—Negative
32—Preposition
33—And
36—Irritates
38—Agitate

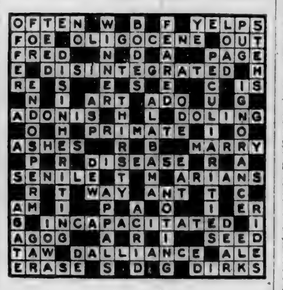
42—A seaport in Scotland
46—First name of well-known actress
49—A wooden implement for propelling a boat
51—Form of verb "to be"
52—Unknown (abbr.)
54—Little lump
55—Suffix to form adjective and noun of names of countries
57—To perform
58—Exclamation

The solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

If Economy Is Wealth, Skinner Will Prosper

President Arthur Williams of the American Museum of Safety, said to a New York reporter:

"One and a half billions a year are lost in America through disabled help. This vast loss is due to parsimony—stupid unwillingness to install safety devices. Such parsimony is more shameless than Skinner's.

"A man rushed Skinner into a cigar store.

"'Two good domestic five-cent cigars,' he said, and slammed down a dime. Then he lit up, shook Skinner by the hand and hurried off, for he had a train to catch.

"Skinner lit up in his turn. He stood at the counter and smoked thoughtfully for a few minutes. Then he said to the salesman:

"'These cigars, I understand, are seven for a quarter. Well, here's your extra 15 cents. Just let me have the other five, please.'"

Points of Interest in Bequest to Doctor

The layman is inclined to wonder if the bequest of £1,000 by a man who died recently to the doctor who should discover that he was not really dead, but only in a trance, might not be void as against public policy, observes the London Morning Post in a recent issue.

One can imagine cases where expectant heirs or widows pining for freedom might let it be known that in the event of the testator being found to be only in a trance they would be prepared to double the stakes in favor of the doctor who knew enough to let well enough alone. It recalls the story of the Irish farmer's wife who was being carried into the cemetery when the coffin bumped into a gate post and the woman, who was only in a trance, came to and demanded to be let out. A few years later she really did die, and was again borne to the cemetery. As the coffin bearers approached the bereaved husband exclaimed hoarsely: "For hivin's sake, boys, mind that post."

Bedlam

Bedlam is the old synonym in England for a lunatic asylum. The word is a corruption of Bethlehem, due to the British custom of shortening proper names arbitrarily, as in Boston, for St. Botolph's town, Harden for Hawarden, etc. The hospital of St. Mary of Bethlehem in London, originally a priory founded about 1245, was afterwards used for the detention of lunatics, and gave rise to the popular use of the name.

Why Spring Cleaning

The idea of spring cleaning came to the moderns by way of the Dutch people, who borrowed it from the ancient Jews. Cleaning up was a custom associated with the celebration of the Passover, which falls about the same time as Easter. The first mention of spring cleaning in the English language appears to have been in the writings of Sir Thomas More, the famous lord chancellor, who was beheaded by Henry VIII.

Origin of Chapels

The word chapel comes from capa, a chest. The word was originally applied to the chest in which the relics of a saint were deposited, afterwards to the apartment in a church or cathedral in which the chest was kept. These chapels were dedicated separately, but were known by the name of the saint whose relics they contained.

No Argument at All

The attorney was setting up illiteracy as a defense for his client, accused of forgery. "Why, your honor," he argued, "this man could not have been guilty of this crime; he cannot write his own name." "Your argument is worthless," said the judge. "The prisoner is not charged with writing his own name, but that of someone else."

Precisely

Said an Irishman at a conference in London: "Gentlemen, this is a most insidious proposal. If you accept it, you will find it to be neither more nor less than the thin edge of a white elephant."—London Tit-Bits.

Still Alive in Pictures

A naturalist says the American eagle is becoming extinct. We should worry so long as they continue to strike off good copies of it.—Philadelphia Inquirer.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Women's Letters

WOMEN speak more easily than men and with less self-consciousness, and so they write letters more easily, and in the case of social letters, at least, more often. Men write on anything that is at hand or do not write at all, while women in general are careful as to their stationery and are more likely to know what is proper and what is not.

Women are more prompt in answering letters than men because, perhaps they are naturally more conscientious. A still further reason, and possibly a better one, is that women more often have the materials at hand in a desk or a table drawer, or in some convenient place, where they can be easily gotten at, and so there is not so much fuss and litter. A man has no place to go when he wants to write a letter. Nature (or custom, is it?) has not provided him with a lap, and the table is generally cluttered up with something else when he makes up his mind to write. A woman will write on her lap or the window ledge.

Because they are more fluent in speech than men, the letters of women are usually longer than those of men. They have less unity, are not so much to the point; they wander more. In a social or friendly letter there is no disadvantage in this fact. When gossip or neighborhood news are the topics of discussion, we like detail. The bald, unamplified statement is dull and does not satisfy our curiosity. It takes a woman to give all the interesting details. No matter if she does wander round the whole block in doing so.

When it comes to business the matter is different. Then we want to get at the point as quickly as possible; we want to know what it is all about without dragging in extraneous and unrelated matter. This is where the woman falls down. She is likely to tell it all from the creation to the end of time, and when she has finished you scratch your head often and, like the Frenchman, you ask yourself, "What is it that it is?"

I have a case at hand now. From what I can gather from the woman's letter a young student has rented a room from her and agreed in writing to pay $20 a month for it and keep it for a half-year. He now declines to stay, and she wishes my help in enforcing the contract. She could tell it all in three or four lines, and a man usually would do so. As it is, she takes eight closely written pages in which she touches upon all the details of the initial interview with her tenant; what he said, and what she said, and what she remarked at the time to her neighbor, Mrs. Brown. She stresses her own need, her husband's business inactivity, the fact that it is the first (and I trust the last) time she has ever had difficulty of this sort, though she has rented rooms since Columbus discovered America. There is much more interesting but wholly unrelated fact presented. What she really wants is for me to ask the boy to liquidate at once.

I have tried to analyze the cause of this prolixness in the correspondence of women, for it is pretty general in the women with whom I have business or social correspondence, no matter what the education of the women concerned may be, and I believe it can be explained on the ground that she is more emotional than men, more high-strung. She feels injustice, or joy, or grief, or business responsibility more keenly than he does, and feeling it she gives free expression to it, and so too often misses the relative importance of what should go into her letter, and in doing so writes an ineffective letter.

One of my old teachers of composition used to say that when, in criticizing the themes of his students, he could not think of any fitting comment to write upon the back of the paper, it was always safe to say, "Omit the first page." I have sometimes felt that the woman who writes the business letter might often with profit omit the first two pages.

Women more often than men reveal their characters in their letters. Their feelings come to the surface; then ruling passions show; their weaknesses are more evident. Two letters are before me as I write. The one is hastily, carelessly, sloppily done. The lines reel drunkenly across the page; there are blots scattered everywhere. It is easy to see that the writer would be a poor housekeeper, untidy in her dress, and one who let things run at loose ends. The second letter is beautifully done, careful, neat, well considered in all details. I can imagine how she looks; and I know her house is well run. She's the girl for me!

(© 1925, by Western Newspaper Union)

Gentlemen

Perhaps these are rarer personages than some of us think for. Which of us can point out many such in this circle—men whose aims are generous, whose truth is constant, and not only constant in its kind but elevated in its degree; whose want of meanness makes them simple; who can look the world honestly in the face with an equal manly sympathy for the great and the small? We all know a hundred whose coats are very well made, and a score who have excellent manners, and one or two happy beings who are what they call, in the inner circles, and have shot into the very center and bull's-eye of the fashion; but of gentlemen, how many? Let us take a little scrap of paper and each make out his list.—Thackeray.

Color Is Feature of Latest Modes

Recently there have been held a number of attractive fashion shows, expositions of the trend of the mode as it is presented by the foremost creators of styles in Paris and America. These, observes a fashion writer in the New York Times, illustrated principally the fabrics made by the American manufacturers, and for this reason have been occasions of greater significance than any ever before given.

At each of the gatherings there was evident a tendency toward a higher plane, a better standard in all things that have to do with women's dress. A vital point was the harmony between art and commerce, beauty and style, an underlying union of the practical and the ideal.

Showing Autumn Modes.

The theme that caught the attention at these style conventions was color. It is a sort of slogan not only for the moment, but for the days to come. Design, line, method are all important in their latest variants, but we have apparently gone on a long spree. It is the thing uppermost in the thought of every promoter, from whichever end he approaches the subject.

Fabrics and styles for the summer having been established, it is the mode for next autumn that is being flown in so many engaging models. There are the woolens, velvets and silks illustrated by the most prominent couturiers on both sides of the ocean in frocks and suits and coats, giving one a peep into the season far ahead, but acting also as a gauge by which to check up the present styles. The designs already accepted will have some sequel in the fashions that are to follow those of the summer. Their genuine points may be traced in the creations that carry on. The acid test will apply most of all to color. Fabric is first of all a matter of season, though all tradition has been left out of the scheme in the latest materials, since the mood is for silk, satin and crepe. Any, in fact, of the silk variants. In these a wider horizon, a deeper sense of color, is painted from a fuller palette than has ever given beauty and importance to just clothes, translating them into creations. From the inception of a type to its realized form, it is now, as never before in the history of fashion, a problem of harmony in form and proportion, but most of all in color.

Among the fashion plates presented by the artists who are drawing for the future, the advance fashions for next autumn are many of great distinction. It is safe to predict soft woolens of the quality of kasha, of flannel-like twills and of the kid finish goods, like and yet unlike duvetyne. These for frocks and suits and coats, and for wraps are of such materials or of velvet, lined with one of the new printed silks of the Cinderella type—the silhouette, modern floral, geometric or other tracery patterns. Those which give merely a hint of the wealth of ideas that will later find expressions in models designed by the world's foremost creators will share popularity with rich satin and surah.

For gowns of the softer type for both day and evening, there are the luxurious silks and velvets of subtle feeling, luscious quality and enchanting colors. A multi-colored, embossed

Afternoon Dress of Royal Blue, With Velvet Ribbon at Waistline.

velvet on a chiffon ground reflecting the richest tones of the Orient with the softer shades, monotone and two-tone velvets. Roman stripes, moresque, arabesque, cubist, and bold conventionalized flower and leaf motifs. In contrast to these are small "innocent" designs as fine, as delicate and as intricate as a mosaic.

Harmony Is Sought.

The simple expression ensemble, borrowed from the French authorities in style, embodies the idea of artistic costuming of the present day. The plan of so combining materials that three pieces, gown, bodice and wrap, would appear as one complete outfit, is being reflected in many other items of dress. Now much thought, taste and discrimination are given to hat, shoes, hosiery, scarf, gloves, neckwear, even to such minor details as the necklace.

There is no longer any hit-or-miss in the designing of a costume; it is a matter of harmony, with a definite type in view, and individuality is more important now than ever.

Shoes are of especial importance this season, with a gratifying tendency toward simplicity to carry out the mode in dress. Generally speaking, fancy shoes, the extremely low cut, the

Afternoon Gown of Tan Roma Crepe; Scarf Tied Into Lavish Bow.

shoe of many straps and of fancy detail are passe. The oxford, high-cut pump and the single-strap shoe for general occasions are shown by the best bootmakers, and for afternoon and evening are the sandal of satin or suede. At Paris the beige-colored shoe for both afternoon and evening is considered very smart and is already popular on this side.

Gray shoes are again in style, and quite new modes in black are shown. One is the black shoe in colonial pump, plain oxford or strap model, trimmed with colored leather, gray or tan beige, blue or green, to be worn with the ensemble costume. It is this narrow line of color which draws the footwear into ensemble harmony. Plain black is less seen this season except for service, although there is a decided vogue of patent leather in the dressier street shoes and for afternoon, because the glace finish is well adapted to the fancy buckles that are so decorative.

Certain motifs introduced in the advance styles in dress materials are shown also in the latest shoes from Paris. The cubist, the silhouette, the geometric, all of the patterns that relate to the so-called "modernistic" tendency, are presented by some of the more enterprising designers. These are seen, of course, in the satin brocades, the metalized or gold and silver leathers fancifully traced in contrasting color, or iridescent tints.

Shoes for Sports.

With summer at hand the demand is for sports shoes and for those of lighter weight and color to fit the street dress of the season. For town and even for general country wear light leathers are very popular, tan, gray, beige and all the pastel shades; tan in the pale yellow tint more than ever. And white is, of course, the universal summer sports shoe. White shoes and stockings are worn with all manner of light-colored summer frocks, as well as with the all-white costume. The styles in these were introduced at Palm Beach and other southern resorts during the winter, with a few conspicuous novelties. Some of the most attractive were white shoes, trimmed with colors—usually the pastels. These were seen at the continental resorts. A white shoe combined with beige or trimmed with beige is considered most chic.

For the woman who goes in for the more strenuous sports activities there are new but slightly changed models in the shoes that are worn for golf and tennis, the comfortable, practical, rubber-sole, flat-heel affairs, some of which are distinguished with a touch of black or colored leather. And for the long hike or long wear there is the Peel oxford, so popular in England, which is finding an increased clientele among sportswomen in this country.

Leaving the costume as a whole, the ensemble fancy is reflected in many charming groups of the smaller things. With an evening gown of flesh-tinted chiffon which is appliqued at intervals with larger silk flowers of a deeper shade having centers of silver and crystal beads are worn slippers of silver leather embroidered with beads.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

TORTOISE FAMILIES

"We are lucky," said Mr. Box Tortoise.

"Why?" inquired Mrs. Box Tortoise.

"Just think about it," said Mr. Box Tortoise.

"I don't know what to think about it," said Mrs. Box Tortoise. "Do you mean because we have such a nice zoo home? Or because the keeper is kind to us. Because we don't have to worry about getting our food? Or because we are always safe, so very safe?"

"Now," said Mr. Box Tortoise, "you have given me many thoughts; yes, many happy thoughts. I think we're lucky in many ways, but all along I've really only been thinking of just one way. Now you have given me pleasant thoughts and I'll show my gratitude by giving you some.

"Well, of course you know that we live on the dry land."

"Isn't the land always dry?" asked Mrs. Box Tortoise.

"Yes," chuckled Mr. Box Tortoise, as only a box tortoise can chuckle, and as only another box tortoise can understand, "the land is always dry—that is, except when it is wet. But then it isn't lost in the wet. I meant that we didn't live in the water as so many of the turtle family do. They're our neighbors in the zoo and I love to watch their ways.

"But to continue my story of why we are lucky. We can draw our legs and head inside our bony shell, and we can also lock ourselves in."

"I know," said Mrs. Box Tortoise, "by means of a tortoise lock which is in the center of our lower shell. That is why we are named Box Tortoises."

"Yes," agreed Mr. Box Tortoise. "Of course, you knew all about it but I wanted to remind you of it. We can always keep ourselves out of the way of danger by locking ourselves in our own little boxes when we are frightened. We do it in the zoo sometimes when people come near us who are strangers."

"Ah," said Mrs. Box Tortoise, "it's splendid for the box tortoises who have to live in the outside world to have something to keep them safe—and

"We Never Have to Worry."

what a wonderful thing it is to be able to carry around one's protection always and to be able to put on a lock, too!

"But we never have to worry for we are in the zoo and are always safe. Still it's nice to have our own protection always."

Now, Mrs. Gopher Tortoise was talking nearby. "I've heard of sensible creatures," she said to Miss Gopher Tortoise, who was her daughter, but who was called Miss Gopher, even by her mother.

"You mean other gopher tortoises?"

"Ah, my child takes after me. She is wise. There is a compliment for you and one for me. That's what I call saving time. Of course, it's not that I want to save time, but I hear people speak of it as something to be done. They rush and run and hurry, they scramble and race and dash about and if anyone asks them why, they say they are trying to save time and to do as much as possible in a little time.

"So I paid a compliment to both of us at the same time," continued Mrs. Gopher Tortoise. "I said you were wise and that was paying you a compliment, and I said that you took after me and therefore I paid myself a compliment. Of course, now that I have explained it all I don't suppose I have really saved much time—but no matter, as I said before, it doesn't really make any difference to me.

"Now, there are other sensible creatures. The prairie dogs are sensible for they dig holes in the ground. They say that they love to burrow and dig better than anything! That shows they're sensible, for we're sensible and we dig holes in the sand down South from where we came.

"Alas, when I think of home," continued Mrs. Gopher Tortoise, "it makes me glad, indeed, I am in the zoo, for we are supposed to be good to eat and our relations are fast disappearing down South—yes, they are disappearing down people's throats! Just because they are good to eat!

"They are big and they have thick shells but just the same they are caught and they are eaten.

"But our own story needn't have a sad ending. We're safe."

Her Fork Leaked

One morning four-year-old Bess had pancakes and sirup for breakfast. After she had eaten the cakes there was some sirup left on her plate and she said: "Mamma, please give me a spoon; my fork leaks."

SUFFERED TWO YEARS

Finally Relieved by Taking Lydia E. Pinkham's Vegetable Compound, Says Mrs. Anderson

Rangeley, Maine. — "Lydia E. Pinkham's Vegetable Compound helped me greatly for bearing-down pains in the sides and back, headaches and tired feelings. I suffered for two years and it seemed as though I could not get my work done from one day to the next. After reading letters from others who had taken the Vegetable Compound I decided to try it and now I can do all kinds of work, sewing, washing, ironing and sweeping. I live on a farm and have five in the family so am busy most of the time. I recommend the Vegetable Compound to my friends and hope my letter will help some one to take your medicine."—Mrs. WALTER E. ANDERSON, Box 270, Rangeley, Maine.

Over 200,000 women have so far replied to our question, "Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

98 out of every 100 of the replies say, "yes," and because the Vegetable Compound has been helping other women it should help you. For sale by druggists everywhere.

Labial Burden

James Agate writes: "I simply adore the Lithuanian folk songs of Mme. Szshwnowskzosha, whose name is on everybody's lips."

We thought we noticed lately an unusual number of people with pendulous lips.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Source of Straw Hats

Straw, from which most straw hats are made, is grown from special varieties of wheat in China, Japan and Italy.

Baby's little dresses will just simply dazzle if Red Cross Ball Blue is used in the laundry. Try it and see for yourself. At all good grocers.—Advertisement.

If a man speaks and acts as his conscience dictates he is called a crank.

A single dose of Dr. Peery's "Dead Shot" will expel Worms or Tapeworm. No second dose required. 372 Pearl St., N. Y. Adv.

ROAD BUILDING

JOHN LISKA WROTE BEST ROAD ESSAY

John Liska, Wisconsin Rapids, Wis. wrote the best essay in the 1924 national good roads essay contest for the Harvey S. Firestone four-years' university scholarship. The subject of his essay, which told in simple form the epic story of a country crossroads, was "The Relation of Improved Highways to Home Life." Liska is the fifth high-school student to earn this honor and award.

The contest is conducted each year under the auspices of the highway education board, Washington, D. C. of which the United States commissioner of education is chairman. It is strictly educational in character and in the several states is sponsored by one of the leading universities, or by the state department of education.

Mr. Liska's essay follows:

Isolation is the primary cause of the ignorance so evident in rural communities. Poor roads, more than anything else, have forced the farm home into a demoralizing isolation. The improvement of highways, making the consolidated school and social center possible, is injecting new life into homes formerly hopelessly isolated. Home life is broadened and enriched. Boys are willing to stay "down on the farm." Girls cease to envy their city cousins and to leave home for "the bright lights."

Just a few minutes of travel, on a particular road leading out of the city of Wisconsin Rapids, will convince the most doubtful skeptic of the value of good roads and their influence upon home life. About two miles from the city this road branches. One branch is called "the left road"; the other "the right road." The left road is almost always in a deplorable condition; the right road is hard-surfaced. The homes on the left road are dilapidated, the front yards scarcely recognizable among the tangle of broken machinery, old wire and various other objects placed "out of the way." The land has been cropped until it is impossible for even quack grass to flourish. The stock, descendants of some grand-dad's scrubs, is now so degenerated that scarcely any characteristics of a high-producing, profitable animal are evident.

Can you expect the boy or girl to remain on the farm under these conditions? Not one boy or girl living on this road has any education above the eighth grade, and very many have not even progressed that far. These young people, many of them lying about their ages, have had to seek a "job" at the store, mill or factory, instead of completing their education. Can home life be pleasant and happy where these conditions exist?

The road to the right leads through land slightly more fertile, but more fertile only as a result of better farm management. No farm home on this road, for a distance of twenty miles, is without at least one modern convenience. Several farms are equipped with every modern convenience, both in and out of the home.

The esthetic influence a good road exerts is very evident. Often it stimulates latent self-respect into practical expression. These people are continually adding some improvement in an honest attempt to beautify their home surroundings. Through diversification and rotation of crops they have succeeded in bringing their land to a high degree of fertility, resulting in a more stable income each year. They are sending their children to high schools, agricultural schools and universities. A better education is teaching these children to realize the value of a true home.

In a large measure, on the road to the left, the average farmer has lost his self-respect, has allowed his home to fall below the standard, and has failed to keep in stride with the times. He is considered inferior to city people. Farmers, such as those on the right road, are again placing the farm home upon the pinnacle where it should rest, "The True Home of Man."

How necessary to that home is a good road! What a relief it must have been to those simple folk in Whittier's "Snow Bound" to have the road opened and the floundering carrier bring the village paper to the door!

The left road may be compared to the snow-bound road, impeding progress, forcing isolation. The right road may be compared to the opened road, offering new opportunities, new possibilities and new happiness.

The right road is, in the true sense of the word, the "right road." We must build more of them. Until this is accomplished home life in isolated sections will, in the future, simply exist; but when all roads are "right roads," these same communities, these same homes, will live.

Much Road Building

An interesting feature of this year's road building is the evident willingness of both counties and states to assume building through issuance of highway bond issues. Sixty millions of dollars have been spent since 1918 on the Lincoln highway alone for improvements, and many millions more will be spent during the few years just ahead on this great 3,100-mile transcontinental road, which stretches from the Hudson river to San Francisco bay.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© by Western Newspaper Union.)

WHAT CAUSES ECZEMA

EVERYBODY has had eczema at some time or other, in a mild or severe form, in small localized patches or in a general skin irritation. We all know what it is and how irritating it is.

It is the commonest skin disease known, being nearly as common as all other skin diseases combined. It has many forms, but they all have the same general features. It begins with a redness and heat in the skin, over a large or small area. Then itching, varying from a slight annoyance to an almost unbearable distress. There may be some local swelling. The skin may break out in an eruption, may form crusts or scabs and may be intensely painful. Under proper treatment or sometimes with no treatment at all, it may disappear, without leaving any scars, to return again with the same symptoms.

While the causes of some special forms are known, no one knows the cause of the disease itself. It is an inflammation of the skin either all over the body or only in certain spots. Whether it is a disease of the skin itself or simply the skin symptom of some general disease, no one knows.

It has long been suspected that at least some forms of eczema were due to errors in diet. The fact that some people who are particularly susceptible to certain foods almost always have a skin eruption if they eat any of the foods which disagree with them, would seem to bear out this theory. Some persons cannot eat strawberries, lobster and other foods without being violently sick. Usually the illness is accompanied by a general or local attack of eczema.

These facts have lead to the suspicion that many if not most forms of eczema are due to some kind of food which is irritating to the particular person suffering from the disease. It has long age been recognized that the old adage which says that "One man's meat is another man's poison," is literally true. Our bodies are not all the same. What one human body will take in and absorb with benefit will sicken and poison another.

Most of the food substances suspected of producing eczema belong to the protein group. It has been found that patients with chronic eczema are often susceptible to eggs, corn, barley, wheat, cheese, lima beans, potatoes, chicken, rye and other perfectly good foods. Generally each person is only susceptible to one or two of these foods. But feeding the patient on the food to which he is particularly susceptible generally causes an attack of eczema.

Are you subject to eczema? Find out by careful trial and observation what food or foods seem to bring on the attacks. Then eat that food alone and see if the eczema disappears.

The chemistry of living matter is a strange and delicate subject. Study your own body and find out what agrees with you and what doesn't.

SHAKING PALSY

IN 1817, over 100 years ago, Parkinson, an English doctor, described a peculiar nervous disorder that has since been known among doctors by his name and by the public as "shaking palsy."

It is not a very common disease yet almost every village has one or more cases. Beginning cases can often be seen on the streets of any large city, although it is less common in the city than in the country.

It affects men more often than women and usually begins between fifty and sixty years of age. It has two principal symptoms, a shaking of the hands and the head and a peculiar, rigid condition of the muscles.

The shaking or tremor, as it is called, is characteristic and once seen can hardly be mistaken for anything else. It is a fine regular rythmical movement, from three to five per second. The hands, whatever their position, shake constantly yet without interfering in any intentional movement. That is, the patient can open and close his hands, pick up or lay down a book, paper or cup, yet all the while this fine trembling goes on. If the head is affected, it shakes no matter what its position.

The trembling is increased by excitement and sometimes by efforts on the part of the patient to stop it. Yet strange to say, it ceases entirely during sleep. Sometimes the feet are affected, producing constant motion when the patient is sitting down and interferring greatly with motion when the patient tries to walk.

The other symptom is rigidity of the muscles. They do not waste and are apparently as strong as ever. Yet they have a peculiar, dead, lifeless feeling. The patient cannot make quick movements, such as turning a book page or folding a newspaper.

In walking, there is a slow shuffling gait with short steps. Some old people with this disease also complain of sensation of heat and cold, of a crawling sensation in their skin or of loss of feeling. Usually the mind is not in any way affected, although in the very old, the patient may be childish.

As no one knows the cause, no one knows a cure for shaking palsy.

LIFE'S LITTLE JESTS

AFRICAN GOLF

A woman recently wished to dispose of a mah-jongg set of which she had grown tired, and asked a colored porter in her employ:

"Do you play mah-jongg?"

"What's that?"

"Oh, that's a game you play with little ivory blocks."

"Oh, yes, I play that," exclaimed the porter. "But why don't you say what you mean?"—Chelsea Record.

Ignorant of One Thing

Two friends were having an indignation meeting of their own. Both had suffered domestic strife and now they were comparing notes.

"Aren't women the limit?" growled the first. "We husbands don't know anything at all and our wives know everything."

"Well," said his companion in misery, reluctantly, "there's one thing my wife admits she doesn't know."

"What on earth is that?"

"Why she married me."

Telling 'Em

Rastus—When Ah had de influenza Ah had a chill dat was so cold dat it done froze all the water pipes in de horsepittle!

Sambo—Ain't nothin' Once Ah had a fever, and mah mouth was so hot Ah melted the doctor's thumometh, and Ah had to wear asbestos pajamas to keep from buhnin' the bed clothes!

NOT EVEN ACQUAINTED

"How does that girl strike you?"

"Good heavens, man! You talk like I was her husband."

Breeding Places

The cistern breeds the skeeters,
the garbage breeds the flies
That walk upon the ceiling
And buzz around the pies.

Motley Crew

Old Lady (to chorister)—And how many are there in the choir?

Chorister—Twenty-five.

Old Lady—Is it a mixed choir?

Chorister—Yes, all boys.

Old Lady—How can it be a mixed choir if they are all boys?

Chorister—It is; there is some as can sing, and some as can't.

How He Knows

"How does the hashaw know how many wives he has?"

"Oh, he takes stock at the first of the year regularly."

NOT ALTOGETHER

"I understand you got rid of your loud speaker."

"Well, not exactly! I'm still paying her alimony."

Fell Into Debt

'Twas in a restaurant they met,
Romeo and Juliet.
And there he first fell into debt,
For Romeo'd what Juli-et.

Soaked

Wife—Mrs. Jones sent over to borrow some sugar, some eggs and some flour. Evidently going to make some sponge cake.

Hub—Sponge cake is right. But why sponge entirely on us?

A Chuckle From Copenhagen

Customer—Ah, here's another of those hideous portraits you call works of art.

Dealer—Oh, no, madam! That's a mirror.

Insure Your Complexion!

USE Marcelle Face Creams and Cold Cream Powder

Their fragrance is charming and they impart that delightful feeling of well-being so much appreciated by every dainty woman. Best dealers everywhere sell it.

Rice Glue

The Japanese make a fine, clear glue, very useful in pasting white paper, by simply boiling rice in water until it is reduced to a thick, fine paste.

There is nothing more satisfactory after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue.—Advertisement.

All there is worth getting out of friendship is delight in the company of your friend.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher
Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

In Part

"They are getting married soon."

"Does he know her age?"

"Some of it!"

Pessimistic

First Freshie—What do you expect to be when you get out of college?

Second Freshie—An old man.

Let Tanlac restore your health

IF your body is all fagged-out and run-down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into the nearest drug store and get a bottle of this world-famed tonic. That's the first important step back to health and vigor.

Tanlac Restored Her Health

"Typhoid fever reduced me to 95 lbs. and left me weak as a rag. Failing to get relief from other sources I tried Tanlac and after 6 bottles had gained 20 lbs. Now I enjoy a fine appetite and feel like a new woman. As a nurse I give Tanlac to all my patients."

Wilson Sanders Passed Away

Early Monday morning, the life of Wilson Sanders came to an end at his home in St Joe, after continued suffering Funeral arrangements are announced for Wednesday afternoon at 2:30 from the residence. Because of The News being issued early, the life sketch will appear next week.

PERSONAL PARAGRAPHS

Mr. and Mrs. Wm. Pepple spent Sunday with George Pepple and wife at Waterloo.

Forrest Dermott and family were Sunday dinner guests of E. R Kinsey and wife.

Mrs Harman of Angola, spent over Sunday here with her son, Wm. Harman and family.

Mr. and Mrs. M J. Riding of Chicago came Sunday to visit Mrs. Alice Warner and F H Langley and wife, also at Fort Wayne until Tuesday.

Lost: Tire chain, Saturday evening, some where between Kenneth Miller's and Spencerville. Finder call News office or Ben Soule.

Mr. and Mrs. O L Widney of Hicksville were Thursday night and Friday guests and Mrs. Vera Elson was a Friday guest in the B. E. Widney home.

Two store fronts were painted last week, the Leighty Grocery and the Home Bakery and Restaurant. A very neat, clean and tidy appearance is presented in these two business places. An attractive E A T sign adorns the west side of Cochran's room, so that it can be seen for some distance up the street.

MORE OR LESS TRUE

At that, it isn't as bad to rush into matrimony as it is to rush out of it.

—

Two things a lot of men won't stand up for are their principles and homely girls.

—

All girls would die old maids if they had to wait for men to come along who would suit all her relations.

—

We may be all wrong, but our guess is that the girl who rolls her own isn't the kind who is gonna love her own long.

—

The only reason women are crazy for a lot of things is because they know they haven't a chance in the world of getting them.

—

Very few couples know what they are doing when they marry. That's the reason so many of them go through with the ceremony.

—

When a jar of rouge gets to batting for beauty sleep it may make a hit at the start, but it doesn't take it long to get into a batting slump.

—

Men are so built that if wives want their husbands to keep on bringing them flowers and candy they'll have the Constitution amended, making it a crime for them to do it.

—

It takes a girl just as long as it ever did to get into bed. It may take her less time to shed her clothes, but she makes up for it in the time it takes to remove her complexion.

—

The honeymoon has taken the count when she begins to wish they had put her in the nut factory when she was so crazy about him, instead of leaving her free to make such a fool of herself.

PUNGENT PARAGRAPHS

Fewer laws, fewer taxes.

—

Love is kindest to beginners.

—

When a dog has a bone, he seeks no companions.

—

"Being cute" is the first step toward becoming sassy.

—

The tongue ties many a knot that the fingers can't loosen.

—

In a contest for popularity, cleverness wins oftener than virtue.

—

Value is not determined by the price tag, but by Old Man Time himself.

At the close of a busy day. Photo Copyright, Underwood & Underwood, N. Y.

Conditioning the Farm Horse

Thousands of farm horses have been idle or roughing it during the winter months and are not ready for hard, steady work. It is now the season when the program of many a farm horse is suddenly changed without the preparation that is necessary for efficient service.

On many farms the horses have obtained their winter feed from stalk fields and the straw stack. They come through in a thin condition and need to be put in better flesh before ready for hard work. This is best done by gradually giving the horses in advance a portion of the same ration that is to be fed during the work season.

Whether the horse has been out in the open or standing idly in the barn, a moderate amount of light work preceding the rush season is advisable. The hardening process may be accomplished by changing horses each half day in doing the necessary hauling about the farm preparatory to working in the fields. This will exercise and strengthen the muscles without tiring them.

The horse will not perform efficiently in an ill-fitting harness. The raw sores that develop are due, in most instances, to plunging an idle horse suddenly into heavy work or to the fact that the harness is not properly adjusted. It is especially important that the horse collar be of the right kind, shape and size. A well-fitted collar does not choke and distributes the draft over the entire shoulder.

During the winter months most farm horses are groomed very little and the long hair of the winter coats is a handicap when spring comes. It is best to remove the old hair at once, by clipping. This is important as it increases the efficiency of the horse. It prevents the extreme sweating and lathering that would otherwise take place as the heavy work goes on and the weather becomes warm.

Due to the fact that the direct farm income is mainly from cattle, hogs, or sheep, the care of the farm horse and mule is generally neglected. It should be remembered that the income from the other classes of live stock depends upon the crops that the farm produces; and the horse furnishes the power that makes farm operations possible. More care for the work horse will in the end effect a saving and increase the efficiency on many farms. Be fair to the horse, by doing the things that will give him a good chance to give his best during the present season.

Causes for Gratitude

The people to whom we are the most grateful are those who help raise our standards, who awaken in us good impulses, who enrich us spiritually and morally, and who make us resolve to express ourselves in greater service to others.—Grit.

Nothing Gained by Hurry

Business dispatched is business well done; but business hurried is business ill done.—Bulwer-Lytton.

Woman Famous for Gift of Clairvoyancy

Mary Sprouse was one of the most remarkable characters, and was known throughout the United States during the early part of the Nineteenth century. She was born in Albermarle county, Virginia, in 1739, and at a very early age developed the gift of clairvoyancy.

Her gift first attracted attention when the "guessing games" of her fellow pupils in the little country schoolhouse were set to naught. As she grew into young maidenhood this gift developed without any special effort on her part, and soon her fame spread throughout the surrounding territory and then throughout the country. It is greatly to her credit that she never accepted any fees for performing her feats of clairvoyancy and she never went into the business of forecasting the future.

On the contrary, she raised vegetables and poultry and sold these at the market in Charlottesville, making the trip on foot daily. In fact, she continued her marketing until the day before she died, May 7, 1838, at the age of ninety-nine years.—Chicago Journal.

Eros Small Planet, but of Importance

Eros is known to astronomers as the name of a very tiny planet, but one of the highest importance, because it has enabled them to measure with the greatest accuracy the distance of the sun. Not only that; it has helped them to find the distances of the stars, and even to measure the dimensions of the universe itself.

Eros, discovered not many years ago, was a great surprise to astronomers, as no one had an idea that any planet came so near the earth.

It is only a few miles across. If anyone could reach it from the earth he would be able to jump a mile on it with the same effort as he would jump a few feet on the earth. If he had been accustomed to carry, say, a hundredweight of coals on the earth, he could easily carry sixty or more tons on Eros. Supposing he were a man of average weight, he would be a remarkably light creature on Eros—eight of him would go to the pound.

Famous English Prison

The "Fleet" was a famous prison in London, built over the Fleta, or Fleet, a once small creek, now a sewer. It was founded in 1189, and became a debtors' prison in 1640. It was burned in the great fire of 1666, and again in the Gordon riots of 1780; was rebuilt in 1781-82, and finally demolished in 1845. Many distinguished men were confined there, and Pope called it the "Haunt of the Muses," from the number of poets imprisoned within its walls. Fleet prison was also notorious for the so-called Fleet marriages performed there by clergymen imprisoned for debt. They were the occasion of innumerable scandals, and were finally declared illegal by an act of parliament in 1753.—Kansas City Star.

Caught on a Technicality

Judge Blank has a six-year-old niece of whom he is very proud. The other day she came to him with a serious air and said: "Uncle Robert, if a man had a peacock and it went into another man's yard and laid an egg, whom would the egg belong to?" The judge smiled indulgently and replied: "Why the egg would belong to the man who owned the peacock, but he could be prosecuted for trespassing if he went on the other's property to get it." The child seemed very much interested in the explanation, then she observed with an innocent expression: "Uncle, did it ever occur to you that a peacock couldn't lay an egg?"—Boston Transcript.

Exactly

Clerk of Court—Well, gentlemen of the jury, have you agreed upon a verdict?

Foreman—We have.

Clerk—What say you? Do you find the prisoner at the bar guilty or not guilty?

Foreman—We do.

Clerk—You do. Do what?

Foreman—We find the prisoner at the bar guilty or not guilty.

Clerk—But, gentlemen, you must explain.

Foreman—Of course. You see, six of us find him guilty, and six of us find him not guilty, so we've agreed to let it go at that.

Anne de Marquets

Anne de Marquets was born of rich and noble parents and very carefully tutored in belles lettres and her religious duties. She became a nun of the Order of St. Dominic at Poissy, where she devoted the poetic talents for which she was distinguished to the service of religion. Ronsard and other celebrated contemporary poets have spoken very highly of her talents. She reached an advanced age, but lost her sight some time before her death, which took place in 1558.

She bequeathed to Sister Maria de Fortia, a nun in the same convent, 380 sonnets of a religious nature.—Chicago Journal.

A Scrapbook

"And I suppose," remarked the fair visitor in the courtroom, "that they have a record of all the divorce cases that come to trial here?"

"Oh, yes!" said her companion. "They no doubt have a scrapbook."—Cornell Widow.

Slats' Diary

By Ross Farquahr

Friday—Evry oncen a wile pa trys to figger out a new way to make more money for his self. Today we all went to a funerl of a man which had died a few days before and on the way home on the fliver why pa he sed heed figgered out a new skeme for to make money. He sed he was a going to envent a coffin out of seement. & then when enny buddy was put in it why it wood last them a complete life time.

Saterday—It seems at sum relation of ourn went and got marryed just here of lately. Ma sed she had marryed a man witch has got enuff money so she can grattify evry taste. Pa sed that wood be mitey nice oney she hassent got no taste.

Sunday—Mrs. Gillem went away on a visit today and ast me to take care of her gold fish and chickens wile she is gone. She give me sum Maggazines to take home and when Ant Emmy seen the Century maggazine she was surprised to see so many of them. She thot the Century maggazine oney cum out once in evry 100 years.

Monday—Pa tuk us up to the city with him today and we went to a resterant for dinner and he ordered sum roast beaf. When he commenced to eat it he called the Waiteress and ast her if that was pork or beaf she had gave him. She sed. cant you tell witch it is. And he sed. No I cant. She sed. Then why shud you wirry witch it is.

Tuesday—Mrs. Gillem returned back home today and rite away she seen they was sum thing rong with the Gold fish and she ast me did I give them any fresh water. I sed No I diddent becuz they never drunk up what they had when she went away. I herd her say sum thing about a ox or sum thing.

Wensday—Pa says the main diffrence between he and Geo. Washington was that Geo. wirked hard and becum the father of his country and got his face on the money of are country. Pa says he becum the father of me and hasta wirk hard to get his hands on sum of the same.

Thirsday—Pa sed heed all ways had a ambishun to injoy sum grand opry so tonite we tuk him to see it. After we cum out ma sed Well how did you like it you sed you all ways wanted to injoy grand opry. Pa sed. Well I still got the ambition to ENJOY it. Same as I had before.

Christian Church Notes

Bible School at 9:30, communion service immediately following. Morning sermon by the pastor.

Turquoise's Odd Use

A Fourteenth-century authority states that turquoise protected horses from the ill effects resulting from drinking cold water when they were overheated. It is said that the Turks often attached these precious stones to the bridles and frontlets of their horses as amulets.

Epitaphic

Sufficient epitaph for most of us: "He meant well."—Duluth Herald.

CHAMBERLAINS COLIC AND DIARRHOEA REMEDY.

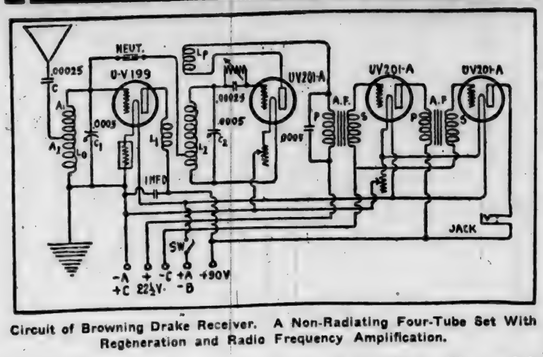
RADIO



Circuit of Browning Drake Receiver. A Non-Radiating Four-Tube Set With Regeneration and Radio Frequency Amplification.

The radio public has been introduced to hundreds of receiving sets and circuits during the past year or two. Some of them have been new but most of them have employed old principles and ideas revamped to look like something different. In some cases the new arrangement of circuits have been improvements while in others nothing worth while has been accomplished other than to make slight changes in order to attach trade names to old circuits. It is the exception rather than the rule when a circuit is designed and given to the public that really has an advantage over older methods.

Manufacturers and designers for some time have been working toward the neutrodyne and away from the regenerative. This has been due to the fact that the neutrodyne is an exceptionally good radio frequency amplifier and the regenerative, of the popular type, has several objectionable features. The trend along this line was so great for a while that there was an organized effort made to condemn the regenerative set as a public nuisance. Time, however, has brought a reaction and the public has begun to realize that a good regenerative is hard to beat. Engineers likewise are almost ready to admit that a receiver does not amount to much unless is uses some form of regeneration.

Eliminates Radiation.

The Browning Drake receiver employs one stage of neutralized radio frequency amplification, detector and two stages of audio amplification. The stage of radio amplification strengthens the radio frequency signals before they get to the detector and permits very sharp tuning. The detector with regeneration gives all the advantages of the old regenerative without radiation, which is the worst of the defects of the old receivers of this type.

The circuit of the Browning Drake receiver is given in the accompanying drawing. The two main features of the receiver are the antenna tuning inductance and the radio frequency amplifying transformer that works into the detector tube. The latter is made of three inductances, the primary, secondary and tickler, and is called a regenoformer to differentiate it from the ordinary transformer.

The antenna inductance L-0 consists of 50 turns of No. 20 double silk or cotton-covered wire wound on a three-inch tube. A tap is taken off at the center of this coil A-2 so that when the set is used with a long antenna it can be compensated for by using only half of the coil. When a short antenna is used it is attached to the top of the antenna inductance A-1. If neither of these connections are found to be appropriate for the antenna further vibrations in the circuit can be made by placing fixed condensers in series with the antenna. The regenoformer consists of three windings. The secondary is made of 60 turns of No. 20 double cotton or silk-covered wire wound on a three-inch tube. The tube should be long enough to allow for the mounting of the tickler. One tap is taken off of the secondary coil. This is at the fourteenth turn counting from the end opposite the tickler, and is used for neutralizing the tube capacity. The primary L-1 consists of 24 turns of No. 30 D S or C C wire, wound jumble fashion in a slot one-half inch deep and one-eighth inch wide on the outside edge of a wooden disk that will fit snugly into one end of the tubing that supports the secondary winding. This coil should be placed at the low potential end of the secondary, the lead of which goes to the A battery.

The tickler is of the common type, 30 turns of No. 20 D S or C C wire wound on a tube two inches in diameter. This is mounted on a rod that passes through two holes in the tubing that holds the secondary coil. It is placed at the high potential end of the secondary the lead of which is connected to the grid condenser and leak.

Care in Mounting.

When mounting the antenna coil and regenoformer care should be taken to place them at right angles to each other. This eliminates or reduces to a minimum coupling between the two circuits and prevents any feed back between them. In the standard parts made for this receiver the coils are mounted on the backs of the two variable condensers.

201-A or 199 tubes can be used. In the circuit shown a 199 tube is used as the radio frequency amplifier and 201-A's for the detector and audio amplifiers. The 199 is practically as good as a 201-A as a radio frequency amplifier and is somewhat more easily neutralized. The larger tubes give more volume than 199s when used as detectors or audio amplifiers and for that reason are recommended in these positions in the Browning Drake four tube receiver.

An amperite of the right value for a 199-tube is used in series with the filament of the first tube. A 30-ohm rheostat permits the control of the current to the filament of the second tube and a 20-ohm rheostat is connected in the negative filament lead to the two audio amplifiers. Two amperites can be used in place of the 20-ohm rheostat if one wishes to reduce the number of controls to a minimum.

The values of the various condensers, the remainder of the instruments and the correct connections are shown plainly on the diagram.

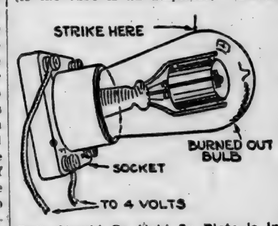
Those who have built receivers of this type are very high in their praise of the efficiency of the circuit. The four tubes give a greater amount of amplification than is obtainable with a five-tube set having two stages of radio amplification. Regeneration in the detector of the Browning Drake set affords much greater amplification than one stage of straight radio frequency amplification. One tube has therefore been eliminated, and by the use of one 199 tube the current drain on the "A" battery has been reduced materially. This receiver will be of particular interest to those who have asked the question, "How can I add one stage of radio frequency amplification to my regenerative receiver?"—St. Louis Post-Dispatch.

Welding Tube Filament With Regular Current

No doubt all radiophans have experienced the bad luck of burning out a tube, usually just when an extra is not at hand. If you have patience and carefully follow these directions you can repair your burned-out tubes.

The method of doing this is quite simple as can be seen in the illustration. The burned-out tube is placed in a socket and wires led to the filament binding posts, and these connected to the battery. About four volts is all that is required, and is often better than the usual six. The bulb is held in one hand, the other being used to strike the bulb as shown by the arrow in the illustration. The bulb should be held so that the plate is in the position shown. The bulb may require quite a lot of hitting before the broken filament will touch and weld. After the filaments touch the current will weld them together, but the tube will have to be handled with care so as not to jar them apart.

Bulbs repaired in this manner will give nearly as good results as new ones. They also make excellent detectors, sometimes being better than the ordinary detector tube, as they can use more current on the plate (if the tube is an amplifier). These



Bulb Should Be Held So Plate Is In Position Shown.

bulbs require much less current than the ordinary tube with almost as good results.

The bulbs described are those of the older make (UV-200 and 201); however, the newer ones (UV-201) may be repaired in this way in many cases.—Radio Digest.

Hints That Will Be of Interest to Radio Fans

Copper foil makes the best fixed condenser.

Keep wires straight; a kink in a wire may cause it to break.

The clips and terminals of a battery should be cleaned once a week.

A small watch case voltmeter is a valuable accessory to any radio set.

A crystal receiver provides the simplest means of detecting radio signals.

Rubbing over a bakelite panel with an oil-soaked rag will make the surface look like new.

A fairly good loud speaker can be made by fitting a telephone receiver into an old phonograph horn.

Keep the grid leaks of an amplifier as short as possible. The shorter they are the less chance of howling.

The proper test for a battery should be made with a voltmeter after the set has been operating about 20 minutes.

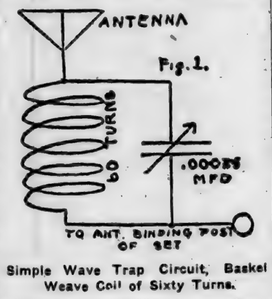
Wave Trap to Get Distant Programs

Coils of Basket Weave Type Are Well Adapted to Construction.

In these latter days, a radio receiver that will not tune through local broadcasting reasonably well is not all that it should be.

Yet there are many sets quite broad in tuning, and others that, while fairly selective, are found lacking when operated near powerful stations.

In such instances a wave trap affords a simple and quite effective means of tuning out local broadcast



Simple Wave Trap Circuit, Basket Weave Coil of Sixty Turns.

ing when distant programs are desired.

And, fortunately, coils of basket weave type are well adapted to wave trap construction.

Typical Circuits.

The accompanying illustrations are of conventional wave trap circuits. Those who wish to use the simplest of these (see Fig. 1) will require a basket weave coil of 60 turns (hence the standard loading coil will serve nicely) and a good variable condenser of about .00035 capacity.

It is only a little more difficult to

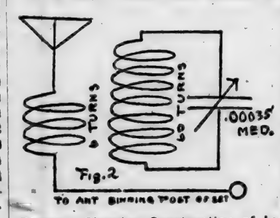


Diagram Showing Construction of Inductively Coupled Trap.

make an inductively coupled wave trap (as shown in Fig 2) by using the same condenser across the secondary of a standard radio frequency coil, which has a primary of six turns and a secondary of 60.

In using the loading coil the taps may be employed or not, as the builder chooses. Slightly better results might be expected if the inductance as well as the capacity in the trapping circuit were variable.

It will be seen that the trap is inserted in the antenna (or ground) circuit of the set in such a manner that incoming signals must pass through the trap in order to reach the receiver.

Methods of Tuning.

The usual procedure is to set the trap condenser at zero (that is, with the movable plates out of mesh) and tune the set to the local broadcasting that is to be eliminated.

Then carefully vary the trap condenser setting until the local station is no longer heard, or is reduced in volume as much as possible. Then retune the receiver to whatever distant programs are desired.

The effectiveness of a wave trap depends upon how well it is made, with what sort of circuit it is operated, and where and how it is used.

It will be found convenient to mount both coil and condenser in a small cabinet, or at least on a panel, with binding posts for connections.

Those who do not wish to construct wave traps will find on the market a number of efficient devices of this sort. —Cleveland Plain Dealer.

Coil Same as Increasing Length of Your Antenna

Two simple principles applied to the average receiving set will enable the operator to keep in tune with all waves from 200 to 600 meters. If a coil of wire is placed in series with the antenna it has practically the same effect as increasing the length of the antenna, thereby making it possible to pick up higher wave lengths. The larger the coil the greater will be the increase in wave length. If a variable condenser is placed in series with the antenna or ground wire the wave-length range of the set is reduced. The smaller the capacity of the condenser the greater will be the cut in wave length. To place a coil in series with the antenna connect the lead-in wire to one end of the coil and run a wire from the other terminal of the coil to the antenna binding post on the set. A series condenser is connected the same way.

Winding Coils

It is a simple matter to wind a coil with each turn of wire spaced a short distance from the next one. Start the coil with thread and wire, at the same time applying considerably more tension to the wire than when no thread is used. After the coil is wound and the end of the wire fastened, the thread may be unwound. It is much easier if you can persuade a friend to hold a spool of wire in one hand and a spool of thread in the other while you use both hands to turn the coil form.

INDIANA NEWS

West Baden.—"The council meeting has cleared up the atmosphere on questions tremenduously," said Mrs. John D. Sherman, president, at the close of the eighteenth biennial council of the General Federation of Women's Clubs, which has been in session. "If women only would listen and take heed of the things that are discussed and told them we would get along better," she said. During the business sessions the child labor amendment resolution was kept from being killed, the maternity and infancy, marriage and divorce and Communist resolutions were passed. Lorado Taft was the speaker for the final session, and a program on rural club programs finished the program.

Indianapolis.—Immediate negotiations will be started for the purchase of 500 acres of dune land on the shore of Lake Michigan for a state park, it was announced by the state conservation department. Everett Gardner of Monticello, member of the conservation commission, was appointed purchasing agent at a meeting of the commission and the dunes park committee with Gov. Ed. Jackson. Gardner selected State Senator Nejdl of Whiting and William Gleason of Gary to assist him in the negotiations. Gleason is president of the National Dunes Park association.

Indianapolis.—An impartial investigation of the charges that "the whipping post" has been instituted at the Soldiers' and Sailors' Orphans' home at Knightstown was asked of Gov. Ed. Jackson by Thomas McConnell, state commander of the American Legion; Frank Henley, state adjutant, and C. A. Jackson of Newcastle, representing the Sixth district legion committee. Mr. McConnell said that the governor had promised to have the investigation made.

Michigan City.—The resignation of Edward J. Fogarty as warden of the Indiana state prison was accepted by members of the prison board of control at the regular session of the board here. The resignation will be effective at the end of the fiscal year, September 30. William H. Daly, deputy warden, was appointed acting warden. On October 1, Mr. Daly will be formally named warden, Jess Andrews of West Point, vice president of the board, said.

Evansville.—John W. Daniels, age fifty-eight, who as a hospital corps man in the United States army in the Philippines campaign against the Aguinaldo insurrectionists, held Gen. Henry W. Lawton in his arms as the general was dying, died here. Daniels was the commander of the Henry W. Lawton post of the Veterans of Foreign Wars here and had been spoken of as the next state commander of the organization.

East Chicago.—Timothy O'Neil, captain of police, was arrested after two indictments charging him with assault and battery and larceny had been returned by the Lake county grand jury. O'Neil is accused of assaulting two deputy sheriffs of Hammond and taking their stars from them. The two deputies have also been indicted on the charge of attempting to extort money.

Lebanon.—John M. Conyers, eighty-three years old, ex-city treasurer, pioneer citizen and veteran of the Civil war, died after an illness since February, 1923, when he suffered from a fall. He served under Col. Lew Wallace during the Civil war and was widely known in the state as a pension attorney.

Gary.—A dozen steel excavators have been started to work on the site of the proposed $20,000,000 Jones & Laughlin Steel company's midwestern mills to be erected at Hammond, and gradual improvement of these holdings is in progress. The Hammond mills will be among the largest three in the Calumet district.

Indianapolis.—Appointment of Mrs. Frank B. Chester of Valparaiso as a representative for the United States public health service was announced at the office of the state board of health. Mrs. Chester will co-operate with the state board in doing educational work throughout the state.

Lebanon.—Three residences and four barns were destroyed by fire at Whitestown after the barn of the Lutheran parsonage was razed. Loss is estimated between $25,000 and $30,000. The homes of Rev. H. Grady Davis, Russell Huffman and A. O. Dulin were burned to the ground.

Indianapolis.—Mayor Lew Shank announced the reappointment of Sol Schloss, president of the board of health, for a period of four years.

Indianapolis.—Accidents and drownings brought death to 17 Indiana persons last week. Several were killed while on automobile tours.

Anderson.—Frank McCoy, an inmate of Indiana reforatory, who, with another inmate, Leon Sulz, escaped from the institution by using an automobile that belonged to the reformatory, was arrested at New York, where it was said he was attempting to pass fraudulent checks on banks.

Marion.—Leroy Simmons, eight years old, son of Mr. and Mrs. Frank Simmons, is dead of injuries received when he fell from a bicycle near his home in this city and was crushed by an automobile driven by Forest Lane. He died while en route to a hospital.

BOARD OF 14 FOR RURAL EDUCATION

Indianapolis.—Gov. Ed. Jackson announced the appointment of a committee of 14 persons to co-operate with Dr. Henry Noble Sherwood, state superintendent of public instruction, in making a thorough study of rural education conditions in Indiana.

The purpose of the investigation will be to recommend to the next session of the Indiana general assembly proposals for co-ordinating and unifying the system of rural education throughout the state.

Members of the committee, as announced by Governor Jackson, are:

Merle F. Coons, superintendent Montgomery county schools; H. L. Smith, dean of Indiana university school of education; G. L. Roberts, director of education, Purdue university; Charles A. Greathouse, ex-state superintendent of public instruction; Z. M. Smith, superintendent of Greenfield city schools; Claude Steele, Knox, state senator; C. Pralle Erni, New Albany, state senator; Thurman B. Gottschalk, Berne, state representative; George Freeman, Kokomo, state representative; Otis E. Crane, Marion, secretary Indiana Farm Bureau federation; Mrs. G. G. Derbyshire, Southport, president Parent-Teacher federation; Walter Farmer, Franklin, township trustee; Charles Appleton, Camden, township trustee; Everett L. Fields, New Castle, township trustee.

In discussing the work of the committee, Governor Jackson said:

"The growing appreciation of the value of education and the increasing complexities of human endeavor make necessary continual readjustments in our public school system.

"Urban communities have generally made adequate changes in the curriculum and provided necessary equipment and materials of instruction."

Indianapolis.—Gov. Ed. Jackson announced the appointment of two new members of the state live stock sanitary board, to succeed incumbent members whose terms expired Monday. The new appointees are Dr. Charles E. Mummert, Young America, and Marion Williams, Yorktown. Doctor Mummert succeeds Dr. Josiah H. Mills, Democrat, Russiaville, and Mr. Williams succeeds A. D. King, Muncie, Republican. The appointments are for three-year terms.

Brazil.—Dorothy Aitken, age eighteen, daughter of Mr. and Mrs. Dan Aitken of Midland, was killed, and Hester Stringfield, age seventeen, daughter of Mr. and Mrs. Norman Stringfield, also of Midland, was probably fatally hurt, and two others were injured in an automobile accident in which three machines were involved on a bridge in state road No. 9, a few miles north of this city, shortly after midnight.

Connersville.—A mastodon tooth, found in a clay bank near the Fries tile yards, west of here, has been donated to the natural science museum of the Connersville public schools. The tooth weighs six pounds and measures eght inches in length, five inches in height and three inches in width.

Gary.—After 48 hours of beating through the wooded and swampy country between Gary and Hammond from Ridge road to the lake by police, armed citizens and two squads of state militia, no trace has been found of the colored moron who attacked four white women in Gary. Two suspects are being held.

Indianapolis.—With vacation time here officials of the state department of conservation said that Indiana will entertain many thousand more tourists this season than ever before and that hotels, both privately owned and hostelries at the state parks will be taxed beyond their capacity.

Indianapolis.—Dale Russell, secretary of the school of education of Indiana university, was selected by the state board of education as director of statistical research. The position is a new one. Mr. Russell was assume his duties June 21. He will receive a salary of $3,200 a year.

Crawfordsville.—Wabash college's annual commencement program opened with the holding of the Hinkle C. Hays oratorical contest in the old chapel in Center hall. L. W. Price, a member of the Kappa Sigma fraternity, won first place with his oration on "Genius, the Educational Ideal."

Terre Haute.—The Bank of Carbon, a private institution at Carbon, was held up by three bandits and robbed of $30,000. The bandits fled in an automobile.

Columbus.—Milton Othello Reeves, age sixty, president of the Reeves Pulley company and of the Union Trust company and for many years prominent in the business and civic life of the city, died at the family home here after an illness of several months.

Indianapolis.—Members of the special commission created by the legislature of 1923 to buy a tract of land in the dunes area of northern Indiana met with Gov. Ed. Jackson and discussed steps looking to the consummation of their task.

SINNERS IN HEAVEN

PART FOUR

—15—

Broken Harmony

By CLIVE ARDEN

Copyright by The Bobbs-Merrill Co.

I

Miss Davies, Mrs. Stockley's only remaining sister, placed a marker in her book; then laid it down upon a small table. Her face assumed the complacent expression of one about to perform a pleasant duty in accordance with her conscience.

"I think," she observed decisively, "Hugh should be warned."

Mrs. Stockley glanced up from the stole she was embroidering. "About what?" she asked.

"Barbara."

Her sister made a gesture of annoyance, which caused her to prick her finger; this increased her irritation.

"I wish you would for once be explicit, Mary! You have thrown out dark hints about Barbara ever since we heard of her rescue. Why should Hugh be warned?"

"Are you so stupidly dense as you appear, Alice? Or are you wilfully blinding yourself?"

"I am no more stupid than the rest of my family, I hope!" snapped Mrs. Stockley, with much meaning.

"Well, then," continued her sister, ignoring this improbability, "you must realize that Barbara will most likely return—very changed. Indeed, from her one letter there seems no doubt about it. That was queer—very queer!"

Mrs. Stockley impatiently hunted among bundles of colored silks. "Of course she will be changed. She is two years older and has suffered ghastly experiences. She was very ill at Singapore: you couldn't expect long chatty letters!"

She spoke with unusual asperity. Two years of her sister's undiluted companionship had increased an inherent instinct toward contradiction, while developing a self-defensive alertness. Both were necessary in the radius of two sharp eyes ever quizzing through their lorgnette, two ears which seemingly reached all over the house, and a caustic tongue ready to reduce other people's foibles or few ideas to shreds. Such gifts used at the expense of common acquaintances are a different matter, of course. . . .

"Ah!" Miss Davies returned to the promptings of conscience with renewed relish. "You are as blind as Hugh, Alice. I saw him this afternoon, quite excited over meeting her tomorrow. He wants to have the wedding after Christmas . . . of course it was not my business to say anything!"

Whether this self-discipline could have been maintained had not other people been present, is open to question. . . .

"You don't understand Bab as well as Hugh and I do, you see," returned her sister complacently.

"No," she agreed, "but I understand Man!" Her lips closed with a snap, to give effect to the world of meaning in her words. "Don't you realize, Alice, that Barbara was attractive? And she has been flung, unchaperoned, for two years, into the society of a man who—well—had extremely loose ideas, and Bohemian ways—a man whose influence would be most questionable for any young girl."

Mrs. Stockley flushed. "Are you insinuating that Bab would be weak enough to allow him to influence her? After her careful upbringing, too? Why—looseness of any sort would be abhorrent to her! Her surroundings have always been strictly moral."

"I don't insinuate anything; but I wouldn't trust that man far, in such circumstances! We have yet to learn how he behaved."

"She did not allude to him in her letter."

"No. But—she did her utmost to get taken back to search for his body! Surely her chief desire should have been to hurry home to Hugh?"

Mrs. Stockley smiled impatiently. "You are making mountains from molehills, Mary! She did that purely from humanitarian motives; it was only right and natural. Hugh thought so. He liked Captain Croft."

"Hugh is too trustful: that's why I am sorry for him, Frankly, Alice, I do not believe a man and woman could live in such isolation without coming to grief. I have seen too much of human nature—"

"My dear Mary! what do you mean? You don't—"

Her sister held up a dignified hand to stop all interruption. "You must face it, Alice! Everybody is talking and wondering. Of course, it depends entirely upon the man. I don't imply that all men are beasts—as some women would who had seen as much of the world as I have. If he had a strong spiritual nature—a clergyman, perhaps. But that man!" She pursed her lips.

Mrs. Stockley gazed at her, her own face paling, her finger twitching the forgotten stole.

"'Coming to grief!'" she repeated, horrified. "Do you dare suggest my daughter would so disgrace her name and family as to allow— My dear Mary! it is preposterous! I would disown such a child. But Barbara! Why, I would trust her alone with any man, for forty years! She wouldn't dream of such things. Besides, Captain Croft was Mrs. Field's cousin, of good family himself—"

Martha, the old servant, hustled in at this moment with bedroom candles. She plumped them down upon the table, and her old face beamed at an excuse for [illegible] rudely rebuked. [illegible]rted.

Mrs. Stockley faced her sister, candle in hand, with an air of outraged dignity.

"Mary" she said, "your conversation tonight has shocked me inexpressibly! I insist on your never breathing a word of your suspicions—either to Hugh or Barbara. If she has any—painful memories—she will confide in me. Of course, I did not know Captain Croft well, nor like him; but—poor child! Her sufferings may have been worse than I ever imagined. Good night!"

With unusual decision she opened the drawing room door, and went to bed. But she lay long awake thinking over her sister's remarks. One alone stood out clearly, gathering force with every minute: "Everybody is talking and wondering."

Everybody eagerly devoured all scraps of news; but the supply was scanty. After being brought to Singapore, the heroine remained there, ill, unable to be moved for a time. . . . A certain reticence surrounded this illness, prostration being given as the natural cause. No trace of a white man's body was found by the expedition sent, post-haste, to search the island. Only the charred remains of a hut, and a few dead natives, were discovered in the north. In the south, a small tribe of furious, armed savages offered a wildly hostile reception, making approach difficult, refusing any information other than a poisoned arrow. . . . Babooma had presumably recovered and wreaked his vengeance upon the body of his late antagonist. . . .

When well enough, the girl had implored frantically, as one distraught, for facilities to return, herself, to search. This awakened a new interest, adding piquancy to the situation. But

Impatience Was a Novelty.

such quixotic madness could not be indulged by level-headed authorities. What could a girl accomplish where hosts of men had failed? No! The island had been thoroughly explored. The hostile faction of the natives was in possession; her return would be mere suicide, or worse. She was sent to England as soon as practicable.

But the De Borceau brothers, ever thirsting for adventure, understanding perhaps more of her sufferings and the true facts than they chose to publish, carried out to the end their oath to Croft. Only on the boat did they bid her farewell—then they returned to their charts and their seaplane. Nothing save death, so they vowed to her, in their exuberant French fashion, should deter them from learning final news of the man whose personality had won their generous admiration. . . .

The key to more intimate, romantic drama was not forthcoming. Speculation flourished. What would be likely to happen in such circumstances? Would propinquity bring love in its train? And, if so— This entailed endless discussion, heated arguments. What would be right, and what wrong? Which would need most courage: to resist or— There were women who thought the reverse.

The fact of the girl being already engaged shed a further glamor of the dramatic over the adventure, making the uncertainty all the greater. Perhaps no problem had arisen after all. . . . But if it had? Did the two themselves have clear convictions on either side; and, above all, courage to be true to them?

This was the vital point all longed to know. The pair became invested with romance. . . . Women laid their heads together and wondered. . . . Dark surmises were murmured concerning that illness at Singapore. . . . Sentimental girls forgot their matinee or cinema idols and cut Croft's photograph out of newspapers, half-wishing they themselves had been wrecked with him. . . .

Meanwhile, through the darkness of winter nights and drabness of monotonous days, the ship plowed her way to England which bore one from the closed gates of an "earthly paradise," with [illegible] eyes still dazzled by the lights she had left there, to trim the little lamps of her Darbury home.

II

The boat train was late.

Little groups of people, wrapped in heavy coats and furs, stood about the platform at Charing Cross chatting together; or promenaded slowly, eying their fellows with furtive interest, or absorbed in their own reflections.

Hugh became convinced that both the station clock and his wrist-watch had stopped; yet the watch appeared to be ticking when, every few moments, he exclaimed it. He sighed, turned on his heel, and for the twentieth time started to walk the length of the platform and back. Impatience was a novelty, also the state of excitement in which he found himself: he hardly knew how to cope with such sensations. . . .

Two years in his usual comfortable groove had changed Hugh very little. He managed his father's property, hunted, shot, played games, as of yore. If the tragic loss of Barbara had taken the keen edge from his enjoyment of life, making him a little older and graver, it had not destroyed his interests in the wholesome occupations which came his way. After the first shock had abated, he found himself a forlorn hero among his many friends, who took him to their hearts and filled his days so that brooding became impossible. Perhaps more than mere sympathy lurked within the minds of mothers with marriageable daughters; but that suspicion never penetrated his brain. The girl who was part of his very life had gone: to none other did he give a moment's thought.

And now this Twentieth century miracle had happened! After what seemed a dull dream he awoke just where he was, when, so to speak, he fell asleep. His feelings were absolutely unchanged, except, perhaps, that they were intensified by loss. The possibility of any alteration in their relationship never even occurred to him. As has been mentioned before, he was not blessed—or cursed—with imagination. . . .

When he had nearly reached the barrier, a sudden tension became apparent everywhere: conversations ceased, heads all turned one way, a flutter of expectancy passed over the scattered groups. . . .

Hugo turned quickly. The huge engine, approaching, glided slowly alongside the platform, followed by the train which brought far travelers home again from distant lands. . . .

Within a few minutes all was bustle and hurry. The platform swarmed with excited passengers, harassed porters, barrows, luggage. . . .

He searched hither and thither for the figure he sought, anxiety slowly rising within him. As the crowd thinned, he took up his position just inside the barrier, where she was bound to come. Peering through the murky light, he hastily scanned each face that passed, without success. When at last but a few stragglers remained, he made his way further down the platform a dull feeling of disappointment adding to his anxiety.

Casually his glance traveled over a thin figure in a dark coat and hat, seated upon a bench, a kindly, gray-haired porter standing near, suit-case in hand. . . . As he passed by, a voice he had once thought never to hear again caused him to turn sharply, with a leap of the heart.

"I shall be better in a minute. . . . Thank you, porter. . . ."

"Bab!" With probably the quickest movement of his life, Hugh reached the seat and seized the girl's trembling hands in his own. . . . Then all other words of greeting faded upon his lips: he was conscious of a sense of shock, a nameless apprehension. The general features of the face quickly raised were those he knew; but that was all. This woman with the heavy, haunted-looking eyes, the strained set lips, the curious rigidity of expression, bore no resemblance to the sweet-faced, impulsive girl who had clung round his neck at parting, in the cabin of the airplane. He felt checked, curiously embarrassed, as if with a stranger. Still clasping her hands, he gazed at her silently, noting with alarm the ashen hue spreading even to her lips.

Several times she essayed to speak, and failed. The porter, scenting romance, discreetly moved a few steps away. . . . At last Hugh heard his name uttered, again and again, in a voice so charged with misery that his apprehensions deepened, and a sudden mistiness enveloped the surrounding scene. For she was clinging to his hands like one in deep torment who, for the first time amid a storm of suffering, finds the anchor of an old friend. . . . And yet he received the impression of fear in her manner; she seemed loath to meet his gaze, unable to talk to him. . . . He was frankly puzzled; but an Englishman, with his horror of scenes, can be trusted to bridge over any threatening chasms.

Sending the porter for a taxi, he sat down by her side, still holding her hands, and took refuge in the prosaic.

"Come and have some tea—or brandy—or something, Bab," he suggested. "There's just time."

She shook her head.

"But—you—you—dash it all! You don't look fit to travel. What is it, dear—"

"I—shall be all right," she breathed. "We had a bad crossing. I—caught cold. That's all, Hugh."

He watched her with puckered brow. "What made you leave the boat at Marseilles and come overland?"

"I hated it!" she cried huskily, freeing her hands. "It was all—unbearable—day after day—the monotony, the people—oh! I hated it all!" Her eyes roved wildly over the platform, then she abruptly turned toward him. "I want Mrs. Field. Is she in London, or at Darbury?"

"Neither. She's in Russia."

The girl's hands twined convulsively together, and she said no more. It was a relief to both when the porter appeared to lead them to the waiting taxi. By this sudden act of traveling overland, she had successfully thwarted publicity. No curiosity was evinced in her arrival. She sank back in a corner, with throbbing head, bewildered by the noise around. It all seemed part of the nightmare which had been going on for so long, in which various parts of her anatomy moved, spoke, ate and slept, while she herself was numbed or dead. The movements around appeared as unreal and detached as the life of a gay city to one lying, blind and pain-stricken, in a darkened room.

Hugh turned to put his arms about her, as they drove away—but again something intangible checked him; instead, he took her hand once more, almost shyly, and leaned toward her. "Bab," he asked diffidently, "won't you—aren't you going to kiss me? After all this time?"

She drew away quickly, sharply. For a moment she laid her hand upon the door, with the mad instinct to escape which some trapped animal might feel on its way to the zoo, its heart ever away in the wilds with its lost mate. . . . Then, drawing a long quivering breath, she leaned back and looked up at him. In the light from passing vehicles, she saw the hurt wonder on his face. . . .

All at once the cold rigidity encompassing her heart relaxed. With trembling lips, and eyes swimming in sudden tears, she laid her free hand on his.

"Hughie!" she muttered brokenly, "you must bear with me. So much has happened, I have to tell you. . . . I—I'm not—I don't—" The words quavered away into silence. How was it possible, at this first moment of meeting, to blurt out the bald statements which would shatter his pathetic happiness and trust? She could not bear, yet, to allude to what had become a sacred memory full of poignant, exquisite pain. "I can't tell you everything—here," she continued. "Oh! I can't speak of it all—yet, Hugh! Don't ask me. It—it is so—unbearable—" Again her voice died away.

Hugh pressed the hands in his, and laid them against his cheek.

"Darling old girl! Has it been as bad as all that?"

He had, she knew, entirely misunderstood; but she made no comment. Explanations were impossible, just then. This meeting, fraught with such irony and tragedy, had bewildered her. Hugh's presence, with its present strangeness and odd sense of familiarity, brought with it a sense of shock, reducing her preconceived ideas of it to chaos.

When they reached Waterloo, she nerved herself to put the question she scarcely dared to frame—that which was her only interest in life at present.

"Has any news reached England—yet—from De Borceau?"

Hugh looked grave and shook his head.

"Of—Croft, you mean? No. Poor fellow. . . . I suppose—I say—Bab—"

"Yes?"

"I suppose—I've sometimes wondered—was Croft quite—decent to you, all the time?"

A harsh caricature of a laugh jarred on his ears.

"Yes. Oh! Quite—decent!"

Hugh knitted his brow at her tone. "You are sure? He—looked after you, I mean, and did all he could?"

"Oh, yes, yes! He—did all he possibly could."

"It was a beastly position for you both. Especially as you didn't like him—"

"Here's the station!" she exclaimed, with a quick breath of relief. The taxi drew up at the pavement, and a porter opened the door. . . .

The train was rather full; but the presence of others in their carriage was a boon to Barbara. Hugh had sunk so far into the background that, in her recent anguish, the consideration of their position had held no place. Robbed with such cruel suddenness of both Alan and her future motherhood, there had been no room, in the bitterness of her heart, for thoughts of the empty years ahead. Every throb of the engines bringing her away increased the passionate craving to return—to search every nook and corner of the island for remains of the man who meant more than life to her; then to lie down beside them and die, herself.

(TO BE CONTINUED.)

The Wonderful Baby

"Now, then, ladies and gents," shouted the rosy-faced showman, "walk up an' see the most wonderful baby on earth! The charge for admission is only sixpence. Walk up! Walk up!"

A good many people responded to the invitation, and when the place was full the showman brought forward a very ordinary baby indeed in all respects.

"What is there wonderful about it?" asked one of the disgusted audience of the showman. "I've seen thousands of babies like it."

"Well," said the showman, getting near an aperture in the booth, "all I can say is that its mother says it's the most wonderful baby on earth, an' if she doesn't know who does? You'll have to take the lady's word for it!" he yelled as he dodged an empty bottle and disappeared from view.—London Tit-Bits.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)

(©, 1926, Western Newspaper Union.)

Lesson for June 21

PETER DELIVERED FROM PRISON

LESSON TEXT—Acts 12:1-19.

GOLDEN TEXT—The angel of the Lord encampeth round about them that fear Him, and delivereth them.—Ps. 34:7.

PRIMARY TOPIC—Peter and the Angel.

JUNIOR TOPIC—Peter's Deliverance From Prison.

INTERMEDIATE AND SENIOR TOPIC—How Peter Was Brought Out of Prison.

YOUNG PEOPLE AND ADULT TOPIC—The Possibilities of Prayer.

I. Peter's Imprisonment (vv. 1-4).

1. By Whom (v. 1).

Herod, the grandson of the wicked Herod who slew the innocent children of Bethlehem.

2. The Reason (v. 3).

It was to gain the favor of the Jews. Herod was not a Jew, but an Edomite, therefore knew that his success was dependent upon his having the good-will of the Jews. He did not particularly hate the church, but loved popularity. Since the church had developed so as to be a successful rival of Judism, he saw an opportunity to curry favor with the Jews by putting forth his hands against it.

3. The Method (v. 4).

He was arrested, put into prison and guarded by four quaternions of soldiers. A quaternion is a guard of four soldiers. Four quaternions means that a special group was on duty each watch of the night. It was the custom for two soldiers to be in the prison, one on each side of the prisoner bound to his arms with chains (v. 6), the third one to watch outside the door, and the fourth to be near the outside gate.

II. The Church of God in Prayer (v. 5).

The church was at a crisis. Her situation was most grave. James, one of the brethren of the church, was dead, and Peter, the most prominent of all, was in prison. In this desperate strait they did the wise thing—they betook themselves to prayer. It was a noteworthy prayer.

1. It Was Unto God, Not Unto Men, or to Be Heard of Men.

2. It was United Prayer.

3. It Was an Intensely Earnest Prayer.

It was more than unceasing prayer. It was the earnest desire of the soul as it stretched itself out toward God.

4. It Was Definite Prayer.

They specifically offered prayer to God for Peter. Their prayer was concentrated, definite and specific.

III. Peter Delivered by an Angel (vv. 6-11).

This occurred the night before Herod's plan to make a public display of him.

1. Peter Sleeping (v. 6).

The Lord keeps in perfect peace those whose minds are stayed on Him (Isa. 26:3).

2. Peter Leaving the Prison. (vv. 7-10).

A heavenly light shone in the prison. The angel smote Peter on the side; the chains fell off. Peter put on his clothes and passed by one guard after another through the iron gate out into the city. The whole transaction was orderly and leisurely, showing that God is not in a hurry.

3. The Effect Upon Peter (v. 11).

Although the matter was so wonderful to Peter, even outside his consciousness, when he came to himself he was assured beyond a peradventure that God had miraculously delivered him from Herod's wicked hands.

IV. Unconscious Unbelief (vv. 12-19).

1. The Behavior of Peter and the Church (vv. 12-17).

Peter went to the house of Mary and knocked. The knock was answered by Rhoda who was so overjoyed that she forgot to open the gate, and ran in and told them that Peter was at the gate. The disciples were not prepared for such good news, and even accused her of madness. She, undaunted, insisted. They offered as an explanation that perhaps it might be Peter's guardian angel in his likeness. Peter rehearsed unto them the Lord's, dealing with him, and instructed them to make these things known unto James and the brethren.

2. The Behavior of the Soldiers (vv. 18-19).

There was great agitation among them as to what had become of Peter. This was a serious matter since they were responsible for him. Not being able to account for Peter's escape, Herod commanded that they be put to death. After this Herod went down to Caesarea. Here he was adored as god. Because he arrogated this honor to himself, the Lord smote him. Herod died, but the Word of the Lord grew and multiplied.

Value of a Deed

The value of a deed depends upon its meaning, and its meaning depends upon its motive and the spirit and purpose that prompt it. The widow's mite is really worth more than the spare cash of the rich, because it means more.—Nathaniel Micklem.

The First Thing

God's rule is over all; and in all our perplexity, doubt, and fear, Jesus reminds us that the first thing is faith in God.—T. R. Glover.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

In loving our fellowmen we may sometimes have occasion to sigh. This is not a perfect world.

Anoint the eyelids with Roman Eye Balsam at night and see how refreshed and strengthened your eyes are in the morning. Send now to 173 Pearl St., N. Y. Adv.

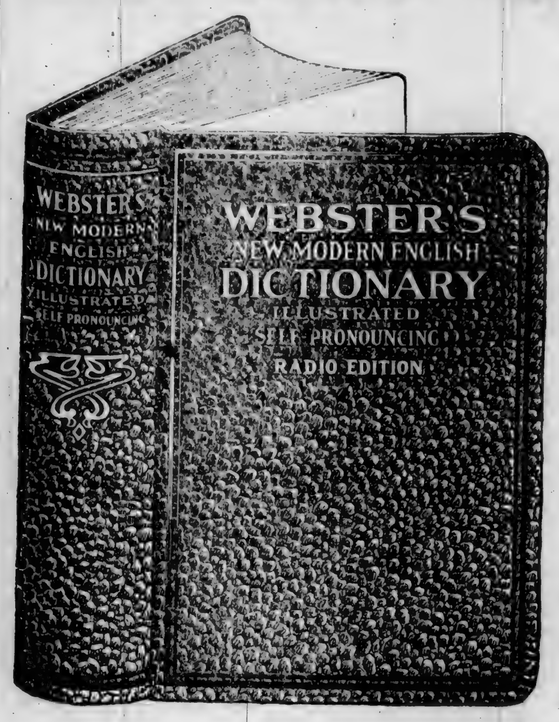
OUR EXCLUSIVE OFFER

WE HAVE made special arrangements with the publishers and have been given exclusive right for the distribution of the

WEBSTER'S New Modern English **DICTIONARY**

To the Readers of the

St. Joe News



A $4

Webster's New Modern English Dictionary for NOW ONLY

98c

and 3 Coupons

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons—the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

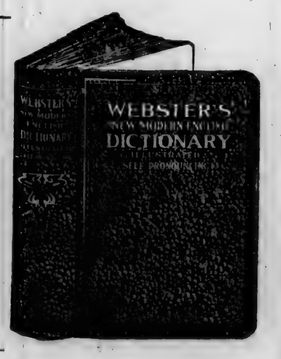
Dictionary Coupon

Clip three 3 coupons and bring to office of the

ST. JOE NEWS, St. Joe, Ind.

which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.



And Yet That "Roll" Had Seemed So Real!

The mind is capable of embracing almost any belief or conviction. And the psychoanalysts tell us some of these are revealed in dreams. Strangely, too, they claim we often forget our most important dreams. Perhaps some psychoanalyst can explain this story, which is vouched for by Tim Crowley.

A friend of Tim's had a failing for stuss. For two years his losses at this card game were the cause of a regular Saturday night squabble with his wife. But every tide turns some time, and one night Jim arrived home with a fine swagger and $1,800 in bills. His long-suffering spouse immediately seized the roll.

"I am going to keep this for all you have lost," she announced determinedly.

Jim had nothing to say, but noticed that she put the money under the pillow.

After they had retired Jim began to think how, instead of winning $1,800, he might have won $18,000 by playing his luck stronger. The idea gained such strength that he slipped the money from under the head of the sleeping Mrs. Jim and with it sneaked back to the game. A few hours later he returned, having lost all, and crawled into bed again without disturbing his mate.

He had been asleep only a short time when his wife shook him.

"Jim, get up!" she said.

"What for?" he asked.

"I want you to get up early to take that money to the bank for me."

"What money?" he asked, feigning sleepiness while his mind worked fast.

"Why, the money you won last night," she replied. "You aren't awake yet."

"You're talking crazy, woman," said Jim, sitting up suddenly. "I didn't win any money last night. You've been dreaming."

Mrs. Jim strode to the bed, lifted her pillow and a strange look spread over her face. As she walked away she muttered: "Who would believe a dream could seem so true?"—New York World.

Tobacco Seed Smaller Than That of Mustard

The cultivation of the tobacco used in the making of cigarettes is a most interesting process, even to those who may disapprove of the habit of smoking the completed product. The tobacco seed is so tiny that a single tablespoonful will produce plants enough to cover ten acres. Certain growers whose crops are always of the highest excellence will not sell a single seed at any price. Every crop is kept in the warehouse from three to five years for the purpose of "mellowing" or "sweating"—which occurs twice yearly—before the leaves are subject to "stemming." Sand and dust that have remained are shaken out by sieves, with the result that the tobacco is 25 to 30 per cent lighter because of the absence of the midrib and sand. Nimble-fingered girls can make 2,500 cigarettes a day, but machines can turn out 400 finished cigarettes a minute, or 190,000 in an ordinary working day.

But He Spoke English

An American girl, decidedly Parisian in appearance, was promenading along the Avenue des Champs Elysees one day when she was accosted by a Frenchman in his native tongue. Instead of insulting him in French, as she was capable of doing, she remarked in icy tones, "I don't understand a word you are saying." Whereupon the Frenchman exclaimed "Mon Dieu, another of these Americans," and walked away. Not long after that a friend to whom the girl had related the incident, met with a similar experience. She too, turned a withering glance on the little Frenchman, who was muttering in her ear, and told him in English that she could not speak French. "Oh, but, mademoiselle," replied the pest, "I spik Ingleesh, too."

Old Idea of Reparation

The Amende Honorable was a form of punishment that originated in France in the Ninth century. It was inflicted upon murderers, traitors, and sacrilegious persons. The culprit was delivered into the hands of the hangman; his shirt was stripped from his back; a halter was placed around his neck, and a lighted taper in his hand. In this condition, he was brought into court, and there made to ask pardon of God, the king, and the country. Death or banishment sometimes followed. As the phrase is now used, it refers to any apology or reparation made to an injured person.—Exchange.

Information Sought

A certain man who is very precise in the matter of English had occasion to consult a doctor.

"What you need more than anything else is a tonic in the shape of fresh air," said the doctor.

"Before we proceed further," said the patient, sarcastically, "would you mind telling me what is the shape of fresh air?"

What She Wanted to Know

The superintendent of a model farm was explaining the working of an incubator to a class of young women. At the end of the lesson she told them to ask any questions they liked if they did not fully understand her.

Imagine her astonishment when one of the girls, with an earnest look of inquiry on her face, put the question: "Where does the hen sit?"

Notice Of Sale Of Bonds

Notice is hereby given that the Trustee of Concord School Township DeKalb County, Indiana, will offer for sale to the highest bidder $30,000.00 par value of the bonds of the said Concord School Township, at the hour of ten o'clock A. M. on the 27th. day of June, 1925 at the school house in the town of St. Joe, said DeKalb County, Indiana. Said bonds to be for the aggregate sum of $30,000 00 and shall bear interest at the rate of four and one half per cent per annum, payable semi-annually to be issued in thirty series; each series shall consist of two bonds numbered one and two; each bond shall be for $500 00; series number one shall be due on the 1st. day of July, 1925; series numbered two shall be due on the 1st. day of January, 1927, and one series shall fall due each six months thereafter until all have been fully paid. Said bonds shall be sold for not less than par and accrued interest at the date of sale. Date of issue of said Bonds July 1, 1925.

The said Trustee hereby reserves the right to reject any and all bids.

FRANK L. MILLIMAN,
Trustee of Concord Tp.

Notice Of Sale Of Contract

Notice is hereby given that the Trustee of Concord School Township will receive bids for the construction of a new school house in the town of St Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A M. on the 27th. day of June 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St. J e, DeKalb county, Indiana, on the 27th day of June 1925, at 10 o'clock A M. of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said Trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township Trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township Trustee reserved the right to reject any and all bids. Dated this 29th. day of May 1925.

FRANK L. MILLIMAN.

Maxwell Touring Car, 1923, new paint, in A-1 condition, can make attractrive price for quick sale. St. Joe Garage.

MICKIE SAYS—

Speaking in the Legal Terms

One thing that makes legal advice costly is that so few of us can say what we want to say in legal terms. For instance, if a St. Joe man wanted to give a friend an orange he would simply say, "I give you an orange." But if he trust it to a lawyer—and pay legal rates—here is about how it would sound in writing:

"I hereby give and convey to you, all and singular, my estate and interest, right, title, claim and advantages of and in said orange, together with all its rind, juice, pulp and pips, and all rights and advantages therein, with full power to bite such and otherwise eat the same or give the same away, with or without the rind, skin, juice, pulp or pips, anything hereinbefore or hereinafter or in any other deed or deeds, instrument or instruments of whatever nature or kind whatsoever to the contrary in any wise notwithstanding."

Missionary Entertains Visitors

The local Missionary Society of the Church of Christ entertained the ladies from Newville and several other ladies from St. Joe, Friday afternoon at the home of Mrs. Belle Keesler. An interesting program was given on Prayer and Missions. The following ladies from Newville were present: Mesdames Kate Fusselman, J. A. Seeley and two children, Prudence Schramm, Jessie Fusselman and daughter, Mildred Enzor, Princess Casebere and daughter, Mabel Lyon, Maude Patee, Etta Glaw and daughter, Blanche Tomlinson, Mildred Beree and children. Those from Coburn's Corners were Mrs. Nellie Perry and Mrs. Sada Coburn. St. Joe ladies were Mesdames Myrtle Pugsley, Fern Hickman, Alma Woodcox, Neilie Lindley, Belle Woodcox, Nina Kees, Doris Yeiser, Esta Storer and Ada Bassett. A splendid offering of $3.75 was taken. Ice cream and cake were served.

LOCAL ITEMS.

Wilbur Yeiser and family visited friends at Angola and Kendallville Sunday.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JUNE 25, 1925 | NO. 26

DeKalb Awarded Flag Fifth Time

For the fifth consecutive year DeKalb county was awarded the flag at the annual state convention of Council of Religious Education, formerly the state Sunday School association, for being a 100 per cent county in organization.

DeKalb county led the four flag counties, the others being Wayne, Tipton and Tippecanoe. In addition to receiving the flag the DeKalb county organization was given the gold crown for having paid its apportionment in advance.

Fifty-nine Sunday Schools in the county are completely organized. Nine of the ten officers of the DeKalb county organization together with one hundred and five registered delegates attended. George E. Beugnot of Auburn is state vice president.

Mr. Beugnot presided at the adult meetings and Fred B. Leighty of St. Joe, county president, addressed the county officers meeting during the sessions of the convention at Winona. The convention next year will be held at Richmond.—Publicity Committee.

To Teach In The Butler Schools

Miss Edna Jackson will be among the teaching force of the Butler schools for next year. She will teach home economics and have charge of the girls athletics. Miss Edna has just completed two years normal work. Miss Helen Renner teacher of English and Walter Renner, history and coach, are sister and brother of H. J. Renner of this place.

In Society

St. Joe relatives have received invitations to attend the wedding of their nephew, Henry Beams, son of Mr. and Mrs. Frank Beams of Spencerville and Miss Phyllis Green daughter of Mr. and Mrs. Chester Green, of Garrett, which took place at the bride's parents Wednesday evening. The young couple will be at home in Detroit after July 10, where the groom has employment with the Ford company.

Mr. and Mrs. Jasper Snyder and Grover Morr and wife drove to Ft. Wayne Sunday to visit Mrs. Stella Snyder, who is very ill with cancer.

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The St. JOE ELEVATOR

Speeding us Lightly Away

O. Lawrence Hawthorne

Over the hills to the heart of the woodland,
Out to the nooks where the brooks gaily call,
Down to the farm with its orchards and meadows,
Back to the pool when the cool shadows fall—
Over the landscape of hillside and valley,
Eager to view where the beauty-spots are,
Bound for retreats of romantic enchantment—
Glad is the day when we play in our car.

Life has become so intensely delightful
Now that the world is unfurled at our door;
Friendship has made a companion of distance,
Bringing those dear to us nearer once more.
Open today is the pathway to freedom,
Calling us out with a shout gladly heard;
Laughter has caught a new cadence of rapture—
Notes that belong in the song of a bird.

Happiness comes on the wings of the morning,
Speeding us lightly and brightly away,
Off to the portals of lasting contentment
There to begin and continue the day.
Learning the wonderful secrets of nature,
Reading her glorious story afar,
Freely we join in a carol of praises—
Spirits are gay when we play in our car!

Falls From Pony and is Injured

Dorothy, the second daughter of Rev. C. H. Havens and wife was severely bruised and skinned when she was thrown from a Shetland pony, her foot catching in the stirrup. She was dragged several hundred feet. She with her parents and sisters were visiting in the Ira Bone home Sunday when the accident occurred. She was taken to Spencerville where Dr. B. O. Shook dressed the wounds. Fortunately no inward injuries were received.

Obituary

Wilson Henry Sanders was born January 31, 1848, in Burbank, Wayne County, Ohio. He was the son of Henry and Mary Sanders. His four brothers and four sisters have all departed.

He was united in marriage with Alice Bradley in 1898, who passed away in 1870 and to this union was born one son, Ellsworth Sanders.

In 1872 he was married to Mary Kinsey, who with his son Ellsworth are his sole survivors.

He was a member of the Lutheran Church and the Independent Order of Odd Fellows.

The funeral was conducted on Wednesday at 2:30 at the home by Rev. S. D. Steffey assisted by Rev's. Mumma and Clyde Havens. Burial at Spencerville cemetery.

Accident Takes Life of Penland Child

As the result of an automobile accident Sunday afternoon, Marie, the three year old daughter of Jay Penland and wife, died Monday afternoon at her home on the Newville road, just east of Sam Wyatt's residence.

During the afternoon four of the Penland children were playing in the creek bottom along the road, Marie and an older sister were going to join them and were walking on the left side of the road. An auto load from VanWert, Ohio, were going west and as they neared the children, the tiny tot darted across the road and was struck by the car, breaking a leg near the hip and fracturing her skull, rendering her unconscious.

In an effort to avoid hitting the child, six posts were broken off and the fence torn down, that had been built at the creek grade to protect travel.

The car was soon stopped and the child taken to its home just east of the creek. Dr. Minnick was called and found that nothing could be done.

Besides the parents, the little one leaves three brothers and three sisters. The entire community is sorrowing and are doing all they can to comfort the parents.

The funeral was held from the home Wednesday afternoon. Rev. Small of Newville Church of Christ officiating. E. R. Kinsey, funeral director. Burial was made south of Garrett.

Life of Mrs. J. S. Kain

Mrs. Mary J. Kain, died at her home three miles east of St. Joe, Friday evening at 6 o'clock after an illness from complication of diseases. The past four weeks Mrs. Kain had failed rapidly. Several years ago she suffered several strokes of apoplexy and although in poor health she was able to attend to her household duties up until her last sickness.

Mrs. Kain was the first of a large family, with the exception of one whom died in infancy to break the family circle. By a peculiar coincidence until her death there were nine living brothers and sisters, nine living children and nine grandchildren.

She was born at Cecil, Ohio, 62 years ago where she was united in marriage to J. S. Kain. The young married couple came to DeKalb county forty years ago and located near Summit and for the past thirty years they resided on the farm near St. Joe.

She was the mother of a large family of children, eleven in all, nine of whom are living. They are as follows: Mrs. Stella Young, of Washington, D. C; Everett M. and Mrs. Grace Robertson, of Hicksville; Mrs. Gladys Treesh, of Garrett; Forrest M. and Russel W. of Fort Wayne; Mrs. Blan Moore, of St. Joe; Dwight R., residing with his parents and Calvin, of Auburn.

Mrs. Kain was a member of the United Brethren church of Newville from which the funeral service was conducted Sunday afternoon at 2 o'clock with the Rev. J. W. Lilly of Hicksville, in charge. Burial was made in the cemetery at Newville.

Real money saving prices prevail at Coolidge store. See our local ads in this issue.

County Nurse Benefit Entertainment

Not a very large crowd attended the benefit entertainment at the Christian Church Friday evening, for the support of the County Health Nurse. The program was made up by representatives from the different societies, showing that practically all were in sympathy with the work of a nurse in the county.

It is the purpose of those sponsoring the movement to get aid of all organizations combined, and then present the matter to the county officials and make the county nurse fund a part of the county budget and thus be permanent. The plan is to suggest curtailment of health appropriations so that a nurse can be maintained without additional tax.

In DeKalb county there is reported seventy-nine unfortunate children, that can be helped by a county nurse, and this seems to be the desire of this movement.

Little Miss Irene Inlow of Concord township, blind, gave a demonstration in reading, to show what has been done for her through the work of the county nurse in aiding parents and children.

When the drive in the township is completed a report will be given as to the amount of finances raised.

LODGE NOTES

At the meeting of the K. of P. lodge, June 15, the following officers were elected to serve the coming six months:

C. C.—Vernon Woodcox
V. C.—R. W. Brodbeck.
M. W.—H. E. Randall.
Prelate—Donald Kinsey.
M. A.—John Barger.
I. G.—Virgil C. Perry.
O. G.—Harvey J. Hull.

Twenty-four permits to carry concealed weapons have been issued by Clerk of Court. Among the list is Neff Culler and son, Carson.

PART FOUR—Continued.

—16—

But fate destined otherwise. With increased sense of desolation and hopelessness, she foresaw the trails looming in front of her—the misery she must cause, the lack of understanding she must face alone. Only the desire to reach Mrs. Field had reconciled her to this return; now that was crushed. . . . Bewildered with conflicting emotions, with burning throat and aching head, she crouched, shivering, in a corner of the carriage while Hugh wrapped his traveling rug round her knees.

The train rushed through the wintry darkness. An elderly clergyman dozed in one corner of the compartment; two girls carried on a low-voiced conversation, interspersed with bursts of laughter. Hugh discoursed upon all the little mundane happenings in Darbury during her absence, and she was grateful to him.

Thus, amid prosaic surroundings, hidden under unemotional exteriors, life's tragedies and comedies work out their scenes. The two girls, absorbed now in their magazine stories, were oblivious to the living drama, full of tragedy and bitter irony, being enacted but a few feet away. When ever Barbara looked at Hugh, the ironic misery of this false situation was increased. To him, at present, things seemed only vaguely unsatisfactory. This he had accounted for in the obvious way; therefore, worrying was futile. . . .

"I shall soon know without being told," Miss Davies had said. And she did. By the time she had extricated her niece from the combined watery tendrils of Mrs. Stockley and Martha, and kissed her cold face, she knew! The girl greeted them all with a certain quiet warmth, lacking both effusion and emotion, which bore as little resemblance to her old impulsive ways as the forced smile and sunken eyes to a face distinguished by its serenity. Nobody returning to a longed-for home and fiance would look upon them with those eyes of haunted hopelessness! No illness would leave those rigid lines of pain around a mouth ever easily wreathed in smiles. . . . "Something has happened," the woman of the world said to herself, watching in silence. What it might be, she was left to conjecture.

Mrs. Stockley, after the poison dropped into her mind the night before, regarded her daughter's island life as some terrible blot staining the clean pages of her existence, which must not be lightly touched upon. She felt self-conscious upon the subject, shocked and apprehensive over the girl's appearance. As usual, she took refuge in helpless tears. It was Martha, urged by Hugh, who, noticing the chattering teeth and clammy hands, suggested hot soup and bed at once.

"With a 'or bottle," she added.

A contraction caught Barbara's throat, preventing speech. Everything was so familiar, so home-like; and yet—so intolerable! She allowed herself to be led into the well-known dining room. Somebody removed her coat, and somebody her hat; then Hugh's voice uttered an exclamation.

"You've bobbed your hair, Bab! Why?"

Kneeling unsteadily before the fire, with hands stretched to the cheerful blaze, she was struck by the strangeness of this question coming from him—the indirect cause two years before.

"It—was—better short," she replied shakily.

"I hope it will soon grow again now," said her mother anxiously. "I dislike the craze for 'bobbed' hair; it's unfeminine."

The meshes of the net which had loomed near with the advent of the De Borceaus, appeared to the girl's distraught mind to be closing steadily round her. Like one struggling in vain to elude them, she staggered to her feet.

"Mother—let me go to bed! I feel too—ill—"

It was Hugh who caught her, as she stumbled toward the door. With Martha, he half carried her up the stairs to her old room. . . .

And all through the night, as she tossed about, with wide feverish eyes staring at Martha fussing near at hand; where—hundreds of years ago, it seemed, she had blown out the candle upon her old home-life—vision after vision rose, full of exquisite torture, to her mind. . . . A night of delirious terror in a little, vault-like hut. . . . A fearful vigil seated upon upturned suit-cases, waiting in the dark for the natives' attack. . . . A pair of scissors and a shock of dark hair, from under which dear gray eyes laughed up into her face. . . . An early dawn, with a little tin key ring. . . . Golden hopes of motherhood, dashed almost as soon as awakened. . . . Like a relentless panorama, detail after detail came vividly to life again, with, over present, the buoyancy of a man's strong personality carrying all before it. . . . She pressed her lips passionately to that little circlet of tin, with a bitterness of grief too deep for the relief of tears. . . .

Downstairs, Mrs. Stockley and her sister sat long into the night, talking, murmuring, arguing. Ever and anon, the former damped the atmosphere with her tears.

"She is so changed—so changed!" she repeated at intervals. "If people are already talking, I don't know what they will say when they see her!"

"She is sure to tell you, soon, all that happened," consoled her sister. "Then we can contradict any wrong suspicions."

"I am sure she has been ill-treated," moaned the other; "or why should she look so ill and miserable, now she has come home? I don't believe she was even glad to see me—her own mother! It seems so ungrateful. But Bab always was thoughtless and inconsiderate over my feelings."

"Why not ask her for the truth, tomorrow?" suggested Miss Davies, her curiosity difficult to curb. "Or shall I? I am more used to girls in trouble—"

"No, Mary!" said Mrs. Stockley, with quick anger at any interference. "I will not have you insinuate that she is one of—of your 'fallen girls,' like this! If she has suffered anything at—that man's hands, she will tell me, herself. I couldn't speak of it now. Besides, I wouldn't dream of forcing her confidence! After all, it may be only the result of her illness."

Miss Davies glanced at her, rather sharply.

"What was really the matter at Singapore, do you suppose?" she asked.

"Prostration. And shock. Don't you remember? Very natural, I am sure, after such terrible times."

Miss Davies drew in her lips, in her usual way when considering discretion the better part of valor, and made no reply.

III

Mrs. Rochdale gave an annual local dinner party before Christmas every year, over which she presided like a good-natured hen—clucking, with her Buff Orpington smile, upon the chickens pecking at the good things provided for them. Everybody who was anybody in the neighborhood received an invitation, so that the parties bore a singular similarity.

Fresh interest was aroused this year, owing to the expected presence of Barbara. So far, she had been seen by few. For a week a severe chill had kept her in bed, invisible to the curious eyes of those who buzzed around Lake cottage. The more persevering, after her arrival downstairs, spread interesting reports of the extraordinary change wrought in her looks and behavior.

To the girl, weak in health and tortured in mind, everybody and everything seemed unbearable. Perceiving the suspicious curiosity around her, she instinctively cloaked herself with reserve, throwing no intimate sidelights upon the vital point causing so much conjecture. News from Du Borceau was all she craved, and she felt fresh anxiety concerning the lack of it. Had Mrs. Stockley's weak mind not been poisoned, making natural talk upon the island life impossible to her, things might have been vastly different for all. As it was, the topic became increasingly difficult of approach; until it assumed the character of something mysteriously tabu. Only the wreck and possible fate of Aunt Dolly were discussed. Croft's name was never even mentioned between them.

Urgent business on Mr. Rochdale's Devonshire property summoned Hugh thither before Barbara came downstairs. Still, therefore, the full explanation she intended to give him hung heavy on her mind, assuming increasing proportions the more she pondered over it. His horizon had been so contentedly bounded by conventional, orthodox views, that it might be difficult to make him understand the true case. She shrank from hurting him, from destroying his faith, as she knew she must do.

Mrs. Field's letter, full of the large-hearted, far-seeing sympathy so vital a part of her nature, brought a grain of comfort. Full of genuine grief and affection for her cousin, which she took for granted was shared now by the girl, there was no discreet avoidance of the matter. Being his nearest relative, she was kept informed of all proceedings concerning the recovery of his body; the lack of information from the De Borceaus, with their possible fate, was, she said, causing renewed anxiety. She urged Barbara to use the "House on the Moor" and its library, whenever she wished, as usual.

Mrs. Stockley never encouraged—or believed in—invalidism other than her own. Once downstairs, her daughter was expected to renew her old household duties and seek diligently to recover parochial ones. That she showed no inclination for either increased the sense of strain between them. Her shrinking from company would give rise, her mother dreaded, to further "talk." It was, therefore, strongly condemned. She found it impossible, as things were, to escape the ordeal of Mrs. Rochdale's dinner party without hurting the kind old couple by actual rudeness. Having decided that Hugh must be told the truth before anyone else, she was obliged, though shrinking in every fiber of her being, to dress in one of her old evening frocks and be fetched by the Rochdale's big car. . . . This had been one of her few treats in past years. . . . As she fastidiously finished her toilet, the poignant pain of it all struck her afresh. . . . The reflection of shadowy, sunken eyes and aureole of dark hair mocked at her, in the large drawing room mirrors. . . . The unconscious irony of the conversation, the kindliness of Hugh's parents and their delight over her, his own affection, were unbearable torture. . . .

He had only returned that day, and she spoke to him in desperation, as they went in to dinner together. "Hugh!" she whispered, "I must see you alone, to tell you—"

"I know!" he broke in eagerly. "I'm dying to hear everything! It was a beastly nuisance having to go away just then; but it couldn't be helped. Afraid we shan't get a chance tonight, though."

"Tomorrow, then? Hugh, I must see you alone tomorrow!" There was a passionate urgency in her voice, a tragic pleading in her eyes—both signs which he entirely misunderstood. A flush overspread his face, and he pressed her bare arm to his side.

"Bab, darling!" he whispered, "don't you think I'm just longing to be alone with you, too? I—I counted the hours until I got back, today!"

Barbara sat down at the table, her heart like lead. She felt like a murderer who, about to drop poison into the cup of a trusting friend, talks and smiles upon him the while.

The vicar's enthusiasm over the missionary results of this providential visit to "children of darkness" (having a double meaning, this phrase was considered witty in Darbury), broke loose almost in the same breath wherein he concluded grace. He was not among those whose importunity had been crowned with success where seeing the "Wandering sheep" was concerned.

"I am so deeply interested in your work among the natives," he began, his clear clerical tones arresting every-

A Severe Chill Had Kept Her in Bed.

body's attention. "I gathered from the papers that you obtained a wonderful influence over them?"

"Weren't they awful creatures?" put in Hugh, with a grimace. "I wonder you weren't scared stiff, Bab!"

"I was at first," she owned. "But I grew very fond of them."

"Capital!" beamed the vicar. "Our brothers, in spite of difference in color, Deuteron they responded to your affectionate overtures, poor souls?"

A vision of Alan's affectionate overtures with electrified wire, flashing eyes, and fearful rhetoric, until his brothers became responsive, brought the shadow of a smile into her white face, which old Mr. Rochdale saw and answered.

"I imagine Croft got 'em under more by bullying than affection; didn't he?" he laughed. "That wireless stunt was a brainy notion! I suppose he had to whip up the lazy beggars pretty hard afterward, to make 'em work?"

"No," she replied, aware of many eyes upon her face at this open allusion. "They loved him and obeyed him because"—her voice faltered—"because he had the personality to command obedience. He inspired them to work for their own good. They learned cleanliness; and we taught them to talk a little English—"

"Capital! capital!" The vicar beamed again at her, through his pince-nez. "How did they receive the Word?"

"Wonderfully quickly," she answered, misunderstanding. "Some of them could talk quite fluently in a very short time—"

"But the Word? How did they receive the Gospel?"

"Oh! We did not attempt to disturb their own religion."

The vicar gazed at her, aghast, as did most of those present. "You mean—" he began, "you can't mean that you neglected the first opportunity of giving them the Truth?"

"Yes," she said calmly, "if you look upon it in that light. We thought it unwise, for many reasons. For one thing, we had to play upon their superstitions to insure our own safety and obtain any influence at all. It needed great wariness."

"But surely," he remonstrated pedantically, "at the risk of one's life one should carry on the Gospel? Missionaries have to risk—"

"We were not missionaries!" she reminded him sharply. She looked impatiently at his self-complacent, horrified face and short-sighted eyes. "We tried to encourage them in cleanliness, gentleness, and consideration. Isn't that all part of the Gospel's real meaning? To have stuffed entirely new doctrines down their throats would have been ridiculous!"

Quick startled glances were directed upon her from all directions; the "Negatives" present flushed uncomfortably; Mrs. Stockley tried, ineffectually, to fix her with a stony eye.

"Apparently your success was not very great," she observed tartly.

Old Mr. Rochdale hastily smoothed over possible trouble by inquiring concerning the personal character of the natives.

"They are very simple and real," the girl replied warmly. "You find the same fears and jealousies and faults as everywhere else; but they are not hidden by any thin veneer of civilization. When they love or hate, they do so openly."

"I hope," remarked Miss Davies, not much liking her tone, "you made them wear decent clothing?"

"Most of them were naked," said Barbara; "some wore a little matting."

Everybody rather hurriedly went on eating. Hugh buried himself into the silence, thinking to change the subject.

"What did you do about clothes, Bab? Did your own last out?"

"Fairly well. I made some breeches, and wore them."

The vicar coughed; Mrs. Stockley refused her favorite game in her embarrassment. . . . Mrs. Rochdale remarked tactfully: "Dear, dear! Isn't it all like a novel? If you had been there, Hugh, it would have been really romantic!"

Hugh laughed. "I shouldn't be much good on a desert island," he observed modestly. "Must have been beastly uncomfortable."

"I bet Bab often wished you were there!" smiled old Mr. Rochdale, in his genial way. "Only she won't own it. Now, Hugh, make her confess!"

But Hugh's glance had fallen upon the girl's left hand, and he did not reply.

Barbara felt like one undergoing slow torture; her nerves seemed incarcerated. It was the constant repetition of little drops of water which sent the condemned man mad.

"Bab," asked Hugh, "whatever are you wearing in the shape of a ring? Where is mine?"

Everybody craned forward, and she hastily withdrew her hand. It seemed as if curious hostile eyes were peering at something sacred, the only thing of value to her now in life.

"I—have lost your ring, Hugh. It was left on the island with everything else."

"And you are wearing that instead? I must get another at once. What is it? A key ring?"

"Y-yes."

"Once," remarked the vicar, rising from his oblivion, "I had the case of a wedding party forgetting the ring; and I married them with a key ring!"

"Really!" asked Miss Davies. "I suppose it is quite legal?"

"Quite! Provided, of course, that everything else is in order and a priest performs the ceremony."

Barbara's right hand closed convulsively upon her left, under the table.

(TO BE CONTINUED.)

Refused to "Fall" for Bishop's Second Scheme

A western minister tells a story, according to the Kansas City Star, showing how a bishop, accosted in a Chicago street by a neat but hungry stranger, derived profit from the encounter.

Now the bishop took a fancy to the needy one, took him to a hotel and shared a good dinner with him. Yet, having left his episcopal wallet in the pocket of a different episcopal jacket, he suddenly faced the embarrassment of not having the wherewithal to pay for the dinner.

"Never mind," exclaimed the guest. "I have enjoyed dining with you, and I shall be charmed to pay the price. Allow me."

And the stranger paid for the two. This worried the prelate, who insisted: "Just let me call a taxi and we'll run up to my place, where I shall have the pleasure of reimbursing you." But the stranger met the suggestion with: "See here, old man! You've stuck me for a belly good dinner, but hanged if I am going to let you stick me for taxi fare!"

The Impossible

"No man ever allows himself to believe that a woman is single from choice."—From "Think Sugar," by Douglas.

CAP AND BELLS

TRY A GUN

"Madame," said the dignified gentleman, "your dog bit me on the ankle."

"He did?" cried the lady. "Oh, I must send for the doctor!"

"Oh, I assure you it isn't as bad as—"

"You're the third person he's bitten today," broke in the lady. "I just know he isn't feeling quite well."—Legion Weekly.

Wisdom of the People

"A little nonsense now and then is relished by the best of men."

"Undoubtedly," answered Senator Sorghum. "The only trouble is that when you put a little nonsense into your talk it's liable to prove the only part that some of your auditors take seriously."—Washington Star.

BRUTAL TRUTH

Miss Ann Teak—Don't you think I look more youthful with my hair bobbed?

Mr. Hardfax—You sure do. One more clip and you'll be in your second childhood.

Both Toilers

The farmer and the sailor toil
Alike to some degree,
For where the former tills the soil
The latter plows the sea.

Doing the Honors

"Yes, Senator Flubdub thinks pretty well of himself."

"What now?"

"At a banquet given to celebrate the birthday of Shakespeare, the senator horned in and responded for Shakespeare."

Probably Not

"Daughter, it took you and your young man a long time to say good-by last night."

"It was forever, ma," sobbed the girl.

"Oh, I see. Then I suppose he won't be around for a couple of evenings."

Bird Life

"Never lived in the suburbs before?"

"Never."

"You'll enjoy the bird life on the place. This is a house for the bluebirds. And yesterday I saw a cuckoo on the lot."

"Good. I'll hang out an old clock."

Technicalities Aside

"And, of course, you're an able-bodied seaman like the rest," ventured the fair visitor of the battleship's guide.

"Me? I'm a coxs'n," he snorted, pointing to his chevrons.

"Coxs'n? Coxs'n? Oh, yes! You mean you crow reveille, don't you?"

THOUGHT HE HAD MORE

Hubby—I've come to the conclusion you married me because you thought I had a little wealth!

Wife—Wrong again—I thought you had a good deal.

Pure Breds Pay

Contentment shines upon the brow
Of Farmer Brown. Says he,
"I used to keep scrub cows, but now
My pure bred cows keep me."

Fooled Him

She—According to Pliny, kissing is an infallible remedy for colds.

He (with a slight one)—I'd like to try the old boy's recipe.

She—You may. It is: "Three kisses on the mouth of a mule."

The Love Maker

Irate Customer—Here; look what you did!

Laundryman—I can't see anything wrong with that lace.

"Lace? That was a sheet!"

Help That Achy Back!

Is backache making you miserable? Are you tired, nervous, "blue"—utterly played out? Have you suspected your kidneys? Your kidneys are the blood-filters. Once they fall behind in their work, there's slow poisoning of blood and nerves. Then is apt to come backache, headaches, dizziness, and other annoying kidney irregularities. Don't wait! If your kidneys are sluggish, help them with a stimulant diuretic. Use *Doan's Pills*. *Doan's* are recommended the world over. *Ask your neighbor!*

An Ohio Case

Mrs. Eli Duley, 273 Second Street, N. W., Carrollton, Ohio, says: "When I caught cold it settled in my kidneys and I had a weak back. Mornings my back was lame and dull pains across my kidneys kept me in a run-down condition. I was nervous and all out of sorts, too. My kidneys were weak. A neighbor recommended Doan's Pills and that fine old remedy helped me."

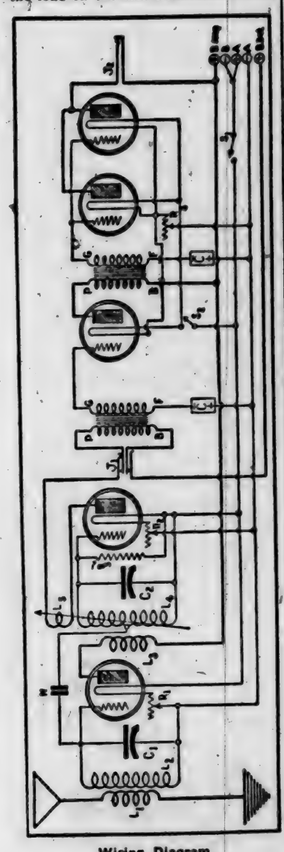
RADIO

By BREWSTER LEE, in Radio World.

Two tubes, instead of one, in the last step of a two-stage trasformer-coupled audio-frequency amplifer improve quality greatly. Anything within economic and scientific reason that improves quality of the received signal should appeal to radio fans. Sets that operate a speaker, even the faithfully reproducing cone type, without audible distortion, constitute the best possible encouragement of greater radio growth and popularity.

Probably 85 to 90 per cent of the tube sets in use today produce distortion that is discernible by the ear trained to the best radio reception. Why should your set be in this class? Tubes are much cheaper now than ever before. The additional cost of one tube, counting its tube life, as well as battery current consumption, is so low that anybody who can afford a four-tube set can afford a five-tube set. Therefore this circuit is presented. It uses five tubes. The first is a tuned radio-frequency amplifier. The second is the regenerated detector. The third is the regular first stage of transformers-coupled audio-frequency amplification. The last two are parallel-connected tubes to handle the heavy load of the last stage of audio.

Distortion may arise from many causes, including even RF feedback or stray coupling between stages. But the audio side of the circuit is most often responsible. As tubes are made today, unless a power tube is employed, which means much greater expense, or push-pull resorted to, or the parallel device presented herewith, the load on the last transformer audio



Wiring Diagram.

tube will be too great. Many who have listened to their set on earphones plugged into the detector circuit, and even listened on the first audio stage, have remarked upon the decline in quality when comparison was made with the final audio output.

What the Circuit Does.

The circuit itself, aside from the audio feature, is one that gives splendid service. There are three controls, two of which may be logged. The other control is the tickler, which affects volume, and the setting is not loggable. For selectivity and distance reception it is hard to produce a better circuit. The superheterodyne is only a little more sensitive and scarcely a bit more selective.

As a test of selectivity, the set may be used near a powerful broadcasting station, and will tune it out, if only aerial is used. The ground connection is entirely omitted in that case.

The set is to be neutralized, so far as possible. The success of complete neutralization is doubtful, since some signals may be heard without aerial, ground or loop being used, hence the heterodyned note might escape. But in fact the neutralization is practical in that no radiation need be expected that will annoy neighbors. With the set oscillating, an experiment was made with a receiver hooked up to an aerial six feet away from the antenna used for the oscillating set. Squeals could be heard from the oscillating receiver by the person tuning it, but the family living on the floor below, using the other receiver, heard no squeal. And that is the object of neutralization in the present case.

Neutralization is effected by connecting a neutralizing condenser from the grid of the RF tube to a tap on the secondary of the 3-circuit coupler. If commercial coils are to be used in this set, any 3-circuit tuning coil may be employed. The usual type has an inductance requiring a .0005 mfd. variable condenser. Both coils should be tuned by condensers of the same capacity, for logging simplicity.

As commercial 3-circuit couplers do not usually have a tap for the neutralization connection, this tap may be made by the constructor. Slightly raise the eighth turn from the grid end of the secondary, scrape off a little insulation, and solder a flexible lead thereto. The other end of this lead goes to one side of the neutralizing condenser, which of course is a variable instrument.

Making the Coils.

If the coils are to be made at home, L1 would consist of ten turns of No. 22 single cotton-covered wire on a 3-inch diameter tubing, and L2 would be 45 turns of the same kind of wire, wound in the same direction. The coupling may be close, preferably should be, as the added apparent resistance makes for better stability. The usual ¼-inch separation may be used between primary and secondary, if the constructor's preference runs that way.

The 3-circuit tuner would be made of the same kind of wire on the same diameter tubing, all windings in the same direction. L3 would be ten turns. If the coupling is close between L3 and L4 and between tickler and secondary, then about two extra turns should be put on the secondary, making 47 turns, as against the 45 for the RFT secondary. The reason is that there is an absorption effect, which deprives the secondary of some of its inductive value. The extremely loose coupling that would be required if the secondary's value in microhenries was to be what the inductance tables call for with a given number of turns, is hard to realize in practice. The tickler L5 consists of 34 turns of No. 26 SSC wire on a 2⅝-inch tubing 2½ inches high.

Each of the stator tubings is 4 inches high. The two coils, when mounted, may be at right angles, which is more easily accomplished by having the RFT mounted on the baseboard, its axis parallel thereto.

The condensers for the coils as described are .0005 mfd. Straight-line frequency condensers will make tuning easier on the low waves, as will straight-line wave-length condensers. These are distinguished from the straight-line capacity condensers by the fact the preferred ones have shaped plates.

List of Parts Needed.

One radio-frequency transformer (L1, L2).
One 3-circuit coupler (L3, L4, L5).
Two 15-ohm rheostats (R1, R2).
One 6-ohm rheostat (R3).
One double-circuit jack (J1).
One single-circuit jack (J2).
Two push-pull battery switches (S1, S2).
One .00025 mfd. fixed grid condenser.
One variable grid leak (R5).
Two .0005 mfd. variable condensers (C1, C2).
One neutralizing condenser (N).
One 4½-volt C battery, or two of them.
Two 45-volt B batteries.
One storage A battery, 6 volts, 100 to 120 amp.-hr.
One 7 by 24-inch panel.
One 7 by 23-inch baseboard.
Three 4-inch dials.
Sixty-five feet of aerial, ground clamp, lightning arrester, earphones, speaker, connecting wire, screws, No. 14 insulated lead-in wire.

One Soldering Problem That Is Easily Solved

It is difficult to solder leads on to tinfoil with ordinary solder, owing to the thin body of the foil, and its melting point being so near that of the solder used. If you have trouble in doing this, try the following: Clean your tabs by spreading them apart as shown at A and dipping them for a moment in solder acid. Clean and dip the end of your lead wire also. Melt a little "fusible metal," the kind used in setting crystals, in an old tablespoon and dip the end of the wire into this, tinning it to a distance a little greater than the width of the tabs.

Press the tabs together tightly and roll the wire into them, as shown at

B. Bend the wire back along the body of the condenser, so that it will be out of the way, dip the rolled end first into solder acid, then into the melted fusible metal deep enough to completely cover the rolled-up part.

Leave it for a moment, to allow the tabs to get warmed to the same temperature as the liquid metal, which will insure a better "stick." Withdraw and you should find the whole roll coated and soldered together by the fusible metal. If the job is not thorough, moisten the surface with acid and dip again, having the metal barely melted.

In this way an easy, neat and permanent joint is made, both mechanically and electrically.—Radio Digest.

Five Principles Governing Radio

Explanation Will Enable All to Understand Operation of Circuits.

There are many processes which take place in a radio receiver that enable an operator to tune in the broadcast concerts. Numerous changes take place in the radio current from the time it enters the receiver from the aerial until it leaves on its way to the headphones, but if these changes are considered step by step, they do not appear complicated.

The five important principles on which modern radio circuits are based are radio frequency amplification, detection, regeneration, reflex amplification and audio frequency amplification. An explanation of these five principles will enable a person to understand the operation of any radio circuit. Every circuit makes use of one or more of them.

Consider the difference between radio frequency currents and audio frequency currents. The radio signals that flow into a receiving set from the aerial are in the form of an alternating current; that is, they are in the form of a current which rapidly reverses in direction of flow, just like a clock pendulum swings back and forth, except that it changes many thousands of times more often than the clock pendulum in a given period of time. An alternating current in which the reversals, or alternations, occur at a rate of from twenty to twenty thousand times per second, will cause a set of headphones or a loud speaker to emit an audible sound when passed through it. Currents reversing at such rates or frequencies are called "audio frequency currents."

Radio Current.

The radio current, however, that comes into a receiving set from the aerial changes in direction much more rapidly. The signals received from an ordinary broadcasting station are of a frequency of from 500,000 to 1,000,000 reversals, or cycles, per second. These currents are of frequencies much too high to create a sound when passed through headphones or a loud speaker, and to distinguish them from audio frequencies they are called "radio frequency currents."

A radio receiving set must perform three functions. It has to tune to the broadcasting station wanted, it has to modify the received radio frequency current in some way so that it has the effect of audio frequencies and is able to operate headphones or a loud speaker, and in the majority of cases it has to amplify the received current so that the volume of sound is sufficiently great. The tuning function is not directly concerned with the changes that take place in the radio current within the receiver.

Changing the radio frequency current so that it will operate headphones or a loud speaker is accomplished by a vacuum tube called the "detector tube." After the radio frequency current has passed through the detector tube it behaves, for all practical purposes, like an audio frequency current.

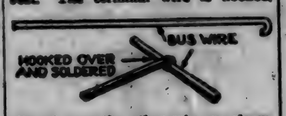
Amplification.

Some amplification takes place within the detector tube in the process of detection. But an amplification many times as great may be obtained by running the current back through the detector tube again, employing the system known as "regeneration." This regenerative system makes one tube act as both a detector and an amplifier, and in that way enables one tube to do the work of two.

When it is desired to get a still greater volume of sound from the headphones or loud speaker, the current in the radio receiver is further amplified by passing it through one or more additional vacuum tubes, used as amplifiers. If the radio frequency current is amplified before it reaches the detector, by passing it through an amplifier tube, the process is known as "radio frequency amplification." If the audio frequency current after leaving the detector tube is amplified by passing through one or more additional tubes, the process is known as "audio frequency amplification."—New York Times.

Hook Method Best for Easily Made Connection

For a quick and easily made connection that will be solid between the hook-up wires, either bus wire or flexible, the hook method is about the best. The terminal wire is hooked,



slipped over the other wire as shown and a firm pull is exerted while the joint is soldered. Such a joint has greater strength and less resistance and it gives a neat appearance.—Radio Digest.

WAVE LENGTHS

Ozone of amplifying transformers should be grounded.

Reverse the tickler leads of a regenerative set if it does not oscillate.

One of the great causes of interference is the misuse of regenerative receivers.

Foreign ships in Swedish harbors get into trouble if their wave length interferes with commercial radio traffic.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and inclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

Torch Fights Forest Fires

A new apparatus for fighting forest fires consists of a kerosene blowtorch, useful for beating back fires, says Popular Science Monthly. By its use all the firing. It is claimed, can be done by one experienced man, thus reducing the attendant danger to a minimum.

Snowy linens are the pride of every housewife. Keep them in that condition by using Red Cross Ball Blue in your laundry. At all grocers.—Advertisement.

India's First Electric Railroad

The first electric railroad in India, which was opened last February, will be extended at a cost of 23,000,000 rupees.

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

Her Neighbor's Advice Helped Mrs. Frick

MRS. ADA FRICK

"YOU can be just as healthy, strong and happy as I am,' said one woman to her neighbor after listening to the description of her ailments,—'if you will take Lydia E. Pinkham's Vegetable Compound. My condition was very similar to yours, I suffered from those awful bearing down pains, weakness, backache, nervousness and headaches until I could hardly drag around. Today I am strong, well and happy because I followed the advice of a friend who had been greatly benefited by this old-fashioned root and herb medicine."

Nearly fifty years ago Lydia E. Pinkham of Lynn, Mass. prepared from medicinal roots and herbs Lydia E. Pinkham's Vegetable Compound. Its fame has spread from shore to shore. You will now find in every community or neighborhood some woman who has been restored to health by its use, or has some friend who has. Therefore ask *your* neighbor.

Thousands of unsolicited testimonials such as the following are on file at the Pinkham Laboratory at Lynn, Mass., and prove the merit of this medicine. Therefore no woman should continue to suffer from such ailments.

Mrs. Frick Tells of Her Experience

PENNSBORO, OHIO—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my sides all the time. I can't remember just how long I suffered but it was for some time. One day I was talking with a neighbor and I told her how I was feeling and she said she had been just like I was with pains and nervous troubles and she took the Vegetable Compound and it helped her. So then I went and got some and I certainly recommend it for it is good. Whenever I see a woman who is sick I try to get her to take Lydia E. Pinkham's Vegetable Compound."—Mrs. ADA FRICK, R. No. 8, Perrysburg, Ohio.

Such letters Should induce others to try

Fox in Tight Corner Displays Its Cunning

When a fox is cornered by a dog and knows it cannot escape, it will often feign playfulness, gamboling and prancing about, before it closes with its enemy in a fight to the finish. Right in this line a well known naturalist relates the following. An eagle was seen to be repeatedly swooping at something till it finally alighted on a bowlder. As fieldglasses were brought to bear, it was seen that a large fox was the object of the eagle's attentions, and the animal was now walking round and round the bowlder close up against it with its tail brushed out and extending vertically in the air.

The eagle was seen to peck again and again at the tail as it came within reach, at which the fox would instantly drop it, then raise it again.

When this had gone on for some little time, the eagle flew off and alighted in the heather some distance off, at which the fox began to approach with the most playful antics, circling round the great bird until the latter eventually made off in disgust.

Usually when an eagle attacks a fox there is little hope for Reynard unless suitable cover is at hand, but this fox, knowing that it was in deadly peril, managed by feigning playfulness to deceive the enemy, and thereby save his own skin.

Time Spent in Sleep Pays Big Dividends

Spanish siesta at midday never gained a foothold north of the Rio Grande; nor has going to sleep at 10 p. m. been as thorough in its practice as it needs to be.

True "early to bed and early to rise, and you meet very few prominent people," but this only makes apparent that any effective propaganda must be directed toward the prominent people. They will have to set the fashion, if it is ever set, a writer in the St. Louis Globe-Democrat remarks.

Sleep, enough of it, is superior to the work of beauty parlors; it knits up the raveled sleeve of care and unknits the wrinkles. Why not have the balls and parties at five o'clock in the morning, when everybody looks pretty?

In mythological history, we learn that the festivities on Olympus and in Valhalla's halls were not markedly reserved for the night hours. What the gods did at night is not made entirely clear, but we have every reason to believe that darkness was the revelling time only for the evil gods. The well-behaved ones preferred the sunshine.

World-Famous Chapel

The Sistine Chapel is a famous chapel in the palace of the Vatican at Rome, erected by Pope Sixtus in 1473, and designed for religious services during Holy week. The ceiling is covered with frescoes by Michelangelo and the great Florentine masters, representing scenes from the Old Testament; while the walls are adorned with paintings, depicting events in the lives of Moses and Christ. The wall above the altar bears Michelangelo's sublime fresco of the Last Judgment, filling a space sixty feet high and thirty feet broad. This work was designed by Michelangelo when in his sixtieth year, and required eight years for its completion. The colors, however, have been so much impaired by time that little of the original beauty remains.—Kansas City Star.

Wyre Drawing Ancient Art

The Gold and Silver Wyre Drawers' company recently gave a big banquet in London, England. It is of interest to note that the craft had its origin in India, and the first mention of it is made so long since as B. C. 1491. Holy Writ runs: "And they did beat the gold into thin plates, and cut it into wires to work it in the blue, and in the purple, and in the scarlet, and in the fine linen with cunning work." Homer and Herodotus also make mention of the art. Specimens of gold and silver wire drawing dating back to the Scandinavian period were found some years ago at Wareham; and the body of William Rufus when disinterred in the days of Charles I was found to be wrapped in cloth of gold.

"Mad as a Hatter"

Originally this expression meant very angry or furious. Now it is more often used in the sense of violently insane. Lexicographers have been unable to trace its origin. Some think "hatter" in this phrase is a corruption of "atter," which is the Saxon way of writing adder. In German it is "natter." Since this is an old English phrase, and since many people in England have a trick of omitting "h's" where they are needed and supplying them where they are unnecessary, this seems to be a plausible theory. It would be very easy for "mad as an atter" to become corrupted into "mad as a hatter." However, this is only a theory without any concrete evidence to support it.—Pathfinder Magazine.

Temperature Variation

As a rule the temperature is the lowest just about sunrise. This is due to the fact that on account of radiation, heat is being given off during the night more rapidly than received from external sources. As this continues until the heat from the sun overcomes this disparity, it is the natural consequence that the lowest temperature should occur just preceding the moment when added heat from the sun overcomes the loss occasioned by radiation during the night.

Health and Home

ICED DRINKS IN THE SUMMER

On a warm and sultry summer day, there is nothing more refreshing to the mind and to the body than an iced drink. Of course, when such drinks are being used, moderation should be practiced, because if taken in excess or too rapidly, they are liable to be injurious to the stomach. However, when taken in a sensible manner, they are refreshing and beneficial to the fatigued. In the manufacture of these drinks, care should be taken to avoid any combination that may be indigestible or hard to assimilate. The drink should be consumed in a slow and leisurely manner.

The greatest danger present in the use of iced drinks is the one that involves the use of ingredients that are possibly impure or contaminated in any way. This is very liable to happen if the juices that are used are allowed to stand until they become soured and unfit for use, or if the milk or other ingredient used is not strictly fresh. The predisposition of milk to spoil quickly at summer temperatures makes it ofttimes necessary to use evaporated milk, which after all is just pure fresh milk with more than half the water taken away. It is sterile and, therefore, always safe. For use in iced drinks, it is ideal.

Following are several formulas used in the manufacture of iced beverages. If these formulas are followed religiously, the results will be found to be very satisfactory.

Chocolate Malted Milk.

1 cup evaporated milk
1 cup water
3 teaspoonfuls cocoa
2 teaspoonfuls malted milk

Mix cocoa with water until syrup is obtained. Put all ingredients in Mason jar and shake thoroughly and serve with chipped ice.

Milk Punch.

1 cup evaporated milk
Sugar to suit taste
1 cup tea
2 tbsp. lemon juice
3 tbsp. orange juice
½ cup water
Small stick cinnamon
½ cup fruit juice (currant or berry preferred)

Boil slowly the cinnamon, a lemon rind and orange rind in water for ten minutes. Strain and when cool add the other ingredients. Place in a Mason fruit jar and shake well. Serve in tall glasses with chopped ice.

Egg Nog.

1 egg
Pinch salt
½ cup cold evaporated milk
½ cup ice water
1½ tbsp. powdered sugar
2 tbsp. fruit juice
Nutmeg gratings

Add salt to egg white and beat to a stiff froth. Add the sugar, the well beaten yolk of the egg and the fruit juice and nutmeg. Fill glass with milk and cold water. Sprinkle top with chopped nuts.

Lutheran Notes

Sunday School 9:30.

Preaching service at 7:30.

Prayermeeting Thursday evening.

On Sunday morning Ward Jackman, County Administrative Superintendent, will be present and address the workers of the school.

S. D. Steffey, Pastor.

LOCAL ITEMS IN BRIEF.

Lee O Tustison and family and Charles Tustison of Defiance, were Sunday luncheon guests of Will Hamilton and wife. They were also callers of Rev. J. N. Scholes and family.

Mrs. Ada Berry has returned home from her daughter's, Mrs. Carl Hatch, of Fort Wayne.

Harry Cole of near Hicksville and Glen Cole, spent Saturday and Sunday at Crooked Lake.

B. E. Widney and family and S. L Widney, were Sunday dinner guests of Ed Storer and family.

Myrtle Roudebush and Gertrude Lewis left Saturday morning for a summer course at Columbus, Ohio University

Margaret Hamilton was a Saturday night and Sunday guest of Josephine Bachtel.

The W. C. T. U. meeting has been postponed from Friday afternoon until a later date.

C. C. Woodcox and family were guests of Frank Filley and wife at Huntington, Sunday.

Mr. and Mrs. Howard Northrup are spending a few days with their daughter, Mrs. Will Hamilton.

Mr. and Mrs. Wm Pepple visited the past week with relatives at Gary and Elkhart. This week they have as guests Miss Irene Miller of Gary and Miss Harriet Townley of Elkhart.

E R. Kinsey and Harcourt Miser, made a business trip to Kendallville Tuesday morning.

Mrs. Foster Gee and children are spending the week with her parents near Auburn.

The scales at the B. & O. stock yards were given a thorough overhauling this week and are now in first class condition.

Mrs. Meade Baker left Monday for Wabash to attend the funeral of her brother, George Richwine, who died at Momence, Illinois.

Bake Sale at Kinsey's Hardware, Saturday at 10:00 A. M., for benefit of County Nurse, Newville Township.

Sam Biveley of Fort Wayne has returned home after spending a week with John Betz and wife.

Emmit Betz, wife and two small sons of near Harlan and Joel Betz and wife of Spencerville, spent Sunday with John Betz and wife.

Miss Margaret Johnson of Tippecanoe was a Tuesday guest of Miss Geraldine Thornton.

Mrs. Wm. Horstmeyer and daughter, Hetty Jane, are guests of her sister, Mrs. Charles Rice.

Mrs. Miller Dermott is quite ill at her home southeast of here.

Ralph Sechler and family were at Hamilton Lake, Sunday afternoon.

Tom Brunson and wife had as Sunday guests, George Seavers and family of near Logan, Ohio.

J. E Foltz and sister, Mrs. J P. Buckingham, were called to Continental, Ohio, by the illness of their brother, C. J. Foltz.

H. J Renner and wife are spending a week at Lafayette with relatives. Mr. Renner is attending a conference at Purdue in the interest of the Vocational work.

Mrs. Jane Burns and George Emmons of Crystal, Michigan, are guests in the B. E. Widney home for a few days. They are here to attend the Widney family reunion to be held Thursday at Eckhart Park, Auburn.

Mr. and Mrs. Wm Randall entertained Sunday at dinner in honor of their thirty-third wedding anniversary, Harry Randall and wife, Miss Marie Goldsmith and Mildred Pence.

Mr and Mrs. Abner Trostel and son, Dale, visited relatives at Roan Sunday and Monday. Mrs. Trostel reports that it had been three years since all of her brothers and sisters met in a reunion.

Carl Carpenter and wife and Clarence Hart, wife and daughter, Florence, have returned home from a few days spent with friends at Flint, Michigan.

Albert Wade, wife and baby attended the funeral of Mrs. Wade's step-mother at Pleasant Lake Monday afternoon. Mrs. Wade and baby remained for a few days visit with her father, Dr. Lake.

Rev. C. O. Johnson and two children of Tippecanoe, were St Joe and Concord guests Tuesday. He and Rev. Havens called on Billy Heitz, another M P. pastor, who is in a Fort Wayne hospital and report him in a very weak condition. He is known to many St. Joe people.

Clayton graduated from the Accountant Department of the International Business College at Ft. Wayne, Friday and was given a position June 22 with George Buist and Company certified public accountants in the First National Bank building at Fort Wayne.

Dr. and Mrs. B. S. Sheffer and Craig Sheffer, wife and son, Basil, spent Sunday as guests of Van Hadsell and wife, near Ney, Ohio They drove by way of Hicksville and took Mr. and Mrs. C. J. Hadsell with them.

PLANT NOW!

Fine Celery, Cabbage, Mango, Yam and Sweet Potatoe plants at

50c per hundred.

June sale on Geranium and Bedding Stock

TenEyck & Son, Greenhouses
Auburn, Indiana

$278 has been raised in Garrett for the County Health Nurse.

Will Miller and wife called on F M. Monroe and wife Sunday afternoon.

Clay Coburn and family spent Sunday with his mother, Mrs. Jane Coburn.

Charley Koch and wife and Mrs Anna Baker were Fort Wayne visitors, Tuesday.

The streets in St. Joe have been oiled, and there is no more dust. A fine job was done by Wm. Keeler.

Mrs. Daisy Woodcox and niece Miss Kathryn Kennedy were luncheon guests of Mrs. F. M. Thornton Thursday.

Transfer paper at NEWS office 2 sheets for 5c. Get some now for that pattern you wish to transfer

E. B. Smith, wife and baby and Miss Rosella Mendallshon picniced with friends at Hamilton Lake, Sunday.

Will Koch and wife and John Koch and wife, were Sunday dinner guests of Waldo Rosenberry and wife, north of town.

Save trouble by using receipts. Get a book at News office.

Mrs. Guy Walker, daughter, Helen and son, Dickey, of South Bend, came Friday for a visit in the J. C. Hull and Ella Smith homes.

Willys Wilcox, wife and daughter, Carma Jean, of Fort Wayne, were Sunday guests of Charles Cochran and wife.

Sam Kees and wife, and grandchildren, Dean and Betty, went to Blakesley Saturday for a visit with Will Beams and wife.

The Sunday Schools of Concord township will unite in a program July 5, at the Erick grove, south of town. Regular sessions will be held in the morning with basket dinner and afternoon program. Everyone is asked to participate in this meeting and enjoy a day of fellowship.

Picnic Paper Plates and Wax Paper in large rolls now on sale at News office.

Rev. Steffey and family are spending a few days this week at Muncie with their son.

Mr. and Mrs. John Rozine, of Miami, Florida, left Monday after a week's visit with F. D. Tope and wife.

The local bank has instituted a new ruling, that of closing for one hour at noon. Every bank in the county is doing likewise.

Rev. J. N. Scholes and wife, Scott Scholes, wife and baby, Myrtle Roudebush and Gertrude Lewis, spent Sunday at Harlan.

Receipt books on sale at News office.

Every man knows his own address if not that of his correspondent. The News will print a return card on your envelopes at a nominal cost.

Mr. and Mrs. Ella Wilmot had as Sunday guests, Carrole Wilmot of Fort Wayne, Arthur Wilmot, Mr. and Mrs. Wilmot Coburn and Mrs. Mary Donley and children

Eight member of the R. H. C. and two guests were entertained at the home of Mrs Matie Gee, Thursday afternoon. The hostess served refreshments. Mrs. Cora Waltz will entertain in two weeks.

Mrs. Anna Baker, who has been caring for Mrs. Frank Farley near Auburn, is spending the week here at her home. She was a Sunday dinner guest of her brother, Charley Koch, and wife. Stanley Koch and wife of Fort Wayne were also Sunday guests in the same home.

Defiance county officials have served notice upon all owners of dance halls in cities or rural districts that the new state law providing for licensing of such amusement places will be enforced. No one under 18 years of age will be permitted in dance halls unless accompanied by parents or guardians.

Three Special Prices on Men's and Young Men's SUITS

$19.75 $27 $39.75

Special prices on these fine suits mean a decided saving to you. Every garment in the lot is a new spring pattern, new models and the the wanted fancy shades as well as blue serges, plain and fancy worsteds. The fabrics are all wool, the tailoring of a quality workmanship found only in clothes to sell for $30 to $50 upward. You make an actual saving of $10.25 or more on any garment you choose.

SPENCERVILLE

Mrs. Tressie Kelley and babe and Mrs. Della Smith, visited friends at Woodburn, Sunday.

Herman Reasoner is at Richmond on business.

Miss Mame Bair returned home Sunday after spending a few days with her sister, Mrs. Adrian Miller and family.

Miss Ida Reed entered college at Muncie, Monday.

Quarterly conference was held on Sunday at the Methodist church, followed by a basket dinner at the parsonage.

Mrs Ethel Reasoner returned home Sunday evening after spending a few days at the home of her aunt, Mrs. C. P. Nichols, of Quincy, Michigan. Mrs. Nichols is ill.

The C. C Club will be entertained Friday in an all day meeting at the home of Mrs. Frank Silberg at Butler. There will be an election of officers for the next six months. The ladies will start from the home of Mrs. R U. Bowser at 10:30.

Farrow Chix after June 15th 100 lots postpaid, Barred Rocks, S. C. Reds, Anconas, $9.50; White Rocks, Rose Reds, $10.50; Wyandottes, Buff Orp., Minorcas, $11.50; White or Brown Leghorns, $8.50. Free catalog. D. T. Farrow, Chickeries, Indianapolis, Indiana. 23t4p

Let me keep your stables, barns, poultry houses, etc., sanitary and free from disease germs, lice and vermin. My name is

DR. LEGEAR'S DIP AND DISINFECTANT

I also clean, deodorize, and rid your poultry and livestock of fleas, lice, ticks, etc. My charge is only a few cents. Please hire me at once.

Satisfaction Guaranteed or Money Back

FOR SALE BY

B. S. SHEFFER Drug Store

Prof. A. J. Smith is spending the week at Purdue University.

Granulated sugar $6.50 per 100 lb. bag, Coolidge, Spencerville.

Ada Bowser returned home Sunday evening from a visit in the John A. Waters home of near Fort Wayne.

For good glasses see Griest at American Building Hicksville, Ohio.

Walter Lake and wife and Mrs. Charles Lake and son, Glenn, of Fort Wayne, were Sunday guests in the W. O. Lake home.

Dwight Coolidge, wife and family were Sunday guests of Mrs Carrie Brown and family of south of Hicksville.

Any work shirt at 85c. Coolidge, Spencerville. The place to buy.

Adrian Miller and wife of Coletown, were guests on Sunday for dinner of Mrs. Miller's mother, Mrs Hattie Bair and family.

Children's exercises will be held on Sunday evening, June 28 at the Methodist church. Exercises were observed at the Lutheran church Sunday evening. There was a good attendance.

Mrs. Sylvia Vansile of California is here visiting friends and relatives.

The Old School Reunion will be held on Thursday, June 25, in the Lutheran church basement. The officers desire a good attendance.

Mrs. Frank Odle was called to Muncie Saturday on account of the serious illness of her daughter.

Mr. and Mrs. Frank Wise of Auburn, were weekend guests of Mrs. Arline Rhoades.

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co., Otsego, Mich.

The Ladies Aid of the Methodist church entertained their friends at the home of Mrs. Raymond Rhodes on Thursday afternoon Music and readings formed the program while cake and tea were served as refreshments. There were about fifty ladies and children present.

Retaliation

Although there were only about thirty persons in the house during the performance of a revue in a small Warwickshire village, the two principal performers were continually hissed. It is reported, however, that the manager, with great presence of mind, brought his whole company on the stage and out-hissed the audience.—Passing Show, London.

World's Wettest Spot

At Cherrapunji, champion rainy spot of the earth, in the Himalayas, the average yearly rainfall is 466 inches. In 1861 it is recorded that 918 inches, or 76½ feet, actually descended at Cherrapunji. More than a third of this, or 372 inches, fell in July alone, and 42½ inches—or more than most Americans experience in a year—came down in a single day.

Fine "Food for Powder"

The Coldstream Guards of the Bloody Seventh division are the biggest men in the British army. Every man is over six feet tall.

American Students for University of Mexico

When the College of William and Mary opens a summer school at the University of Mexico, soon, the second oldest institution of learning in the United States will make an effort to promote better understanding and friendship between the two nations by studying the civilization of Mexico at its hub, the oldest university in North and South America. It will be the first instance of mutual recognition between the University of Mexico and an American college, officials have declared. The agreement with the Mexican university was obtained in line with the policy of William and Mary to enlarge its foreign summer school idea. A group of students, under the guidance of C. E. Castaneda, of the Spanish department of the college, will spend six weeks in Mexico City. Regular courses in English subjects will be offered by four members of the William and Mary faculty, but the students may avail themselves of any of the branches of study offered by the University of Mexico.

DIFFERENT TALENT

"You know Dick has become quite a vocalist at college."

"Indeed! I didn't know he sang!"

"No! He doesn't sing; he's the cheer leader."

Good Timber Burned

Fine timber was burned in the Croghan district of the Adirondacks as the cheapest way of clearing the land. Because of the excessive cost of building a road over which logs might be hauled, timber worth thousands of dollars is being burned at a tract deep in the Adirondack wilderness as the first steps in a big power development. As part of the power site 300 acres containing a fine stand of timber must be cleared. After felling, the big trees are hauled by teams into great heaps and burned, with lumberjacks guarding against spread of fire. The timber is burned to get it out of the way and to remove it as a forest fire menace. It is said to be the first burning of timber to clear land since the days of Adirondack pioneers.

Record of Thankfulness

He died thankfully, may very appropriately be said of a Northamptonshire (Eng.) man, who, disposing of his estate of £8,000, said in his will. "I give my soul to God and my body to the earth, or better still the sea, or better still to my university, but all as my wife shall appoint, and I thank her for 40 years joy of living. I won't say anything to thank my son for what he did for us. Everything that I have is settled upon him. Thanking everyone concerned for a happy life." He left £500 to each of his daughters, Mary and June, thanking them "for standing by us in the wartime."

Can't Lose Overshoes

Those who traverse muddy roads will be interested in a recently patented device for preventing overshoes from being pulled off by deep mud. It is in the shape of two metal grippers that clamp the overshoe to the shoe itself. For a high shoe there is a hook that is attached to the top of the shoe and extends down to hold the gripping jaws. The jaws are movable so that too much wear will not be brought to bear on one spot.—Scientific American.

Valuable Magnetic Device

A long rod with a magnetizing device on the end, controlled by a thumb switch on the handle, was recently invented for picking nuts, screws and other bits of iron or steel out of parts of machinery where they have fallen accidentally, says Popular Science Monthly. The rod is attached to automobile battery terminals and can be bent in any shape. It can pick up two pounds at a time, and works in grease, oil or water.

Club Work News

From Spencer Boys and Girls

Dr. Baumgartner gave a demonstration at the club meeting at the school house Wednesday evening on administering double immunity to pigs. Two fifty pounds were vaccinated by him. Some of the points emphasized by him were:

1. All pigs, especially breeding stock and pig club pigs should be vaccinated.

2 The best time to vaccinate is when the pigs weigh between 40 and 90 pounds.

3. Extreme care must be used in sterilizing instruments and parts of pig before and after administering the serum.

4. His method is one which gave the pigs double immunity for life

All appreciated the excellent manner in which Dr. Baumgartner conducted this demonstration.

The following officers of the Spencerville Boys and Girls Farm Club were elected:

President—Maurice Hollabaugh
Vice Pres.—Chas. Timmerman.
Secretary—Esther Lake.
Yell Leader—Virginia Goldsmith

The next meeting will be July 15. We expect to have moving pictures.

Christian Church Notes

Bible School at 9:30, communion service immediately following.

Preaching service in the evening.

The Martha Society will meet Thursday afternoon with Mrs. Myrtle Pugsley. Election of officers.

The Loyal Sons and Daughters class will have a class meeting with pot luck dinner Sunday at the home of Harvey Lindley.

The Thinking Reed

Man is but a reed, the weakest in nature; but he is a reed which thinks. The universe need not rise in arms to crush him; a vapor, a drop of water, suffices to kill him. But were the universe to crush him, man would still be greater than the power which killed him; for he knows that he dies, and of the advantage which the universe has over him, the universe knows nothing. —Pascal.

Carries Cook's Name

Sally-Lunn, the popular tea cake, received its name from a pastry cook of Bath, England, Sally Lunn, who about the end of the Eighteenth century used to carry such cakes about in a basket.

Papuan Savagery

In Papua, only 400 miles from Australia, and part of the British empire, cases of cannibalism still occur; the Papuans have a tradition that no youth may marry until he has shed human blood.

Notice of Feed!

Will have supply of Chicken feed, Dairy feed, Hog feed, Bran Middlings, Hominy, Oil Meal, Laying Mash. Now have shelled corn, cracked corn, cracked wheat, corn and oat chop, oyster shells and tankage.

Farmers Co-operative Mg. Co.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves the catarrhal inflammation, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces, thus restoring normal conditions.

Sold by druggists for over 40 Years.

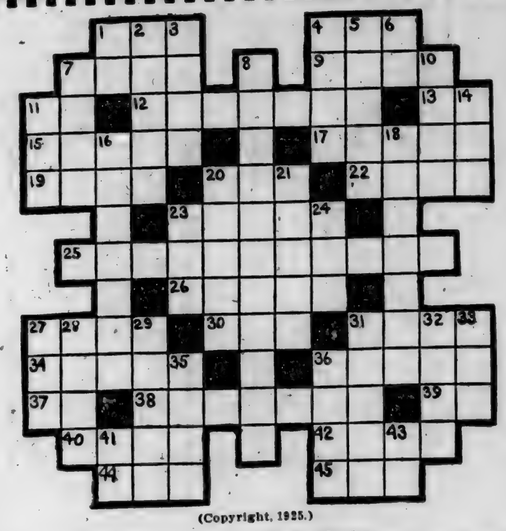
CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

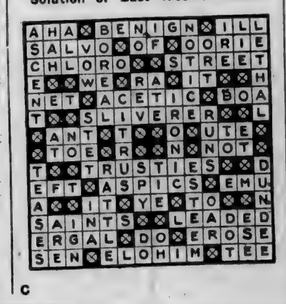
1—A newt
4—The night before a holiday
7—A Mohammedan of the Philippine Islands
9—Affectedly grand
11—A preposition
12—Sincere and eager
13—Exist
15—Wished
17—Americans (slang)
19—A girl's name
20—One who has been presented to society (slang)
22—A girl
23—Wraps or rolls
25—Having the form of a compressed circle
26—Concrete made after the French fashion
27—Elevated
29—Indistinct
31—To load
34—Opposite the middle of the ship's side
36—Tardier
37—Objective personal pronoun
38—Pulled down, as a flag
39—For example (Latin abbrev.)
40—Combining form from the Greek "wood"
42—Not far
44—A superlative suffix
45—An insect

Vertical.

1—Ex officio (abbr.)
2—Liberated
3—A tailless leaping amphibian
4—Simple
5—Necessary to life
6—A suffix denoting an agent
7—A luminary body
8—Chinks or crevices
10—Large oxen of Tibet
11—A definite article
14—Manuscripts
16—To plunder
18—A pale red color with a cast of orange
20—Cheated
21—To flower
23—A falsehood
24—Transgression
27—A nest
28—A wild goat of the old world
29—Large rooms
31—Loaded
32—A ruminant mammal
33—A unit of energy
35—Debated or debatable
36—A girl's name
41—An old form of "you"
43—A preposition

The solution will appear in next issue

Solution of Last Week's Puzzle.



C

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Reveals Interior of Rifle Barrel

A miniature edition of the submarine periscope is the essential part of a new camera which permits photographs to be made of the inside of a rifle barrel, it was announced recently at the bureau of standards. The device is the invention of Dr. I. C. Gardner and Frank A. Chase of the bureau, and uses a periscope small enough to enter a 30-caliber barrel, the size used in army rifles and machine guns, illumination being provided by a tiny incandescent lamp. The periscope, lamp and camera remain stationary while the barrel is moved along and the photograph made on a strip of motion-picture film, says Science Service.

The advantage of the apparatus, it is claimed, is that it is not necessary to saw the barrel in two, as formerly, when it is desired to examine the bore. With the new apparatus, tests may be made over a long period of time, and photographs made at intervals to determine the effect.

And the Witness Told "Only What He Knew"

Judge John C. Poluck said at a Wichita banquet:

"Legislators are continually being told that they couldn't amend the constitution, but they have given us four big amendments recently. They are like the witness.

"'Now, witness,' said a lawyer, we want you to tell us only what you know. Don't tell us what some other man knows, or what you think, or anything of that kind. Tell us what you know only. Only what you know.'

"The witness gulped and gave a solemn nod of assent.

"'I know,' he said, weighing and emphasizing every word—'I know that Bob Sloan said that Bill Harris told him that he heard Gaston Lemon's wife tell Jerome S. McWade's daughter that her husband said Matthew Mills Johnson wasn't far off when the scrap took place, and she heerd say they fit each other round that there sody fountain right considerable.'"

Somewhat Invidious

The visiting lawyer advanced a proposition that obviously was very doubtful law. The home town judge eyed him narrowly. "Mr. Smith," he said, "do you think that is law?" "No," said the lawyer, gracefully, "candor compels me to admit that I do not, but I did not know how it would strike your honor." The judge deliberated a few moments, then gravely said: "That may not be contempt of court, but it is a mighty close shave."

Lack of Exercise Means Ill Health

Many American business men have functional heart diseases simply because of lack of exercise, says Dr. Claude P. Fordyce in Hygeia, health magazine published by the American Medical association. They could well afford to walk daily until tired, in order to rid themselves of drawn faces, sallow cheeks, and weak, hesitating steps.

To them pedestrianism affords not only profit, but real pleasure in getting away from the routine of city and office and lying to the glorious out-of-doors.

The average man or woman of sedentary habits has a physical condition below normal. His tendency as the years advance is to dodge exertion, and the functional activity of excretory organs is apt to be accumulative.

Valuable Quality

Blessed are the pure in heart, and fortunate are those they bless. Intellect, station in life, opportunities are incomparable to companionship that is void of evil, and filled with that purity which emits the light of a soul filled with nothing but kindliest thoughts.—Grit.

The Laugh

Men like to be laughed at for their wit, but not for their folly.—Good Hardware.

INDIANA BREVITIES

Indianapolis.—Collegiate education in Indiana is becoming increasingly popular with young men and young women. Records in attendance and in the number of graduates at virtually all colleges and universities were established this year. Approximately 2,500 were graduated from the 13 leading institutions in Indiana, including the state university and the state agricultural and mechanical college. The attendance at these schools for the year was about 19,000, an increase of approximately 8,000 over the previous school year. The number of candidates to receive degrees exceeded any previous year by more than 500.

New Albany.—In an address before the Southern Fish and Game Protective association at the Tavern in this city, Richard Lieber, director of the state department of conservation, lamented the wanton waste that has been practiced with regard to natural resources of the state and issued a warning note that dire consequence will befall it commercially, socially and economically unless steps are taken to replenish wherever it is possible.

Indianapolis.—Indianapolis police department's special bank bandit detail, under command of Capt. Roy A. Pope, and armed with sawed-off shotguns, are guarding Indianapolis banks. As the men were assigned to their respective posts, Captain Pope's orders were: "Be careful of those guns in the bank, but if bandits come in your bank, don't be so careful. Shoot them just as often and carele - ly as you feel like."

Culver.—Graduation exercises ended at Culver Military academy by the award of diplomas to 149 seniors and the reading of orders announcing military promotions for next year. Arthur James Dyer, Jr., Nashville, Tenn., becomes senior cadet captain and regimental commander, and Frederick A. Lange, Jr., of Milwaukee, becomes cadet captain of the Black Horse troop. Fourteen Indiana boys received diplomas.

Crawfordsville.—Diplomas were presented to the largest graduating class in the history of Wabash college at the eighty-seventh annual commencement exercises held here Saturday in the college gymnasium. Seventy-four men are in the class, and nine others will be classified as members providing they complete some work they will be required to take in summer school.

Indianapolis.—The $50,000 damage suit of William E. Ruhl against the Ford Motor company, filed first in the Marion Circuit court, was transferred to Federal court Friday. Ruhl seeks damages against the company, alleging his health was permanently impaired as the result of breathing poisonous gases while employed in a small motor assembling and testing room.

Mount Vernon.—Four members of a gang alleged to have attempted to rob the Farmers' National bank of Wadesville several weeks ago, pleaded guilty in the Posey Circuit court here and were sentenced to ten to twenty-one years each for bank robbery and ten to twenty-five years each for auto banditry, the sentences to run concurrently.

Jeffersonville.—George Horlander, city councilman from the Seventh ward and Democratic nominee for re-election, pleaded guilty to sale and possession of liquor in the Jeffersonville city court an hour after police and federal agents raided his roadhouse in an abandoned schoolhouse near the city.

Mount Vernon.—John Derrington, age forty, owner of a garage and auto sales agency, killed himself at his garage following his attempt to kill W. Moses, chief of police. Derrington had been suspected of selling liquor illegally for some time. Chief Moses' condition is not serious and he will recover.

Indianapolis.—A tract of 53 acres of land in Beach Grove has been acquired by the Sisters of the Order of St. Francis, who operate the convent and academy of the Immaculate Conception at Oldenburg, in Franklin county, as a site for the erection of a girls' boarding school, it became known.

Indianapolis.—Work of razing the structures on the site of the new $400,000 National Guard armory, to be built in North Pennsylvania street, opposite St. Claire park, will begin July 1, it was announced by William H. Kershner, adjutant general of Indiana.

Anderson.—Approximately 250 persons attended the annual convention of the Christian Endeavor society of the United Brethren church in the White River conference at Lapel.

Washington, D. C.—Carl C. Davis has been appointed postmaster at Ramsey, Harrison county, Indiana, in place of Eli E. Crayden, resigned.

Indianapolis.—Padlocks were ordered placed in the doors of five buildings at Fort Wayne by Judge Robert C. Baltzell in Federal court, when evidence was presented to show the places had been used in violation of the prohibition laws.

Salem.—The water situation here has become serious on account of the drought. Strictest economy has been ordered by George B. Nuckles, superintendent of the water works, and the washing of cars, yard sprinkling and other unnecessary uses of the water are forbidden.

ARMED GUARDS TO PROTECT ALL BANKS

Indianapolis.—Plans were completed at a conference of Jay V Carpenter of Brazil, president of the Indiana Bankers' association; A. G. Brown of Greencastle, chairman of the association's protective committee, and Miss Forba McDaniel, secretary of the association, for an organization of approximately 4,000 armed men, with deputy sheriff powers, some of whom will be placed in every banking community in Indiana, with orders to "shoot to kill" bandits, in bank robberies and other crimes.

With the eight banking groups comprising the Indiana association having approved the so-called Iowa plan of recruiting and arming local citizen committees as a protection against banditry, the details of the plan will now be worked out in each county.

Organization work will be carried on in each banking community and it is the hope of the association officials to have a committee of citizens, armed with army rifles, sawed-off shotguns and revolvers, stationed in the neighborhood of each bank within a few weeks.

The plan to call out individual National Guardsmen as volunteers and station them in banks as guards until the Iowa plan is perfected, has been dropped, it was learned. The prohibitive cost of paying the National Guardsmen was given as one of the reasons why the plan was not found feasible.

Evansville.—Approximately 100 ministers and lay delegates of the Evansville district attended the annual district Episcopal conference here.

Shelbyville.—Mrs. Gail Tripp, age thirty-nine, an art teacher of Indianapolis, died of heart disease while bathing in Flatrock river, near Flatrock cave.

Bloomington.—Registration for the 1925 summer session of Indiana university opened in assembly hall. It is believed the attendance will reach 1,500. This is the thirty-sixth annual summer session of the university.

Princeton.—Theodore Skeets Hall, age twenty-one, slayer of his mother-in-law in Evansville last year, was found guilty of manslaughter by Judge C. A. Smith in the Gibson Circuit court and sentenced to two to twenty-one years.

Indianapolis.—Indiana cities invested $454,713.30 in public recreation last year, more than six times their expenditure for this purpose five years before, according to the year book of the Playground and Recreation Association, just issued.

Indianapolis.—Fire in a large two-story storage building at the Kingan & Co. packing plant destroyed the building, threatened other buildings of the plant, resulted in the injury of three men fighting the fire and caused a loss estimated at $40,000.

Newport.—Newport and Vermilion county observed dedication ceremonies for the new Vermilion county courthouse. A parade, in which citizens and organizations of the county took part, was held in the principal streets which were decorated with flags.

Terre Haute.—Mrs. Edward Englehart of Riley, who was seriously burned June 2 when the motor truck on which she was riding caught fire, died here. The accident was caused when the gasoline tank of the truck overflowed and the gasoline was ignited.

Marion.—Nels Ratliff, age seventy-two, one of the widely known men in Grant county, who had been for many years active in the work of the Prohibition party in Indiana, was killed by an infuriated bull on the farm of Arthur Shugart, southwest of this city.

Lafayette.—Bishop William F. Faber of the Episcopal diocese of Montana urged members of the graduating class of 1925 at Purdue university to work for the good of the human brotherhood, making use of the advantages which education offers, in the annual baccalaureate sermon in Fowler hall. He closed the address with the admonition to keep faith in humanity, and with the promise that work for all will be worth while.

Indianapolis.—According to a statement by Lewis S. Bowman, auditor of state, the state finance board, July 1, will not renew the entire $2,500,000 temporary loan of the state, but will retire $500,000 of that amount. Mr. Bowman said that it will be possible at the present rate to retire $500,000 more at the end of the calendar year. The temporary loan was renewed at the beginning of the year for the six months' period.

Indianapolis.—Fire of undetermined origin destroyed the home of Fred Wegehoft, a gardener, Rural Route D, Box 198, several miles south of Indianapolis in the Bluff road, with a loss estimated at approximately $37,000.

Martinsville.—Two Indianapolis youths, Roscoe Perry and Jeff Abbott, received a hearing in the Morgan Circuit court before Judge J. W. Williams on a charge of auto banditry. They were found guilty and sentenced to the reformatory at Pendleton for terms of from ten to twenty-five years.

SCIATICA

EVERYBODY knows what sciatica is. Those who are unfortunate enough to suffer from it, will agree in testifying that there are few ills of the human body which are as painful, chronic and wearing. But what causes it has until recently been a mystery. Like "lumbago," "muscular rheumatism," and a dozen other pains and aches in the body, it has been treated with liniments, plasters, electricity and massage. Sufferers have tried osteopathy, chiropractic and such things, also potatoes and horse chestnuts. One of these methods of treatment has been about as effective as another and, in most cases, all of them have failed to give any permanent relief. The trouble has been that little was known about the causes of this painful condition and so, like all diseases the cause of which is unknown, treatment has been largely a matter of "shooting in the dark" with about a hundred-to-one chance of hitting the bull's-eye.

In a recent article in the Journal of the American Medical Association, Doctors Rosenheck and Finkelstein give the results of a careful study which they have carried on for years on this much neglected subject. They find, as might be expected, that there is no one cause for this condition, but that there are two main classes of sciatica. The first, which they call symptomatic sciatica, is caused by infection, poisons from distant sources, as the teeth, tonsils, gall bladder, appendix, etc. In this class, the pain in the sciatic nerve is simply a symptom of disease elsewhere and disappears when the disease causing it is cured.

The second class, which they call orthopedic sciatica, is caused by some disease or displacement of one of the joints of the pelvis, such as the hip joint, the joints between the different parts of the pelvis, between the spinal column and the pelvis, etc.

The cases of the first class, in which the pain is caused by disease conditions elsewhere and in which the sciatica is simply the manifestation of this condition—the "place where it hurts" rather than the place where the disease is located—must naturally be treated by removing the cause, whether bad teeth, diseased tonsils, infected gall bladder or abscess around the appendix, be responsible.

On its removal or treatment, the sciatica disappears with all the other symptoms.

In the second class, especially the chronic cases caused by a dislocation of one of the joints of the pelvis, stretching of the leg, followed by plaster jacket, was found to give permanent relief in a large number of cases.

The moral is, if you have sciatica, find out what kind you have, and have it properly treated. Don't take medicine or treatment for the pain alone. Find out the cause and remove it.

DIPHTHERIA IN OUR CITIES

THE amount of typhoid fever in any large American city has come to be recognized as an indication of that city's standing. A modern, up-to-date, progressive city does not give its citizens dirty water or dirty milk to drink. It does not allow the "typhoid fly" to carry death to its people and especially to its children. So a low typhoid rate for any city generally means a good city government, while a high typhoid rate indicates a weak, ineffective and often corrupt administration.

In the same way, the amount of diphtheria in any city is a measure of the care given the city's children. Diphtheria, like typhoid, is now an entirely preventable disease. We know what causes it, how it is carried from the sick child to the well, how it can be prevented. Not only that, but in antitoxin we have a remedy that will positively cure any case of diphtheria, if given early enough and in sufficient amount. In the Schick test, we have a positive way of separating the children who are immune and need no treatment, from those who are susceptible and sure to take it if exposed, while toxin-antitoxin will protect any susceptible child from danger of infection.

In a word, we know more about diphtheria and can do more to prevent it than any other human disease. If the people and the local health officers could get together, there is no reason why a single American child should die of diphtheria.

The amount of diphtheria last year in all cities of the United States over 100,000 population is shown in a recent article in the Journal of the American Medical Association. In 69 cities the death rate ranges from Nashville, Tenn., with only 1.6 deaths per 100,000 population, to Worcester, Mass., with 23 deaths per 100,000. The average is just about half-way between. In 1923, out of 29,000,000 people in these cities, there were 3,231 deaths from diphtheria, or a rate of 13.16 per 100,000. In 1924, out of the same population, there were 3,285 deaths, or a rate of 11.10.

That's a saving of 536 children in one year. Good! But how about the 3,285 children who died last year of a disease which is preventable and should be prevented in every case?

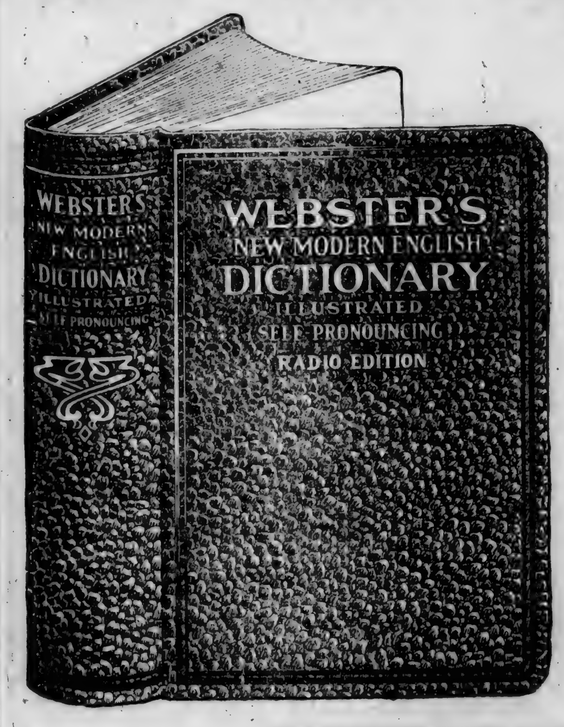
WEBSTER'S New Modern English **DICTIONARY**

To the Readers of the

St. Joe News



A $4

Webster's New Modern English Dictionary for NOW ONLY

98c

and 3 Coupons

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons—the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

Dictionary Coupon

Clip three 3 coupons and bring to office of the

ST. JOE NEWS, St. Joe, Ind.

which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.

They had also been to Springfield, Ohio, where they attended the commencement at Wittenberg College where their niece, Miss Margaret Tuttison was a graduate.

Plan Exploitation of Regions of Far North

There is no insurmountable physical obstacles to the exploitation of the Arctic and especially of Baffinland, in which the Canadians are particularly interested, says the Boston Transcript. The northern portion of that great expanse of territory lies beyond the Arctic circle, but it does not extend farther north than 75 degrees. The northern extremity of Spitzbergen passes the eightieth parallel, and coal has been mined in Spitzbergen. In the years before the World war several companies were engaged in the business. There was a time when Americans participated in it. What was done in Spitzbergen could be done in Baffinland or elsewhere in the Arctic.

Certainly the Canadians are showing wisdom in attempting to find out the extent of the riches which may be concealed beyond the Arctic circle. They may remember to their ultimate benefit that time was when Alaska, lying wholly within what was then regarded as the Far North, was derisively known as Seward's Folly.

Two Thousand Degrees Fahrenheit the Limit

A temperature of 2,000 degrees Fahrenheit is probably the absolute maximum of heat that can be generated in a fire disaster, bureau of standards scientists have concluded as the result of recent experiments, according to a bulletin of the department.

In order to test fire-resistant building materials of various kinds the bureau has been conducting a series of imitation conflagrations inside miniature rooms, with conditions paralleling those found in buildings liable to fire hazard. The highest temperature generated resulted from building a hypothetical "library room," carrying fifty-eight pounds of combustible material per square foot of floor by stacking up old records from the navy. The temperature warped walls and flooring and the "structure" which housed the fire did not cool down for twenty-four hours.

Fashions Little Changed

That there is little new under the sun, even with regard to women's fashions, was pointed out by Ethert Brand, curator of the museum at Rotherham, Eng., in the course of a recent lecture. Referring to an illustration of women dancers on the walls of a Spanish cave, he said these paleolithic belles were very near to the present-day women with their high hats, chignons, tight waists and bell-shaped skirts. These cave pictures were probably the earliest fashion plates in the world, and were drawn about 20,000 years ago, declared Mr. Brand. Another illustration from Spain showed a costume very much akin to that of the flapper.

Paraguay Can Grow Wheat

After many attempts, the production of wheat in Paraguay has now definitely been shown possible. Experiments at Aleman-cue, near Ita, in the central district, are stated to have brought favorable results, the grain being of good grade and specific gravity. A yield of 2,000 kilos to the hectare, as compared with an average of 1,000 in Argentina, is claimed by those interested. Experiments in this line are also being made at Puerto Pinasco by the International Products company.

German Waterways

Shipments of freight on German inland waterways increased to a marked extent in 1924. During the year a total of 46,569,000 metric tons of goods arrived at various inland ports, as compared with 15,613,000 metric tons in 1923, and with 58,679,000 metric tons in 1913. In 1924 goods totaling 41,765,000 metric tons were shipped from inland German ports, as against 17,013,000 metric tons in 1923 and 63,575,000 metric tons in 1913.

Back to Old Times

Oldtime hooks and scythes were recently brought out for the harvesting in parts of Scotland, where the crops were so battered and flattened that modern machinery was handicapped.

Fight California Raisins

Spain's raisin interests have combined to combat the hold gained by California raisins in foreign markets.

Rising Young Star Fond of Cooking

Claiborne Foster.

Claiborne Foster, that clever little lady who makes Barry Connors' play, "Applesauce," the outstanding comedy success of the year, is an extraordinary young woman. She is generally recognized as one of the rising young stars of the American stage and her services and company are always in demand but such is her nature that she shuns the "bright lights" and leads a simple and unostentatious life wherever she may be. She is essentially a home girl, being passionately fond of cooking, an art at which she is very adept, and much of her leisure time is spent in the modest little kitchenette of her apartment. When not playing in some production, Miss Foster may be found at her home a short distance from New York city, where she revels in the joys of cooking for the whole family and her friends and spends her vacations doing the work of the ordinary housewife.

There are two dishes which are regarded with more favor by Miss Foster, than are any others. These are Bronk shrimps and chicken en casserole. She uses the simplest of formulas but insists upon the purest of ingredients, using pure butter, and evaporated milk. The recipes that she uses are:

Bronk Shrimps.

2 cups shrimps, canned or fresh	Yolks 2 eggs
4 tbsp. fat	½ cup evaporated milk
½ tsp. salt	½ cup water
Few grains cayenne	1 tbsp. flour
	2 tsp. lemon juice

Clean the shrimps, and cook in half the fat for 2 minutes; add seasoning and lemon; cook 2 minutes longer. Remove shrimps and make a white sauce of the remaining fat, flour and milk; when thickened add yolks of eggs slightly beaten, stirring in quickly and cooking two minutes; add the shrimps.

Chicken en Casserole.

1 tender chicken for roasting	1 cup evaporated milk
2 tbsp. butter	1 tbsp. chopped parsley
2 tbsp. lard	2 cups chopped mushrooms
Salt and pepper	
1 pint hot water	

Clean chicken, split down back, and lay breast upward in casserole. Spread fat over breast, dust with salt and pepper, add hot water, cover closely and cook in hot oven one hour. When nearly tender put in evaporated milk, mushrooms and parsley. Cover again, and cook 20 minutes longer. Serve hot in casserole.

Health and Home

THE WOMAN WHO WORKS

In this new order of things, with women, both married and single, broadening their business activities, a very serious problem arises. It is the problem of what, when, and where to eat.

Breakfast is always a hurry-up meal for the men but much more so for the woman who goes to business. Luncheons, of course, are taken in the lunchrooms and restaurants in the business districts and are no problem. But how about dinners? Shall they, too, be restaurant meals or can they be so planned that business women may enjoy the home cooking of which they are so fond? Take away the element of haste and anxiety and in its place put carefully thought-out menus, well planned and easily prepared, and home dinners will again regain their high favor with the working housewife.

One of the big worries is frequently with the milk. Did it come? Is it fresh? Is it frozen? Has the milkman been paid? Are the bottles washed and set out? However, there is no cause for worry about milk. Why not keep a dozen cans of evaporated milk in your pantry? There are large cans, equal to a quart of milk and smaller cans that will meet the lesser needs.

For evaporated milk is just pure, fresh milk with more than half the water missing. This water can be replaced in a jiffy, if you so desire or you can use it as cream if rich and creamy foods are desired.

Here are a few recipes that may be used by "The Woman Who Works" for forming her plans for self help and good home cooking.

Scalloped Ham and Potatoes.

1 pound smoked ham	1½ cups water
6 medium potatoes	1 green pepper (may be omitted)
1½ cups evaporated milk diluted with	Flour

Cover the bottom of an oiled baking dish with sliced, raw potatoes. Sprinkle with flour and pieces of ham ½ inch square. Repeat until dish is full. Fill dish ¾ full of diluted milk. Bake until potatoes are tender.

Eggs en Casserole.

6 hard-boiled eggs	¾ cup evaporated milk
3 tomatoes	¾ cup water
2 tbsp. butter	½ cup grated cheese
2 tbsp. flour	Buttered crumbs
1 tsp. salt	

Cut hard-boiled eggs in half and arrange around the edge of a greased casserole. Slice tomatoes in center of dish. Make a white sauce of the milk, water, fat and flour. Add cheese and stir over a low fire until cheese is well mixed and smooth. Pour over tomatoes and eggs. Cover with crumbs and bake twenty minutes in a moderate oven.

Trainer of Boxers Gives Diet Hints

Sammy Mandell.

To Kid Howard of Chicago and his new system of training and conditioning, Sammy Mandell, the present lightweight boxing champion of the world, gives a great deal of the credit for his meteoric rise to stardom in the world of pugilism. When Mandell first started fighting, he was small, weak and undeveloped, but after turning himself over to Howard it was only a short time before he took the decision from Sid Terris of New York that resulted in him being recognized as the boss of the lightweights.

Howard's system is unique in that it works no hardship on the athlete who is in training. Unlike the systems that have been used for years, this prominent and successful trainer of men makes conditioning more of a pleasure than a distasteful necessity. Instead of demanding that his men eat only certain things he advises them to eat what they want and when they want it as long as it is cooked in a proper manner. Mr. Howard, in a recent interview on the subject of diet and condition, said, in part: "Years ago it was a task, and an unpleasant one, for a boxer or a wrestler to train for a bout because he was forced to literally starve himself unless he wanted to eat steaks and chops at all times. I remember that when I was training for a match, I was so truly tired of steaks that I choked every time that I ate one but it was steak or nothing. I advise my men to diet at all times but it is perfectly possible for them to diet and, at the same time, to enjoy their food. My only 'don't' is the one regarding the eating of such combinations as fresh milk and cheese, and fruit with cream. In fact, I advocate the use of evaporated milk entirely. Vegetables are fine and the more that the athlete eats the better he will be for it. Pastry, of certain kinds, such as homemade pies, cakes and cookies, if made correctly, and with pure butter, evaporated milk and pure lard, are very beneficial. Stews and boils are ideal. Taken as a whole, any food, with a few exceptions, is all right if properly cooked and eaten without gorging."

And one has but to look at Howard, who is the most religious user of his own system, to realize that it is a success.

Our Old Habits

It's a tremendous task to excavate a large cellar with a teaspoon—a small matter with a steam shovel. Then why use some of our old habits?—Indiana Construction Recorder.

Frugality and Hope

He seldom lives frugally who lives by chance. Hope is always liberal, and they that trust her promise make little scruple of reveling today on the profits of tomorrow.—Johnson.

Hog Production Costs Reduced

Lower Capital Investment Needed Where Two Litters Are Raised.

(Prepared by the United States Department of Agriculture.)

Hog production costs are lower when two litters of pigs are raised each year than when only one litter is raised. Adding fall pigs to the production plan means a slight increase in feed and labor costs for each 100 pounds of pork produced. Other costs, however, are decreased chiefly because it is easier to save pigs at weaning time in the summer than in the spring. The economy of producing two litters a year is also shown in a lower necessary capital investment. Maintenance costs of the breeding herds are slightly higher when two litters are raised, largely because sows are on the farm for a longer time. On a monthly basis there is practically no difference.

Interesting Lights.

These facts and many other interesting lights on hog-production costs are brought out by the Department of Agriculture in a study recently completed on hog raising in Iowa and Illinois. Farmers in Henry county, Iowa, and Warren county, Illinois, co-operated with the department representatives in making exact records of their hog-production costs in 1921 and 1922. These counties are large producers of corn, hogs and cattle. Although the actual cost figures obtained in this study are out of date now, the methods of efficient practice that were revealed and the light thrown on sources of loss in the hog-raising business have permanent interest.

Besides demonstrating the superior efficiency of the two-litter system, the study showed that there is a regular increase in corn consumed when pigs are fed heavier weights. In other words, it took on an average less feed to produce the first 50 pounds of pork than it took to produce the second, and less to produce the second than the third, and so on. Thus, to raise a herd of pigs averaging 125 pounds in weight took only 294.8 pounds of corn for each 100 pounds of hog. When hogs were raised to the average weight of 275 pounds, the amount of feed necessary to produce each hundredweight of hog was 405.2 pounds. Although the investigation did not entirely bear out the theory that the meat-producing power of feed declines in a steady proportion as animals are raised to greater weights, it did confirm the generally accepted idea that it progressively takes more corn to increase the weight of hogs as they approach maturity.

Effect on Profits.

Reduced costs of production have obviously the same effect on profits as an increased sale price. This is strikingly demonstrated by the department in an analysis of effects of production costs on profits. Production costs varied widely on the farms studied. The cost in 1921 ranged from $3.07 to $13.55 per 100 pounds of hog. Profits in the lowest cost group averaged ($3.03 cents) for 100 pounds, compared with a loss of $5.27 per 100 pounds in the highest cost group. In 1922 the range of costs was from $4.86 to $10.02 per hundred pounds of hog. Farmers in the low-cost group made a profit of $2.96 a hundred pounds, whereas those in the high-cost group suffered a loss of $2.04 per hundred pounds. It was shown that each increase in costs means a distinct decrease in profits and a decrease in the return for each bushel of corn fed.

For farms raising two litters a year, the spread was smaller although considerable. No fewer than 31.5 per cent of the pigs farrowed in the spring of 1921 were lost before weaning time. In 1922 the proportion of loss before weaning was 40.3 per cent. Average losses before weaning out of the total number of spring and fall pigs farrowed in both years was 35.4 per cent. The number of pigs that died before and after weaning was 41.4 per cent of the total number farrowed. Severe weather in the spring of 1922 increased the death losses.

Cost of Pork.

The 1921 costs were gathered from 44 farms producing 1,033,744 pounds of marketable pork, or an average of 23,494 pounds per farm. The net cost of this pork was $5.42 a hundred pounds. The 1922 costs were obtained from 39 farms producing 1,004,008 pounds of marketable pork, or an average of 25,744 pounds per farm. The net cost in 1922 was $5.86 a hundred pounds. In general, better feed and wise management showed a saving in that more and better pigs were produced, even though sometimes the increased care meant an increased cost of maintaining the breeding herds. The producers who raised the largest number of pigs per sow had a great initial advantage in the effort to keep production costs down. Some hog raisers made little effort to save the pigs, and others who tried were not thorough in their sanitary methods and failed.

Feed constituted the largest item of cost, amounting to 64 per cent of the total in 1921 and 75 per cent in 1922. Labor charges were the second largest item, constituting 8.4 per cent of the total in 1921 and 7.1 per cent of the total in 1922. Cost of equipment was the third largest item. Where fall pigs were produced the cost of equipment for each hundred pounds of hog raised was below the cost of equipment on one-litter farms. Equipment valuations on the farms varied in 1922 from $182 to $1,982. The average was $971 per farm. It was shown that the use of expensive equipment did not always mean more economical production.

Calf Failures Are Being Eliminated

Ventilation, Sanitation and Feeding of Importance.

Failures in raising calves are largely being eliminated by New Jersey dairymen through giving closer attention to ventilation, feeding, and sanitation. They have found that cold drafts must be avoided, feeding must be regular, the stalls kept clean and well bedded, and the barn well ventilated.

A growing practice is to paint the new-born calf's navel cord with iodine or iodoform and then allow the calf to suckle the dam. The calf is kept on the cow 36 to 48 hours.

For the first week after the calf is weaned, five to seven pounds of milk is fed per day at a temperature between 90 and 100 degrees Fahrenheit. The feeding is done at regular intervals and thoroughly cleaned pails are used. The milk is increased to from eight to ten pounds in the second week.

Carl B. Bender, assistant dairy husbandman at the New Jersey State College of Agriculture, New Brunswick, states that on the third week any good calf gruel can be used to take the place of some of the milk. By increasing the gruel and decreasing the milk a seven-weeks' calf will be receiving two pounds of milk and ten pounds of gruel in addition to clover or alfalfa hay. From ten weeks to four months of age a calf will consume about 13 to 15 pounds of the gruel daily in addition to a small amount of dry feed immediately after the gruel.

A good dry grain mixture for calves is made up of equal parts of linseed meal, ground oats, cornmeal, and bran. After the calves are four months old they can be fed exclusively on the grain mixture and good clover or alfalfa hay.

Poultry Manure Is Very Valuable as Fertilizer

Poultry manure is an excellent fertilizer if properly used. However, it is very rich and must be used with caution. It contains about 20 pounds of nitrogen, eight pounds of phosphorus and 15 pounds of potassium per ton, as comapred with about ten pounds of nitrogen, two pounds of phosphorus and ten pounds of potassium perton for average horse manure. In view of its richness, poultry manure is likely to have a burning effect on plants if used in too large quantities. If used at all, it should be scattered very thinly. Properly used, it is a valuable and quick-acting fertilizer.

In order to prevent loss in poultry manure, it should be properly stored. A good absorbent should be used on the dropping boards or under the perches. Since the fertility is quickly lost by leaching and fermentation, the droppings should be stored in a dry condition in well-covered bins so constructed that air can circulate through the manure. Poultry manure can also be kept well in barrels in which holes are bored through the sides.

Good Recipe for Making Ordinary Lime-Sulphur

To make ordinary lime-sulphur slake 40 pounds of high-grade stone lime (90 per cent or more calcium oxide) in an iron cooking kettle (never use brass or copper) and carefully sift in 80 pounds of flowers of sulphur and stir to a uniform paste, breaking up all the lumps that form. Add enough water to make 50 gallons. Bring to a boil and boil briskly for one hour. Add more water from time to time to keep the volume always as near 50 gallons as possible. Remove to a tank or barrel to permit the sludge to settle. Dip off the clear liquid, strain and place in air-tight casks. This is then kept as a stock solution and diluted at the rate recommended for various purposes.

Feeding Broilers

The person who is expecting to market the male chicks as broilers usually figures on forcing them somewhat more rapidly than the pullets or the males which are kept for breeding purposes. There are really three steps in the feeding of broilers, the growing, forcing and fattening. The growing period varies to some extent with the breed, the time of hatching and the size which is desired at market time. Usually this period will last from four to five weeks.

FARM FACTS

Growing hogs need growing pasture.

* * *

Now we'll wait to see who tested their corn seed.

* * *

Unless a need exists, nothing useful will be perfected.

* * *

You can skip the spray but you can't dodge the loss.

* * *

Potato spraying should begin early and continue late. Plan accordingly.

* * *

A community club for most anything has its main value in the word "community."

* * *

To get high-grade results from your chickens you must expect to give them high-grade attention.

* * *

Don't let the water get low in the tractor radiator; burned valves are an almost inevitable result.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Formal Announcements

A GOOD many people, when they receive a formal announcement, are at a loss to know exactly what to do about it. They do not like to confess ignorance, and ask some one who might, perhaps, be able to throw some light on the subject, so they do nothing, and make no acknowledgment of the announcement.

Formal notes or announcements of all sorts use the third person throughout. They may be written in long hand with perfect propriety, they may also be engraved, but it is not thought good taste to have them printed. The formality of the note requires a formal dress, just as one going to a formal party would hardly be justified in wearing tan shoes or a sweater. Printing is cheap and it can be done more quickly than engraving, and it is quite satisfactory in its place, but it is not the thing for a formal note.

Being written in the third person, the formal announcement is not signed, all proper names are written in full, and the date is placed, without abbreviations, in the lower left-hand corner of the note. In some cases an even greater formality is maintained, and no figures are used, even the date and street numbers being spelled out.

In the formal announcement, it is in better taste to omit from your name whatever titles you may have, though physicians and military officers, and judges seldom adhere to this rule. A physician usually holds rigidly to his title of "Doctor," and a military man expects everyone to call him "Colonel" if he rates that title, and if one is a judge, he does not care to have you forget it. All other people are more properly addressed as "Mr." or "Mrs.", and these titles may be abbreviated in the body of the announcement.

Certain announcements should always be formal—marriages, births, the dissolution or the formation of a firm, and in many places, even formal announcements of deaths are sent out. The uncertainties of birth, and the eagerness to get to their friends the news of the arrival of the first born, sometimes causes young parents to send out printed birth notices. These can usually be found at any stationer's, and require only that the name of the newly arrived be written, and the parents' card enclosed. They are not in such good taste, however, as the engraved card, and it is better if a formal announcement of the arrival of the young stranger is to be made, that the parents wait a few days, and do it correctly.

One can use as little originality in a formal announcement as in formal dress. Convention decides the form we are to use, almost the exact choice and order of words, and if we depart far from this order, we show ourselves socially inexperienced, or "green"—and what could be more humiliating?

In the matter of materials used, we are also almost as fully restricted in sending out a formal announcement as we are in the form and order of words we employ. We may never use any color but white, the stock must be heavy, and in general a double sheet is required, though in the announcement of a birth, or the formation or dissolution of a firm, a heavy card is proper. If the announcement is to include various members of a family, two envelopes are frequently used. The inside envelope bears the names of all the persons to whom the announcement is to go, as:

"Mr. and Mrs. Cohen
Mr. Julius Cohen
Miss Cohen"

The outside envelope may bear the address of the head of the house only, and if desired, his title, if he possesses one, may be used.

I find three formal announcements upon my desk this morning. Glidden Jones has a new baby. Gorden McGinnis has been married, and George Curtis has formed a law partnership with Everett Huckley. What should I do in each case if I wish to be polite, and to observe the courtesies of the occasion? Most people who receive such announcements will do nothing.

I may, if I wish, write a formal acknowledgment. I may, for instance, acknowledge the notes formally, and write to Glidden Jones:

"Mr. Thomas Arkle Clark is pleased to receive the announcement of the birth of Miss Margaret Hallett Jones, and wishes to offer his congratulations to her parents."

This is all too stiff and formal, however. The formal announcement should seldom have a formal reply, and it is about the only sort of formal note that should not be so answered. It will be quite sufficient, and in good taste, if I simply write an informal note to the Jones' congratulating them upon the arrival of their daughter, that I wish Curtis well in his new business relationship, and that I write to McGinnis whatever pleasant advice occurs to an old married man of wide experience, but I really should do something like this.

(© 1925, by Western Newspaper Union.)

Brief Facts

New York had its first electric street light in 1882.

Kelp, a seaweed, has been known to attain a length of 900 feet.

In 18 years 7,085 forest fires in America razed 1,120,000 acres of timber.

The Association of British Chambers of Commerce has started a movement to establish an international standard of liquid measure.

Hints on How to Make Own Dresses

The pathway of the home dressmaker has been strewn with roses ever since the day that the chemise frock took its place in the sacred circles of the mode, and its partial eclipse this season, observes a fashion writer in the New York Herald-Tribune, has occasioned many reproaches and dubious glances on the part of this thriftily inclined lady. The mantle of the chemise, however, has fortunately fallen on the athletic shoulders of the jumper frock, whose construction is almost as simple, and the nimble-fingered lady can settle down to at least another season of complacency.

The first maxim of the French home dressmaker is this: Always eliminate unnecessary trimming, think first of your line, study your figure, look at yourself in a long glass—if possible one with wings, so that you can examine your outline from every viewpoint. If you are slim and straight the world of fashion is at your feet. You have only to run up a little jumper and put a group of knife plaits on either side of your straight crepe de chine skirt to match and Paris could do little more for you.

Making Plumpness a Virtue.

If an unkind fate has endowed you with a little more than the necessary plumpness, your problem is more difficult and calls for more selective discretion. It is a truism that the large woman must avoid horizontal stripes and trimmings, yet how unfortunately often she chooses them. If you are what the French call roundelette, remember always to put some little touch into your dress that gives length. It may be a narrow panel down the center front—for instance, you can choose a printed cotton voile in a straggling flower pattern, making it up so that the long lines run from neck to hem.

A printed voile model recently seen is particularly adapted to the average embonpoint figure, as its flower design runs up and down, giving a perpendicular striped effect. The narrow, plain panel in front, with its row of buttons and fine pin tucks on either side, also gives length. It is the same color as the ground of the material and is edged with a tiny frill of the color of the design. Both colors edge the short straight sleeves. Though both back and front are each cut in one piece, the effect of a separate skirt and bodice is given by merely adding a gathered flounce at a longish waistline in front. Be sure to arrange the fullness of the flounce more in front than on the hips, for, though the latter arrangement is charming for the slender demoiselle, her more plump sister must avoid emphasizing the hip line. The back of this dress is made straight and in one piece. You will be quite in the swing if you give

Method of Trimming Plain Materials With Two-Color Border.

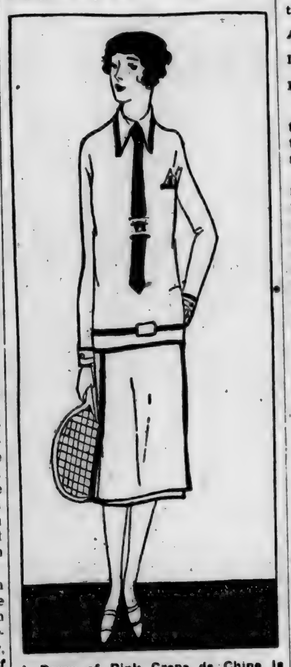
a two-piece effect in front and show a straight, unbroken line at the back—so many dresses in Paris carry this deceptive appearance this season.

Ingenious Trimming Effects.

If your flower design is printed on a beige or pink ground you will make your center panel about three inches wide, of beige or pink, cut on the straight of the material. It is best to draw a thread each side, to be sure to get it perfectly even all the way down. You may trim it with three fine hand-sewn pin tucks running all the way down on both sides, and as a further decoration put a line of small buttons matching the design of the flowers in color down the center. Edge the panel on each side with a tiny frill or piping the same shade as the buttons. Then your dress will have all the trimming it requires. Put in small, straight sleeves about five inches long and edge them with a two-color band, half an inch in the color of the ground and half an inch in the shade of the buttons. Don't go in for pads. Leave them for the slim girl, as they widen the silhouette. You can add a six-inch-wide sash of the printed material, with a picot edge or finely bordered with a bias band, if you like, but it is not necessary, as the beltless dress shows to greater advantage on the stout figure.

The Insertion of Godets.

The nimble-fingered lady who is able to essay something a little more complicated can insert godets to give a little variety to her summer skirts. These should be curved at the hem and generally fall a little below the



A Dress of Pink Crepe de Chine Is Piped With Deep Rose.

straight line of the skirt itself. You can either have a godet inlet on each side or one in front as well. In the latter case it is better to make the front godet higher and put in the side ones on a lower level.

No article on home dressmaking can be complete this season without reference to the jumper frock which plays such an important part in every woman's wardrobe. There are long jumpers that are almost tunics, and these you may embroider with a large motif or a complicated monogram. Or they might be adorned with a scarf collar, its ends faced with a contrasting color to match the accompanying skirt. You may make the sleeves long or short, inset bands of a contrasting material and trim the hem of the skirt in the same way.

The short jumper that reaches the hips is an even more useful model, but it ought not be made to wear with any old skirt. The jumper of today has its own skirt to match and is worn with no other. It forms a petite robe complète. The only diversion you may permit yourself is a check and a striped jumper in perhaps blue and white, to wear with the same blue plaited skirt; but the blue of the skirt must be of the same material and exactly the same tones as the stripe or check of the two jumpers. Inasmuch as it is better to have the stripes run horizontally this particular model should be limited to the slender type.

There are infinite ways of introducing variety into the short jumper, and the greatest of these is the collar. The most practical and usual is the straight coat collar with small turnback revers. The high collar with a roll-over top is worn in silk and crepe de chine as well as in cashmere and jersey. It often has a slit in the corsage of the jumper, at the back, and a striking finish is a looped cravat hanging down a little lower than the slit. If you wish to be very industrious you can embroider the loop, but to be consistent you should then embroider two motifs of the same design in the front of the jumper just above the hem. The scarf collar may be put on straight in the front so that it looks like a soft high collar, and the ends may be tied in a knot between the shoulders behind or in a loose bow at the back of the neck. A plaited cravat gives chic to the plain jumper with an ordinary coat collar.

For the Over-Slender Miss.

As for the girl who really is a little too thin—she does exist, even in these days of narrow lines—fluffy frills and flounces are their salvation. Her corsage can be made with the lines of the material going round the figure, and she should always be careful to put in a few gathers on the shoulder seam in front. Nothing is better for any figure, and the very thin girl cannot do without them. She should blouse her dress slightly and pouch it over a sash that can be tied in a puffy bow at the side. Her skirt may be made with the lines of the design going up and down, but it should be decorated with five or six little frills, cut on straight lines and finished with a piece of picot edge, gathered all round, with most of the fullness concentrated on the hips. Short puff sleeves are smart this year and would be charming with a little frock of this type. They can be made with small handkerchief tins knotted or tied in a bow on the outer arm.

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)

(©, 1925, Western Newspaper Union.)

Lesson for June 28

REVIEW

GOLDEN TEXT—Ye shall be witnesses unto me, both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth.—Acts 1:8.

PRIMARY TOPIC—The Boy Jesus at the Temple School.

JUNIOR TOPIC—Jesus Asking and Answering Questions.

INTERMEDIATE AND SENIOR TOPIC—The Growth of the Early Church.

YOUNG PEOPLE AND ADULT TOPIC—How the Gospel Spread.

As usual, the methods employed in the review largely depend upon the teacher and the class. Two methods are suggested:

First: The biographical. This is a method which can nearly always be used to advantage, since pupils of all ages are interested in the study of persons. Peter, Paul, Stephen, Philip and Barnabas are very prominent characters in the quarter's lessons. These may be assigned to members of the class the week before with a view of a brief biographical sketch being prepared and read to the class.

Second: The summary method. This method calls for the review of the principal facts of each lesson with statement of the leadings teachings thereof. The following is suggested:

Lesson I.—On the Day of Pentecost, the risen and ascended Christ sent the promise of the Father causing the Holy Ghost to descend upon the disciples to qualify them to be witnesses of His death and resurrection to all the world.

Lesson II.—The healing of the lame man shows that the risen Christ is able to make strong a man who was born a cripple. The man who was healed thoroughly advertised the miracle. Those who have experienced the life of God cannot help but make it known.

Lesson III.—The church is God's dwelling place. Since it is His dwelling place it is as holy as the holy place in the sanctuary. The judgment which befell Ananias and Sapphira proves that God will not allow the hypocrite to escape His judgment.

Lesson IV.—The behavior of Stephen proves that the risen Christ is able to sustain His witnesses, even while they are sealing their testimony with their blood. His standing shows His active interest in His disciples, and that He welcomes home to heaven those who are faithful.

Lesson V.—The experiences of Daniel and his companions show that total abstinence pays.

Lesson VI.—Philip, the only man in the New Testament called evangelist, is in the energy of the Spirit preaching the Word and winning men to Christ.

Lesson VII.—The conversion of Saul, the bitter enemy of Christ, is an illustrious example of what the revelation of Christ in His glory can do, and also illustrates the method of the conversion of Israel.

Lesson VIII.—After Saul's conversion, he straightway preached Christ as the Son of God. Those who are really saved know whom they have believed.

Lesson IX.—The stupendous miracle wrought by the risen Christ at the hands of Peter proved that the gospel lost none of its power by being preached abroad.

Lesson X.—When Christ would break down the middle wall of partition between the Jews and Gentiles, He gave to Cornelius and Peter each a vision. When the gospel was offered to the Gentiles, the Holy Ghost came upon them as at Pentecost.

Lesson XI.—Before the foreign missionary enterprise was launched, a new center of operation was established at Antioch. The Holy Spirit established this strategical center and sent out the missionaries.

Lesson XII.—The risen Christ hears the prayers of the church and sends His angels to deliver His faithful servants.

The Best Judges Us

Our attitude concerning the great value, the great reality, the great personality, is not to put pressure upon our own minds or upon the minds of others to believe in them; and not primarily either with ourselves or others to defend them or to argue for them, but simply to give them opportunity with us, and to do what we may to help others, too, to give that opportunity. The best, thus, judges us rather than we it.—Henry Churchill King.

Better Than Guilt

Better it were, that all the miseries which nature owns were ours at once, than guilt.—Shakespeare.

Let Us Not Lose Faith

Earl Balfour said not long ago: "Let us not fear that the future is going to be less glorious than the past. Problems of which we never dreamed multiply upon us until we are almost overwhelmed. But let us not lose faith or courage."

For Truth's Sake

To love truth for truth's sake is the principal part of human perfection in this world and the seed-plot of all other virtues.—John Locke.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JULY 2, 1925 | NO. 27

"We wish to be remembered to our St. Joe friends" is the message conveyed on a card received from Earle J. Smith and wife of Paris, France.

St. Joe C. E. Track Meet Sunday evening July 5, at Lutheran church 6:30 o'clock. Topic: "Life as a hurdle." Admission—Be on time and worship with us. Com.

How Good It Tastes!

Do You Eat Holsum Bread?

If not prepare yourself for a genuine treat! Try it Today! Surprise your family! Bring a plate heaped high with toothsome slices of HOLSUM BREAD to the dinner table! Then watch it disappear.

More Slices Because It's Longer

"HOLSUM"

Fresh Every Day - - - At Your Grocer

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The St. JOE ELEVATOR

Samuel Keesler, Mgr. Grain Dept. **Bert Jackson,** Mgr. Coal Dept.

NOTE—Pay your accounts. They are due now.

The Worst Is Not To Try

Where would our country be today if it were not for the "power to do" of our forefathers?

They fought against tremendous odds and won.

Have the "power" to make your account with this bank a substantial growing one.

The St. Joe Valley Bank, A STATE BANK

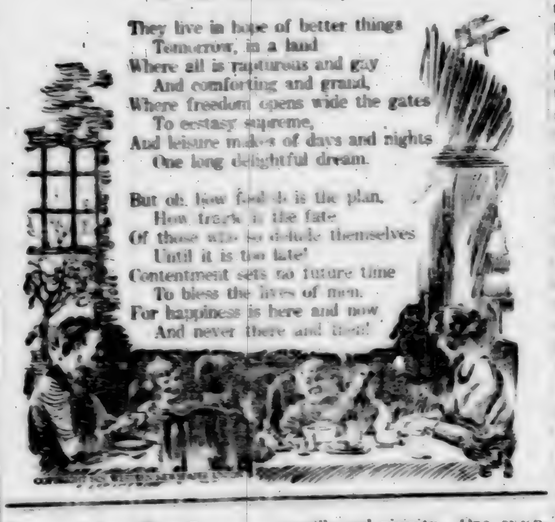
Here and Now

by O. Lawrence Hawthorne

I hear men talk so much about
Some great, uncertain day
When happiness at last will drive
Their miseries away,
When peace will shelter them from care
And fate will guide their feet
Along the endless paths of rest,
And joy will be complete.

They live in hope of better things
Tomorrow, in a land
Where all is rapturous and gay
And comforting and grand,
Where freedom opens wide the gates
To ecstasy supreme,
And leisure makes of days and nights
One long delightful dream.

But oh, how foolish is the plan,
How frantic is the fate
Of those who so delude themselves
Until it is too late!
Contentment sets no future time
To bless the lives of men.
For happiness is here and now
And never there and then!



Everything Ready For July Fourth

Practically the only celebration in DeKalb County this year will be that put on by the American Legion in the Erick grove, one mile south of St. Joe. A large crowd will be present for the day and enjoy the one beautiful spot of the county.

A basket dinner, water sports, foot races, horse shoe pitching contests and other sports will be featured. Rev. Edmund C. Lindsay will be the speaker of the day. He is a member of the American Legion and a fine orator. For the first time in this vicinity the field ceremony prescribed by the legion ritual will be used in connection with the ceremonies of the day.

The boys are arranging for your entertainment as well as comfort. The evening program will be held at St. Joe with Band Concert and Fire works. Plan to spend the entire day celebrating.

Settlement Made For Accident

The insurance adjuster, in the case of the accident, which resulted in the death of the Penland child, on the Auburn-Newville road, a week ago Sunday, made a settlement with the family on Monday of this week. The auto was insured against accident and while no blame was placed on the part of the driver, the settlement came as a real surprise to the family. After talking the matter over with the family the adjuster decided on $200 being sufficient to care for all the expenses. While money will not pay for a life, and the blame could not be placed on the motor party, a settlement of this kind will go a long way in healing the broken hearted parents.

Old School Reunion Well Attended

The Spencerville Old School Reunion was held at Spencerville, June 25, in the basement of the Lutheran church. About seventy-five members and friends gathered for this annual meeting. A bountiful dinner was served which was greatly enjoyed by all.

One new feature of the occasion was the display of old relics which mostly related to the town of Spencerville and vicinity. One exception was a heathen idol brought from Old Mexico by Thomas Devellbis, who gave an interesting account of how he secured it. The old lava rock with a face carved on it gave us good proof of the great advancement this country has made.

Three appropriate songs written for the occasion were furnished by Rev. and Mrs. W. Lindstrom of Pleasant Lake and sung by all present.

The following officers were elected:

President—Mrs. Winifred Shook
Vice Pres.—Mrs. Jennie Walter
Secretary—Mrs. Zona Abel

Some of those from a distance were George Smith, of Cleveland, Mrs. Allen Devellbis of Toledo, Mr and Mrs. Daniel Bair of Findley, Arthur Olds of Lagrange. Others came from Fort Wayne, Auburn, Hicksville, Pleasant Lake and Garrett.

Two Funerals Held Wednesday

Mrs. Harriett Stafford of Newville died suddenly Monday afternoon. Funeral was conducted at 10 o'clock from the home by Rev. Small. The second is that of Mrs. Marion Webb, who resided just south of Newville Center, died on Sunday morning. Funeral was held at 2, from U. B. church Rev. Hubbard officiating. Burial at the Scipio cemetery. E. R. Kinsey, director of both funerals.

School Building Did Not Sell

Considerable interest is being manifested in the new school house. Last Saturday was the day set for the letting of the contract. The bids were as follows:

BOXES

All the bids were from Indianapolis banking houses and were sold at a premium. Fletcher, $737; Meyer, $684; Wiley, $742 and City Trust, $777.

BUILDING

Elmer Zeis, Harlan, $39,900; Martin Krall, Butler, $36,565; H. H. Ackimer, Auburn, partial bid, $33,500 and Fred Hurshberger, Millersburg, partial bid, $33,000.

Heating, plumbing and wiring, old and new building, John R. Swing, $14,078; George Weaver, Auburn, $13,850; B. O. Fitch, ventilating, $12,672; electric work, Don VanFlict, Garrett, $1,267 and Verne Pifer, Fort Wayne, $762.

All bids were rejected as they were more than the amount of the bonds, which was $30,000.

Harry Kees Built First Service Station

The birth of the service station idea dates back to only 1914, when the first station built in the South Bend District was by that great corporation, the Standard Oil Company at Marion, Indiana, under the management of Harry Kees, now of our little city, who holds a district sales job with this company.

The "Standard Record" for June contained a photo of this first station and the later one built to handle the increase in trade. Mr. Kees was the architect in both cases. The idea was a winner with the Standard, and today every oil company in the world is dispensing its products to the public in this way.

Nearly every town of any size can boast of some very fine buildings of this kind and St. Joe can now be classed as one of these up-to-the-minute little burgs with her stations to serve the public in Standard products.

Card of Thanks

We desire to express to our many friends and neighbors, our thanks for their kind words of sympathy and services rendered in our sad bereavement.

Jay Penland and wife.

43c per pound for Butter Fat being paid at Swift & Co. St. Joe, Indiana.

Club Work News

From Concord Boys and Gals

The next regular meeting of the St. Joe Boys Club will meet July 10 at 7:30 at the school house. The program will consist of pictures and talks and refreshments will be served.

Club work has several advantages and results.

1. It teaches the boy or girl to do things in a business like way.
2. It teaches him to depend on himself.
3. It gives him or her a profit.
4. Our Best Dairy Herds in the state of Indiana come from club work.
5. Better corn, greater yields.
6. Where there is competition people strive to do better.

It aids in developing a boy's initiative.

SINNERS IN HEAVEN

PART FOUR—Continued.

—17—

IV

To Barbara, that evening seemed never-ending, her false position intolerable. She craved yet dreaded, the morrow when she could talk with Hugh.

Once by themselves, the women's tongues buzzed over their coffee cups concerning the latest local scandal. Mrs. Rochdale proceeded with a garrulous account of a housemaid treasure, possessing all the virtues, in whose room four empty whisky bottles had been found, during her absence on holiday! As she had been a frequenter of temperance meetings and had taken the pledge, this was in itself a terrible sin, even though she had never been seen drunk. Whether to allow her to return, or to write and denounce her forthwith, exercised her mistress' simple mind to the exclusion of sleep. . . . After much discussion, it was decided to ask the vicar.

The girl shrank into her chair, sick at heart, old talks with Alan in her mind. What key, she wondered, did these people use in substitution for the true one given to the world and lost again? "Charity suffereth long and is kind," they read glibly; or "He that is without sin among you, let him cast the first stone." What did half the righteous souls, judging everybody in their own smug conception of Christianity, know of temptation, sin, the meaning of the word love with all its manifold sub-keys; consideration, understanding, sympathy. . . .

"My dear," broke in old Mr. Rochdale's voice, as he seated himself beside her, "we must bring back the roses into your cheeks!" He took her hand and patted it. "You mustn't brood over the past. It was a terrible experience—terrible! But it's all over now. Forget it, Barbara, like a bad dream, and cheer up again."

The words were, to the girl, like blades of steel thrust into sore bleeding wounds. "Over. . . . Forget!" They seemed to reverberate in her mind, and her very soul turned sick and faint as, gripping the arms of her chair, she heard her mother's voice:

"Her time will soon be full again until her wedding, with all her old duties—"

Then Hugh came up and chatted, in his usual cheery way, and somebody played and sang. . . . But all the time those two words beat upon her brain. God! was it true? Was this not once more to capture her? Was this nightmare to become the reality, and the splendid real—all the very essence of life—to fade into the dream?

The morning was cold and bright. After a pretense at breakfast, she put on her coat, Hugh not being expected before lunch, and her mother not yet down.

A craving for freedom from stone walls, for vigorous action, had seized her. The cold air stinging her face, the wind buffeting her skirts, dulled momentarily the agony within. The lake glistened in the sunshine; here and there sprigs of ling still showed purple amid the russet of dead heather and bracken upon the common; the white sandy paths were crisp with frost.

At the corner where the lane joined the main road, she paused. Here, she and that other had first met. With exquisite pain, memories of those far-off first encounters seethed into her mind. She saw again the half-mocking smile upon his lips; remembered his teasing words and her own annoyance, after speaking of her heart's desire. . . . She understood, as she turned hurriedly away, how, from the first, those keen eyes had read into her heart, penetrating to what she was but vaguely conscious of herself. . . . Her heart's desire? Ah, how changed it all was now—how changed. . . . Since treading last these familiar, heathery paths, a lifetime seemed to have elapsed. She looked back with wonder upon the inexperienced girl dimly yearning after an intangible something beyond the daily horizon. . . .

Presently she turned her steps to the house where so many happy hours had been spent. The garden looked deserted now, the tennis court frost-bound and dreary. But the housekeeper welcomed her warmly; and the few school teachers installed there for Christmas holidays looked at her with ill-concealed curiosity. She hurried away, up to Mrs. Field's little den. Its owner being one of those whose arrivals ever had the charm of unexpectedness, the room had a cheerful fire and was fragrant with hothouse flowers. As Barbara looked round at the buff walls and deep-blue velvet curtains, the soft chairs built for comfort, and shelves stacked with books, other memories of confidential chats and cozy teas caused her again to realize the gulf yawning between herself and the girl of long ago.

She turned to the book shelves, then walked restlessly back to the fire. . . . All at once she caught, with a little cry, at the back of a chair, as her glance fell upon the writing table.

For the eyes she loved and had lost met her own, with the old straight penetrating look. . . . She ran forward and picked up the photograph. He wore the uniform of an air force officer, and his face was set in the lines of dogged stubbornness when unpleasant business was afoot, which she knew well. . . . The vivid likeness was bittersweet.

"It's a d—d nuisance—get it done!" She could almost hear the thought she read behind the grim lips. . . . Then, as she gazed upon the familiar features, all the past rose up and enveloped her: the comfortable English room faded. . . . Once more, in a far-away hut, she prepared strange food for her mate, ever and anon running to look for his return, seeing little black figures at play on the sand. . . . And presently he came striding down the sunny slope, fresh from a dip in the river, laden with fruit, his dear eyes searching for her. . . . She hurried to meet him, taking some of his burden. . . . Again she felt the warm touch of his lips, heard the laughter in his voice as he made some teasing remark. . . .

The ringing of a bell brought her sharply back to reality, the sudden cruel contrast cutting her like a whip. With a low moan she sank upon a couch, throwing herself face downward among the cushions, her lips pressed to the unresponsive portrait. Despair again clutched her in its remorseless claws. . . . She lay inert in her blind fearless abandonment, oblivious to all things. . . .

The opening door and quick footsteps crossing the room did not disturb her. At the touch of an arm about her shoulders she started violently and raised a drawn face. Hugh stood beside her, consternation in his eyes.

"Bab!" he exclaimed, shocked by her expression. "My dearest! what ever is the matter?"

She sat slowly upright, the portrait still clasped with both arms, regarding him dumbly.

"I managed to get away this morning—Martha said you were here—" he stammered. "What is it, Bab? I—I thought something was wrong—"

It occurred to her that anybody less stupidly dense and unimaginative would have guessed the truth long ago. Then, swiftly chasing the thought, came the knowledge that it was his genuine simple trust in her and all

Then Hugh Came Up and Chatted.

his fellow-creatures which blinded him. Suspicion was as foreign to his honest nature as subtle changes were beyond his ken. She recognized, with a warm rush of sympathy, that her affection for this old companion remained unchanged; she alone was to blame for mistaking it for anything more, with the inevitable suffering she was about to cause. She stretched out her hand; and he took it in both of his.

"Hughie! Everything is—wrong."

"Tell me all about it," he urged, sitting beside her. "We can probably put things right between us."

She shook her head, with a catch of her breath; then drew her hand gently free again.

"I'm—I've got to hurt you—horribly. Oh! my dear! I can't bear doing it." Rising impulsively, she walked to the window and back, her face working with emotion. "Can't you—guess, Hugh? Can't you realize that—that—everything is different, now?" she cried, looking straight into his bewildered face.

Apprehension was spreading over his features. His brown eyes, with their dawning sense of trouble, resembled that of a faithful dog not understanding the meaning of some unexpected chastisement. The girl could not bear to see it. She looked involuntarily down at what was still clasped to her breast. His glance followed hers, and the apprehension deepened.

"Guess — what?" he muttered. "What's that, Bab? A photograph?"

She nodded. He suddenly stepped toward her. "Whose? What—I—oh, lord! Tell me straight!"

It was the cry of one upon the borderland of tragic discovery. Feeling like an old-time executioner who let the ax fall upon the quivering neck of his victim, ending the hopes and affections of a lifetime, she silently handed him the photograph, and again turned to the window.

Looking with unseeing eyes at the frosty landscape, her thoughts reverted to a curiously similar scene in the past, wherein the situation was reversed. Hugh's portrait had played its part in that little drama. Alan, she remembered, had, with characteristic vehemence torn it into shreds. . . . Barbara, watching him, half held out her hand.

"You must not think hardly of Alan," she appealed wistfully. "If he had not behaved honorably, I should not have—loved him—as I did. Surely you believe that, Hugh?"

Mechanically he took her hand. "Oh, lord!" he ejaculated. "What a mess it all is!"

"It's hell for me!" she exclaimed, a bitter agony in her voice that startled him. He looked at her strangely, amazed. This tragic-eyed woman who had suffered so much, learning to love with such fierce intensity, was far removed from his old girlish companion. He felt in a turmoil: full of pity for her, though still half incredulous, absolutely uncertain of his feelings toward Croft. Dropping her hand, he picked up the photograph once more. Then the full realization of his own losses to be faced for the second time surged up in his heart, as he looked at the pictured face. He put it down hurriedly, and passed his hand across his forehead.

"It's a—d—d world now for us both, Bab! I—I'd better go—it has rather bowled me over—" He turned away, stumbling a little. "It—will be such a blow to the old people," he muttered huskily.

The girl watched him, helplessly, with aching heart. As he reached the door, she caught the suspicious glint of misery in his eyes which seemed to break down all barriers. Her defensive attitude melted into sympathy, as ice melts at the touch of hot coals. In her impulsive way she ran to him and seized the lapels of his tweed coat.

"Hughie!" she cried, tears raining unheeded down her cheeks. "Forgive me! I couldn't help it. It—it breaks my heart to hurt you like this."

His hands closed upon her arms, but he could not speak.

"I—couldn't bear to—betray your trust," she sobbed. "Believe me, Hughie, I tried not to—I tried to keep loyal to you—"

"Oh!" he interrupted vehemently, "don't make it harder. D'you suppose I should have wanted you to marry me from—flurry? out of loyalty?" He paused, regarding her thoughtfully for a moment. "There's one thing, Bab—"

"Yes?"

"When you tell—your mother, or anybody of things being over between us, don't mention your marriage! They won't understand, and it will be rough for you."

She threw back her head, with something of Alan's old arrogance, and drew away.

"I know you mean that kindly, Hugh; but it's impossible! It would seem as if I were ashamed. It would be implying that our convictions were wrong."

"People are not overcharitable about here, as you know," he urged. "You may both have acted according to your convictions, and they may have been right; but all the same it was—unorthodox, and— They will simply throw mud at you and—especially—him! Bab," he came back to her, speaking with unusual insistence, "I can't bear to think of you facing that! For my sake, as well as your own—and—his, don't tell them."

She remained silent. The truth of his words, as applied to Alan, struck her forcibly. The contemplation of his name suffering calumny had already, that morning, proved unbearable.

"It would be an awful trouble to your mother and my old people," he added, with his usual thoughtfulness. "They will be upset, as it is. And—they couldn't understand."

She suddenly turned and caught his shoulders.

"Hughie! do you?" she asked earnestly. "Ah! you must! I can't lose—your faith, too."

Then he acted in a manner that astonished them both. Passion and a sense of the dramatic had ever been far from his nature. Involuntarily, however, his fingers closed around her wrists. Raising her hands, he pressed his lips upon them.

"Heaven knows what was right or wrong," he declared hurriedly. "But—oh, my dear! God help you!"

The door slammed, and he was gone from her life—this man who had been friend and brother, playmate or lover, all her youth. . . . She stood gazing dreamily through the window at the desolate tennis court, where they had played so often together, and an extra wave of lonely bitterness swept into her heart. . . . She saw Hugh, with bent head, cross the grass to the garden gate. . . . Then she sank into a chair before the fire, crushed by an overpowering sense of physical weakness.

(TO BE CONTINUED.)

"Chameleon Lakes"

It is well known that the water of many lakes exhibits characteristic colors. Lake Geneva, at the western end of Switzerland, is blue, while Lake Constance, at the eastern end of that country, is green. Blueness implies purity, since the natural color of water is blue. A green lake has its water slightly clouded with impurities.

It is said that green lakes sometimes become absolutely colorless for a time, and it has been found that this sudden change of hue is due to the washing into the lakes of mud colored red by oxide of iron. Red is complementary to green, and the result of the mixture is that the green color of the water becomes for the time being neutralized.

Wigs Long Worn

Wigs date back 100,000 years, if the curious covering of a prehistoric woman's head carved in ivory, found by M. Piette in a cave in the Landes, may be interpreted as a wig of the Stone age.

FIREWORKS POISONING

EVERYBODY knows today that Fourth of July fireworks, of the old style, are dangerous. Twenty years ago when the Fourth was a day of unrestricted and unlimited noise, the number of accidents from burns, explosions, cannon crackers, dynamite cartridges, toy cannons, roman candles, sky rockets, shotguns and blank cartridge pistols was appalling. The morning newspapers of July fifth, all over the country, contained literally columns of names of the dead and injured. Worse still, though not so spectacular, were notices of death caused by lockjaw occurring a few weeks later.

Public sentiment and sane Fourth ordinances have changed all that. We are able now to celebrate our national birthday with a small amount of noise and with only an occasional sacrifice of human life.

But fireworks are apparently like the old horse pistol, which was dangerous without lock, stock or barrel. According to a recent article in The Journal of the American Medical Association by Doctors Dwyer and Helwig of Kansas City, Kan., there have been a number of deaths among children from phosphorus poisoning due to eating fireworks.

Phosphorus poisoning used to be quite common in the old days of matches made with yellow phosphorus. This highly poisonous substance was not only a danger to the workers in match factories, but also to many children.

Babies left alone to play on the kitchen floor often got a box of matches which, babylike, went into their mouths. The Esch anti-phosphorus law, passed by congress about twenty years ago, threw yellow phosphorus matches out of interstate commerce and so substituted the harmless and nonpoisonous white phosphorus matches for them.

Now it seems that yellow phosphorus is being used to make fireworks called "split devils," "son of a gun" and "devil on the walk," powders, which, ground under the heel on a concrete walk, will crack and sputter. Anything to make a loud noise and a bad smell!

Seven cases have been reported in New York city alone where little children have eaten this stuff and died. Its manufacture has been forbidden in New York.

If you must buy fireworks, don't get those containing poisonous phosphorus, and whatever you get, don't let the babies eat it. Be sure to keep it where they cannot reach it.

THE DANGERS OF GLASS EYES

YOU wouldn't consider glass eyes dangerous, would you? Yet they are by no means harmless. Our manufacturers have produced glass eyes that are so natural that they defy detection. Some persons who have been so unfortunate as to lose an eye have learned to wear an artificial eye so naturally that few persons know it is not real. But it can readily be seen that a substitute made of glass is not the most harmless sort of thing to wear in your eye socket.

The danger is of the glass eye exploding. Manufacturers of glass eyes say they lose about one-tenth of 1 per cent, or one out of every thousand, through explosion, while the goods are in storage. These explosions occur on very hot or very cold days, more frequently on hot days.

In making glass eyes, the back of the eye must be sealed while the glass ball is at white heat. This causes a vacuum in the inside of the glass eye. As a result, there is considerable air pressure on the outside surface of the finished eye. Different grades of glass are used in making glass eyes and, even in the same grade, there are apt to be inequalities in the glass. If there are sudden changes of temperature in different parts of the eye, the glass may suddenly explode, owing to the unequal pressure at different points.

While such explosions are rare, eighteen have been recently reported and probably more have occurred.

The patient hears a sharp report like a pistol shot close to the head and feels a sharp pain in his eye orbit.

Generally the eye socket and the eyelids are cut by the broken glass. No serious damage has occurred in any of the reported cases, although the cuts required several days to heal and, in some cases, it was necessary for the oculist to remove the small pieces of broken glass from the orbit.

Usually the patient thinks he has been shot in the eye. Where the explosion occurs on the street, bystanders generally get the same impression. Most of these explosions have occurred on extremely hot days.

A possible cause, says the National Safety News, is the effect of the eye secretions. Some persons can wear an artificial eye for years. In others the glass becomes discolored and corroded in six months.

In Case of Accident

Wherever there are children, accidents are likely to happen. Dr. Miles' Pain King Salve has powerful healing and antiseptic properties. Recommended for burns, cuts, bruises, sores, wounds, chapped and cracked skin, boils, piles, felons, tired feet, on the chest, croup, lumbago, varicose veins and eczema. Made of healing drugs combined with lanoline (pure wool fat).

A New Variety

Joedy's mother was planning to take him to see the circus parade, and as it was his very first parade, she thought perhaps some explanation would be apropos. So the sights to be seen were marshalled before him in fancy, and great stress was put on the cowboys. He listened gravely but said nothing. When the silence on his part was noticed she asked him, "Why Joedy, don't you want to see the cowboys?" The answer came slowly, "Well, yes, mother dear, but I'd rather see a lamb boy."

Snow Cleared by TNT

In the Rocky Mountain National park where heavy snows in winter obliterate the trails and present a long task should they have to be removed in the spring in the usual way or by melting, workmen thread a long fuse of TNT through the snow, about soon the last snow has fallen, and explode it. This clears the road in a flash. The fuse is inserted in a tube of sand to preclude premature accident.

Leisurely Remark

"I notice that a New York scientist declares that it is possible to measure time to 1/500th of a second," said a golfer at the Meadowbrook Country club as he prepared to drive, "and it strikes me that he has discovered the exact duration of the ideal working day."

Mouths and Bread

Clergyman—My boy, learn to be contented. Mouths are never sent without the bread to feed them.

Practical Boy—Aw, but the mouths are sent to our houses and the bread to yours.—London Passing Show.

Pursuit of Happiness

Remember, however, it is the pursuit of happiness that is an inalienable right, not happiness itself.—Newcastle Courier.

Outclassed

Mrs. A.—Does your dog ever growl?

Mrs. B.—No; he knows that my husband has him hopelessly outclassed.

For bloated feeling and distressed breathing due to indigestion you need a medicine as well as a purgative. Wright's Indian Vegetable Pills are both. Adv.

At the end of the handle of a new vegetable-cleaning implement are a scrubbing brush and scraper, set back to back.

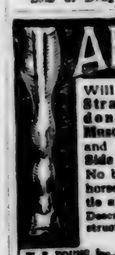
Visitors in a town are never in a hurry and they don't see the use of so much of it.

The most fluent talkers or most plausible reasoners are not always the most just thinkers.

FIRST AID TO BEAUTY AND CHARM

Nothing so mars an otherwise beautiful face as the inevitable lines of fatigue and suffering caused by tired, aching feet. ALLEN'S FOOT-EASE the Antiseptic, Healing Powder, Insures foot comfort. It is a Toilet Necessity. Shaken in your shoes in the morning, Shop all day—Dance all evening—then let your mirror tell the story. Trial package and a Foot-Ease Walking Doll sent Free. Address Allen's Foot-Ease, Le Roy, N. Y. Sold at Drug and Department Stores.

ABSORBINE



Will reduce Inflamed, Strained, Swollen Tendons, Ligaments, or Muscles. Stops the lameness and pain from a Splint, Olde Bone or Bone Spavin. No blister, no hair gone and horse can be used. $2.50 bottle at druggists or delivered. Describe your case for special instructions and interesting horse Book 2 A free.

WAS NOT FIT TO DO HER WORK

Dreadful Condition of Mrs. Fullerton's Health Remedied by Lydia E. Pinkham's Vegetable Compound

Clearfield, Pa. — "I cannot begin to tell you how much Lydia E. Pinkham's Vegetable Compound has helped me in every way. Before taking it I couldn't stand on my feet without pains running all through my whole body from my waist down, just like threads pulling. I was not fit to do any work. My mother got me to try the Vegetable Compound and I have found great benefit, and I not only recommend it for such troubles, but to build up the whole system. I have used it for most everything that gets wrong with me. When I begin to feel nervous and irritable I don't stop long in getting a bottle of the Vegetable Compound if I haven't got one in the house. It gives a fine appetite and makes a new woman of me. You may use this testimonial in my own town or anywhere else, and I will answer any letters I receive." — Mrs. RUSH FULLERTON, 525 S. 2nd Street, Clearfield, Pa.

If you are suffering from nervous troubles, irritability, give the Vegetable Compound a fair trial. For sale by druggists everywhere.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

Unhurt by Time

Workmen clearing away the basement of a Hopkinton (Iowa) building that was wrecked by fire some 25 years ago, recently found a carbon filament electric lamp bulb that had been in use in the building before the fire. This lamp bulb was at once taken to a nearby garage, screwed into a lamp socket and lighted up just as if there had been no fire nor a 25-year vacation spent Rip Van Winkle-like in the debris of the ruined building.

Man Pays for Old Prank

E. L. Oliver of Kenmare, Ohio, has sent a $2 bill to City Manager H. G. Otis of Clarksburg, W. Va., with a letter of explanation that it was to pay for a street lamp which he had broken some years ago. Oliver said the prank had been on his conscience for some time and he wanted to clear himself of the worry.

Returns Poor Timekeeper

A bandit gave the watch of Arthur Hall back to him, says the San Francisco Chronicle, when he held Hall up and discovered that the instrument's time was inaccurate. He escaped with $30.

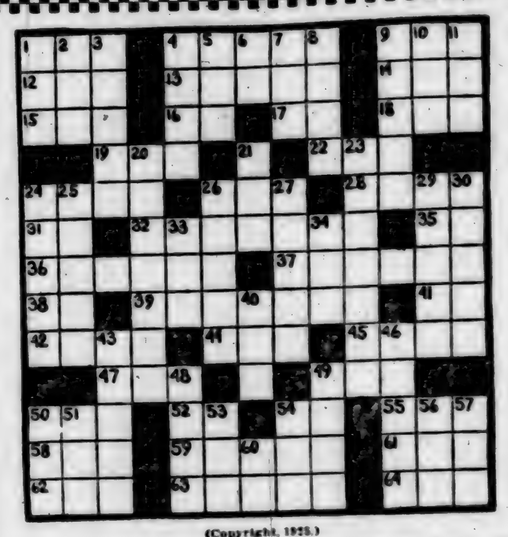
CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal

1—To stroke lightly
4—Started suddenly aside
9—To cut off
12—A gypsy gentleman
13—To state slightly
14—A southern constellation
15—Opposite of no
16—You and me
17—Upon 18—Fixed
18—A numeral
22—Nickname for an Egyptian king
24—A girl's name
26—A dropped stitch in silk hosiery
27—Tidy 31—To act
32—Site of a famous Moorish palace
35—A linguistic stock of gold coast negroes
36—Dressed in one's best
37—Condescends to grant
38—Like 39—Instructed
41—And (Latin) 42—A resting place
44—Belonging to us 45—Other
47—To employ 48—Fuss
50—To study carefully
52—The sun god of ancient Egypt
54—55 (Roman numerals)
53—Part of the verb "to be"
58—An insect 59—To assent
61—A negative connective
62—Governor of a Turkish district
63—To separate 64—To behold

Vertical

1—To pull apart 2—Yes
3—Means of trial (plural)
4—To render senseless
5—Belonging to him 6—Within
7—The complete self
8—A slight depression
9—To moisten with melted butter or fat (cookery)
10—Metallic compound
11—A frolic (slang)
20—Young birds of prey
21—A source of heat 23—Translated
24—Two works in the old Xerxes
25—Not firm or tight
28—A popular instrument
32—The inferior pole of the horizon
33—A female saint
34—One of the senses
35—A color 36—A river in Wales
40—Amusement
43—A familiar name for a relative
46—That which is lent (plural)
49—Epochs 49—To assert
50—A vehicle 51—A single unit
53—To grow old
54—Shelter or protection
56—Eggs of fishes 57—Before
60—Revised version (abbr.)

The solution will appear in next issue

Solution of Last Week's Puzzle.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "Horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

MODERN EMBALMER MASTER OF ART

King Tut's undertaker is a much overrated man, according to Dr. Jerome Alexander, a New York chemist, who has spent much time studying embalming methods and has made a special study of the method used by the ancient Egyptians. "If the skillful American embalmer did his work in the manner the Egyptian undertaker did," says Doctor Alexander, "he would not stay in business very long." In ancient Egypt the corpse was kept for about three months and then dipped in a salt solution. Then it was wrapped in many layers of cloth and sealed in at least three cases. The mourners could not see the body, but instead were compelled to look at a likeness of the deceased painted on the outside of the case. "Compare that with our modern methods," says Doctor Alexander. "Any skillful undertaker can make a corpse assume a life-like expression. The body can be viewed by relatives. The skillful undertaker does a better job in three hours than the Egyptian did in three months."

First Vanity Case

One of the earliest known vanity bags has been discovered in the ruins of the ancient colony of Olbia, which flourished in the Fifth century. Searching the tombs, a Professor Zuffer found a small bag of linen which contained a metal mirror, material resembling rouge and a pencil for darkening the eyebrows.

Origin of "A No. 1"

So far as known, this originated in the classification of wooden ships by Lloyd's, the English insurance association. According to their classification, A 1 or A No. 1 indicated that the equipment and ship were in first-class condition.

Origin of "Chapel"

The word chapel comes from capa, meaning a closet. It originally was applied to a chest in which the relics of a saint were deposited.

SEE KINSHIP OF APES AND MEN

Chemical affinities between the blood of apes and man, much closer than the similarity between that of the tailed monkeys and man, have been shown by serological tests just completed by Drs. K. Landsteiner and C. Philip Miller, Jr., of the Rockefeller institution.

Human beings are grouped into four classes, according to the chemical nature of their blood, and the tests showed that the various species of large apes could be assigned to one or another of these classes. The blood of the tailed monkeys, however, reacted in a manner not nearly so similar to that of human beings, while the blood of a lemur, belonging to an even lower group of monkeylike animals, likewise failed to show close relationship.

Current evolutionary theory holds that men and apes are related by descent from a common ancestral stock, and may be considered to be zoological cousins, while the connection with the tailed monkeys of the New world has been considered to be quite remote. The results of these experiments are interpreted as evidence in support of the theory.—Science Service.

His Brain Foozled

Sugar Valuable Food

The fact that most persons enjoy the flavor of sugar in one form or other is very good reason why it should be included in our list of common foods. Another good reason is that if sugar is used in moderation it is easily digested and furnishes energy for the muscular work of the body.

But Settled at Last

About the only time a man is satisfied with his lot is when he is buried in it.—Boston Transcript.

ROAD BUILDING

IMPROVED HIGHWAYS ARE NOT LUXURIES

(Prepared by the United States Department of Agriculture.)

Although the exact state of road improvement in the United States at the present time is not known, it is estimated by the Department of Agriculture that the total mileage of surfaced roads at the end of 1924 was between 450,000 and 475,000 miles. Indications are that approximately 40,000 miles of surfaced roads of various types have been built during each year since 1921. Exact figures as to how this mileage has been divided by types or states are not available. A considerable part of the work, moreover, has consisted of resurfacing. It therefore cannot be assumed that the net mileage of surfaced roads has been increased during the last three years by the total amount of the new construction. The last complete survey of the road improvement situation was made in 1921 when the total surfaced mileage was reckoned at 387,709 miles. New construction and resurfacing since 1921 have proceeded at a rate which is believed to justify the estimate that the net gain since then is well above 60,000 miles.

In announcing these facts, the department draws attention to certain wrong ideas that are current about road improvement. Improved roads, it says, are not luxuries. For the movement of every vehicle over a road there is a certain cost, which is less if the road be improved than if it be left in a state of nature. Logically, therefore, the only limit that should be placed on expenditure for road improvement is the amount that can be saved in vehicular operating costs. This amount, of course, depends upon the number of vehicles using the road. It is pointed out that the country loses more, in increased cost of operating vehicles, by not improving roads than it costs to improve them. In other words, it pays for improved roads whether it has them or not; and it pays less by having them than by not having them.

Another common error, says the department, is that all roads should be hard surfaced. Hard surfacing with concrete, brick, asphalt, stone or wood blocks is an expensive process. When its cost is greater than the saving accruing from the improvement, hard surfacing is not advisable. It is possible to make great improvements in roads without hard surfacing them and these improvements are quite effective in reducing the cost of travel.

When vehicles using a road are comparatively few, an unsurfaced but graded and drained road can be made and maintained in satisfactory condition by dragging at very low cost. If the traffic is so great that an unsurfaced road cannot be maintained in continuous good condition, surfacing with stone, sand-clay or gravel, although more costly than simple grading, will generally be compensated by the greater saving in the cost of operating vehicles over it. Similarly, when the traffic is greater than a gravel road will carry, a bituminous macadam surface can be economically applied. It is not necessary to use one of the hard surfaced types until the traffic becomes very dense.

All roads should be improved, says the department, to the maximum degree that the traffic on them justifies, but no road should be improved beyond its earning capacity. When this principle is observed the required annual expenditure for any type or road is within the yearly savings in the cost of operating the vehicles it has to carry. In other words, the return to the public in the form of economic transportation is the sole measure of the worth of road improvement. To say that all roads should be hard surfaced, the department points out, is merely another way of urging expenditures in excess of income.

Highway Planting Gets Support of Motor Club

The planting of shade trees on main highways throughout the country has the indorsement of the National Motorists' association, according to a bulletin issued to the automobile clubs of the country.

Care should be exercised, the bulletin says, by the state forestry and state highway boards in this work so as to preclude any possibility of planting trees or shrubbery at locations that will act as "snow catchers." The problem of preventive measures on arterial highways which will keep the snow drifts from the roadbed should be given consideration by every local and state highway engineer, according to the message. It also calls attention to the fact that trees that are placed too near the road may uproot pavements in time and cause considerable damage.

Accidents on Straight Roads

The straight road against the curved road, as a promoter of accidents, has been brought to the front again by a report of the North Shore Motor club of Wisconsin, which shows that of the 2,981 road accidents in that state last year, 2,044 occurred on straight roads, while curves, hills, railway crossings and other danger points were responsible for only 937 accidents. A straight road, it is said, invites speeding, while curved or hilly roads invite caution.

Trial by Jury to Be Instituted in Japan

Japan is going to introduce a system of trial by jury. Preparatory to making this departure the Department of Justice has various measures under way, including the sending abroad of many judiciary officials to study the system in other countries. Many of these officials are already in America and England inspecting the manner in which jury trials are conducted. Two courts each for trial by jury will be established in Tokyo, Osaka, Hiroshima, Fukuoka, Kumamoto, Kagoshima, Nagasaki, Nagoya, Sendai, Sapporo and Niigata and one each at other law court centers. Each of these special courts will have a lodging place for juries to be housed during trials. Establishing the new courts and building the lodging houses involve quite an item of expenditure, in addition to which will be the cost of a good deal of propaganda to let the country understand the system.

Art Masterpiece Found

An extremely rare wax portrait, in high relief, of Prince Francesco dei Medici, done by the celebrated Sixteenth century artist, Benvenuto Cellini, has been presented to the San Marco museum by Guiseppe Val Geppi, a widely known Florentine collector. The work, considered one of Cellini's masterpieces, is supposed by art students to have been executed between 1568 and 1570. It represents the prince in the age of adolescence, and is well preserved.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Seemed Wasted Time

Whistling merrily at his employment, an expert workman busied himself in combining bits of feather, horsehair, hooks and red flannel. There came along a visitor, evidently one from the rural districts, who viewed these operations with palpable astonishment. The workman explained that he was making artificial flies. The stranger's comment was expressive.

"Gosh, aren't there enough real ones in season?"

New Professions

In the ten years between the federal census of 1910 and 1920 there were only two new professions developed, so far as being recognized by the classifications of the United States census are concerned. These two were osteopathy and aeronautics. The federal bureau of the census classifies all gainful occupations according to its index, and recognizes no other officially.

Guess There's No Chance

What a fine world this would be if people would spend as much energy practicing their religion as they spend quarreling about it.—San Francisco Chronicle.

To insure glistening-white table linens, use Red Cross Ball Blue in your laundry. It never disappoints. At all good grocers.—Advertisement.

Nature's Protection

Leaf insects, which thrive on the guava tree, mimic the leaves so closely that they change color with the leaves as the season advances.

Poisoned by Hair Dyes

Hair-dye blindness in England has resulted in a general alarm against poisonous hair dyes.

BILLVILLE BRIEFS

Instead of the "sunny," the weather of late has made it the "funny" South.

No one kills a songbird, and ammunition is so high even the sprins poets escape.

We read of a genius who died from starvation. Why don't they go to work for a living?

If you can't lead the procession, you can stand aside and give it three cheers as it goes by.

A correspondent is informed that plain hellfire is the only ingredient we know of in moonshine booze.

Now that Uncle Sam has our income tax safe and sound, we hope he'll order a good dinner and invite us to eat.

We don't need a hobby-horse for exercise. Managing a mule in a ten-acre field gives us more than we want.

Sure, the world owes you a living, but you have to belong to the bill collectors' union and work day and night to collect it.

It's great to be a congressman and raise your own salary, and then get paid while you're running 'round explaining why you did it.

We hate to run the plow through the lilies of the field, but they toil not, and they draw the line at the spinning business, and this is hustling time in Georgia.

ORIENTAL WISDOM

Every woman hates flattery—when it is bestowed on another.

The woman who smokes deserves a husband who uses perfume.

A wise man moves with the shade; the fool sits still and complains of the heat.

Every man has faith in himself, but few have the courage to test their faith.

Jealousy is suspicious even of the sunbeam that kisses the loved one's cheek.

Happy the wife whose husband cares for the poetry he reads to her when they were courting.

A woman will forgive a man for leaving her to starve, but not for doubting her beauty.

Women love three times: the first is accident; the second, design; the third, despair.—Boston Transcript.

WISE MEN'S WORDS

No legacy is so rich as honesty.

He who knows but little tells it quickly.

Truth is truth to the end of reckoning.

The darken will be clear, carried becomes light.

The web of our life is a mingled yarn, good and ill together.

ODD JOBS

Giving a ton of coal a shower bath.

An elephant putting one foot on a fly.

A camel wearing a pair of suspenders.

Installing a telephone in a monkey house.

Keeping your loose change in a hatnet.

Putting a mustard plaster on a porcupine's back.

Swallowing a pill that looks like a dime and feels like a silver dollar.

Looking for the theater tickets that you feel sure you've left at home.—Chicago American.

HIGHWAY PROVERBS

You can be happy on a crust—if you don't look for the meat under it.

Joy comes in and plays the banjo for the fun of seeing Trouble go headlong through the window.

When some folks get to the end of the life road, they wonder why it took so long to get to the little end of Nothing.

Wings may be provided hereafter for the saints to fly with, but after we get through this world we'll be too tired to fly.

CONCERNING WOMEN

Chinese women are demanding a larger part in the affairs of their country.

The first wedding ceremony officially performed in England or Wales by a woman recently took place at a London register office.

PERSONAL PARAGRAPHS

Mrs. Charles McNabb and son of Garrett, were Thursday dinner guests of Lester Pugsley and wife.

Mr. and Mrs. Frank Myrtle, of Chicago, were Saturday night and Sunday guests of Mr. and Mrs. Wm. Randall.

Hollis Dilley and family and mother, Mrs. Anna Dilley, were guests of John Dilley and family near Waterloo, last week.

J. C. E. Abel and wife were guests from Thursday until Monday morning of Mr. and Mrs. H. L. Dunkle at Cold Springs.

Patrice Wineland left Monday morning for a month's visit with her mother at Columbus, Ohio. Her father accompanied her as far as Deshler.

Ed Miser and wife left Friday noon for a few days visit at South Bend. Mrs. Martha Miser of Waterloo is staying in the home during their absence.

Dr. and Mrs. C. R. Price and Mrs. Martha Dyer drove to La Grand, Saturday, taking the latter to her home. Mr. and Mrs. Price returned home Monday.

Mr. and Mrs. Delbert Crawford and Mr. and Mrs. Asa Crawford and daughter, Ersel, of Kunkle, O., were Sunday dinner guests in the Frank Vernon home.

Glen Bowen and family of Ft. Wayne and Ralph Sechler and family motored to Greenfield Saturday and visited until Monday with Mrs. Sechler's parents, Mr. and Mrs. J. K. P. Martindale. This week Mr. Bowen and family are here visiting the Sechler families.

Don't forget to celebrate the Fourth with the American Legion at Erick's grove. The boys have secured the services of Sou Zoos' Band. Black Jack Periscope will be the principal speaker. Mutt and Jeff will stop over for the day on their tour of the country. Ma[illegible] will be in charge of the events.

Mrs. Hen[illegible] wife and [illegible] Wm. Dorsey and [illegible] Charles Hall[illegible] Auburn [illegible] Mrs. [illegible] of [illegible] and [illegible] Dean [illegible] Fourth of July [illegible] Town [illegible] honor of [illegible] Holladay's [illegible] 29. Those of Mrs. Anstutz, Charles and Milton Hadley.

Lutheran Notes

Prayermeeting Thursday evening.

Union picnic at Erick's Grove. Let every member of the school and church be there.

S. D. Steffey, Pastor.

"Proud and Unafraid" Through the Years

The Boston folk last year were disposed to weep at what they thought a pathetic spectacle as they saw the splendid rearguard of the Grand Army marching in pouring rain through their streets. In point of fact the last thing these boys of Civil war days want is sympathy. They do not belong to the sob-stuff brigade. Like their Southern antagonists, they were men from the crowns of their heads to the bottom of their feet, and they still march on proud and unafraid to the last "rendezvous with death," says the Baltimore Sun.

Splendid old men are these on both sides of Mason and Dixon's line. Army life did not enfeeble them. Perhaps if they had not marched so much in youth they would not have been so lusty and hearty now at an age when most men must do their marching in a rocking chair if they have been so fortunate as to live so long.

Three cheers and three times three for these sturdy survivors of both grand armies. They are of the salt that never loses its savor. Could some potent magician of life sprinkle them with the elixir of youth and set them before us in the radiant and splendid manhood that was theirs in the '60s, would the picked corps of any armies of the present rival them in dauntless courage, in unselfish devotion to principle? Of such are the eternal kingdoms of spiritual glory, of such the human sublimity that shines forever like the stars.

HERE AND THERE

Receipt books, on sale at News office.

Wheat harvest began last week in the community. Pretty well filled but short straw.

Real money saving prices prevail at Coolidge Store's. See our local ads in this issue.

Someone says: "When did St. Joe get her street cars?" Oh, that is John Barger going home to dinner.

Dogs completely ruined a large portion of the flowers in the Bailey garden Tuesday evening. We still contend dogs have no place in town unless corralled.

Merritt A. Hull returned home last Thursday from Grand Rapids, where he was a patient in the Burleson hospital for several weeks. He is now feeling fine.

H. M. Wolney just can't know more about the history of the Wolney family than the average person does about his family. At the family reunion last week he read a paper tracing the Wolney blood back to the year 1561 and with authority.

Ulysses S. Johnson, administrator of the estate of the late Mary E. Johnson, has been authorized to sell at private sale certain real and in Concord township. The land was appraised by I. J. Minneman and Edward Snyder, appraisers and the administrator will receive additional bond with George L. Eastburn and M. J. Herrick as sureties.

For Sale—White Reed Sulky. Price $8. Mrs. Lester Gee.

Mrs. Roy Koch, son Bruce and daughter, Miss Hilda, were Sunday guests of Fred Elson and wife.

Harry Hursh and wife had as Sunday dinner guests, Howard Stalling and wife and O. E. Gunthorp, wife and daughter, Virginia.

Every man knows his own address at not that of his correspondent. The News will print a return card on your envelopes at a nominal cost.

The St. Joe Garage sold one of the new Chrysler Club Sedans to Mr. Geo. D. Williston of Fort Wayne and made delivery Tuesday morning.

Frank Curie and family, Mrs. Jennie Sechler and Merritt Sechler were Sunday dinner guests of Mr. and Mrs. Ira Jump and supper guests of Perry Jump and wife of near Woodburn.

By common consent, Saturday, July 18, has been declared "Sousa Day" by hundreds of communities in Northern Indiana, for on that day, Lieut.-Com. John Philip Sousa, greatest of American Bandmasters and composers and his world-famous band of 100 pieces give a matinee and evening concert at Winona Lake—the only engagement in this section of the country. The program, in addition to illustrating some of Sousa's original marches, songs, marches, and choral music, will also include interpretations of classical and popular music [illegible] Eight gifted soloists [illegible] color and variety to an extensive but truly American program.

Francis Buchman and family were Friday afternoon visitors at Fort Wayne.

Mark Williams and family of Auburn were Sunday guests of Mrs. Ida Williams.

Installation of the Home Missionary society officers will be held on Sunday morning at the Methodist church.

Wm. Vallieu, wife and daughter, Bernice of Harlan and J. C Vallieu, wife and son, Wayne, spent Sunday at Blue Lake.

Gives Offering of Monday to Winona

That "Billy" Sunday the famous Baseball evangelist, believes in working seven days a week was brought out forcefully in a letter from "Ma" Sunday to the Publicity Department of Winona Assembly in which was stated the fact that every Monday, "Billy" instead of resting that day, as is customary, made lecture engagements, giving all the money he made in this way to Winona Assembly. A total of $17,000 was raised this year and is being spent by Winona in beautifying the great Indiana summer resort, building walks, providing more swings and drinking fountains, adding flower beds, constructing roque courts, building summer pavilions and remodeling the Administration Building This is the fourth year that "Billy" and "Ma" have carried out this program, and their gifts and benefactions have amounted to over sixty thousand dollars, according to the statement of J. C Breckenridge, General Secretary of Winona Assembly and Bible Conference.

Nation's Telephone Wires

There is enough telephone wire in the United States to make a net that would hold the earth like an egg in an egg-cup. Besides putting one span around the equator, this net would consist of 6,584 strands joined to the south pole and spreading gradually until they were slightly less than four miles apart at the equator.

Powerful Light Ray

A special ray of light which will penetrate for a distance up to 300 yards under water at any depth has been invented by an Italian scientist.

Insulate Handles of Pliers

In working about electrical connections it is frequently desirable to insulate the handle of the pliers to prevent the possibility of receiving a shock. This may be readily accomplished by placing a piece of heavy wall rubber tubing over each handle.—Automobile Digest.

Champion Wrestler Tells What to Eat

Johnny Meyers, middleweight wrestling champion of the world, is strongly in favor of the use of scientifically prepared foods. He prefers to know that the food he is eating is pure and wholesome rather than to take a chance with any kind of food poisoning by eating food from an unknown source. In a recent interview on the eve of his match with Lou Talaber, from whom he won his crown, he said: "I expect to win the crown from Talaber. He is a fine wrestler and uses more science than any man of the mat today. However, I feel sure that my superior physical condition will prevail and that I will emerge victorious and the champion of my division. Diet is a very important part of my program in training for a match. The system that I use is really very simple, involving only good judgment and caution in the selection of food. I prefer to eat scientifically prepared foods whenever possible and I never eat anything to which is attached the slightest doubt of its purity. I eat a great deal of canned foods because I am sure that they are pure and will have no ill effects on my digestive system. Take just as an example of what food can do for the body—milk. It is the greatest of body builders and a very important part of any man's diet. But is sometimes impure or contaminated and may be the source of illness if used. Because of this fact, I use evaporated milk entirely and find it very satisfactory. I know that it is pure and that I will not suffer from its use. I know that it is a great body builder because the concentration of it gives it such food value. I know that it is easily digested, more so than market milk, in fact, because I drink it before going to bed and feel no effects of it in the morning. This is usually hard to do with ordinary market milk. This plan, in substance, is the same one that I use regarding other foods. If there is any chance or suspicion of impurity or low food value, I use something else.

Johnny Meyers.

"And if a man is so situated that it is impossible for him to get the proper amount of exercise, he must be doubly cautious not to partake of any but the purest food. On the whole, if a man eats with wisdom and observes the fundamental rules for good health, there is no reason why he should ever have a sick or uncomfortable day."

Health and Home

WHAT IS EVAPORATED MILK?

Did you ever stop to figure out the exact meaning of "Evaporated Milk"? The word "evaporated" may give you the idea that in the process of evaporation the milk has lost some of its valuable qualities. It hasn't. It has lost only water. Sixty per cent of the water is evaporated from the milk after it comes fresh from the cow.

The first step in processing the milk is the evaporation, when a portion of the water content is removed. The second step is the homogenization, which insures the cream being distributed evenly throughout the milk. The third is the canning. The fourth is sterilization, which takes place in the can when the milk is subjected to sufficient heat to destroy the bacteria. Thus evaporated milk remains as pure and fresh in the container as when it foamed into the pail in the farmer's barn.

Evaporated milk is now generally recognized as the freshest milk available to those not living on farms and producing their own milk. For freshness in milk means purity.

Transportation of milk from the dairy country to the city is well systematized and rapid and yet owing to the immense quantities of milk that must be rushed in daily, much of it must be obtained at considerable distances and a large per cent is necessarily some days old when it is delivered by the milkman.

Evaporated milk, on the other hand, is last night's and this morning's milk. From the dairy barn, always under rigid inspection, it is hurried by farmers to factories located in the heart of the dairy country and delivered when it is fresh. Evaporated milk is canned just at its "freshest moment," when it is in its finest state. It is never allowed to get old. The whole process from cow to can requires only a few hours. It may be interesting to know that the process of sterilizing takes place after the milk has been sealed in its containers. Once in its sterilized containers, there is no possibility of deterioration.

The sterilizing of evaporated milk insures its purity—it makes a safe milk for the children. Evaporated milk is boiled milk, and this makes it more digestible.

It may be used for any milk need with safety and economy.

For ordinary cream needs, use it just as it comes from the can. When a rich milk is desired, add an equal part of water. For cooking and baking, two parts water and one part milk will usually suffice.

Believes in Teaching True Bible

Dayton, Tenn., June 22.—"Education is a woeful failure the world over until every school child believes in a real Adam and Eve, a real serpent who tempted Eve, and a real angel with a flaming sword who drove the guilty twain from the Garden of Eden

"Taxpayers should arise in protest that their hard earned dollars are paid to teachers who tell their children that their grandparents were animals."

Walter White, superintendent of schools in Rhea county, Tennessee, and chief prosecutor of young John Scopes, the teacher who told his pupils of the beliefs of Darwin, set forth his belief in the above sentences.

Some folks in Dayton may not care whether Darwin is or is not right, whether their children did or did not learn that the first man did not resemble their own fathers—

But Walter White is not one of them.

First Reunion Held Last Sunday

The decendants of Simon Wineland met in the first family reunion Sunday at the home of John Wineland and wife No organization however, was perfected Those present to the number of forty-five were: Frank Baker and wife of Fort Wayne; Mr. and Mrs A. JULY

AMERICA

My country, 'tis of thee,
Sweet land of liberty,
Of thee I sing;
Land where my fathers died,
Land of the pilgrims' pride,
From every mountain side
Let Freedom ring.

My native country, thee,
Land of the noble free,
Thy name I love;
I love thy rocks and rills,
Thy woods and templed hills,
My heart with rapture thrills,
Like that above.

Let music swell the breeze
And ring from all the trees
Sweet Freedom's song;
Let mortal tongues awake,
Let all that breathe partake,
Let rocks their silence break,
The sound prolong.

Our Father's God, to thee,
Author of Liberty,
To thee we sing;
Long may our land be bright
With Freedom's holy light;
Protect us by thy might,
Great God, our King.

Dinner to Lafayette Marked by Hilarity

A subscription dinner was, on Tuesday, given at Matthew Wilson's hotel by a number of the members of the legislature to General Lafayette, pursuant to arrangements previously made by Dr. Kitchen of the senate and Messrs. Gilleland and Mcredith of the house of representatives, the committee appointed for that purpose by the subscribers. His excellency, the governor, General Lafayette, the heads of departments, Judge Gibson, Mr. G. W. Lafayette, Mr. Levaseur, the committee from New York in attendance upon the general and a few veterans of the Revolution, residents of this place, were present as guests. Mr. Speaker Marks presided and was assisted by Mr. Speaker Sutherland and Mr. Roberts of the house of representatives. About 120 gentlemen sat down to the dinner, which was served at a little after four o'clock. The dinner was an excellent one, says a report in the Harrisburg Chronicle, February 3, 1825.

The most cordial hilarity prevailed throughout the whole entertainment, in the course of which, at the particular and repeated request of the general, "Hail Columbia" was sung by himself and the whole company standing. The governor and General Lafayette retired at about eight o'clock and the company broke up shortly afterwards. At 11 o'clock on Wednesday General Lafayette took his departure for York.

Momentous Meeting

The first session of the Continental congress was held in Carpenter's hall, Philadelphia, September 5, 1774, with 44 members present; all the colonies were represented except Georgia and North Carolina. Peyton Randolph of Virginia was president, and Charles Thomson was secretary.

KOSCIUSKO STATUE

This statue of Gen. Thaddeus Kosciusko, the Polish patriot who served the United States in the Revolutionary war, is located in Lafayette square, across Pennsylvania avenue from the White House.

HONOR PATRIOTS OF TICONDEROGA

Monument Records Glorious Deed of Revolution.

Where Lake George enters Lake Champlain, in New York state, the French in 1756 set up a post which they named Fort Carillon. This became a concentration point for French expeditions under Montcalm and others. In 1758 the fort was attacked by 16,000 British under Abercrombie. Though the French had but 4,000 men they beat off the enemy, causing the latter a loss of 2,000 men. A year later Amherst with 11,000 men took the fort after the French had retired.

By the time of the Revolution the fort was generally known by its Indian name—"Ticonderoga," a corruption of the Iroquois word "cheonderoga," meaning "sounding" water. On May 10, 1775, Ethan Allen and 83 Green Mountain Boys captured the fort

In Memory of Frontier Fighters.

and valuable stores. Captain Delaplace was in charge of the garrison of 48 men. He was asleep when Allen rapped on his door with a sword. "Your errand?" demanded the sleepy commander. "I order you to surrender," said Allen. "By whft authority?" inquired the astonished officer. "By the authority of the Great Jehovah and the Continental congress," Allen is said to have replied. Benedict Arnold was a member of the American expedition.

St. Clair and 11,000 Continentals abandoned the fort in 1777 on the approach of Burgoyne with a superior force. Colonel Brown with 500 men tried to retake the place, but after capturing 300 prisoners and many boats, besides releasing 200 Americans, he had to retire. After the Revolution Fort Ticonderoga became a picturesque ruin, but was restored to something like its original state at the expense of Mrs. Stephen Pell of New York in 1909. A monument to the Continentals, shown above, who fought in and around Ticonderoga was recently unveiled at that historic place. It is the gift of Horace A. Moses. The work, executed by Charles Keck, shows Liberty triumphant.—Pathfinder Magazine.

Tea Tax Stamp That Led to Revolution

The tea tax stamp which was one of the causes of the American Revolution. It is the exceptional property of C. Frederic Heyerman, Detroit collector and president of the American Philatelic association. The stamp is embossed, is blue in color and came

into use when England passed the stamp act tax in 1765. Very few of the stamps have survived the years. "Evil to Him Who Evil Thinks" is the translation of the words in the inner oval.

Lafayette's Pride in American Citizenship

The following anecdotes of Lafayette appeared in the National Gazette of August 28, 1824:

As Lafayette passed the house of the late John Hancock in Boston, the mayor said to him: "There sits the widow of your deceased friend." He immediately caught her eye, and in the most enthusiastic manner pressed his hand upon his heart. She burst into tears and exclaimed: "I have now lived long enough!"

A man, while in conversation with Lafayette, observed he spoke the English language remarkably well: "And why should I not," he replied, "being an American just returned from a long visit to Europe?"

When we took a glass of wine in company with several other men with the general, previous to his landing at the quarantine ground from the Cadmus, one of the party addressed him both as marquis and general, and then asked him which he preferred. He unhesitatingly and emphatically replied: "I am an American general."

Seen and Heard In Indiana

Indianapolis.—The old Greenlawn cemetery again is suffering from the encroachments of commercial and civic enterprises. Beside a large pit that is being dug in the cemetery to backfill the Kentucky avenue bridge, is a small pile of bones and skulls, scooped from their resting places by a large steam shovel and thrown aside by workmen. Some of these may be remains of some of the early residents of Indianapolis; others may be bones of some of the 1,616 Confederate soldiers who died in or near Camp Morton during the Civil war and who were buried in Greenlawn cemetery.

Indianapolis. — Information has "dropped" out along the staid and true military channels that Gov. Ed Jackson, who holds a commission in the reserve forces as a major, is considering seriously attending the annual encampment which members of the Thirty-eighth division of the National Guard will hold at Camp Knox, Kentucky, in August. This division is made up of troops from Indiana, Kentucky and West Virginia, and is under the command of Maj. Gen. Robert H. Tyndall of Indianapolis, who was a colonel in the Rainbow division during the World war.

Indianapolis.—Robert D. Humes, chief of the state police, gave out a report of the state police, motor division, for the week ended June 13. Of 134 persons arrested, 61 were for speeding, 16 for violation of headlight laws, eight for no container for the certificate of title, seven for vehicle taking, one fugitive, five for the transportation of liquor, two for failure to stop after an accident, three for conspiracy to commit a felony, and three for operating a blind tiger. The report covers the activity of police over the entire state.

Petersburg.—Frank Heuring, son of A. J. Heuring, editor of the Winslow Dispatch, who accidentally killed Roscoe Evans on Main street in Winslow, was held for involuntary manslaughter at the coroner's inquest. The killing of Evans followed a stag party in which Heuring waived a gun over his head intending to shoot in the air. He pulled the trigger too soon and the bullet struck Evans, a young man who was standing just back of him. Evans died instantly.

Indianapolis.—A jury in the United States District court, after deliberating five minutes, returned a verdict of not guilty in the cases of Lafayette Scott, former sheriff of Morgan county; Don McKahn, a Martinsville attorney, and Horton Beasley, a Morgan county farmer, who were charged with conspiracy to violate the national prohibition laws. The three defendants were part of a group of seven indicted in the so-called Morgan county liquor ring cases.

Hartford City.—J. F. Yearling suffered a sprained arm and J. C. Traxler an injured left eye in the water battle which featured the closing session of the twentieth annual convention of the Northern Indiana Volunteer and Industrial Firemen's association here. Both men were members of the Pennsylvania department of Fort Wayne, which was defeated by the Bowser company, also of Fort Wayne. In the volunteer section Roanoke won from Montpelier.

Indianapolis.—John N. Bromert, age forty-three, an active worker in the interest of civic and community affairs of the city and widely known in the councils of the Kiwanis clubs throughout the state, died at his home in Indianapolis. In 1921 he was lieutenant governor of the Indiana district of Kiwanis clubs, and in 1922 he was governor of the Indiana district.

Terre Haute.—A business session completed the twenty-fourth annual convention of the Indiana state council of the Knights of Columbus at the Gibault Home for Boys, south of Terre Haute. Timothy P. Galvin of Hammond is the new state deputy and Harry J. Fitzgerald, Evansville, was elected state secretary.

Indianapolis.—Dr. Collis T. Bedford, one of the oldest physicians in Indianapolis, died at his home following an operation. He was eighty-four years old. Doctor Bedford suffered an attack of influenza in April and his death is attributed to complications that set in.

Indianapolis.—The 90-day "grandfather" clause of the new motor-bus regulation law passed by the 1925 legislature was held valid and constitutional in rulings made at Indianapolis by two judges of the Marion county courts.

Shelbyville.—Wheat cutting has started in Shelby county. Porter brothers of Flat Rock started on a field of 50 acres, and Otis Cochran, living near Lewiscreek, started cutting a field of more than 100 acres.

Greencastle.—Caught in high water caused by recent rains, Ivan Brent, sixteen years old, son of Lawrence Brent, Putnam county farmer, was drowned while swimming.

Monticello.—A reward of $1,000 has been offered by the White County Bankers' association for the apprehension of any bandit or gang of bandits who raid a bank in the county. This organization has appropriated $15,000 to be used in paying rewards.

Muncie.—The commencement exercises of the eastern division, Indiana State Normal school, were held here at the close of a week's program which included receptions for members of the graduating class and meetings of alumni and former students. The school graduated 255 students.

OBSERVANCE OF AUTO LAW URGED

Michigan City.—Speaking before the delegates to the Tri-State Good Roads conference in Michigan City, Frederick E. Schortemeier, secretary of state, appealed for a sympathetic observance of the automobile laws of Indiana. The enforcement of these laws comes directly under the jurisdiction of the secretary of state and the state police.

The conference was attended by state officials and road association representatives from Illinois, Indiana and Michigan and the problem of developing the road systems of the three states to provide for traffic needs was considered. Mr. Schortemeier was the presiding officer of the conference.

"The death and accident toll in the country from automobiles is entirely too high and can be reduced very greatly if the public will co-operate properly toward this end," said Mr. Schortemeier.

"The greatest factor in accidents is speed. It is my opinion that four-fifths of the accidents could be escaped if automobiles at all times were under control. There is no need for this haste. In my opinion the maximum allowed under the Indiana law of 35 miles an hour on the highways outside of the corporate limits is fast enough for any person, any time. Some of our citizens will not agree with this, but it is my deliberate conviction that this is sufficiently rapid for automobile traffic to move under any circumstances."

Portland.—Admitting that he set fire to a large barn on the farm of his father, Lemon O. Hickman, three miles southwest of Redkey, last June 10, for spite, because his parents had incurred his anger, Kenneth W. Hickman pleaded guilty to a charge of arson before Judge Wheat in the Jay Circuit court at Portland. He was fined $100 and sentenced to two to fourteen years in the Indiana reformatory at Pendleton.

Lafayette.—Prof. Charles C. Albright, a member of the civil engineering faculty of Purdue university, has resigned to accept a post in the engineering headquarters of the Pennsylvania department of highways at Harrisburg, Pa. Professor Albright received a B. S. degree in 1903 at Purdue and a degree in civil engineering in 1909 and has been connected with Purdue for the last 15 years.

Jasper.—Judge John F. Dillon of the Dubois Circuit court decided the case of John Waddle, who several days ago had been tried on the charge of having desecrated a United States flag by having carried it out of a church of which he was an official, and by having thrown it on the ground and piled old shoes and sticks of wood on it. Waddle was found guilty and fined $5.

Evansville.—Theodore Hall, twenty-one years old, who killed his mother-in-law, Mrs. Maggie Cates, here in November of last year and all but fatally wounded his wife, Iola, with the same gun, was taken to the state reformatory at Pendleton to begin serving his sentence of from two to twenty-one years for manslaughter.

Fort Wayne.—That the central district in the Missouri synod of the Evangelical Lutheran church will not permit members in its congregations to be affiliated with secret or fraternal orders was officially made known through a resolution adopted by the annual conference at the Concordia college chapel.

Greenfield.—On pleas of guilty to vehicle taking, Clarence Davidson, Omer Jones and David Pritchard, all members of the United States army, stationed at Fort Benjamin Harrison, were sentenced in the Hancock Circuit court by Judge Arthur Van Dugan to three to five years in the Indiana reformatory.

Elkhart.—Joe Horvath, alias John Coltz, Lawrence Burns, Minnie Labon and Katherine Lichwa, all young people of Chicago, arrested after a series of holdups, were sentenced to from ten to twenty-five years in prison and fined $5,000 each by Judge Hile upon pleading guilty to robbery and automobile banditry.

Frankfort.—An organization of all bankers of Clinton county for protection against bank bandits was formed here. It is planned to raise a fund and offer bonuses for the capture of bandits.

Veedersburg.—Keith DePew, age twenty-five, son of Mr. and Mrs. Samuel DePew of Fort Wayne, was drowned in Shawnee creek near Aylsworth, Fountain county.

Evansville.—Charles A. Kiefer, fifty-seven, manager of the Evansville Country club, accidentally shot himself at the clubmouse.

Boonville.—Charles Krohn, age 27ty, unmarried, is lodged in the Warrick County jail charged with robbing the Elberfeld State bank at Elberfeld of $1,500. Krohn formerly was a farmer in that county. He was captured by Town Marshal John Snow.

Richmond.—A jury in the Wayne Circuit court, after deliberating less than ten minutes, returned a verdict for the defendants in a suit for $10,000 damages, brought by Jesse E. Underhill, against four members of the Richmond police department, alleging false arrest and imprisonment.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)

(©, 1925, Western Newspaper Union.)

Lesson for July 5

THE BEGINNING OF FOREIGN MISSIONS

LESSON TEXT—Acts 13:1-12.

GOLDEN TEXT—And He said unto them, Go ye into all the world, and preach the gospel to every creature.—Mark 16:15.

PRIMARY TOPIC—Two Men Become Foreign Missionaries.

JUNIOR TOPIC—How Foreign Missions Began.

INTERMEDIATE AND SENIOR TOPIC—The Beginning of Foreign Missions.

YOUNG PEOPLE AND ADULT TOPIC—The Holy Spirit in Foreign Missions.

I. The Gifts of the Church at Antioch (v. 1).

Young as Antioch, the new religious center was, she had prophets and teachers. In Eph. 4:8-12 Paul declares that when Christ ascended He gave gifts to men for the purpose of perfecting the saints unto the work of the ministry. This shows that the church does not exist for itself, but for service to others. Christ, the head of the church, came not to be ministered to, but to minister and give His life a ransom for many (Matt. 20:28).

II. Barnabas and Saul Sent Forth (vv. 2-3).

These were the first foreign missionaries sent out. While the five ministers were praying and fasting, the Spirit of God commanded them to send forth Barnabas and Saul. The work of evangelizing the world was laid so heavily upon these men that they refrained from eating in order to seek the will of the Lord in prayer. This is the kind of fasting that meets God's approval. From the fact that they were directed to send forth those whom the Spirit called, we learn that the real call to Christ's service comes from the Spirit. The Spirit called and the church seconded the motion by sending those who were called by Him. The church should be constantly seeking the mind of the Spirit relative to the sending forth of laborers into the vineyard. The Spirit called and the church sent the very best men from the church at Antioch. These men seem to have been ready to go for they rendered instant obedience. This should be our attitude toward the Lord's work, holding ourselves in readiness for the immediate execution of His commission. Those who have received the Spirit's call are not taken by surprise when the church sets them forward to their specific work.

III. Preaching the Word of God in Cyprus (vv. 4-5).

We are not told as to why they first went to Cyprus, but we are left to infer that it was owing to the fact that it was the home of Barnabas. He was acquainted with the country and people, and could thus be assured of a respectable hearing among them. Besides it is most natural that those who have heard the good news to go with it first to their kindred and friends. Andrew first went to his brother, and the man out of whom the demons were cast was denied the pleasure of his request to follow Jesus. Christ commanded him to go home and tell what great things the Lord had done for him (Luke 8:39). As they went forth they carefully carried out their commission for they preached the Word of God, not current history, philosophy, ethics, etc. Those who are faithful to God will never preach anything but His Word. The great need today is Spirit-called, Spirit-filled men preaching God's Word. In fact Spirit-filled men will preach nothing else. The opposer of God and Christ can only be successfully met by this means.

IV. Withstood by Elymas, the Sorcerer (vv. 6-12).

Sergius Paulus, the deputy, invited Barnabas and Saul to tell him of the Word of God. Elymas maliciously sought to turn his mind from the faith. This is the first obstacle they encountered, but it was overcome through the power of the Spirit. This opposer is the same one who came to Adam in the garden of Eden, and Jesus in the wilderness. He is the enemy of God and man. He now sought to bar the gospel as it entered upon its career of the conversion of the heathen. Paul denounced him in the most scathing terms. He called him the child of the devil, denounced him as full of guile and villainy, pronouncing him the enemy of all righteousness, accusing him of perverting the right ways of the Lord. Surely a man is never more of a villain than when trying to turn a soul from the gospel.

Our Life

We are living now by justice, honor and mercy, by the moral mastery of ourselves and of our time; and this life while in time is not of time; it is life in God and for God; it is the life of freedom; it is free from anxiety, fear, doubt, despair, death; it is content with God and with its fate in God. —George A. Gordon.

Sunday

Sunday must continue Sunday.—Strauss.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Formal Notes and Invitations

THERE is a certain dignity and formality about a wedding or a dinner party, like an affair of state, that makes it fitting that an invitation to such a function should take on a somewhat formal exterior in keeping with the character of the event. Marriages, and births, and dinner parties, have in them much that makes for joy and happiness, but not any one of them is a picnic, nor should it be treated so. There have come to me within the last year or two, from certain Robertson centers, poster-like invitations to weddings, or announcements of them, gotten up like the advertisements of a fire sale, or an auction of household goods. Possibly these sheets are funny, but marriage is so sacred a thing that we are wise, whenever we can dignify it by formality, to do so.

If you are inviting friends to a formal function such as a dinner party or a wedding, or a musicale, the invitations may be written, if the number to be invited is small; otherwise, they should be engraved. The formal invitation, like the formal announcement, is written in the third person, and words and figures are usually spelled out, and no abbreviations are used, excepting "Mr." and "Mrs." Even the year may be spelled out.

These invitations may be written or engraved upon a correspondence card, though a double sheet is more commonly used. The printed invitation is not used by people who are careful to follow custom, and to respect conventional form.

Invitations to any formal function should be sent out ten days, or two weeks before the event takes place, in order that those invited may have a chance to adjust their engagements, to fix up their wardrobes, or to do such things as are necessary to permit one to look his best. Many people, women especially, like to have a gown for a wedding, or an important dinner party, and even a mere man sometimes wants to have a white vest dry-cleaned for the occasion.

The reply to a formal invitation should be sent immediately. It is a discourtesy to the hostess to do otherwise. She must know as soon as possible who her guests are to be, and how many. If some of those first invited do not find it possible to accept her invitation, she may wish a definite number at her party, and so should be given time to invite others. If it is a dinner party she is giving, she must arrange the order of their seating at table, and decide as to the amount of refreshments to be prepared. All this takes time. No social blunder is cruder than delay in replying to a formal invitation.

The reply in each case should follow the form of the invitation, and should also be in the third person throughout.

The exact choice of words may be left to you. You may be "delighted" or "pleased" or "charmed" to accept, as you wish, and you may decline with any qualification of "regret" that occurs to you, but the conventional form should be followed in any case.

In making such a reply, correspondence cards may be used or folded double sheets. The more simple, and elegant the stationery, the better, and if possible, it should be white. In these notes the names should be written out in full, and all titles may be omitted. We say "Mr. John Lloyd Jones," not "Mr. J. L. Jones."

A written invitation to a wedding reads:

"Mr. and Mrs. Joseph Noble Enyart request the honor of Mr. James Brown Scott's presence at the marriage of their daughter Jane Emily to Mr. Robert Edward McIntyre on Saturday evening the twentieth of November at eight o'clock, Central Presbyterian church, Jacksonville, Illinois."

If the invitation is engraved, however, as is usually the case, the pronoun "your" will need to take the place of the name of the person invited. In England a blank space is left for writing in the full name of every individual invited. The reply to such an invitation would read:

"Mr. Henry Duane Gordon accepts with pleasure the invitation of Mr. and Mrs. John Noble Enyart to the marriage of their daughter Jane Emily, on Saturday evening the twentieth of November."

If all the persons concerned in these formal invitations live in the same town, then only the street number need be given in the notes, and in case of intimacy, even that may be omitted; otherwise the street number, city, and state should be indicated.

If you want to gain a reputation for social courtesy you will acknowledge every formal note you receive on the day in which you receive it, even though you may be uncertain whether an answer is absolutely necessary or not, and you will do it in long hand, even if the stenographer is idle at the time.

(© 1925, by Western Newspaper Union.)

Necessary Delay

A workman had been suffering severe pains for several days and his wife finally persuaded him to see a doctor, who diagnosed his case as threatened appendicitis. The man went home and called to his wife, who was at work about the house, to tell her the result. "I'm bound to have an appendicitis," he said. "Yer not," was the stern reply, "yer bound to have nothing till I've got my new hat."

JULY

RADIO

By A. DINSDALE, in New York Herald-Tribune.

Radio-frequency amplification has engaged the attention of experimenters both here and on the other side of the Atlantic for some time past, but with the exception of the superheterodyne all the systems so far devised have proved unsatisfactory when applied to more than at most three stages.

The reason for this difficulty with multistage R. F. amplification lies in the fact that self-oscillation of the R. F. tubes is difficult or impossible to control. Many different methods of preventing this unwanted oscillation have been tried by introducing into the circuit different stabilizing devices.

John Scott-Taggart, the well-known British designer, set out to find means of overcoming the difficulty without introducing more or less inefficient stabilizers. He alternated tuned circuits with untuned circuits, the grid circuit being tuned and the plate circuit untuned.

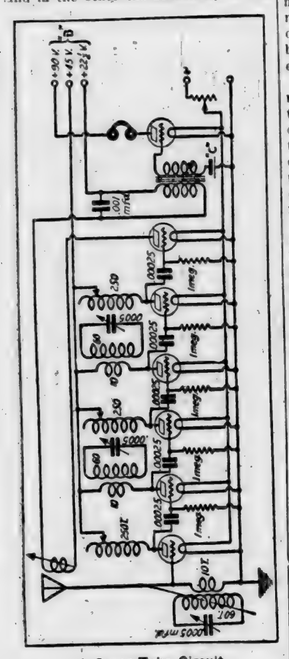
This method immediately proved successful, for the stability is perfect, regeneration being necessary, in fact, to make the set oscillate.

A seven-tube circuit, giving five stages of R. F. amplification in which regeneration was employed, was constructed, but was found to be lacking in selectivity, although very stable and sensitive.

The circuit was therefore modified by the introduction of wave traps into all the tuned circuits, which modification immediately elevated the system into the superheterodyne class as regards selectivity, while reducing the sensitivity by only a small amount.

The method is illustrated in the diagram.

There are two kinds of wave traps. In one method the interfering station is cut out, leaving the desired signals, and in the other the selectivity of the



A Seven-Tube Circuit.

receiver is increased to such a pitch that the interfering signals cannot get through.

The latter method is the more scientific and is the one adopted. The explanation of the principle is as follows:

If the trap circuit L2C1 were not present the coupling between the first and second tubes would be by means of the inductance L1 only—i. e., entirely aperiodic. Thus all interferences present in the aerial circuit would be passed on to the next stage.

By introducing the trap circuit and tuning it exactly to the frequency of the desired signals, the coil L1 no longer remains entirely aperiodic. Since L1 is tightly coupled to L2 it comes under the influence of the trap circuit and is inclined to respond more to the frequency of that circuit.

If, on the other hand, L2C1 is not accurately tuned to the incoming frequency L1 reverts to its original aperiodic condition.

Now, a choke coil, to produce an appreciable amount of amplification, must consist of a considerable number of turns, otherwise there will be no build-up, or increase in amplitude, of the oscillations flowing through it. That is to say, if L1 consists of relatively few turns it will act as a virtual short circuit to the oscillations transferred to the plate circuit by the grid.

Applying Wave Traps.

In practice, the circuit L2C1 may consist of any of the usual forms of low-loss inductance, say 60 turns, tuned by a low-loss condenser of .0005 mfd. capacity.

L1, which is tightly coupled to L2, may consist of a coil of 25 turns, or less. As low a number as eight turns has been used with success, the determining factor being the degree of volume required as against the degree of selectivity necessary. Eight turns will give very much greater selectivity than 25 turns, and the loss of volume will only be slight. The point is one which the individual experimenter can with advantage decide for himself.

Except for the aperiodic coils, the components are all standard, and the number and arrangement of the various stages are given just as a suggestion to the experimenter.

As a matter of fact, the writer strongly recommends the reader to commence experiments with only three stages of R. F., as the selectivity will be found to be so great, in a well-laid-out receiver using good low-loss components, that two condensers will be found to be quite enough to handle.

It matters little whether the tickler coil is coupled to the aperiodic aerial coil or to the wave trap inductance. Those who prefer to use plug-in coils can use an ordinary three-coil holder in this position.

Similarly, plug-in coils, mounted inside the cabinet, may be used for the interstage R. F. chokes, which are shown variable in the diagram. This variability is desirable because, in a sense, a choke coil of this sort is not absolutely aperiodic. A coil which will present sufficient impedance to a certain frequency to cause the necessary build-up of oscillation amplitude, will present a negligible impedance to another much lower frequency.

Thus, if plug-in coils are used, they can be changed to suit the wave length being received. Nos. 150, 200 or 250 will cover the American broadcast band satisfactorily.

Alternative Choke Coil.

An alternative choke coil which can be made up by those who desire maximum possible efficiency on any given wave length consists of 150 turns of No. 40 s. s. c. resistance wire wound on a former about 2¾ inches in diameter. Tappings are taken to a ten-point rotary switch from the ends of the coil, and from the fiftieth turn. From the fiftieth turn to the one hundred and twentieth tappings are made at every tenth turn.

The switch for this coil may be mounted on the face of the panel, or, more conveniently, on the end of the coil, which can be mounted on the baseboard. This is a point for the experimenter himself to settle.

The interstage R. F. wave trap coils may be wound as cylindrical coils, and the few turns of the aperiodic plate coils wound over the central part of the winding. In this way turns can easily be put on or taken off during the course of experiments. The aerial coils can be made up in the same manner if plug-in coils are not used.

There is, of course, no reason why special low-loss coils of the various basket-wound types should not be made up, the few turns of the aperiodic coils being wound on the same former to insure tight coupling.

Having familiarized himself with the method of tuning, the experimenter may proceed to add as many stages of R. F. as he pleases, but if more than three are employed it is practically essential that a multiple condenser be used in conjunction with carefully matched coils.

Suggestions of Lay-Out.

The main thing to bear in mind when arranging the lay-out is to avoid overcrowding in the R. F. circuits and to so arrange all coils that no interaction can occur between them.

Using only three stages of R. F. and no A. F., many Britishers report loud-speaker signals from American stations almost every night, with an unusual absence of fading and freedom from distortion. This alone speaks volumes for the efficiency of the receiver, for, although many different types of receivers in use in England today will bring in American stations regularly, fading, swinging and "night effect" distortion are almost always present.

As regards selectivity, it has been found possible, within a mile or so of the local station, to completely tune it out and receive uninterruptedly upon a wave length within a few meters of it.

Things to Remember in Care of Dry Batteries

A dry battery will not stand much abuse. If it is accidentally dropped one or more of its internal connections is liable to be broken, or the sealing compound on its top might become cracked, through which moisture can seep, causing a leakage between cells, which acts as a continual drain on the battery. If dust accumulates on the top of the battery, wipe it off with a dry cloth, never with a wet rag, as this, too, will cause a drain or leakage between the terminals until such time as the moisture evaporates. Metal articles, such as trays, shears, metal pencils, etc., if placed on a battery, will cause a possible short circuit.

Use Fine Sandpaper to Keep Phone Jacks Clean

Dirty contacts of phone jacks will produce sizzling and frying noises in the headphones or loud speaker. The simplest way to clean these jack contacts is to let them close on a piece of fine sandpaper and then pull the sandpaper out. Repeat this process with the sandpaper turned over and then both contacts are surely clean. Do not use emery paper, because emery powder is conductive and may partially short circuit the jack.

Value of By-Pass Condensers

By-pass condensers across the "B" batteries act as a control for the fluctuating current, charging as the voltage rises and discharging as the voltage drops. This makes more stable operation of the set.

Reflex Sets Are Very Clear, Loud

Radio Frequency and Audio Frequency Transformers Important.

For loud-speaker reception with the minimum original outlay and upkeep expense, the reflex type of receiver is most suitable. Reflex sets are very clear and loud in their reproduction and have a good receiving range.

The critical units in a reflex set are the radio frequency and audio frequency transformers. Only the best should be used.

The crystal detector should be the adjustable type. Fixed types lose efficiency with use.

Parts You Will Need.

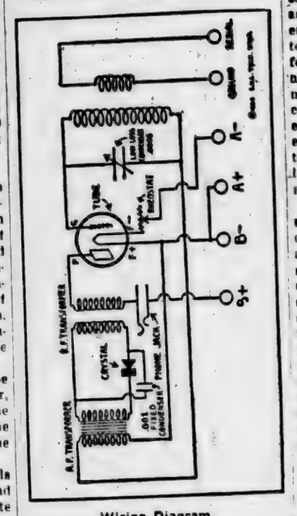
The parts required are as follows.

One antenna coupler.

One .0005 variable condenser (about twenty-three plates and of low-loss construction).

One radio frequency transformer (preferably of the reflex type).

One crystal detector.



Wiring Diagram.

One 25-ohm rheostat.

One socket.

One seven by nine panel.

Two fixed condensers (one .001 and one .002).

One single-circuit jack.

Baseboard screws, wire, binding posts, etc.

A little added expense in buying exceptionally good material is money well spent.

The best all-round tube for reflex work is the UV201-A, or C301-A.

From 45 to 90 volts of "B" battery should be used with this receiver. Either a six-volt storage battery or four dry cells connected in series can be used for the "A" battery.

The antenna tuner uses the familiar aperiodic primary coupler. It consists of two windings on a three-inch bakelite tube. One is of eight turns and the other of forty-five. Use No. 22 d.c.c wire. The eight-turn coil should be loosely wound on top of the forty-five turns so that it can be slid back and forth until the correct degree of selectivity is obtained.

Although not shown in the diagram, the phone jack should be shunted with a .005 mfd. fixed condenser to by-pass the radio frequency currents.

Perfect Contact for Rotor Shaft Bearings

Where pigtails are not used and a brush or bearing contact makes the connection for rotors, considerable scratching will be heard when the rotor is turned. To make a good contact for such a bearing, writes a correspondent in Radio Digest, I used the method as shown. A wire is run between the bolts holding the shaft bearing, the wire being given three turns around the shaft and drawn tight. The wire grips the shaft as it is revolved.

ETHER WAVES

Use good insulators and solder all connections. The lower the resistance, the stronger the signals.

Radio relaying, whether conducted by means of land wires or radio, is a question of satisfactory signal strength, minimum distortion of the signal, and the minimizing of atmospheric and other parasitic disturbances.

Night cruises of the giant airplane R-33 are interesting to English radio fans, because they can hear the operator talking to various land stations giving position reports. The wave length is 900 meters, and is clearly heard on crystal detector sets.

Sheep Diseases Causing Losses

Much of Trouble Among Western Flocks Can Be Readily Controlled.

(Prepared by the United States Department of Agriculture.)

A series of related sheep and lamb diseases which have caused western flock owners increasing losses can readily be brought under control by preventive measures. This announcement by the United States Department of Agriculture is based on the results of investigations by Dr. W. T. Huffman, federal veterinarian stationed in Idaho, who has worked in co-operation with Dr. J. S. Dade, inspector in charge for the state board of sheep commissioners.

Trace Many of Losses.

In the past the sheepmen have accepted most of the losses from strange diseases philosophically as one of the hazards of the business, but the increasing prevalence and virulence of the infection have caused them to seek relief. Acting on requests for assistance from flock owners in southern Idaho, the veterinary investigators have traced many of the losses to four forms of the disease known as necrobacillosis. These related ailments are: Foot rot, lip-and-leg ulceration, a venereal form of the disease affecting breeding stock, and liver infection of young lambs through the navel. In the form of the disease last mentioned, affected lambs invariably die—usually before three weeks old.

The monetary loss is also heavy for sheep affected with foot rot, since they cannot travel, and as a consequence are unable to obtain much feed. A similar result follows infection with lip-and-leg ulceration. Moreover, sick sheep fall an easy prey to coyotes and other range marauders. The existence of any one form of the disease may lead to other forms in the same band, a fact which sheepmen apparently have not understood. Accordingly, the investigators report, the infection of adult sheep must be controlled if flock owners wish to avoid the fatal liver infection of their lambs.

Best Means of Control.

Treatment for the first three forms of necrobacillosis consists in the use of antiseptics and astringents, combined with the prompt removal from the flock of affected sheep. Medicinal treatment of affected lambs is useless, as infection involves the liver and soon proves fatal. Disinfection of the navel for a day or two is sometimes beneficial in prevention, but the best means of control is to keep infection out of the flock.

"Where the soil is not sandy or otherwise porous," say the investigators, "we advocate the use of a layer of gravel at least two inches deep in the lambing sheds. When covered with straw, this makes a clean dry bed; and the soil is not worked up as occurs with dirt floors. While concrete floors for lambing sheds have been suggested, these are scarcely suitable for range conditions where the sheds are largely temporary or are on leased land. Gravel can be disinfected without difficulty; it is inexpensive and has proved highly satisfactory for the purpose."

"To give an idea of the extent of lamb losses," the report states, "one flock master who had a band of 3,000 ewes, declared that this year the liver infection had been fatal to $1,000 worth of lambs. Another owner who was grazing 1,000 ewes, lost 200 of them—20 per cent—from the foot-rot form of the disease."

Can Control Losses.

Observations of the investigators support the belief that sheepmen can control their losses and prevent further spread of the disease, in its various forms, if they will "cure up" all infected stock before letting it go on the range. A great many ewes, also, are being shipped East, and purchasers are urged to co-operate in suppressing any infection that may develop.

The disease appears to be associated largely with bad weather, crowded and insanitary feed lots, infected ranges, failure to separate infected animals promptly from the flock, and muddy and insanitary lambing sheds. With the control methods outlined and a clear understanding of the close relationship between the various forms of the disease, sheepmen need not continue to sustain heavy losses. In Idaho where the conditions described have received special study, further information may be obtained by addressing the State Board of Sheep Commissioners, Boise. The United States Department of Agriculture, Washington, also will furnish bulletins on sheep diseases and parasites to interested persons.

Tuberculosis Is Spread Through Carelessness

Failure to destroy or bury deeply the carcasses of animals that die from natural causes, so that other animals cannot have access to them, is responsible for the spread of much infection on farms. In a recent investigation a farmer admitted having lost between 80 and 100 chickens from disease. He had thrown the dead fowls into the hog pen and had also hauled the cleanings from the chicken house into a field in which his hogs ran. Tuberculin testing showed about 25 per cent infection of tuberculosis among the fowls; and a sow that was tested with avian tuberculin proved to be tuberculous and indicated, moreover, that the infection was of the fowl type.

Ground-Hog Day Is Fast Losing Favor

Control Campaigns Begun in Some Sections.

(Prepared by the United States Department of Agriculture.)

Because of its burrowing and feeding habits, the ground hog is considered in most localities an undesirable resident, and to make matters worse its "weather predictions" on the second of February are no longer taken seriously. "Ground-hog day" thus bids fair to disappear in states where the habits of this rodent run counter to the interests of the farmer, and in such places ground hogs, or woodchucks, or marmots, as they are variously termed, will face forcible ejection if necessary. In places where they do little harm they may be allowed to live in moderate numbers for use as game and food.

Ground-hog control campaigns in Indiana and Illinois have been popular this spring, and the biological survey of the United States Department of Agriculture has been called on to cooperate with state officials and individuals in conducting them. Four county-wide campaigns just completed by the representative of the survey in charge of rodent control in the eastern district have proved successful and have resulted in requests for similar work in 20 other counties in the district. More than $6,000 has been raised by county commissioners for the purchase of fumigation material, which will be distributed in most cases without cost to the farmers.

Milk Fever Is Serious Menace to Fresh Cows

All of the high producers should be closely watched for milk fever during the 48-hour period immediately following freshening, says John M. Shaw, dairy husbandry specialist, Iowa State college. The only man who may feel secure from loss from this disease is the man with low-producing cows.

Restlessness, stamping of the feet and general nervousness are among the early symptoms. These are quickly followed by a paralysis in the rear legs, which causes the typical stagger. This condition becomes rapidly worse until the animal gets down and is unable to rise. Cows suffering from milk fever are often found thus with heads thrown back with their muzzles pointed flankward.

While the disease often results fatal within 24 hours, the "air treatment" is one of the surest cures. Inflate the udder by means of a milk-fever outfit and tie each teat with a strand of cloth to prevent air escape. In severe cases two or more inflations of the udder are often necessary. The air should remain in the udder from 12 to 24 hours, or longer in case of only partial recovery.

Have Hay Available for Calves From Very First

Hay for calves should be available from the first. By the time they are fifteen days old, they will be eating an appreciable amount. There is some uncertainty as to the kind of hay best suited for calves. Some dairymen have no bad effects where alfalfa hay is used for calf feeding, while others find that the calves scour badly. For this latter group, red clover seems to give much better results. It has been argued by some that if alfalfa is available from the beginning, there is less danger than if it is first fed after the calf is two or three weeks old.

Silage is a satisfactory calf feed if fed in moderation and care is exercised to remove all moldy portions. Calves at the Iowa State college dairy farm have shown more rapid and more economical gains when silage has been included in their rations.

Various figures have been given to indicate the feed requirements of a calf to six months. The following are from Eckles and are the average of the rations of seven calves: Whole milk, 300 pounds; skim milk, 2,804 pounds; hay, 270 pounds; grain, 113 pounds.

FARM NOTES

Muskmelons require warm soil and a great deal of fertilizer.

• • •

Sunflowers are ornamental and the seeds make good food for poultry.

• • •

Successful dairymen find the silo is an essential on farms where 30 or more cows are milked.

• • •

Potassium iodide fed to pregnant ewes will keep the lamb crop practically free from goiter.

• • •

An oil-can, wrench, or hammer at hand is worth two or three in the bush—or fence corner.

• • •

Sufficient live stock should be maintained on each farm to consume a considerable portion of the legumes raised.

• • •

Young, growing chicks need shade and free range, plenty of fresh water and proper food to make best profits for the owner.

• • •

A satisfactory type of portable house is one that is 10 feet wide, 12 feet long. The front should be about 7 feet high with the back 4½ feet high.

• • •

The first feed in the morning is generally scratch feed, which is fed in the litter. The sooner this is fed in the morning the better, for it encourages the hens to get off the roost.

Current Wit and Humor

WHY HE FAINTED

A young wife went into a grocer's shop and said: "I bought three or four hams here a month or so ago, and they were fine. Have you any more of them?"

"Yes, ma'am," replied the grocer; "there are ten of those hams hanging up there now."

"Well, if they're off the same pig I'll take three of them."—Tit-Bits.

His Last Hope

Benevolent Mrs. Smithers (who has discovered a youthful burglar in her dining room)—Young man, instead of sending you to jail I've decided to give you another chance.

Burglar—Thank yer, mum, thank yer. Only when yer do, mum, will yer see that them chairs ain't in the way?—Saratoga Herald.

SUPPLYING THE MEANS

His Wife—I saw a lovely gown that I can get for a mere song.

Mr. Tunelifter—Here's a near-hit that I wrote the other day. Take it and get the dress.

Uncommon

A little stock of common sense
Will boost you on your way;
But common sense, you'll find, is not
As common as they say.

Saved!

Alf (shipwrecked)—'Ow far would yer say land was, Bill?

Bill—Mile an' 'arf, I reckon. 'Ow far can yer swim?

Alf—I can only manage a mile, Bill.

Bill—Then we'll just do it between us. I can swim 'arf a mile.—Goblin.

Good Tactics in Wrong

Kind Gentleman—You wouldn't be in jail now if you had learned a business and gone in for yourself when you were young.

Sad Convict—But that's just what I did do. I worked in a mint.—Legion Weekly.

Oh, That Kind

"I was so hungry that the moment I got in I began eating the tables!"

"Um, I dare say. Do you expect us to believe that? What sort of tables?"

"Why, vege-tables, to be sure!"

And Worth It

Restaurant Proprietor—Our violinist here was offered $1,000 for that instrument last week.

Guest—I can't go that high, but I'll give him $20 if he'll quit right now.

Didn't Know He Knew Him

"I didn't know you knew that man."

"I didn't—but by the time I discovered I didn't, I did!"

WHERE MOST SEEN

"America is characterized by bigness."

"Yes—very noticeable in the swelled heads."

Cultural Preponderance

The intellectuals 'mong mankind
Outnumber other lists.
For every moron you will find
A dozen altruists.

Caviar Not an Author

"Do you like caviar?"

"That's too old for me to bite. Caviar is a dessert and not an author."

The Heavy Sleeper

Angry Passenger—Porter, why didn't you wake me as I asked you? Here I am miles beyond my station.

Porter—I did try, but all I could get out of you was, "All right, Maria. Get the children their breakfast and I'll be down in a minute."

Anticipatory

She—Your lips certainly look nice.

He—Don't talk about things that may be used against you later.—Georgia Tech Yellow Jacket.

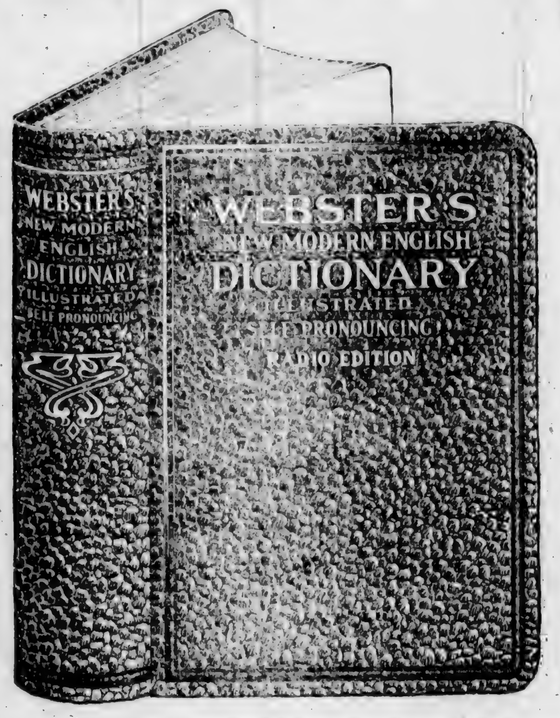
OUR EXCLUSIVE OFFER

WE HAVE made special arrangements with the publishers and have been given exclusive right for the distribution of the

WEBSTER'S New Modern English **DICTIONARY**

To the Readers of the

St. Joe News



A $4

Webster's New Modern English Dictionary for NOW ONLY

98c

and 3 Coupons

Radio, Wireless, Aviation and Automobile Terms Up-to-date.

A Remarkable Book

This dictionary is an abridgment from the Standard work on the English language by America's greatest lexicographer, Noah Webster, LL. D., revised and brought up-to-date so as to include practically all of the terms in the English vocabulary which are in ordinary use as well as many technical terms which would be required by the engineer, architect or the advanced student.

This is a remarkable book indeed and patrons of The News are fortunate in having this opportunity. Our first shipment of 64 books is expected this week and if you secure 3 coupons - the dictionary is yours. Clip the coupons. If to be mailed, postage additional.

Dictionary Coupon

Clip three 3 coupons and bring to office of the

ST. JOE NEWS, St. Joe, Ind.

which together with 98c will entitle bearer to one copy of the

Webster's New Modern Dictionary, Cross-Word Puzzle Edition. Postage additional to out of town readers-10c.

Large can Sauer Kraut at Coolidge's for only 10c.

Earl Sherer of Washington, D C. visited in the Ginther home Tuesday, returning to his work Wednesday.

Mrs. James Dresser and two children of Lafayette, are here for a month's visit in the Howard Renner home.

Fred Reichelderfer, wife and son Dale and daughter Mrs. Wilber Spencer and son Max of Wayne, Mrs. Harry Adcock and 3 children of Payne, spent Sunday with John Betz and family.

The two farms of the Case estate were sold a few days ago One tract of 80 acres, a greater part is timber, was sold to Peabody Lumber Co. of Columbia City for $13,950. It was appraised at $9,000. The other 80 acres, comprising the old homestead, was sold to Otto E Ginther and wife Sylvia, $7 150, the appraisement was made at $5,000.

See Furnish for that new Chevrolet.

Plain or stripe Berne Overall $1.50, Coolidge Store.

N. G Bennett and 6 children of McComb, O, were guests in the Thornton home Sunday

Harry Kees went to South Bend Sunday afternoon to attend a Standard Oil Salesmen's meeting.

Howard Williams and wife and Lester Pratt and wife of Fort Wayne, stopped here Sunday at the Wm. Henley home enroute to Fort Wayne from a week's fishing trip up in Michigan.

Mrs F. H Langley attended the funeral of Mrs Jane B oth at Pierceton, Saturday The Booths were at one time residents of St. Joe and conducted a barber shop where the Meek shop now stands.

Russell Williams and wife of Lafayette were Monday night guests of Howard Renner and wife. They were enroute to Attica, O, where he will take work as a vocational teacher. The ladies are sisters.

RANDOM REMARKS

I cannot endure the boredom of sport.—G. Bernard Shaw.

The moral standard of a country will always be set by the standard the women set.

Men alone are useless, and no one knows this better than the men themselves.—Lady Astor.

That most distressing of all human types—a woman masquerading as a man.—Lord Ronaldshay.

If a man is a pessimist he wears a belt as well as suspenders; if he is an optimist he wears neither.

God has put us into an extraordinary interesting world, and boredom is a symptom of hardening of the mind.

There is nothing to prevent men developing into something as different from us as we are from our remote ancestors.

I firmly support flirting on the part of boys and girls; I think it enables them to choose the right partner in life.—Dr. J. A. Hadfield.

In many cases the medicine bottle does far more harm than good by suggesting symptoms three or four times a day rather than suggesting their relief.

THE SUCCESS FAMILY

The baby is Opportunity.

The father of Success is Work.

The oldest daughter is Character.

The mother of Success is Ambition

The oldest son is Common Sense.

Some of the other boys are: Perseverence, Honesty, Thoroughness, Foresight, Enthusiasm, Co-Operation.

Some of the sisters are: Cheerfulness, Loyalty, Courtesy, Care, Economy. Sincerity, Harmony.

Get acquainted with the "old man" and you will be able to get along pretty well with the rest of the family.—London Opinion.

TRIFLING TRUTHS

It's well to bear in mind that it's harder to "land" easy than it is to fly high.

In this day the wolf doesn't howl at the door, but sneaks in the back way and helps himself to all in sight.

It's time to hunt cover when the storms of life catch you without your rubbers and your weather reputation.

FROM THE WISE

War destroys man, but luxury destroys mankind; at once corrupts the body and the mind.—Crown.

Let friendship creep gently to a height; if it rushes to it, it may soon run itself out of breath.—Fuller.

The heart that is soonest awake to the flowers, is always the first to be touched by the thorns.—Moore.

Music is the fourth great material want of our nature—first food, then raiment, then shelter, then music.—Bovee.

Life does not count by years. Some suffer a lifetime in a day, and so grow old between the rising and the setting of the sun.—Augusta Evans.

ENGLISH EPIGRAMS

Women like to wear their age like their gowns—cut as low as possible.

The more of a pattern wife you are the more easily will some woman cut you out.

A woman's clothes are of two sorts: Those that clothe her and those that disclose her.

A woman regards a man as a means to an end; he soon discovers that she's an end to his means.—Boston Transcript.

POINTED PARAGRAPHS

A friend in need is never intangible—he is one you can touch.

When one calls another a liar it may result in a job for the undertaker.

When a man once poses as a wide-awake citizen he should not repose.

Introduce your enemies to your wife's relations and then forgive them.

When a girl goes gunning for a husband she should keep her powder dry.

The girl who hesitates may not be lost, but she is apt to become an old maid.

When a woman accuses her husband of having poor judgment his mind slowly wanders back to the time when he asked her to marry him.

Health and Home

CAMPING AND PROBLEM OF FOOD

There is no healthier sport than camping. During the warm and balmy spring and summer days, it is real recreation. To get out in the fresh air and sunshine, free from worry and care, enhances the health of anyone, be he office man, salesman or what not.

But due to the entirely inadequate means of food preservation and refrigeration found in the majority of camps, there is the ever-present danger of sickness from infected foods. The utmost care must be taken in order that this may be avoided. Butter and eggs should be bought only as used. The milk is a problem in itself. Perhaps the solution lies in the use of a milk other than market milk, in order that purity and sterility may be assured. For such use, evaporated milk is ideal. Many people are wont to confuse evaporated and condensed milk but there is no similarity between the two. Condensed milk is a combination of sugar and milk and can be used only when both of these substances are desired. Evaporated milk is merely pure, fresh milk with about sixty per cent of the water removed and the nutrient content left intact. It is absolutely sterile and pure, having been sterilized before leaving the factory. The water, removed by evaporation, may be replaced very easily and the milk returned to its original volume. Evaporated milk may be obtained in small cans, containing six ounces or in larger ones containing sixteen and can be taken to the camp in quantities sufficient for the needs of the entire period, thus assuring a constant supply of pure, fresh milk without the worry of, the danger attached to the use of the market product.

Following are recipes for a few dishes that are best adapted for camp consumption because of ease of preparation, purity and food value.

Tomato Soup.

1 pint tomato pulp or canned tomato soup	1½ cups water
1½ cups evaporated milk	Salt and pepper to taste
	⅛ tsp. soda

Bring tomato pulp or soup to the boil, add the seasonings and soda. Heat the milk and water and combine slowly with the tomato mixture

Stirred Eggs.

⅓ cup evaporated milk	¼ tsp. paprika
⅓ cup water	6 eggs
⅛ tsp. pepper	2 tbsp. fat
	Grated cheese

Beat the eggs, add the milk, water and seasonings. Melt the fat in a frying pan. Add the egg mixture and stir until the mixture is creamy. When almost done, sprinkle with grated cheese. Serve on slices of bread, toast or crackers.

Health and Home

FEEDING BABY DURING SUMMER

Milk is recognized as the ideal food for young children. It should be carefully guarded during the warm summer months, to insure its freedom from germs or bacteria that might cause harm to the child. Because of its nature, it is, under certain conditions, a breeding and propagating ground for germ life and may soon become unfit for use unless it is handled with the utmost care and vigilance. Perhaps the ideal way to obviate this risk is through the use of evaporated milk. This milk is only pure milk with sixty per cent of the water removed from it and is absolutely sterile. It is of double richness but may be modified by the addition of water, which will return it to its original volume with a greatly enhanced food value.

Evaporated milk is sterilized and has a high nutritive content. This causes it to be a very excellent food for the young child and the infant. In fact, many of the leading pediatricians of the country advocate its use after the child is deprived of its mother's milk. A formula, evolved by these pediatricians, through experimentation, is as follows:

From Sixth Week to Third Month.

Milk, evaporated	6 ounces
Lime water	3 ounces
Milk sugar	2 ounces
Boiled water	26 ounces

Seven feedings in twenty-four hours; 4 to 5 ounces at three-hour intervals during the day and four-hour intervals at night.

From Third Month to Fifth Month.

Milk, evaporated	7½ ounces
Lime water	3 ounces
Milk sugar	2 ounces
Boiled water	29½ ounces

Six feedings in twenty-four hours; 5 to 6 ounces at three-hour intervals during the day and a feeding at 10 p. m.

From Fifth to Seventh Month.

Milk evaporated	10 ounces
Lime water	3 ounces
Milk sugar	2 ounces
Boiled water	29 ounces

Five feedings in twenty-four hours; 6 to 7 ounces at four-hour intervals, the last feeding to be given at 10 p. m.

From Seventh to Ninth Month.

Milk, evaporated	11 ounces
Lime water	3 ounces
Milk sugar	2 ounces
Boiled water	35 ounces

7 to 9 ounces at four-hour intervals during the day. Last feeding at ten at night.

From Ninth to Twelfth Month.

Milk, evaporated	12 ounces
Lime water	3 ounces
Milk sugar	2 ounces
Barley water	34 ounces

8 to 9 ounces at four-hour intervals during day. Last feeding at ten at night.

Veteran Indian Fighter Observes Anniversary Of Enlistment.

Spokane, Daily Chronicle — A unique golden anniversary was celebrated yesterday by W. H. Hannon, R. F. D. 1, Spokane.

"Fifty years ago yesterday, when the Indians and cowboys were fighting it out for possession of the country west of Omaha," he writes the Chronicle, "I enlisted in the Fourth Infantry band at Newport, Ky. Reading of the Fourth U. S. infantry band now stationed at Fort Wright reminds me of those old days when game and bad men roamed the plains of the new west.

"First I was stationed at Fort Bridger, then Fort Collins Col., and finally at Fort Sanders, Wyo.

"We spent most of the time out after Indians and stage robbers, and we surely had a fine bunch of men to do it with. Colonel E. F. Flint was in command of the regiment; Theodore E. True was adjutant and commander of the band; John Scott was quarter master and Joseph Nevottie and Francis F. Gast were our band leaders.

"June 15, 1880, I received an honorable discharge, preferring citizen life, although offered extra pay to reenlist. The west, however, still remains my home."

"The 4th U. S. Inft. band has been stationed at Fort Wright, Wash., for several years, it is a fine military band of thirty five instruments and is the same organization we belonged to fifty years ago, but not one officer or enlisted man in the regiment now belonged to it when we left the regiment. Fort Wright is two miles from Spokane connected by electric railway. We have heard the band play several times Spokane has several fine bands and orchestras. Last week the Moose lodge met at Spokane, they had five bands. Tomorrow the Lutheran College Concert band of Decora, Iowa will appear in two concerts, afternoon and evening at Natorium Park, sixty musicians including five soloists and a vocal quartette All of the best bands and musical organizations of this country and Europe stop here. Spokane has 125,000 inhabitants."

Wanted

Two thousand real folks to attend the American Legion Picnic. We can show you a regular time on the Fourth of July for a very small consideration. A hundred ways to enjoy yourself and no dishes to wash afterwards Bring your dinner along and get your supper on the grounds. Help the boys that help you.

Kinsey ambulance removed Oscar Smith to Ft. Wayne hospital for appendix operation, Tuesday evening. He lives east of Spencerville.

Stanley Flickinger, construction boss of electric light gang stationed at St. Joe last summer, was buried Tuesday north of Tiffin. A number of boys attended the funeral.

Nothing Quite So Good

To the busy housewife a loaf of HOLSUM BREAD is the blessed assurance of a delicious, wholesome meal.

As a matter of fact, HOLSUM BREAD is really more delicious and appetizing than our advertisements represent it to be. And it's more economical because it's longer and gives more slices.

More Slices Because It's Longer

"HOLSUM"

Fresh Every Day - - - At Your Grocer

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

NOTE—Pay your accounts. They are due now.

When My Ship comes In

Is an expression often used to imply the meaning that probably in old age one will be able to live the rest of his life independently.

You won't have to worry about your ship not coming in if you have a steadily growing interest account with this bank.

The St. Joe Valley Bank, A STATE BANK

First Burglary In Months at St. Joe

Three stores were broken into July 3rd. the first for many months Back door entrances were made at Kinsey's Hardware. Rice's Drug Store and Sheffer's Drug Store.

At Kinsey's the safe was moved to the back door and combination mutilated by use of an ax. One hinge was broken but did not gain an entrance. The cash register was rifled and some change taken. A small wagon was moved from the front of the store to the rear, preparing to haul the safe away. Here everything was left. Mr. Kinsey now has a new safe.

At Rice's the robbers helped themselves to ice cream, pop, cigarettes and other articles amounting to several dollars. At Sheffer's nothing was missing.

Sheriff Morr and his deputies were called but no clue worth while was available as all the places had been disturbed by eight seers.

Resolutions Of Respect

Whereas, Death has removed from our midst a highly respected citizen and from our lodge a faithful member in the passing away of Wilson Sanders therefore be it

Resolved, That we the members of the St. Joe I. O. O. F. lodge deplore the death of Wilson Sanders but bow our heads to the expression of the Divine will

Resolve, That we extend to the family of our deceased brother our heartfelt sympathy, not in any empty phrase, but in the full meaning of the term

Resolved, That the charter of our lodge be draped in mourning for a period of sixty days out of regard for the memory of our departed brother; that these resolutions be spread upon the minutes of the lodge, that they be printed in the St Joe News, and copies sent to the members of the family of Brother Sanders.

Hart-Caskie Wedding

Miss Arlene Hart, daughter of Mr. and Mrs. John Hart and Albert Caskie of Fostoria, Ohio, were quietly married at Auburn by Rev. Shaw, pastor of the Church of Christ, last Thursday. The young couple left Friday morning for Fostoria to visit the groom's parents.

LOCAL ITEMS IN BRIEF.

Save trouble by using receipts. Get a book at News office.

Mr. and Mrs. Abner Trostel and sons were Sunday dinner guests of Thurman Shull and wife.

The DeKalb County Tuberculosis Society will hold a Free Clinic in the assembly room of the Court House Tuesday, July 28th, from 1 to 4 P. M.

Mrs. Elizabeth Astry and daughters Winnie and Ethel, all of Ft. Wayne, spent Saturday and Sunday guests of the former's brothers Sam and Harry Kees.

Last Monday The News force decided suddenly to dispense with the issuing of the paper for the week and take a few days vacation, hence your disappointment when the time came for the delivery of the paper.

Picnic Paper Plates and Wax Paper in large rolls now on sale at News office.

The Bishop reunion was held at Eckhart Park, Auburn, Wednesday. M. T. Bishop and wife and Chas. Bishop and family of Cleveland, attended.

Mr. and Mrs Ed Miser, daughter, Miss Martha and sons Frank and Charles, spent Sunday at Benton Harbor, Michigan. Frank remained for the week with his brother, Harcourt

The Boys and Girls clubs of DeKalb, Noble, Steuben and Lagrange counties will hold a club camp at Blackman's lake in the last named county, August 17-22. H. A. Colliver of Angola, will be Camp Director and Miss Marguerite Milliman of St. Joe will be Assistant.

The Home Bureau Club met Friday in the Domestic Science room at the school house with a good attendance. The lesson on under development of commercial pattern was very interesting and instructive. Under business the report on the County Health Nurse fund was encouraging Two new members were added to the roll. Mrs. Ed Storer will entertain the club at an all day meeting with potluck dinner August 21, at which time there will be several demonstrations.

Can You Answer

Why is Paris green?
Has a window pain?
How wide is a narrow escape?
Is a baby buggy?
How far is a little way?
How many peeps in a key-hole?

Building Program Is To Be Held Up

The trustee, F L Milliman, advisory board and architect held a conference at Auburn Monday and were considering the school house question. All bids were rejected at the previous letting.

The board considered every angle of the building program for the fall and decided that by the time a new contract could be let and material on the ground, school would be in progress, and would cause an interruption in the whole school program. The preliminary work will be cleared away this winter ready for early spring letting.

New Fuller Representative Here

Our Local Representative, Ralph Emerson will be in St. Joe, Spencerville and vicinity for a few days. He will have a surprise for you. Have you seen the shower bath outfit that we are featuring this summer? Signed

Keep Bees Busy to Make Money

Remove Filled Supers as Soon as Possible and Put in Empty Ones.

The "busy" bee is not nearly so industrious as he has been pictured by his admirers. In fact, he has some very human qualities. He works when there is an incentive to work, and he has been known to loaf on the job dreadfully when he has gotten up enough honey to keep him through the winter.

The bee would not contribute much to man's sweet tooth if he was not persuaded to do so through intelligent handling, and through fear of starvation. A hive of bees can be kept at work through most of the summer if you keep this fear constantly before the workers.

Quit When Full.

Under the old system of hiving a good swarm seldom produced more than 10 to 20 pounds of honey a season for the keeper. This was due to the fact that when Mr. Bee got his house full of honey, he quit working. Since beekeepers adopted the sectional hive with supers holding small pound frames, the records of production of a single hive have constantly grown until beekeepers say that in good seasons they sometimes run 200 pounds of honey to the hive. Certainly 60 to 80 pounds is an average yield.

The point is to keep a continual watch on each hive during the honey flow and to remove the filled supers as fast as possible, putting in empty ones. If you don't do this, you are losing just so much return from the bees. Oftentimes to delay doing it at the right time, finds the bees out of the "notion" and they will continue to loaf.

By planting alsike clover for midsummer feeding and even for late summer, the bees can be kept working right along during hot weather, and they can finish off on buckwheat or some other late crop. Buckwheat honey, however, does not appeal to the market as clover honey. If there is any considerable planting of sweet clover near by, either in fields or growing wild along the roadsides, it will keep the bees busy until well into the fall. And sweet clover is one of the best and cleanest honey-makers you can find.

Prices for Honey.

Last season honey was bringing beekeepers 50 cents a pound right at the local markets. In the larger cities, the price was even more favorable. And every pound that the bees can be encouraged to produce is just that much more "velvet" for the beekeeper. It pays to have the extra supers all ready to be slipped into place as needed. The big honey flow always comes with a rush and the way the bees get it in often catches the beekeeper unawares, especially so if he is a new hand at the business. Constant prodding is good for Mr. Bee. It will help him to earn the right to the reputation he has enjoyed so long.

Satisfactory Ration to Produce Baby Beeves

Beef cattle investigations conducted by the animal husbandry department of the Kansas State Agricultural college show that fairly satisfactory baby beef can be produced on a ration consisting of cane silage, shelled corn, and no alfalfa hay. The calves fed this ration gained 2.08 pounds per head per day for 197 days.

The high degree of finish and economy of gains, according to the result of a second experiment, are determined by the length of time a limited amount of alfalfa hay is fed with cane silage, shelled corn, and cottonseed meal. The longer a limited amount of alfalfa is fed with this ration the greater the finish and economy of gain.

Another test showed that alfalfa alone is a satisfactory roughage to feed with shelled corn in fattening baby beef for market in so far as gains are concerned.

As Green Manuring Crop Rye Holds a High Place

Rye does not make use of atmospheric nitrogen as does the legume crops and for that reason it gives back to the soil only the nutriments which it takes from it. Its greatest value as a green manuring crop is its ability to return large amounts of organic matter to the soil which improves its mechanical condition, moisture capacity, etc. Rye should not be allowed to grow until it reaches a large size before it is turned under because it will exhaust the moisture supply and thereby injure the following crop. In some soils there is also danger of getting so much organic matter from a crop of rye that unless it is turned under early and allowed to begin decomposition the excessive amount of material turned under will interfere with the movement of the soil moisture.

Parasites Kill Pests

A well-known scientist once expressed the opinion that were it not for the tendency of insects to prey upon each other, thus holding down their numbers, life on this globe would be made impossible for the vertebrates, including man. Entomologists have been taking advantage of this warfare to help in keeping down the numbers of certain insect enemies of crops, introducing parasites from various parts of the world.

Early Oats Good as Alfalfa Nurse Crop

Most Satisfactory When Cut in Green or Dough State.

"There is really no best way to put in alfalfa," says Professor Shepperd of the North Dakota Agricultural college. "It all depends on the fertility of your soil, whether your soil is sandy, loam, clay loam, free of weeds (especially such weeds as quack grass, foxtail and pigeon grass) also, whether you have the time, the tools and the inclination to do all the things necessary to best protect your little alfalfa plants under all conditions.

"In certain soils, there isn't enough plant food or sufficient moisture to take care of the needs of growing a full-sized nurse crop and ripening it ready for harvest, and at the same time supply the necessary plant food and moisture for the alfalfa plants. They have to send their roots deep enough into the ground so that they can get moisture in sufficient amounts to supply the need when the nurse crop is removed and the sun shines directly on the little alfalfa plants during the hot, sunshiny period of harvest time.

"Of all the nurse crops early oats at the rate of two pecks to one bushel per acre with the alfalfa and then cutting the oats green or in the dough stage for hay, have given most satisfaction. It gives them shade in their early weeks of growth, and it keeps weeds and grass from starting and crowding out the alfalfa. Also, by removing it before it ripens, the moisture that would be needed to ripen the grain is conserved and not passed off into the air by the evaporation process. A light seeding of about two pecks of oats to the acre is a good protection for the little alfalfa plants from the blowing of sand.

"Barley seeded at the rate of one bushel to the acre on soils suited for barley has proven to be an excellent nurse crop. As a rule, it does not lodge as easily as oats, ripens early and excellent yields have been secured of from 25 to 51 bushels on different farms where only a bushel of barley was used and seeded."

Most Profitable Crops for Hay and Pasturage

Alfalfa is the most profitable hay crop that can be grown in this state. It does best on soils that are fairly well drained and in a fair state of fertility and that are not acid. Only adapted, hardy seed should be used. Grimm is especially well adapted to Michigan conditions while Cossack, Ontario Variegated, Northern Grown and High Altitude Common usually give good results.

Sweet clover is gaining very rapidly as a pasture crop. On the other hand, alfalfa is frequently used for pasture purposes.

The seed should be inoculated. Material for inoculation may be secured from the department of bacteriology, East Lansing, Mich. The price is 25 cents per bottle and each bottle contains sufficient material to inoculate a bushel of seed. Full directions for application accompany the material.

The spray of the orchard should not in any way lessen the feeding value of the hay.—C. R. Megee, Associate Professor of Farm Crops, Michigan Agricultural College.

Spray for Vegetables

Arsenate of lead is better than paris green as an application on vegetables and vines such as the potato, cucumber and bean, because it will stick to the plant longer. Paris green, however, will kill the bugs as quickly and as readily as arsenate of lead. Arsenate of lead should be used at the rate of one teaspoonful to two gallons of water, well stirred or at the rate of 1 pound to 50 gallons of water for arsenate of lead and one-half pound of paris green to 50 gallons of water. Cover the plants thoroughly to get good results.

FARM FACTS

Frequent and shallow cultivation will keep the garden coming along in good shape.

• • •

Overfeeding is bad for the calf. A good rule is always to keep the calf a little hungry.

• • •

A garden free from weeds not only produces more vegetables but is a sight worth seeing.

• • •

Because wood is so useful trees must be felled. Because wood is so useful trees should be planted.

• • •

In a number of instances very injurious insect pests have been in a measure controlled by introduced parasites.

• • •

The herd bull should run in pasture at least a part of the summer. The exercise will be a fine thing for him and the succulent green grass will "cool him out" and be a great relief from the dry feed he has probably been receiving for many months.

• • •

Cultivation of corn and other row crops, in excess of that required to control weeds and keep the surface soil in a granular condition, is not necessary or advisable. Deep cultivation prunes the roots of corn plants and may decrease the yield, especially if deep cultivation is practiced late in the season.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

SCIENCE AND KNOWLEDGE

SIR Ronald Ross is one of the great men of the British medical profession. He is the man who first worked out the way in which mosquitoes carry malaria. He is also one of the leading authorities of the world on tropical medicine.

Speaking recently on the increasing length of life, he said the average length of life can be still further increased to one hundred years, at an expense that would only amount to sixpence a year for every Englishman.

"Eighty years ago," said Sir Ronald, "the average length of life in London was about thirty-four years and seven months for a man and thirty-eight years and four months for a woman. Today, it is fifty-three years and nine months for a man and fifty-nine years for a woman. Thus medical science has in 80 years given us 20 years more of life."

The editor of a large city daily, quoting this remark, says: "That is very interesting, but the entire increase in the length of life during the last 80 years can hardly be credited to medical science. Better living conditions, brought about by modern building and plumbing, have probably done more to prolong life than anything else, except better food and bathtubs."

Both Sir Ronald and the editor show a curious but very common confusion of ideas regarding just what is meant by "medical science." The general idea is that there are two kinds of knowledge, ordinary knowledge and "scientific knowledge," and that there are at least two kinds of science, ordinary science and "medical science."

That this is incorrect will be plain on a moment's thought. Science means knowledge. All knowledge is science, whether it relates to man or to rocks, to trees or to engines, to farming or to flying. All knowledge that is worth anything is gained by observing and experimenting, carefully proving each fact, discarding what is error and retaining what is true. The only difference between the farmer and the expert in the United States Department of Agriculture is that the farmer's knowledge is limited to what is generally known, while the expert tests every theory by carefully conducted and checked observations and experiments.

In the same way "medical science," or what we know about the human body and its disorders and care, is a part of all knowledge or science. The student of the body must also know chemistry, physics, biology and many other subjects. Certainly "modern building and plumbing, better food and bathtubs" have helped to prolong life. But what made these things possible? Greater knowledge. All knowledge is science, and science is one and not many.

ULCER OF THE STOMACH

WE HEAR much more today than formerly about ulcer of the stomach. Does this mean that it is more common than in former years? Probably it is, but not so much as one might suppose. Many cases which are now known to be stomach ulcers were formerly called "chronic dyspepsia," "indigestion," etc. But our habits of living and our present-day food have also probably increased the number of cases of this very painful and dangerous condition.

Ulcers of the stomach, or round ulcers, as they are also called, are exactly what their name would indicate. In the mucous membrane which lines the stomach a round ulcer appears which destroys the lining membrane; sometimes, if neglected, it eats through the muscular coats and may finally go clear through the stomach wall, making a round, punched-out hole and allowing the stomach contents to escape into the abdominal cavity, generally causing peritonitis and death.

These ulcers, in about 95 per cent of all cases, are at the lower end of the stomach and usually on the back rather than the front wall of the stomach.

What causes them? No one knows positively. There are several theories. One is that a blood vessel in some way becomes stopped up and the part of the wall supplied by it dies and softens, causing an ulcer to form. Another is that germs from other parts of the body lodge on the membrane and cause inflammation and ulceration. Apparently there is a close relation between infection and ulcers.

The symptoms of a stomach ulcer are quite characteristic. A gnawing, burning, boring pain or cramp, coming on from one to three hours after eating but absent when the stomach is empty, is common. Pain is relieved by eating or by taking soda or magnesia. Washing out the stomach relieves the pain. The stomach contents are usually strongly acid. If the pain is severe enough to keep the patient from eating, there may be loss of weight.

In the early stages or in mild cases the patient will generally recover if put to bed and kept for four weeks on a soft, nonirritating diet. If the ulcer has gotten to the point of perforation or if bleeding has begun, surgical treatment is generally unavoidable.

EXCURSIONS IN CORRESPONDENCE

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

Letters of Courtesy

MOST of us learn from experience more than we learn from any other source. We have to buy gold bricks with money we have earned ourselves, before we realize how thinly gilded most of them are. What I know about the subtleties and the effects of writing letters, I have learned from trying things out, and seeing how they work, from watching other people succeed or fail in their correspondence, and sometimes the results of what we attempt are not at first apparent.

Years ago, I was brought into contact with a man who had had a wide experience with people in business, in educational affairs, and in politics. He had a great many friends, he had a wide influence, and when necessity required, he could marshal an amazing number of supporters.

I was very much interested in studying his methods, and in trying to learn how he had been able to accomplish so much. He was not a very broadly educated man, but he was shrewd, he understood human nature, he grasped the psychology of making men act, and he succeeded amazingly. I came to see that he wrote more letters than most men whom I knew, and letters of a different character. He used the best stationery he could buy, he wrote with but one sort of ink, and many of his letters, especially those of a personal character, were written by hand, though he had all the clerical help he could use.

These practices of his gave his letters a certain distinction, called special attention to them when they came into one's hands, and emphasized his individuality. He made friends by paying attention to them, by showing them certain individual courtesies which the average man neglects. His letters were never stock letters, pieced together with a patchwork of conventional, and ready-to-put-on paragraphs; they always fitted the individual case in hand. They were written to all classes of people from the governor of the state when he won a close election, to the washerwoman who named her baby for him, and one was as carefully written as the other.

There were letters of condolence, and congratulation, and encouragement; letters which let people know that he was glad that they had succeeded, or full of sympathy with them in their sorrow and ill-luck. He found time to do these things, as most men find time to do what they want to do, and what seems to them really worth while.

Not all of the letters he wrote were answered—not many of them were, I suppose, for people are thoughtless, and procrastinating, and ignorant, and inexperienced, but none of them were forgotten, and everyone, I feel sure, added to the respect, and love which became his heritage.

I came to see that the results which come from writing these letters of courtesy, as I have called them, repay many-fold the effort that must be put forth in doing it.

When, later in life, I became interested myself in writing letters of courtesy, as I have called them, I was somewhat discouraged at first; I thought that they had no effect upon those who received them, that the people were not especially helped or pleased, but later I came to see quite differently.

Every year I write a score of letters or more to the young fellows in college who have made the highest scholastic average, and I attempt to make these letters as individual as I can. Most of them are never acknowledged, many of them I never hear from in any remote way, but I know they bring pleasure and encouragement, that they are shown with pride and sent home to father and mother, and sometimes even are produced in the local paper, as an indication of what one of the favorite sons is doing to bring credit to the old home town. The one who writes such letters must not expect them to be answered, though, of course, they should be, but he can be sure that they will not be forgotten, and that their effect will be far-reaching.

Some time ago, I determined that I would make a practice of writing one such letter a day. There are plenty of opportunities. The preacher has something worth while to say in church Sunday, the soprano has an effective solo, I notice in the paper that Smith is married, or that Peck has a new boy; Granger loses his mother, or Thomas is elected president of Kiwanis—the opportunities are infinite.

The letters are informal always in character, pleasant, familiar, with first names and nicknames employed, if the relationship warrants such a familiarity. They are brief, and sincere, and to the point. It is the spirit that counts principally, and not so much the form. The time required is not as great as might be supposed. With the materials at hand, ten minutes before breakfast, or at lunch time, or after dinner, are enough, and the thing is done, and a friend is made, or a friendship strengthened.

Just Like a Man

Mae—He's been to see her twice once for dinner—and once for no reason at all.—Life.

Adrift With Humor

HIS MATCH

A taxi driver recently got the worst of a wordy bout.

An old man with a wheelbarrow wouldn't get out of the way, and the taximan shouted:

"You ought to be wheeling a baby buggy."

"And you ought to be in it," replied the old man.

A Business Getter

A small boy called on the doctor one evening. "Say, doc, I guess I got measles," he said, "but I can keep it quiet."

The doctor looked up puzzled.

"Aw, get wise, doc," suggested the small boy. "What'll you give me to go to school and scatter it among all the kids?"—Bottles.

SHOULD BE TRAINED

Wife—I don't think I approve of this movement to train young people for marriage.

Hubby—What! Ain't pugilists and soldiers and all other fighting people trained?

Publicity

The movie actor has to face
The perils of publicity
And sacrifice, in quest of "space,"
His marital felicity

Old, but No Fool

She (to old suitor)—You know what people would say—that you were foolish enough to let me marry you for your money.

He—Oh, no, my dear; they would say I was too smart to let you get it any other way.

TRIALS OF WEDDED LIFE

Radio Fan—Have you a loud speaker in your house?

Longsuffer—Yes, loud and incessant. I'm sometimes sorry I married her.

Supply and Demand

Supply and demand
Serve to heighten the gloom.
There are always more problems
Than we can consume.

True Sympathy

Lawyer—What? Ten thousand a year to your wife if she marries again and only $5,000 if she doesn't? Most unusual that!

Client—Yes, but you see I am considering my successor. He deserves extra.

Very Sick

"My lawyer," said a European tenor, "he writes me that my contract is sick."

"Sick? How do you mean sick?"

And the tenor pointed to the word "invalid."

No Contact

"I saw a love of a hat today," she said to her husband.

"Huh! Of course you bought it."

"Oh, no; it was merely a platonic love," she replied rather sadly.

Nothing Exciting

Fontaine—I can't get over it! Telegraphing pictures!

Penn—Pooh! Ain't I been telegraphing flowers twenty years?

It Must Have Been

"Do you remember Mrs. Smith?"

"No, I can't say I do."

"Oh, you must remember her. She was the plainest girl in the village. But I forgot; that was after you left."—London Tit-Bits.

All Right for the Purpose

"Are you painting that scene over there? It doesn't look much like it at all."

"I know. I'm doing it for souvenir post-cards."—New York Mercury.

GOOD ROADS

MODERN HIGHWAYS IN MOTION PICTURE

(Prepared by the United States Department of Agriculture.)

The achievements of the Western road builder in battering down gigantic barriers and overcoming seemingly insurmountable obstacles to make accessible to the public the natural wonders of the West and to aid development of Western communities through the medium of modern highways is the story told in a new United States Department of Agriculture motion picture, "The Road Goes Through!"

This film, replete with spectacular road construction shots, with the scenic grandeur of the national forests as the background, shows roads being cut through the giant timbers of the Mt. Baker National forest, blasted through walls of solid rock along the precipitous shores of Lake Crescent on the Olympic peninsula of Washington and cleared through the tangled mass of trees blown down by heavy winds in the now famous Olympic storm zone; carved into the ledges of precipices a thousand feet above the blue waters of the Pacific along the route of the Roosevelt Memorial road in Oregon; bridged over roaring glacial torrents on the vertical sides of Mt. Hood, and the building of a road over historic Donner pass, California.

"The Road Goes Through!" reaches its climax in scenes devoted to the Cuyama project in southern California where the task of piercing this valley became the heaviest construction job in the West. Here the highway engineer found himself facing every problem known to the road builder, and many new ones—but breaking down barrier after barrier, the skill and ingenuity of the engineer triumphed and the Cuyama road went through!

"The Road Goes Through!" is one reel in length. Copies may be borrowed for short periods, or may be purchased at the laboratory charge. A complete list of the department's films, with information on the method of distributing them, is given in Miscellaneous Circular 27, which may be obtained, as long as the supply lasts, on application to the department at Washington.

Public Wants Highways as Traffic Increases

We have made some progress along the way toward complete improvement of the highways of this country in the last ten years. The statistics give us credit for more than 400,000 miles of surfaced road, and nearly all of it has been improved within a decade. Perhaps it is time to ask the doughboy's question; Where do we go from here?

One thing is certain, and that is that we are going to have better roads in this country. The public demands them. There has been manifest of late some reaction against the expenditure of public funds for roads. There can be no avoiding that expenditure. With more than 15,000,000 motor vehicles now operating on our highways, additional mileage of improved highways and the maintenance of those already improved is a huge work that can neither be laid aside nor neglected, says a report of the federal bureau of public roads. The cost of operating and maintaining these motor vehicles on the highways in their present condition will be greater than the cost of improving and maintaining the roadways so that they will be equal to the traffic demands.

In other words, with the number of motor vehicles now in operation, the public at large will pay in other ways a sum greater than the cost of improved highways if we do not improve the highways. Unless the states build them the locality must, and the voice of experience proclaims it a very foolish thing for the people of a state to decide not to support an adequate program of state road building as a means of decreasing taxes, because it is much more likely to increase taxes.

This recalls President Coolidge's declaration: "No expenditure of public money contributes so much to the national wealth as for building good roads."

Roads Hold China Back

It is estimated, according to the Department of Commerce, that there are 8,524 passenger cars, 1,150 trucks and 942 motor cycles registered in China. Definite statements relating to the extent of the Chinese market are difficult in view of the absence of central statistical bureaus and the number of widely separated cities, each having its own peculiarities.

Chinese development is being retarded by the lack of transportation. When the country has a system of highways, automotive vehicles will be a great factor in developing China into a modern industrial nation.

Cost of Transportation

California is spreading the gospel of live and let live on the highways. Billboards along the state roads carry these mild exhortations so that he who drives may read:

"Look before you weep."

"This is a good road. It will cost you money to burn it up."

"Don't speed; else, 'Good morning, Judge.'"

"Thou shalt not kill."

"Look out. You may meet a fool around the corner."

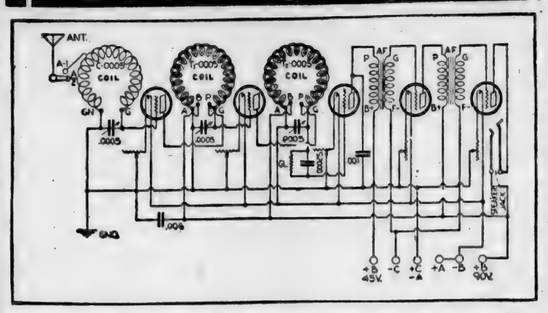
RADIO



Five-Tube Tuned Radio Frequency Receiver Using Low Loss Doughnut Coils

By CARLTON E. BUTLER

Associate Member Institute of Radio Engineers and American Institute of Electrical Engineers.

The tuned radio frequency type of receiving set employing two stages of tuned radio-frequency, detector, and two stages of low ratio audio-frequency amplification, is going to be far and away the most popular broadcasting receiver for the coming season.

This is due largely to the fact that the development of the toroid coil, for both radio-frequency transformers and couplers, has now reached the advanced stage, where practically all of the bad features of the tuned radio-frequency receiver are eliminated with their use.

Toroids are not new. Some of the best engineering talent in the United States and Europe has been working on them for three or four years. There always seemed to be some fault that could not be overcome, that prevented their successful application in radio receivers. Generally this consisted of high losses in the coil itself, that nullified the good effects gained by the peculiar shape of winding. This difficulty has now been overcome in the new low-loss doughnut coil designed by Frank Reichmann, one of the pioneers in the radio engineering field, by the use of stagger winding.

Shows Lowest Loss.

The stagger-wound doughnut coil not only has the advantage of an enclosed magnetic field, which prevents intercoupling, but it also shows the lowest loss of any coil now on the market. The enclosed field practically eliminates the pickup of stray signals and static by the set itself. These factors combined mean that the construction of a radio-frequency set with doughnut coils will produce a receiver that possesses tremendous volume, amazing selectivity, and a much better tone quality than is usually obtained with a set of this type.

Until the introduction of the toroid coil into the construction of tuned radio-frequency receivers, most all of the sets were built along the same lines, with great stress laid on the advantage of different methods of making the receiver stable in operation by preventing oscillation. Some circuits used a small balancing condenser between the grid of one tube and the plate of the preceding tube, others used a potentiometer or balancing resistance of some sort in the plate circuit of the radio-frequency tubes.

Without stabilizing condensers or resistances of some sort, the average five-tube set of this type is practically useless, bringing in distortion and whistles when the receiver is tuned to the wave length of a station. The sole function of the auxiliary apparatus is to add sufficient losses, or resistance, to the circuit to bring the total amount of energy down below the oscillating point of the receiver.

If the same circuit could be so arranged that the fields of the coils could be balanced and located in a manner that no inter-acting of the magnetic fields of the coils would take place, the volume and range of the receiver would increase wonderfully. The tone quality would also improve with the absence of the auxiliary apparatus. This is exactly what is done in the receiver described in this article, through the use of low-loss doughnut coils which have self-contained magnetic fields, and so prevent inter-action of the coils and circuits. It is for this reason that it is unnecessary to mount the coils at critical angles to avoid whistling and howling. In practice the coils may be placed side by side without any noticeable effects.

As the magnetic field is entirely closed, no pickup effect is noticed without the aerial and ground and no static or signals will be received except on the exact wave to which the receiving aerial is tuned. This makes it an ideal summer radio receiver, and it can be used near a powerful broadcasting station without interference.

Parts Needed.

To build the receiver you will need the following parts:

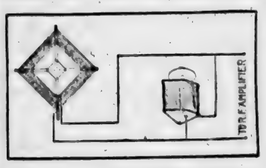
1 antenna coupler, low-loss doughnut coil.
2 low-loss doughnut radio-frequency transformers.
3 straightline frequency low-loss variable condensers of .0005 mfd. capacity.
2 8-to-1 ratio audio-frequency transformers.
1 standard tube sockets with five 25-ohm rheostats, if the C 301-A type of tube is to be used. This combination is recommended. Operation can be simplified by using a 25-ohm rheostat to control the two radio-frequency tubes and a 6-ohm rheostat for the detector and two audio tubes.
1 each .the following capacity fixed mica condensers: .001 mfd., .009 mfd. and .00025 mfd.
1 2 or 3 megohm grid leak.
1 single-circuit phone jack.
Binding posts, wire and screws complete the list of apparatus needed. The total cost of the receiver will approximate $40.

The receiver can easily be assembled on a 7x18-inch panel, without crowding, but the conventional 24 or 26-inch panel may be used if desired.

Loop or Coil Antenna Unit Used Anywhere

By E. N. RAULAND

An important class of tuners employs no aerial or ground connection whatever, but only an inductance coil of large diameter, known as a coil antenna, or loop antenna, and a variable condenser for tuning it. These two pieces of apparatus form together a complete tuner, just as do the aerial, ground and tuned inductances previ-



Loop or Coil Antenna Tuner Unit.

ously described. The difference is that the loop type of tuner can deliver only a very weak current, ordinarily too weak to operate a detector directly, with any satisfaction. The loop antenna has the advantages, however, that it can be used almost anywhere, or carried around, and that it helps selectivity by its directional effect, in not picking up strongly any station unless it is pointed toward that station. When used with efficient radio-frequency amplifiers, it is, therefore, quite effective.

Soldering Iron Should Be Kept Well Cleaned

Soldering is easy after a little practice. The iron should be cleaned with fine sandpaper or emery cloth before using. When heating, if done over a flame, the pointed end of the iron should not come in contact with the flame. A little flux should be applied to iron and rubbed in with solder until the sides of the iron are bright.

The iron should be held under the work, to be soldered whenever possible, and when the solder is running freely in the joint, the iron should be taken away, and the joint allowed to cool. Flux should be used sparingly on joints, and should be wiped off when soldering is completed.

Don't use a "soldering paste" for flux. Rosin dissolved in alcohol or rosin core solder is all right.

Broadcasts Reports of Health in the Far East

Radio has been impressed into service in the world battle against disease by the League of Nations. Each week the great wireless station at Saigon, French Indo-China, broadcasts into the ether reports of the state of health of the Far East, the plague area of the world. Heretofore these reports moved more slowly by mail or in a more limited area by cable. The epidemiological reports are compiled at the league base of operation at Singapore and include the latest figures on smallpox, plague and other dangers to man. In many cases they will allow quarantine regulations to be set up in sufficient time to protect other countries against invasions of disease imported from the infected lands.

Use Silver for Switch Contacts, Tube Sockets

Silver is the best conductor of electricity known and has several advantages over any other conductor. Most metals, such as copper, brass, etc., are subject to corrosion. This corrosion, which forms on the surface of the metal, greatly increases the resistance of the conductor to radio frequency currents, which travel on the surface. This is not true in the case of silver. Silver oxide, which is the corrosion which forms on silver, is an excellent conductor of electricity. Because of this fact silver is an ideal metal for switch contacts, tube sockets, etc.

Quick Reading of Circuit Is Easy

Builder Needs to Know Anatomy of Hook-Up—Parts Vary but Little.

By E. N. RAULAND

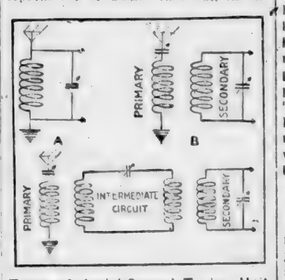
Nearly all radio receiving circuits are made up of several parts which vary but little in themselves, and a new hook-up is usually only a very little different from the old ones.

The difference may be in the tuner or in the radio amplifier, etc. The experienced eye becomes trained to recognize, instantly, all the familiar combinations that make up circuit diagrams, and can therefore, pick out at a glance the special feature of any new hook-up. If you will spend a little time in acquainting yourself with these familiar combinations, or circuit units as we have called them, in a short time you can read and understand radio circuits like an "old hand."

It must be thoroughly understood that this division of circuits into units is merely on paper for the purpose of understanding them better; do not assume that sets can actually be constructed to give good results by piecing together various separate circuit units.

What the Tuner Is.

The tuner and detector are frequently considered together as a single unit forming, when properly combined, a crystal set or single tube set, as the



Types of Aerial-Ground Tuning Unit

case may be. It is helpful in classifying them, however, to consider the tuner and detector separately. In this sense, we may say that the tuner is that portion of the apparatus which picks the radiated waves directly out of the air and converts them into a very weak electric current, alternating at radio frequency.

The most familiar tuner is the aerial and ground, connected by a tuned circuit, as shown at "A." This single circuit tuner is very cheap and simple since there is only one circuit to be tuned, but it is not very selective. That is, even when tuned to the station you want to receive, it does not exclude others on nearby wave lengths.

For better selectivity we employ a two-circuit tuner, as shown at "B," where the energy is transferred from the primary to the secondary by electro-magnetic induction, or inductive coupling as it is most commonly called in radio work. The principle of this is the same as that of the transformer.

A Coupled Tuner.

In a coupled tuner, it is necessary to tune each circuit separately, and sometimes the amount of coupling is also varied, as by using a vario-coupler; that is, the extent to which the two coils encircle the same magnetic flux is varied by rotating one of them. Still greater selectivity can be obtained by inserting a third or intermediate circuit, as shown at "C." A third tuning adjustment is here required.

By tuning a circuit, we mean varying its natural vibration rate. We can vary a coil's inductance by tapping it so as to take some of its turns out of the current's path, either at one or at both ends. We can insert a condenser in series or in parallel with it, or we can insert in series with it a variable inductance, such as a variometer. The latter is simply an inductance coil built in two parts, one rotating inside the other. They can be set so that their inductances combine either to strengthen each other or to oppose each other, or in any angular position between these, thus giving wide variation of inductance.

Hints and Notes for Amateur Radio Fans

If signals are mushy and stations hard to get, reverse the leads on the grid coil.

Always give a new hookup a thorough tryout before attempting another design.

An old dry cell can be revived by a solution of sal ammoniac for a short time, but it is seldom worth while.

Some detectors require very critical filament adjustments for best results.

Germany now has 500,000 radio fans.

Poor insulation is sometimes the cause of poor signal strength.

Too much wiring will increase losses in the set.

Spain has no fewer than 100 amateur radio transmitting stations.

The new high-powered wireless station at Varberg, Sweden, cost $1,850,000.

It is usually cheaper to buy a new condenser than to attempt to fix one which has become damaged.

Every precaution should be taken to prolong the life of a good vacuum tube.

A porous type of insulator absorbs moisture and becomes useless in a short time.

Cat howls in a set are either caused by too much regeneration or not being tuned close enough.

Birds Courageous in Facing Bad Weather

At six o'clock one July morning 2,000 homing pigeons belonging to the Yorkshire Federation of Pigeon Owners were released at Arres, France, to race back to their home in Lancaster, a distance of a little more than 300 miles.

In midchannel they were enveloped in a heavy storm; in the south of England a worse storm was encountered, and in the Midlands the weather was no better. Yet at 3:30 p. m. the birds were arriving home.

The breast feathers of most of them were gone as the result of the head wind, and some were so exhausted that, having alighted in the yard, they were unable to fly up to the loft. The winner of the race had nevertheless managed to make the long journey at a pace of 900 yards a minute.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

Made Parsley Pattern

The history of the famous British Peel family is most interesting and romantic. Just 160 years ago one of the sons of a weaver who owned a small manor near Blackburn spoilt, in weaving, a piece of cloth made of linen and thread, and the father took it to the Claytons and asked them to have it printed with a pattern for kerchiefs. The price charged was so high that Peel determined to experiment himself. His first successful experiment was with a "Parsley Leaf" pattern and, when he saw the effect "Parsley Peel," father of the first Sir Robert, declared that he was a made man. So he was, for his son became very nearly the richest man in England.

Needed Information

The shopwalker approached the rather perturbed-looking young man just inside the entrance of the big store.

"You look as though you wished some sort of information, sir. Can I be of service to you?"

"I don't know," said the young man. "I was told to buy either a camisole or a casserole, and I can't remember which."

"Well," said the shopwalker, patiently, "if you'll tell me what kind of a chicken you propose to put in it, perhaps I can help you."—London Tit-Bits.

The use of soft coal will make laundry work heavier this winter. Red Cross Ball Blue will help to remove that grimy look. At all grocers—Advertisement.

Diamond Production

It has been estimated that the production of all diamond mines from their discovery to the present time is 113,810,000 carats. The productions of the individual fields are given as follows; India, 2,000,000 carats; Brazil, 15,000,000; South Africa, 90,000,000; southwest Africa, 5,000,000; Congo, 1,200,000; Angola, 200,000; British Guiana, 200,000; scattering, 150,000.

Grouch's Note Book

The community is always finding fault with me, when I'm in no way different from the rest of 'em, since all I want, in addition to what I have of the earth, is the gold of the sun and the silver of the moon and stars, not to mention a harp and a golden crown in the hereafter.

Roman Eye Balsam is an antiseptic ointment. Hence the application heals by penetrating the inflamed eye surfaces. Adv.

Descriptive Powers

Delia's sister was telling her how one of their neighbor's three dogs had been ill for a short time and died. Delia listened with growing excitement, and then breathlessly inquired: "Was it the white one trimmed with black?"

Repair Cracks in Plaster

Equal parts of plaster of paris and whiting mixed with water is good to repair cracks in walls before they are painted or papered.

Truth is the beginning of every good thing, both in heaven and on earth.—Plato.

TWICE IN THIS WOMAN'S LIFE

Lydia E. Pinkham's Vegetable Compound Helped Her from Sickness to Health

Ellensburg, Washington. — "When I was first coming into womanhood I suffered terribly every month. My mother did everything she could think of, so she took me to several doctors and they only helped me a little. Mother was talking to another lady about my condition and she told mother of Lydia E. Pinkham's Vegetable Compound. Mother got me six bottles and at the end of the first month I was much better, so I kept on taking it until I had no more pains. When I got married and had my first child I was in terrible pain so that it was impossible for me to do my housework. I thought of how the Vegetable Compound had been of so much benefit to me when I was a girl, so I went to Perier's Drug Store and got six bottles. It sure did help me and I still take it. I am a well woman today and I can't say too much about Lydia E. Pinkham's Vegetable Compound. I will answer any letter that comes to me to answer about what your medicine has done for me."—Mrs. WILLIAM CARVER, R. F. D. No. 2, Ellensburg, Washington.

He Feels Like a Boy at Forty

"For over a year I suffered from headache and constipation. Someone at my club suggested Beecham's Pills. I tried them and they relieved me. I'm only forty and I feel like a boy again after taking Beecham's Pills."
Mr. J. G., Yonkers, N. Y.

This man gives good advice. Follow it, and see how quickly digestive disorders, constipation and biliousness are overcome by Beecham's Pills.

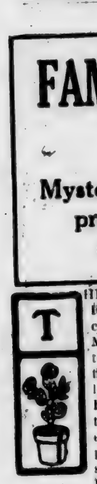
FAMOUS DETECTIVE CASES

By Cleveland Moffett

Mysterious Murder and Robbery of an Express Messenger and the Final Solution of a Most Difficult Crime Problem

(Copyright by W. G. Chapman.)



THE through express on the Rock Island road left Chicago at 10:40 p. m., on March 12, 1880, with twenty-two thousand dollars in fifty and one-hundred-dollar bills in the keeping of Kellogg Nichols, an old-time messenger of the United States Express company. This sum had been sent by a Chicago bank to be delivered at the principal bank in Davenport, Iowa. In addition to the usual passenger coaches, the train drew two express cars; the first, for express only, just behind the engine, and, following this, one for express and baggage. These cars had end doors, which offer the best opportunity to train robbers. Messenger Nichols was in the first car, and was duly at his work when the train stopped at Joliet, about forty miles southwest of Chicago. But at the next stop, which was made at Morris, Harry Schwartz, a brakeman, came running from Nichols' car, crying, "The messenger is dead."

The messenger's lifeless body was found lying on the floor of the car. The head had been crushed by some heavy weapon, and there was a pistol wound in the right shoulder. Apparently he had been overcome only after a hard fight. His face was set with fierce determination. His fists were clenched, and the hands and fingers cut and scratched in a curious way, while under the nails were found what proved to be bits of human flesh. The pistol wound was from a weapon of 32 caliber; but it was not the cause of the man's death. This, unmistakably, was the blow or blows, on the head, probably after the shot was fired. All who knew Messenger Nichols were surprised at the desperate resistance he seemed to have made, for he was a small, light man.

The express car was immediately detached from the train, and left at Morris, guarded by all the train crew except Schwartz, who was sent on with the train to Davenport. After the first cursory inspection no one was allowed to enter the car where Nichols lay; and nothing was known precisely as to the extent of the robbery. The safe door had been found open and the floor of the car littered with the contents of the safe.

An urgent telegram was at once sent to Chicago, and a force of detectives arrived at Morris on a special train a few hours later. Search parties were at once sent out in all directions along the country roads and up and down the tracks. Hundreds of people joined in the search, for the news of the murder spread rapidly through the whole region, and not a square yard of territory for miles between Morris and Minooka station was left unexplored. It happened that the ground was covered with snow, but the keenest scrutiny failed to reveal any significant footprints, and the search parties returned after many hours, having made only a single discovery. This was a mask found in a cattle guard near Minooka—a mask made of black cloth, with white strings fastened at either side, one of which had been torn out of the cloth as if in a struggle.

Meantime Mr. Pinkerton himself entered the car and made a careful investigation.

Coming to the safe, Mr. Pinkerton found that the twenty-two thousand dollars were missing, and that other papers had been hastily searched over, but left behind as valueless.

Among these was a bundle of canceled drafts that had been roughly torn open and then thrown aside.

All the train hands were immediately questioned, but none of their stories was in any way significant, except that of Newton Watt, the man in charge of the second car. He said that while busy counting over his way-bills and receipts he had been startled by the crash of broken glass in the ventilator overhead, and that at the same moment a heavily built man, wearing a black mask, had entered the car and said, "If you move, the man up there will bore you." Looking up, Watt said further, he saw a hand thrust through the broken glass and holding a revolver. Thus intimidated, he made no attempt to give an alarm, and the masked man presently left him under guard of the pistol overhead, which covered him until shortly before the train reached Morris, when it was withdrawn. He was able to locate the place where the crime must have been committed, as he remembered that the engine was whistling for Minooka when the stranger entered the car. This left about thirty minutes for the murder, robbery, and escape.

Returning to Chicago, Mr. Pinkerton investigated the character of the man Watt, and found that he had a clean record, was regarded as a trusty and efficient man, and had three brothers who had been railroad men for years and had always given perfect satisfaction. Watt's good reputation and straightforward manner were strong points in his favor, and yet there was something questionable in his story of the mysterious hand. For one thing, no footprints were found in the snow on the top of the car.

Brakeman Schwartz, the only man on the train who had not yet been questioned, "deadheaded" his way, in railway parlance, back from Davenport the following night on Conductor Danforth's train, and reported to Mr. Pinkerton the next morning. He was a tall, fine-looking young fellow, about twenty-seven, with thin lips and a face that showed determination. He was rather dapper in dress, and kept on his gloves during the conversation. Mr. Pinkerton received him pleasantly, and, after they had been smoking and chatting for an hour or so, he suggested to Schwartz that he would be more comfortable with his gloves off. Schwartz accordingly removed them, and revealed red marks on the backs of his hands, such as might have been made by fingernails digging into them.

"How did you hurt your hands, Schwartz?" asked Mr. Pinkerton.

"Oh, I did that handling baggage night before last," explained Schwartz; and then he related incidentally that as he was on his way back to Chicago, the conductor of the train, Conductor Danforth, had discovered a valise left by somebody in one of the toilet rooms. Later in the day Mr. Pinkerton summoned the conductor, who said that the valise was an old one, of no value; and, having no contents, he had thrown it out on an ash pile. The only thing he had found in the valise was a piece of paper that attracted his attention because it was marked with red lines.

Examining this piece of paper carefully, Mr. Pinkerton saw that it had been torn from a money draft, and at once thought of the package in the express messenger's safe.

Mr. Pinkerton at once ordered a search made for the missing valise, and also an inquiry regarding the passengers who had ridden on Conductor Danforth's train between Davenport and Chicago on the night following the murder. The valise was found on the ash heap where the conductor had thrown it, and in the course of the next few days the detectives had located or accounted for all passengers on Conductor Danforth's train, with the exception of one man who had ridden on a free pass. The conductor could only recall this man's features vaguely; and, while some of the passengers remembered him well enough, there was no clue to his name or identity. As it appeared that no other of the passengers could have been connected with the crime, efforts were redoubled to discover the holder of this pass.

So great was the public interest in the crime and the mystery surrounding it that three separate, well-organized investigations of it were undertaken. The Rock Island railroad officials, with their detectives, conducted one; a Chicago newspaper, with its detectives, another; and the Pinkertons, in the interest of the United States Express company, a third.

Mr. Pinkerton, as we have seen, concluded that the crime had been committed by railway men. The railway officials were naturally disinclined to believe ill of their employees, and an incident occurred about this time which turned the investigation in an entirely new direction and made them the more disposed to discredit Mr. Pinkerton's theory. This was the receipt of a letter from a convict in the Michigan City penitentiary, named Plunkett, who wrote the Rock Island railroad officials, saying that he could furnish them with important information.

Mr. St. John, the general manager of the road, went in person to the penitentiary to take Plunkett's statement, which was in effect that he knew the men who had committed the robbery and killed Nichols, and was willing to sell this information in exchange for a full pardon, which the railroad people could secure by using their influence. This they promised to do if his story proved true, and Plunkett then told them of a plot that had been worked out a year or so before, when he had been grafting with a mob of pickpockets at county fairs. There were with him at that time "Butch" McCoy, James Connors (known as "Yellow-hammer"), and a man named "Jeff," whose surname he did not know. These three men, Plunkett said, had planned an express robbery on the Rock Island road, to be executed in precisely the same way, and at precisely the same point on the road, as in the case in question.

The story was plausible, and won Mr. St. John's belief. It won the belief, also, of the Chicago newspaper; and forthwith the railway detectives, working with the newspaper detectives, were instructed to go ahead on new lines, regardless of trouble or expense. Their first endeavor was to capture "Butch" McCoy, the leader of the gang. "Butch" was a pickpocket, burglar, and all-around thief, whose operations kept him traveling all over the United States.

The police in various cities having been communicated with to no purpose, the editor finally decided to do a thing the like of which no newspaper proprietor, perhaps, ever undertook before—that is, start on a personal search for McCoy and his associates. With Frank Murray, one of the best detectives in Chicago, and other detectives, he went to Galesburg, where the gang was said to have a sort of headquarters. The party found there none of the men they were after, but they learned that "Thatch" Grady, a notorious criminal with whom "Butch" McCoy was known to be in relations, was in Omaha. So they hurried to Omaha, but only to find that Grady had gone to St. Louis. Then to St. Louis went the editor and his detectives, hot on the scent, and spent several days in that city searching high and low.

The method of locating a criminal in a great city is as interesting as it is little understood. The first step is to secure from the local police information as to the favorite haunts of criminals of the class under pursuit, paying special regard in the preliminary inquiries to the possibility of love affairs; for thieves, even more than honest men, are swayed in their lives by the tender passion, and are often brought to justice through the agency of women. With so much of such information in their possession as they could gather, the editor and his detectives spent their time in likely resorts, picking up acquaintances with frequenters, and, whenever possible, turning the talk adroitly upon the man they were looking for. It is a mistake to suppose that in work like this detectives disguise themselves. False beards and mustaches, goggles and lightning changes of clothing, are never heard of except in the pages of badly informed story writers. In his experience of over twenty-five years Mr. Murray never wore such a disguise, nor knew of any reputable detective who did. In this expedition the detectives simply assumed the characters and general style of the persons they were thrown with, passing for men of sporting tastes from the East; and, having satisfied the people they met that they meant no harm, they had no difficulty in obtaining such news of McCoy and the others as there was. Unfortunately this was not much.

After going from one city to another on various clues, hearing of one member of the gang here and another there, and in each instance losing their man, the detectives finally brought up in New Orleans. They had spent five or six weeks of time and a large amount of money, only to find themselves absolutely without a clue as to the whereabouts of the men they were pursuing. They were much discouraged when a telegram from Mr. Pinkerton told them that "Butch" McCoy was back in Galesburg, where they had first sought him. Proceeding thither with all dispatch, they traced McCoy into a saloon, and there three of them—John Smith, representing the Rock Island railroad; John McGinn, for the Pinkerton agency, and Frank Murray, working for the newspaper—with drawn revolvers captured him, in spite of a desperate dash he made to escape.

McCoy's capture was the occasion of much felicitation among the people interested in the matter. Mr. St. John and the editor were confident that now the whole mystery of the express robbery would be solved and the murderer convicted. But McCoy showed on trial that he had left New Orleans to come North only the night before the murder and had spent the whole of that night on the Illinois Central railroad. It also appeared that McCoy's associate, Connors, was in jail at the time of the robbery, and that the man "Jeff" was dead. Thus the whole Plunkett story was exploded.

Some time before this the man who had ridden on the free pass, and given the detectives so much trouble, had been accidentally found by Jack Mullins, a brakeman on Conductor Danforth's train. He proved to be an advertising solicitor, employed by no other than that self-same newspaper, which would have given a thousand dollars to know what its agent knew; for the advertising man had seen the conductor bring out the valise containing the all-important fragment of the draft. But he had not realized the value of the news in his possession, and Mr. Pinkerton took good care to keep him from that knowledge. Not until he had seen the man safely on a train out from Chicago did Mr. Pinkerton breathe easily; and it was not until months later that the editor learned how near he came to getting a splendid "scoop" on the whole city and country.

The identification of the pass-holder removed the last possibility that the valise had been taken into the train by any of Conductor Danforth's passengers. And yet the valise was there! How came it there? In the course of their examination two of the passengers had testified to having seen Schwartz enter the toilet room during the run. Brakeman Jack Mullins stated that he had been in the same room twice that night, that the second time he had noticed the valise, but that it was not there when he went in first. Other witnesses in the car were positive that the person who entered the room last before the time when Mullins saw the valise was Schwartz. Thus the chain of proof was tightening, and Mr. Pinkerton sent for Schwartz.

After talking with the brakeman in a semi-confidential way for some time, the detective began to question him about Watt, his fellow trainman. Schwartz said he was a good fellow, and, in general, spoke highly of him. Mr. Pinkerton seemed to hesitate a little, and then said:

"Can I trust you, Schwartz?"

"Yes, sir."

"Well, the fact is, I am a little suspicious of Watt. You see, his story about that hand overhead does not exactly hang together. I don't want to do him any wrong, but he must be looked after. Now, my idea is to have you go about with him as much as you can, see if he meets any strangers or spends much money, and let me know whatever happens. Will you do it?"

Schwartz readily consented, on the assurance that the railroad people would give him leave of absence. The next day he reported that Watt had met a man who wore a slouch hat, had unkempt red hair, and in general looked like a border ruffian. He had overheard the two talking together in a saloon on Cottage Grove avenue, where the stranger had discussed the murder of Nichols in great detail, showing a remarkable familiarity with the whole affair. Schwartz had a sort of Jesse James theory (which he seemed anxious to have accepted) that the crime had been committed by a gang of Western desperadoes and that this fellow was connected with them.

Mr. Pinkerton listened with interest to all this, but was less edified than Schwartz imagined, since two of his most trusted shadows, who had been following Schwartz, had given him reports of the latter's movements, making it plain that the red-haired desperado was a myth, and that no such meeting as Schwartz described had taken place. Nevertheless, professing to be well pleased with Schwartz's efforts, Mr. Pinkerton sent him out to track the fabulous desperado. Schwartz continued to render false reports. Finally, without a word to arouse his suspicion, he was allowed to resume his work on the railroad.

The shadows put upon Schwartz after this reported a suspicious intimacy between him and Watt, and a detective of great tact, Frank Jones, was detailed to get into their confidence, if possible. He was given a "run" as brakeman between Des Moines and Davenport, and it was arranged that he should come in from the west and lay over at Davenport on the same days when Schwartz and Watt laid over there, coming in from the east. Jones played his part cleverly, and was soon on intimate terms with Schwartz and Watt, taking his meals at their boarding house and sleeping in a room adjoining theirs. They finally came to like him so well that they suggested his trying to get a transfer to their run, between Davenport and Chicago. This was successfully arranged, and then the three men were together constantly; Jones even going to board at Schwartz's house in Chicago. About this time Schwartz began to talk of giving up railroad work and going to live in Kansas or the far West. It was arranged that Jones should join him and Mrs. Schwartz on a western trip. Meantime Schwartz applied to the company for leave of absence, on the plea that he wished to arrange some family matters in Philadelphia.

Mr. Pinkerton being informed by Jones of Schwartz's application, used his influence to have it granted. When the young man started East he did not travel alone. His every movement was watched and reported, nor was he left unguarded for a moment, day or night, during an absence of several weeks, in New York, Philadelphia, and other eastern cities.
